

**UNIT-1****Chapter 1 : Fundamentals of Heat Transfer and Heat Conduction 1-1 to 1-57****Syllabus :**

**Basic concepts :** Different modes and Laws of heat transfer, 3-D heat conduction equation in Cartesian Co-ordinates (with derivation) and its simplified equations in cylindrical and spherical coordinates (Simplified equations, no derivation) thermal conductivity, thermal diffusivity, electrical analogy, Thermal contact Resistance.

**Boundary and initial conditions :** Temperature boundary condition, heat flux boundary condition, convection boundary condition, radiation boundary condition.

**1-D steady state heat conduction without heat generation :** Heat conduction without heat generation in plane wall, composite cylinder, composite sphere.

<b>1.1</b>	<b>Thermodynamics and Heat Transfer .....</b>	<b>1-1</b>
1.1.1	Applications of Heat Transfer .....	1-2
<b>1.2</b>	<b>Modes of Heat Transfer .....</b>	<b>1-2</b>
<b>1.3</b>	<b>Mechanism of Heat Transfer by Conduction .....</b>	<b>1-3</b>
<b>1.4</b>	<b>Basic Definitions Relating to Heat Transfer .....</b>	<b>1-3</b>
1.4.1	Heat Transfer Rate and Heat Flux.....	1-3
1.4.2	Steady State .....	1-4
1.4.3	Unidirectional Heat Flow.....	1-4
<b>1.5</b>	<b>Fourier's Law of Heat Conduction .....</b>	<b>1-4</b>
1.5.1	Units of Thermal Conductivity, k.....	1-5
1.5.2	Definition of Thermal Conductivity of a Material .....	1-5
1.5.2.1	Apparent Thermal Conductivity .....	1-5
1.5.3	Thermal Conductivity of Materials.....	1-5
1.5.4	Important Points Regarding Thermal Conductivity of Materials .....	1-6
<b>1.6</b>	<b>Heat Conduction through a Wall/Slab .....</b>	<b>1-8</b>
<b>1.7</b>	<b>Convection.....</b>	<b>1-8</b>
1.7.1	Coefficient of Convective Heat Transfer .....	1-9
1.7.2	Newton's Law of Cooling .....	1-9
<b>1.8</b>	<b>Radiation.....</b>	<b>1-10</b>

1.8.1	Emissive Power (E).....	1-10
1.8.2	Emissivity ( $\epsilon$ ) .....	1-10
<b>1.9</b>	<b>Laws of Radiation .....</b>	<b>1-11</b>
1.9.1	Wien's Law .....	1-11
1.9.2	Kirchoff's Law .....	1-11
1.9.3	Stefan-Boltzmann Law .....	1-11
<b>1.10</b>	<b>General Heat Conduction Equation in Cartesian Co-ordinates.....</b>	<b>1-11</b>
<b>1.11</b>	<b>Special Cases of General Heat Conduction Equation.....</b>	<b>1-13</b>
<b>1.12</b>	<b>Heat Conduction Equation in Cylindrical Co-ordinates .....</b>	<b>1-13</b>
1.12.1	Steady State One Dimensional Heat Conduction Equation (Poisson's Equation) .....	1-14
<b>1.13</b>	<b>General Heat Conduction Equation in Spherical Co-ordinates .....</b>	<b>1-14</b>
<b>1.14</b>	<b>Boundary and Initial Conditions .....</b>	<b>1-14</b>
<b>1.15</b>	<b>Types of Boundary Conditions .....</b>	<b>1-14</b>
1.15.1	Temperature Boundary Conditions .....	1-15
1.15.2	Convection Boundary Conditions .....	1-15
1.15.3	Heat Flux Boundary Conditions.....	1-15
1.15.4	Initial Boundary Conditions.....	1-16
1.15.5	Radiation Boundary Conditions.....	1-16
<b>1.16</b>	<b>One Dimensional Steady State Heat Conduction without Heat Generation.....</b>	<b>1-16</b>
<b>1.17</b>	<b>Analysis of One Dimensional Steady State Heat Conduction without Internal Heat Generation.....</b>	<b>1-16</b>
1.17.1	One Dimensional Steady State Heat Conduction through Plane Wall or Infinite Slab without Heat Generation.....	1-16
1.17.2	One Dimensional (Radial) Steady State Heat Conduction through Hollow Cylinder without Heat Generation.....	1-17
1.17.2.1	Logarithmic Mean Area (LMA) for Hollow Cylinder .....	1-18

1.17.3	One Dimensional (Radial) Steady State Heat Conduction through Hollow Sphere without Heat Generation.....	1-19
<b>1.18</b>	<b>Thermal Diffusivity, <math>\alpha</math>.....</b>	<b>1-20</b>
<b>1.19</b>	<b>Analogy between Heat Conduction and Electricity.....</b>	<b>1-20</b>
1.19.1	Procedure of Applying Electrical Analogy to Heat Transfer Problems.....	1-20
<b>1.20</b>	<b>Thermal Resistances and Conductance.....</b>	<b>1-20</b>
1.20.1	Heat Transfer in Plane Wall by Conduction.....	1-20
1.20.2	Heat Transfer by Convection.....	1-21
1.20.3	Overall Heat Transfer Coefficient, U.....	1-21
<b>1.21</b>	<b>Heat Transfer Problem for Composite Wall having Resistances in Series.....</b>	<b>1-21</b>
1.21.1	Estimation of Intermediate Temperatures in the System.....	1-22
<b>1.22</b>	<b>Heat Transfer Problem for Composite Slab having Resistance in Parallel.....</b>	<b>1-22</b>
1.22.1	Neglecting Convective Heat Transfer.....	1-22
1.22.2	Composite Slab with Convective Heat Transfer (Combined Resistance in Series and Parallel).....	1-23
1.22.3	Thermal Contact Resistance.....	1-23
<b>1.23</b>	<b>Heat Transfer in an Infinitely Long Hollow Cylinder.....</b>	<b>1-24</b>
<b>1.24</b>	<b>Heat Transfer through a Hollow Sphere.....</b>	<b>1-24</b>
<b>1.25</b>	<b>Heat Transfer through a Composite Cylinder with Conduction and Convection.....</b>	<b>1-25</b>
<b>1.26</b>	<b>Combined Heat Transfer by Conduction and Convection in Compound Sphere.....</b>	<b>1-25</b>

**Chapter 2 : Heat Conduction with Internal Heat Generation 2-1 to 2-41**

**Syllabus : 1-D steady state heat conduction with heat generation** : Heat conduction with heat generation in Plane wall, Cylinder and Sphere with different boundary conditions.

<b>2.1</b>	<b>Introduction.....</b>	<b>2-1</b>
<b>2.2</b>	<b>Unidirectional Steady State Heat Conduction with Internal Heat Generation in Plane Wall (Poisson's Equation).....</b>	<b>2-1</b>
2.2.1	Specified Temperature on both Faces.....	2-1
2.2.2	When Heat is Transferred from both sides by Convection to Surroundings at $T_{\infty}$ .....	2-2
2.2.3	Heat Conduction in Plane Wall with One Surface Insulated and other Exposed to Surrounding Fluid.....	2-3
<b>2.3</b>	<b>Heat Conduction through Cylinder with Heat Generation.....</b>	<b>2-4</b>
2.3.1	Long Solid Cylinder with Specified Surface Temperature.....	2-5
2.3.2	Solid Cylinder Exposed to Convection of Heat to Surrounding Fluid.....	2-5
2.3.3	Hollow Cylinder with Uniform Heat Generation with Specified Temperatures.....	2-6
<b>2.4</b>	<b>Heat Conduction in Solid Spheres with Heat Generation.....</b>	<b>2-7</b>
2.4.1	Solid Sphere with Specified Surface Temperature.....	2-7
2.4.2	Solid Sphere with Heat Convection.....	2-7

**UNIT-2**

**Chapter 3 : Thermal Insulation 3-1 to 3-22**

**Syllabus : Thermal Insulation** : Critical thickness of insulation, Types and properties of insulating materials, Safety considerations in thermal insulation, Economic and cost considerations, Payback period, Numerical on payback period.

<b>3.1</b>	<b>Thermal Insulation.....</b>	<b>3-1</b>
3.1.1	Types of Insulating Materials and their Application.....	3-2
3.1.2	Safety Considerations in Thermal Insulation.....	3-2
<b>3.2</b>	<b>Critical Thickness of Insulation.....</b>	<b>3-2</b>
3.2.1	Important Aspects of Critical Radius of Insulation.....	3-4

<b>3.3</b>	<b>Critical Thickness of Insulation in Case of Spheres</b> .....	<b>3-4</b>
<b>3.4</b>	<b>Economic Thickness of Insulation</b> .....	<b>3-5</b>
3.4.1	Pay Back Period .....	3-5
<b>3.5</b>	<b>Solved Examples</b> .....	<b>3-6</b>

---

**Chapter 4 : Extended Surfaces (FINS) 4-1 to 4-32**

---

**Syllabus :** Heat transfer through extended surfaces: Types of fins and its applications, Governing Equation for constant cross sectional area fins, Solution for infinitely long fin (with derivation), adequately long fin with insulated end tip and short fins (no derivation), Fin Efficiency & Effectiveness of fins, estimation of error in Temperature measurement by thermometer.

<b>4.1</b>	<b>Introduction to Extended Surfaces</b> .....	<b>4-1</b>
<b>4.2</b>	<b>Extended Surfaces-Fins</b> .....	<b>4-1</b>
4.2.1	Fins on Lower 'h' Side .....	4-2
<b>4.3</b>	<b>Types of Fins and Applications</b> .....	<b>4-2</b>
<b>4.4</b>	<b>Analysis of Fins of Uniform Cross-Sectional Area (Rectangular Plate Fin/Pin Fin)</b> .....	<b>4-3</b>
4.4.1	Case I : Analysis of Infinitely Long Fin .....	4-4
4.4.2	Case II : Adequately Long Fin with Insulated End Tip .....	4-5
4.4.3	Case III : Analysis of Short Fin.....	4-7
<b>4.5</b>	<b>Effectiveness of Fins</b> .....	<b>4-8</b>
<b>4.6</b>	<b>Fin Efficiency (<math>\eta</math>)</b> .....	<b>4-8</b>
4.6.1	Concept of Corrected Fin Length.....	4-9
<b>4.7</b>	<b>Overall Fin Effectiveness (<math>E_0</math>)</b> .....	<b>4-9</b>
4.7.1	Area Weighted Fin Efficiency ( $\eta_{total}$ ) .....	4-10
<b>4.8</b>	<b>Error in Temperature Measurement by Thermometer</b> .....	<b>4-10</b>

---

**Chapter 5 : Transient Heat Conduction 5-1 to 5-26**

---

**Syllabus :** Transient heat conduction : Validity and criteria of lumped system analysis, Biot Number, Fourier Number, Time Constant and Response of thermocouple, Use of Heisler Charts for plane wall, cylinder and sphere

<b>5.1</b>	<b>Transient Heat Conduction</b> .....	<b>5-1</b>
------------	--	------------

<b>5.2</b>	<b>System with Negligible Internal Resistance-Lumped Heat Capacity Method</b> .....	<b>5-2</b>
5.2.1	Analysis of Quenching of Billet by Lumped Heat Capacity Method.....	5-3
5.2.2	Difference between Biot Number and Nusselt Number .....	5-5
<b>5.3</b>	<b>Time Constant and Response of Thermocouple</b> .....	<b>5-6</b>
<b>5.4</b>	<b>Introduction to Transient Conduction using Charts</b> .....	<b>5-6</b>

**UNIT-3**

---

**Chapter 6 : Convection, Boiling and Condensation 6-1 to 6-81**

---

**Syllabus :**

**Principles of Convection :** Local and average heat transfer coefficient, Hydrodynamic and Thermal boundary layer for a flat plate and pipe flow.

**Forced Convection :** Physical significance of non-dimensional numbers, Empirical correlations for flat plate, pipe flow, and flow across cylinders, spheres, tube banks.

**Free Convection :** Physical significance of non-dimensional numbers, Free convection from a vertical, horizontal surface, cylinder and sphere. Mixed Convection

**Boiling and Condensation :** Types of boiling, Regimes of pool boiling, Film wise condensation, Drop wise condensation (No Numerical treatment), Critical heat flux.

<b>6.1</b>	<b>Basic Definitions Related to Convection</b> .....	<b>6-1</b>
6.1.1	Applications.....	6-2
6.1.2	Required Concepts and Laws.....	6-2
<b>6.2</b>	<b>Viscosity</b> .....	<b>6-2</b>
<b>6.3</b>	<b>Laminar and Turbulent Flow</b> .....	<b>6-2</b>
<b>6.4</b>	<b>Convective Heat Transfer Coefficient</b> .....	<b>6-3</b>
<b>6.5</b>	<b>Boundary Layer Concept</b> .....	<b>6-4</b>
<b>6.6</b>	<b>The Thermal Boundary Layer</b> .....	<b>6-5</b>

6.6.1	Heat Transfer Coefficient .....	6-6	6.19.1	Difference between Natural Convection and Forced Convection.....	6-45
6.6.2	Mean Film Temperature or Reference Temperature ( $T_{mf}$ ).....	6-7	6.19.2	Comparison of Heat Transfer Coefficient in Natural and Forced Convection.....	6-46
<b>6.7</b>	<b>Velocity Boundary Layer Development in Circular Pipes in Forced Convection .....</b>	<b>6-7</b>	<b>6.20</b>	<b>Introduction to Heat Transfer in Condensation and Boiling .....</b>	<b>6-60</b>
6.7.1	Relations for Fully Developed Laminar Flow in Pipes .....	6-8	<b>6.21</b>	<b>Condensation .....</b>	<b>6-61</b>
6.7.2	Turbulent Flow through Pipe ( $Re > 4000$ ) .....	6-8	6.21.1	Laminar Film Condensation on a Vertical Plate.....	6-62
<b>6.8</b>	<b>Thermal Boundary Layer in Circular Pipes.....</b>	<b>6-8</b>	6.21.2	Condensation of Inclined Plate.....	6-66
<b>6.9</b>	<b>Convective Heat Transfer Coefficient .....</b>	<b>6-9</b>	6.21.3	Condensation on a Single Horizontal Tube .....	6-66
<b>6.10</b>	<b>Dimensional Analysis.....</b>	<b>6-9</b>	6.21.3.1	Condensation on Horizontal Tube Banks.....	6-66
6.10.1	Buckingham's $\pi$ - Theorem.....	6-10	6.21.3.2	Calculation of Reynold's Number.....	6-66
6.10.2	Application of Dimensional Analysis as Applied to Forced Convection.....	6-10	6.21.3.3	Filmwise Condensation in Turbulent Flow .....	6-67
6.10.2.1	To Show that $Nu = C Re^m Pr^n$ in Forced Convection .....	6-12	6.21.3.4	Influence of Presence of Non-Condensable Gases in Condenser .....	6-67
6.10.3	Advantages and Disadvantage of Dimensional Analysis.....	6-13	<b>6.22</b>	<b>Boiling.....</b>	<b>6-67</b>
<b>6.11</b>	<b>Physical Significance of Dimensionless Numbers.....</b>	<b>6-13</b>	6.22.1	Modes/Methods of Boiling.....	6-67
<b>6.12</b>	<b>Forced Convection Correlations : Flow through Circular Pipe.....</b>	<b>6-14</b>	<b>6.23</b>	<b>Regimes of Pool Boiling .....</b>	<b>6-68</b>
6.12.1	Co-relation for Flow of Liquid Metals in Pipes .....	6-15	6.23.1	Critical Heat Flux.....	6-70
6.12.2	Co-relation for Flow of Heavy Oils in Pipes.....	6-16	6.23.2	Correlations in Pool Boiling.....	6-70
<b>6.13</b>	<b>Co-relations for Fluid Flow Over the Plate.....</b>	<b>6-16</b>	6.23.3	Critical Flux, $q_c$ or $q_{max}$ .....	6-71
6.13.1	Difference between Local and Average Heat Transfer Coefficients .....	6-16	6.23.4	Stable Film Pool Boiling .....	6-71
<b>6.14</b>	<b>Co-relation for Flow Across a Horizontal Cylinder .....</b>	<b>6-17</b>	<b>6.24</b>	<b>Forced Convection Boiling.....</b>	<b>6-71</b>
6.14.1	Co-Relations for Flow Across the Sphere .....	6-17	<b>UNIT-4</b>		
6.14.2	Co-relations for Flow Across Banks of Tubes.....	6-17	<b>Chapter 7 : Radiation 7-1 to 7-52</b>		
<b>6.15</b>	<b>Mechanism of Natural Convection .....</b>	<b>6-40</b>	<b>Syllabus</b> : Thermal Radiation ; definition of various terms used in radiation mode; Stefan-Boltzmann law, Kirchhoff's law, Planck's law and Wein's displacement law. Intensity of radiation and solid angle; Lambert's law; Radiation heat exchange between two black surfaces, configuration or view factor. Radiation heat exchange between grey surfaces, Electrical analogy for radiation, Radiation shields, Numerical.		
<b>6.16</b>	<b>Coefficient of Volumetric Expansion (<math>\beta</math>).....</b>	<b>6-41</b>	<b>7.1</b>	<b>Thermal Radiation.....</b>	<b>7-1</b>
<b>6.17</b>	<b>Dimensional Analysis of Natural Convection.....</b>	<b>6-41</b>	<b>7.2</b>	<b>Theories of Radiation .....</b>	<b>7-1</b>
<b>6.18</b>	<b>Physical Significance of Dimensionless Numbers in Natural Convection.....</b>	<b>6-43</b>	7.2.1	Wave or Maxwell Theory .....	7-1
6.18.1	Mix Convection .....	6-44			
<b>6.19</b>	<b>Correlations Applicable to Natural Convection.....</b>	<b>6-44</b>			

7.2.2	Quantum Theory or Planck's Theory.....	7-2	7.12.1	Two Parallel Infinite Plane Surfaces .....	7-19
<b>7.3</b>	<b>Total Emissive Power of a Surface (E) .....</b>	<b>7-2</b>	7.12.2	Radiation Heat Exchange between Two Concentric Infinitely Long Grey Cylinders.....	7-19
<b>7.4</b>	<b>Irradiation of a Surface (G) and Radiosity (J) .....</b>	<b>7-3</b>	7.12.3	Radiation Heat Exchange between Two Concentric Spheres.....	7-20
7.4.1	Irradiation of a Surface (G).....	7-3	<b>7.13</b>	<b>Radiation Shields.....</b>	<b>7-20</b>
7.4.2	Radiosity (J) .....	7-3	<b>UNIT-5</b>		
<b>7.5</b>	<b>Basic Concepts and Definitions .....</b>	<b>7-3</b>	<hr/>		
7.5.1	Properties of Radiation .....	7-3	<b>Chapter 8 : Mass Transfer</b>	<b>8-1 to 8-20</b>	
7.5.2	Types of Surfaces/Bodies.....	7-4	<hr/>		
7.5.3	Surface Emission Properties.....	7-4	<b>Syllabus</b> : Physical origins, applications of mass transfer, Mixture Composition, Phase diagram, Fick's Law of Diffusion with numerical treatment, Restrictive Conditions, Mass diffusion coefficient, Conservation of species. The Mass Diffusion equation - Cartesian coordinates derivation, cylindrical coordinates and spherical coordinates (no derivation), Boundary and initial conditions.		
<b>7.6</b>	<b>Laws of Radiation .....</b>	<b>7-6</b>	<b>8.1</b>	<b>Introduction .....</b>	<b>8-1</b>
7.6.1	Planck's Law .....	7-6	<b>8.2</b>	<b>Modes of Mass Transfer .....</b>	<b>8-1</b>
7.6.2	Wien's Displacement Law .....	7-6	8.2.1	Mass Transfer by Diffusion .....	8-1
7.6.3	Stefan Boltzmann's Law .....	7-7	8.2.2	Mass Transfer by Convection.....	8-2
7.6.4	Kirchhoff's Law.....	7-8	8.2.3	Mass Transfer by Phase Change .....	8-2
<b>7.7</b>	<b>Emissivity of Real Surfaces .....</b>	<b>7-9</b>	<b>8.3</b>	<b>Important Definitions Relevant to Mass Transfer .....</b>	<b>8-2</b>
<b>7.8</b>	<b>Intensity of Radiation (I) and Solid Angle (<math>\omega</math>) .....</b>	<b>7-10</b>	8.3.1	Concentrations .....	8-2
7.8.1	Solid Angle ( $\omega$ ).....	7-10	8.3.2	Velocities.....	8-3
7.8.1.1	Solid Angle between Two Elementary Areas.....	7-10	8.3.2.1	Diffusion Velocity .....	8-4
7.8.2	Intensity of Radiation (i) .....	7-11	8.3.3	Fluxes.....	8-4
7.8.2.1	Lambert Cosine Law .....	7-11	<b>8.4</b>	<b>A Physical Law for Diffusion - Fick's Law .....</b>	<b>8-7</b>
<b>7.9</b>	<b>Heat Exchange between Two Finite Black Surfaces by Radiation .....</b>	<b>7-12</b>	<b>8.5</b>	<b>General Mass Diffusion Equation in Cartesian Co-ordinates in Stationary Medium .....</b>	<b>8-10</b>
<b>7.10</b>	<b>Radiant Shape Factor Algebra .....</b>	<b>7-13</b>	8.5.1	Specific Cases of Mass Diffusion Equation.....	8-12
7.10.1	Reciprocal Relation .....	7-13	<b>8.6</b>	<b>Steady State Equimolar Counter Diffusion .....</b>	<b>8-12</b>
7.10.2	Important Points Regarding Shape Factor .....	7-13	<b>8.7</b>	<b>Molecular Diffusion through a Stagnant Gas Film .....</b>	<b>8-13</b>
7.10.3	Application Shape Factor for Standard Configurations and Radiant Heat Exchange.....	7-16	<b>8.8</b>	<b>Comparison between Fick's Law of Diffusion and Fourier's Law of Heat Conduction .....</b>	<b>8-15</b>
<b>7.11</b>	<b>Heat Exchange between Gray Bodies .....</b>	<b>7-17</b>	8.8.1	Dimensionless Parameters As Applied to Convective Mass Transfer.....	8-15
7.11.1	Net Radiation Heat Exchange from A Surface and Electrical Analogy : (Radiosity-Irradiation Approach).....	7-18			
7.11.2	Net Heat Exchange between Two Gray Bodies/Surfaces.....	7-18			
<b>7.12</b>	<b>Application of Electrical Analogy to Thermal Radiation Heat Exchange Problems .....</b>	<b>7-19</b>			

**UNIT-6**

**Chapter 9 : Heat Exchangers & Equipment Design 9-1 to 9-71**

**Syllabus :**  
**Heat Exchangers :** Classification and applications of heat exchangers, Heat exchanger analysis – LMTD for parallel and counter flow heat exchangers, Effectiveness - NTU method for parallel and counter flow heat exchangers, cross flow heat exchangers, , Heat Pipe, Introduction to electronic cooling - Active and passive methods of augmented heat transfer.  
**Process Equipment Design :** Condenser Design, Introduction to TEMA standards, Design considerations for heat exchangers, Materials of construction and corrosion, Temperature effects, Radiation effects, Economic consideration, Condenser and Heat exchanger design and performance calculations, Design of shell and tube type Heat Exchanger.

**9.1 Definition and Application of Heat Exchangers ..... 9-1**

9.1.1 Factors Considered in Design of Heat Exchangers ..... 9-1

**9.2 Classification of Heat Exchangers..... 9-1**

9.2.1 Heat Exchangers according to Flow Arrangements of Fluids..... 9-2

9.2.2 Heat Exchangers According to Heat Transfer Process ..... 9-2

9.2.3 Heat Exchangers according to Geometry of Construction ..... 9-3

**9.3 Temperature Distribution in Heat Exchangers ..... 9-4**

**9.4 Overall Heat Transfer Coefficient (U) ..... 9-5**

9.4.1 Energy Balance Equation in Heat Exchangers ..... 9-7

**9.5 Fouling Factor ..... 9-7**

**9.6 Analysis of Heat Exchangers..... 9-8**

9.6.1 Log Mean Temperature Difference for “Parallel Flow” ..... 9-9

9.6.2 Logarithmic Mean Temperature Difference for

“Counter-Flow” .....9-10

9.6.3 Logarithmic Mean Temperature Difference (LMTD) for Cross Flow and Multipass Heat Exchangers ....9-11

9.6.4 Special Cases and Comments .....9-13

**9.7 The Effectiveness – NTU Method .....9-14**

9.7.1 Effectiveness of a Parallel Flow Heat Exchanger .....9-16

9.7.2 Effectiveness of Counter flow Heat Exchanger .....9-17

9.7.3 Charts of Finding Effectiveness for Various Type of Heat Exchangers.....9-18

9.7.4 Special Cases of Heat Exchangers .....9-20

**9.8 Heat Pipe.....9-21**

**9.9 Cooling of Electronic Systems.....9-22**

9.9.1 Classification of Cooling Systems .....9-22

9.9.2 Passive Cooling Systems.....9-23

9.9.3 Active Cooling Systems.....9-23

**9.10 Design Aspect of Heat Exchanger and Its Selection.....9-56**

9.10.1 Introduction to TEMA standards.....9-57

**9.11 Condenser Design.....9-58**

**9.12 Considerations in Design of Heat Exchanger .....9-59**

**9.13 Materials for construction of Heat Exchangers and Corrosion.....9-59**

**9.14 Effect of Temperature on Heat Exchanger Design .....9-60**

**9.15 Radiaton Effects on heat Exchangers .....9-61**

**9.16 Economic Considerations.....9-61**

**9.17 Design of Shell and Tube Type Heat Exchangers .....9-62**

9.17.1 Design considerations for shell and Tube Heat Exchangers .....9-62

**9.18 Thermal Design Procedure for Shell and Tube heat Exchangers.....9-66**

➤ **Appendix A.....A- to A-6**

➤ **Appendix B : Lab Manual ..... B-1 to –B-18**
