

**IN SEMESTER****Unit I****Chapter 1 : Basic Concepts of Engineering Mechanics****1-1 to 1-10**

1.1	Mechanics	1-2
1.2	Engineering Mechanics	1-2
1.3	Basic Concepts	1-2
1.3.1	Particle	1-2
1.3.2	Body.....	1-3
1.3.3	Differentiate between Particle and Body	1-3
1.3.4	Rigid Body	1-3
1.3.5	Deformable Body.....	1-3
1.3.6	One Dimensional (1-D) body	1-3
1.3.7	Two Dimensional (2-D) body	1-4
1.3.8	Three Dimensional (3 -D) body.....	1-4
1.3.9	Mass	1-4
1.3.10	Weight.....	1-4
1.3.11	Force.....	1-4
1.3.11.1	Characteristics of Force.....	1-4
1.3.12	Force system.....	1-5
1.3.12.1	Types of Force Systems.....	1-5
1.3.13	Moment of Force	1-6
1.3.14	Couple.....	1-7
1.3.15	Resultant of Force System	1-8
1.3.16	Equilibrium	1-8
1.3.17	Equilibrant	1-8
1.4	Principles of Statics/Mechanics	1-8
1.4.1	Principle of Transmissibility of Forces	1-8
1.4.2	Principle of Superposition.....	1-8
1.4.3	Newton's laws of motion.....	1-8
1.4.4	Newton's Law of Gravitation	1-8
1.4.5	Principle of moments.....	1-9
1.5	Graphical Representation of Moment of Force	1-9
1.6	Varignon's Theorem	1-9

Chapter 2 : Force - Couple Systems **2-1 to 2-8**

2.1	Principle of Parallel Transfer of Forces OR Resolution of Force into a Force and a Couple	2-2
2.2	Solved Examples.....	2-2

Chapter 3 : Resolution of Forces **3-1 to 3-14**

3.1	Resolution of a force.....	3-2
3.2	Components of a force	3-2
3.2.1	Perpendicular or Rectangular components	3-2
3.2.2	Non Perpendicular (Oblique) components	3-3
3.2.3	Non Perpendicular (parallel) components.....	3-3
3.3	Solved Examples.....	3-4

Chapter 4 : Composition of Forces **4-1 to 4-41**

4.1	Composition of forces.....	4-2
4.2	Resultant.....	4-2
4.3	Determination of resultant	4-2
4.4	Determination of resultant for coplanar concurrent force system	4-2
4.4.1	Triangle law of forces	4-2
4.4.2	Parallelogram Law of forces	4-3
4.4.3	Polygon law of forces	4-4
4.4.4	Determination of resultant by resolving each force into its x and y components	4-4
4.4.5	Determination resultant for coplanar parallel force system	4-6
4.4.6	Determination of Resultant for Non-concurrent and Non-parallel (General) Coplanar Force System	4-7
4.5	Solved Examples.....	4-9

Unit II**Chapter 5 : Centroid of Lines and Areas** **5-1 to 5-39**

5.1	Important Definitions.....	5-2
5.1.1	Centre of Gravity (G)	5-2
5.1.2	Centre of Mass (M)	5-2
5.1.3	Centre of Volume (V)	5-2
5.1.4	Centroid (C).....	5-2

5.1.5	Centroid of Area (C)	5-3
5.1.6	Centroid of Line (C)	5-3
5.2	Location of Centroid of a Line	5-3
5.3	Axis of Symmetry	5-4
5.4	General procedure to determine the position of centroid of line or linear member is, bar, rod etc. bent up to any shape	5-5
5.5	To Locate Position of Centroid of Area	5-6
5.6	Centroid of Common Geometrical Shapes of Lines	5-7
5.7	Centroids of Common Geometrical Shapes of Areas.....	5-8
5.8	Solved Examples	5-10

Chapter 6 : Moment of Inertia **6-1 to 6-18**

6.1	Introduction	6-2
6.2	Types of moment of inertia.....	6-2
6.3	Importance of Area Moment of Inertia	6-2
6.4	Moment of inertia by Integration	6-3
6.5	Neutral Axis.....	6-3
6.6	Parallel Axis Theorem	6-3
6.7	Perpendicular Axis Theorem	6-4
6.8	M.I for Standard Shapes (Areas).....	6-4
6.9	M.I for Composite Sections	6-7
6.10	Solved Examples.....	6-8

Chapter 7 : Friction **7-1 to 7-39**

7.1	Friction	7-2
7.2	Types of Friction.....	7-2
7.3	Classification of dry friction.....	7-2
7.4	Limiting friction (F_L)	7-2
7.5	Coulomb's Laws of friction.....	7-3
7.6	Types of coefficient of friction (μ).....	7-3
7.7	Graph between F and P	7-3
7.8	Different Cases	7-4
7.9	Angle of friction (ϕ)	7-5
7.10	Cone of friction.....	7-5
7.11	Angle of repose (θ).....	7-5

7.12	Factors on which friction depends	7-6
7.13	Applications of friction	7-6
7.13.1	Inclined / Horizontal planes	7-6
7.13.2	Ladders	7-6
7.13.3	Wedges	7-7
7.13.4	Belt friction	7-7
7.14	Solved Examples	7-10

➤ **Solved Model Question Papers of In-Sem..... Q-1 to Q-2**

END SEMESTER

Unit III

Chapter 8 : Equilibrium of Force Systems in Plane **8-1 to 8-47**

8.1	Equilibrium of Force Systems in Plane	8-2
8.1.1	Equilibrium	8-2
8.1.2	Conditions of Equilibrium.....	8-2
8.2	Particular Cases of Equilibrium	8-2
8.3	Support and Support Reaction	8-3
8.4	Types of Supports	8-4
8.5	Beam.....	8-5
8.5.1	Types of beams.....	8-5
8.6	Statically Determinate and Indeterminate Beams	8-6
8.6.1	Statically Determinate Beam	8-6
8.6.2	Statically Indeterminate Beam.....	8-6
8.7	Types of Loads.....	8-6
8.8	Free Body Diagram (FBD).....	8-8
8.9	Solved Examples.....	8-9

Chapter 9 : Space Force System **9-1 to 9-36**

9.1	Introduction to Space Force Systems.....	9-2
9.2.1	Unit Vector (\bar{e}).....	9-2
9.2.2	Position or Radius Vector (\bar{r}).....	9-2
9.2.3	Unit Vector along a Given Line	9-2
9.2.4	Force Vector $ \bar{F} $	9-2

9.2.5	Direction Cosines	9-3
9.2.6	Components of Force in Space	9-3
9.2.7	Resultant of Concurrent Force System in Space	9-4
9.2.8	Equilibrium of Concurrent Force system in space.....	9-5
9.2.9	Parallel Force System in Space	9-5
9.2.10	Solved Examples.....	9-5

Unit IV

Chapter 10 : Analysis of Trusses 10-1 to 10-32

10.1	Structure	10-2
10.2	Types of Members.....	10-2
10.3	Types of Structure.....	10-2
10.3.1	Truss	10-3
10.3.1.1	Assumptions made in the analysis of trusses	10-3
10.3.2	Types of Trusses.....	10-3
10.3.3	Classification of Trusses	10-4
10.3.4	Derivation of Equation : $m = (2j - 3)$	10-5
10.3.5	Zero Force Members in a Truss	10-5
10.3.6	Methods of Analysis of Trusses.....	10-7
10.4	Solved Examples.....	10-9

Chapter 11 : Analysis of Frames 11-1 to 11-13

11.1	Frame.....	11-2
11.1.1	Analysis of Frames	11-2
11.2	Difference between Trusses and Frames.....	11-2
11.3	Solved Examples	11-3

Chapter 12 : Analysis of Cables 12-1 to 12-12

12.1	Analysis of Cables.....	12-2
12.1.1	Introduction	12-2
12.2	Assumptions Made in the Analysis of Cables	12-2
12.3	Important Points in the Analysis of Cables	12-2
12.4	Solved Examples.....	12-3

Unit V

Chapter 13 : Rectilinear Motion of Particles 13-1 to 13-41

13.1	Introduction	13-2
------	--------------------	------

13.1.1	Motion of a Particle	13-2
13.1.2	Types of Motion of a Body in 2-Dimensional Plane	13-2
13.1.3	Kinematics and Kinetics	13-3
13.2	Basic Concepts	13-3
13.2.1	Position of a Particle	13-3
13.2.2	Displacement	13-3
13.2.3	Distance Travelled	13-3
13.2.4	Velocity	13-4
13.2.5	Speed	13-5
13.2.6	Acceleration	13-5
13.2.7	Retardation	13-5
13.2.8	Jerk	13-5
13.3	Rectilinear Motion of Particles	13-5
13.3.1	Rectilinear Motion	13-5
13.3.2	Velocity and Acceleration from Position of the Particle	13-5
13.3.3	Motion with Variable Acceleration	13-6
13.3.4	Motion with Uniform or Constant Acceleration (Uniformly Accelerated Motion)	13-6
13.3.5	Displacement of the Particle in t^{th} Second	13-7
13.3.6	Uniform Motion	13-7
13.3.7	Motion under Gravity	13-8
13.4	Motion Diagrams / Motion Curves (Graphical Method)	13-8
13.4.1	Introduction	13-8
13.4.2	Types of Motion Diagrams	13-9
13.4.3	Different Cases of Motion Diagrams	13-10
13.5	Solved Examples	13-11

Chapter 14 : Curvilinear Motion - Rectangular or Cartesian Coordinates 14-1 to 14-8

14.1	Introduction	14-2
14.2	Rectangular Components.....	14-2
14.3	Motion of Particle in Plane	14-3
14.4	Solved Examples	14-3

Chapter 15 : Curvilinear Motion - Path Coordinates or Path Variables **15-1 to 15-9**

15.1	Introduction	15-2
15.2	Motion of particle in plane.....	15-2
15.3	Solved Examples	15-3

Chapter 16 : Curvilinear Motion - Polar Coordinates **16-1 to 16-10**

16.1	Introduction	16-2
16.2	Motion of Particle in Plane	16-2
16.3	Solved Examples	16-3

Chapter 17 : Projectile Motion **17-1 to 17-19**

17.1	Introduction	17-2
17.2	Equation of Trajectory	17-2
17.3	Projectile on Horizontal Plane	17-3
17.4	Projectile on an Inclined Plane	17-4
17.5	Solved Examples	17-5

Unit VI

Chapter 18 : Newton's Second Law of Motion **18-1 to 18-22**

18.1	Momentum	18-2
18.2	Static Equilibrium	18-2
18.3	Dynamic Equilibrium.....	18-2
18.4	Newton's Second Law of Motion.....	18-2
18.5	D' Alembert's Principle	18-2
18.6	D' Alembert's Force.....	18-3
18.7	Solved Examples.....	18-3

Chapter 19 : Work-Energy Principle **19-1 to 19-19**

19.1	Work	19-2
19.2	Force-displacement (F-x) Diagram	19-2
19.3	Energy.....	19-2
19.4	Types of Mechanical Energy	19-2
19.5	Work-Energy Principle.....	19-3

19.6	Workdone by different Forces	19-3
19.7	Derivation of Expression for W.D. by Spring Force.....	19-4
19.8	Forces which does No Work	19-5
19.9	Conservative and Non Conservative Forces.....	19-5
19.10	Principle of Conservation of Energy	19-5
19.11	Power.....	19-6
19.12	Efficiency.....	19-6
19.13	Solved Examples	19-6

Chapter 20 : Impulse - Momentum Principle **20-1 to 20-7**

20.1	Momentum	20-2
20.2	Impulse	20-2
20.3	Impulsive Motion	20-2
20.4	Force -Time (F-t) diagram	20-2
20.5	Impulse -Momentum Principle.....	20-2
20.6	Impulsive Force during Impact	20-3
20.7	Solved Examples	20-3

Chapter 21 : Direct Central Impact **21-1 to 21-27**

21.1	Important terms.....	21-2
21.2	Coefficient of restitution (e)	21-2
21.3	Law of Conservation of Momentum	21-3
21.4	Types of Impact	21-3
21.5	Impact with a Body of very Large(or Infinite) Mass	21-4
21.6	Impact between Ball and Floor	21-4
21.7	Impact between Pendulum and Wall	21-5
21.8	Special Case of Impact	21-6
21.9	Percentage Loss of K.E.....	21-6
21.10	Solved Examples	21-6

- **Solved Model Question Papers of In-Sem. and End-Sem. Examination** **Q-1 to Q-4**
 - **Solved University Question Papers of Oct. 2019(In sem), Jan. 2020 (End sem) and March 2020(In Sem.)** **Q-1 to Q-7**
-

Marking Scheme for University Theory Examination

Unit No	Unit Name	In Semester Exam (30 Marks) Duration 1 Hr	End Semester Exam (70 Marks) Duration. 2 Hr. 30 min.
1	Resolution and Composition of Forces	15	-
2	Distributed Forces and Friction	15	-
3	Equilibrium	-	18
4	Analysis of Structures	-	17
5	Kinematics of Particle	-	18
6	Kinetics of Particle	-	17
	Total Marks	30	70
