

MODULE 1

Chapter 1 : Impact of Jets 1-1 to 1- 41

Impulse momentum principle, Jet striking flat plates, stationary and moving vertical, inclined plates, hinged plates, curved vanes, series of plates and vanes mounted on wheel, concept of velocity triangles.

1.1 Introduction..... 1-1

1.2 Impulse - Momentum Principle..... 1-1

1.3 Force due to Impact of Jet on a Flat Fixed Plate 1-2

1.3.1 When the Fixed Plate is Normal to Jet..... 1-2

1.3.2 When Fixed Plate is Inclined at an Angle θ with Jet..... 1-2

1.4 Force Exerted by a Jet on Stationary Curved Plate or a Vane 1-3

1.4.1 When Jet Strikes at the Centre of a Symmetrical Curved Plate..... 1-3

1.4.2 When Jet Strikes an Unsymmetrical Curved Plate at One End Tangentially 1-4

1.4.3 For Semicircular Curved Vane or Plate 1-4

1.5 Force Exerted by a Jet on a Hinged Plate 1-7

1.5.1 When the Plate is Held Vertical by External Force 1-7

1.5.2 Angle Turned by Plate when Holding Force 'P' is not Applied..... 1-7

1.6 Force Exerted by Jet on Moving Plates 1-11

1.6.1 Force on Moving Flat Plate in Direction of Jet..... 1-11

1.6.2 Force on Moving Inclined Plate in the Direction of Jet..... 1-12

1.6.3 Impact of Jet on a Series of Flat Moving Plate 1-13

1.7 Impact of Jet on Moving Curved Vanes 1-16

1.7.1 Curved Vane Moving in the Direction of Jet..... 1-16

1.7.2 Impact of Jet in case of Series of Moving Vanes in Direction of Jet 1-17

1.7.3 Impact of Jet on Unsymmetrical Moving Curved Vane When Jet Strikes on One Tip of Vane Tangentially and Leaves at the other 1-18

1.7.4 Force Exerted on a Series of Moving Radial Curved Vanes..... 1-20

1.8 Jet Propulsion of Ships..... 1-34

1.8.1 Jet Propulsion of Ship when Inlet Orifices are at Right Angles to the Direction of Motion of the Ship1-34

1.8.2 Jet Propulsion when the Inlet Orifice facing the Direction of Motion of Ship1-35

MODULE 2

Chapter 2 : Hydraulic Turbines 2-1 to 2-79

General layout of hydro-electric plant, heads, efficiencies of turbine, classification, concept of velocity triangles working of Impulse Turbine (Pelton Wheel), Reaction Turbine, Francis Turbine, Kaplan Turbine, draft tube theory, specific speed, unit quantities, Characteristic curves, Cavitation.

2.1 Introduction 2-1

2.1.1 Basic Classification of Hydraulic Turbines 2-1

2.2 General Layout of a Hydro-Electric Power Plant..... 2-2

2.3 Pelton Wheel or Pelton Turbine..... 2-3

2.3.1 Construction and Working of Pelton Wheel 2-3

2.4 Workdone and Efficiency of Pelton Wheel 2-5

2.5 Design Aspects and Important Points to Remember for Pelton Wheel..... 2-8

2.5.1 Number of Buckets, Z on the Periphery of Pelton Wheel 2-8

2.6 Introduction to Reaction Turbines.....2-23

2.7 Classification of Reaction Turbines.....2-24

2.8 Constructional Features of Reaction Turbines.....2-25

2.9 Comparison between Impulse Turbine and Reaction Turbine.....2-26

2.10 General Layout of a Reaction Turbine Plant.....2-27

2.11 Calculation of Work, Power and Efficiencies of Inward Radial Reaction Turbines2-28

2.11.1 Working Proportions of a Radial Flow Reaction Turbine2-29

2.12 Outward Radial Flow Reaction Turbines2-30

2.13	Comparison between Inward and Outward Radial Flow Reaction Turbines	2-30
2.14	Francis Reaction Turbine	2-31
2.14.1	Axial Flow Reaction Turbines - Propeller and Kaplan Turbines	2-31
2.15	Draft Tube.....	2-33
2.16	Draft Tube Theory.....	2-49
2.16.1	Explanation of Draft Tube Theory	2-49
2.16.2	To Show that Net Head Available on Turbine Remains Constant Irrespective of Location of Turbine w.r.t Tail Race Level.....	2-50
2.16.3	Types of Draft Tubes.....	2-51
2.17	Introduction to Governing of Turbine.....	2-57
2.18	Governor and it's Functions.....	2-57
2.19	Governing System for Turbines of a Hydro-Electric Power Plant.....	2-58
2.20	Governing Mechanism	2-58
2.21	Governing of Pelton Turbine.....	2-59
2.21.1	Double Regulation Speed in Pelton Turbine.....	2-60
2.22	Governing Mechanism of a Francis Turbine..	2-61
2.23	Governing Mechanism for Kaplan Turbine	2-62
2.24	Performance of Water Turbines	2-62
2.24.1	Introduction	2-62
2.24.2	Standard Characteristics Curves.....	2-62
2.24.3	Unit Quantities.....	2-63
2.24.4	Main Characteristics	2-64
2.24.5	Operating Characteristics (Constant Speed Characteristics)	2-66
2.24.6	ISO-Efficiency Curves	2-67
2.25	Specific Speed (N_s) and Shape of Runner	2-68
2.25.1	Derivation of Specific Speed	2-68
2.25.2	Shape of Runners.....	2-68
2.25.3	Specific Speed for Pelton Wheel.....	2-69
2.25.4	Specific Speed of Francis Turbine.....	2-70

2.25.5	Specific Speed of Kaplan Turbine.....	2-70
2.26	Classification and Selection of Turbine	2-70
2.26.1	Sizes of Hydraulic Turbines	2-71
2.27	Cavitation in Reaction Turbines.....	2-74
2.27.1	Effects of Cavitation	2-74
2.27.2	Methods of Preventing Cavitation	2-75
2.27.3	Recent Development to Prevent Cavitation.....	2-75
2.27.4	Thoma's Cavitation Factor for Turbines.....	2-75

MODULE 3

Chapter 3 : Centrifugal Pumps 3-1 to 3-49

Work done, heads, efficiencies, Minimum speed : series parallel operation, Multistage pumps, concept of velocity triangles, specific speed, model testing, priming, characteristic curves, NPSH, cavitation.

3.1	Introduction	3-1
3.2	Classification of Pumps	3-1
3.2.1	Difference between Centrifugal Pump and Inward Flow Hydraulic Turbine.....	3-2
3.2.2	Pump Applications	3-2
3.2.3	Advantages of Centrifugal Pumps over Reciprocating Pumps	3-2
3.3	Components of a Centrifugal Pump (C.F. Pump).....	3-2
3.3.1	Working of Centrifugal Pump	3-3
3.4	Classification of Centrifugal Pumps.....	3-4
3.5	Workdone by Impeller on Water	3-8
3.6	Various Heads and Efficiencies of a Centrifugal Pump	3-9
3.6.1	Relation between Manometer Head and Workdone by Impeller on Liquid.....	3-10
3.6.2	Virtual Head, H_{virtual}	3-10
3.6.3	Manometric Head in terms of Suction and Delivery Pressure Measured by Pressure Gauge.....	3-11
3.7	Losses and Efficiencies	3-11
3.7.1	Losses in Pumps.....	3-11
3.7.2	Efficiencies of a Centrifugal Pump	3-12

3.8 Effect of Vane Discharge Angle ϕ on Manometric Efficiency 3-13

3.9 Minimum Starting Speed of Pump..... 3-14

3.9.1 Minimum Diameter of Impeller, D_1 3-14

3.10 Performance Characteristics of a Centrifugal Pump..... 3-28

3.10.1 Test Set Up for Conduct of Tests on Centrifugal Pump in a Laboratory..... 3-28

3.10.2 Types of Performance Characteristic Curves 3-29

3.10.2.1 Main Characteristic Curves..... 3-29

3.10.2.2 Operating Characteristic Curves..... 3-30

3.10.2.3 ISO-efficiency or Maschel Curves..... 3-30

3.10.2.4 Constant Head and Constant Discharge Curves 3-30

3.11 Cavitation in Centrifugal Pumps 3-31

3.11.1 Estimation of Maximum Permissible Suction Lift (Limited by Cavitation)..... 3-31

3.11.2 Net Positive Suction Head (NPSH)..... 3-32

3.11.3 NPSH (Required) 3-32

3.11.4 NPSH (Available) 3-32

3.11.5 Thoma's Cavitation Factor 3-32

3.12 Priming of a Centrifugal Pump 3-33

3.13 Trouble Shooting of Centrifugal Pumps and their Remedies..... 3-33

3.14 Multistage Centrifugal Pumps..... 3-34

3.14.1 Multistage Centrifugal Pumps for High Heads 3-34

3.14.2 Multistage Centrifugal Pumps for High Discharge..... 3-35

3.14.3 Comparison between Single Stage and Multistage Pumps..... 3-35

3.15 Model Relationships 3-40

3.15.1 Head Coefficient, K_H 3-40

3.15.2 Discharge Coefficient, K_Q 3-40

3.15.3 Power Coefficient, K_p 3-41

3.15.4 Specific Speed, N_s based on Discharge and Power as Applied to Centrifugal Pumps 3-41

3.16 Scale Effect..... 3-42

3.17 Moody's and Other Relationship Considering the Scale Effect3-42

MODULE 4

Chapter 4 : Miscellaneous Hydraulic Machinery 4-1 to 4-21

Hydraulic Ram, Press, Accumulator, Intensifier, Crane and Lift.

4.1 Introduction 4-1

4.2 Hydraulic Accumulator 4-1

4.3 Accumulator Types 4-1

4.3.1 Dead Weight of Gravity Type Simple Accumulator 4-1

4.3.2 Differential Accumulator 4-2

4.4 Hydraulic Intensifier..... 4-3

4.5 Hydraulic Press 4-7

4.5.1 Constructional Features of Hydraulic Press 4-8

4.6 Hydraulic Crane4-11

4.7 Hydraulic Lift4-12

4.7.1 Hydraulic Jack.....4-13

4.8 Hydraulic Ram.....4-15

MODULE 5

Chapter 5 : Uniform Flow Through Open Channels 5-1 to 5-48

Uniform Flow : Flow through open channel : Definition, types of channels, Prismatic, non-prismatic channels, Types of flows in channels, Uniform flow : steady flow and unsteady flow, laminar and turbulent flow, subcritical flow, supercritical flow, Chezy's formula, Manning's formula, hydraulically efficient channel cross-sections (most economical sections).

5.1 Introduction to Open Channel Flow 5-1

5.1.1 Introduction..... 5-1

5.1.2 Comparison between Open Channel Flow and Pipe Flow 5-2

5.1.3 Classification of Channels 5-3

5.1.4 Classification of Flows 5-3

5.1.5 Channel Geometry and Geometric Elements of Channel Sections 5-6

5.1.6 Velocity Distribution in a Channel Section 5-7

5.1.7 One-Dimensional Approach of Flow Analysis 5-8

5.1.8 Pressure Distribution in a Channel Section 5-9

5.1.9 Equation of Continuity 5-10

5.1.10 Energy Equation 5-10

5.1.11 Solved Examples 5-11

5.2 Uniform Flow 5-14

5.2.1 Introduction 5-14

5.2.2 Establishment of Uniform Flow 5-15

5.2.3 Uniform Flow Formulae 5-15

5.2.4 Chezy's Formula 5-15

5.2.5 Darcy-Weisbach Friction Factor, f 5-17

5.2.6 Manning's Formula 5-18

5.2.7 Manning's Roughness Coefficient, n 5-18

5.2.8 Computation of Uniform Flow 5-20

5.2.9 Computation of Normal Depth 5-22

5.2.10 Second Hydraulic Exponent, N 5-25

5.2.11 Maximum Discharge and velocity of a Channel of Second Kind 5-26

5.2.12 Hydraulically Efficient Channel Sections 5-28

5.2.13 Solved Examples 5-31

5.3 Problems 5-46

MODULE 6

**Chapter 6 : Non Uniform Flow Through Open Channels
6-1 to 6-52**

Concept of specific energy and specific energy curve, Dimensionless specific energy discharge curve, applications of specific energy and Momentum principle to open channel flow, specific force. Gradually varied flow, equation for gradually varied flow, back water curve and afflux, Introduction to surface profiles, Hydraulic jump and standing wave.

6.1 Specific Energy and Critical Flow 6-1

6.1.1 Specific Energy 6-1

6.1.2 Specific Energy Curve and Critical Flow 6-1

6.1.3 Depth-Discharge Diagram 6-4

6.1.4 Dimensionless specific energy and discharge curves 6-5

6.1.5 The Section Factor for Critical Flow Computation 6-5

6.1.6 First Hydraulic Exponent, M 6-6

6.1.7 Critical Flow and its Computation 6-6

6.1.8 Solved Examples 6-10

6.2 Gradually Varied Flow 6-18

6.2.1 Introduction 6-18

6.2.2 Differential Equation of GVF and its Various Forms 6-19

6.2.3 Classification of Channels and Flow Profiles 6-23

6.2.4 Practical Examples of Occurrence of GVF Profiles 6-26

6.2.5 Control Sections 6-27

6.2.6 Analysis of Flow Profiles 6-28

6.2.7 Introduction to Methods of Computation 6-31

6.2.7.1 Direct Step Method 6-32

6.2.8 Solved Examples 6-33

6.3 Rapidly Varied Flow - Hydraulic Jump 6-37

6.3.1 Introduction 6-37

6.3.2 Momentum Equation and specific force 6-37

6.3.3 Hydraulic Jump 6-39

6.3.3.1 Introduction 6-39

6.3.3.2 Applications of Hydraulic Jump 6-40

6.3.3.3 Equations of Hydraulic Jump for Prismatic Channel 6-40

6.3.3.4 Classification of Hydraulic Jump 6-42

6.3.3.5 Characteristics of Hydraulic Jump in Rectangular Channel 6-43

6.3.3.6 Use of Jump as an Energy Dissipater 6-44

6.3.4 Solved Examples 6-45

6.4 Problems 6-50
