

**Chapter 1 : Review of Thermodynamics 1-1 to 1-30**

1.1	Introduction	1-1
1.2	Thermodynamics System	1-1
1.3	Dimensions and Units	1-1
1.4	Energy.....	1-2
1.5	Ideal Gas Equation.....	1-3
1.6	Enthalpy	1-3
1.7	Specific Heats of a Gas	1-3
1.8	First Law of Thermodynamics.....	1-3
1.9	Application of First Law of Thermodynamics to Closed System (Non-flow) Processes	1-4
1.9.1	A Constant Volume Process.....	1-4
1.9.2	A Constant Pressure Process	1-4
1.9.3	Constant Temperature or Isothermal Process	1-5
1.9.4	Hyperbolic Process	1-5
1.9.5	Reversible Adiabatic Process	1-5
1.9.6	Reversible Polytropic Process	1-6
1.9.7	The Combination of Polytropic Law $p \cdot V^n = C$ and Equation of State, $pV = mRT$	1-6
1.10	Application of First Law of Thermodynamics to Steady Flow Open Systems	1-7
1.11	Mechanical Work in a Steady Flow Process.....	1-8
1.12	Second Law of Thermodynamics	1-9
1.13	Carnot's Theorem.....	1-9
1.14	Entropy.....	1-9
1.15	Principle of Increase of Entropy	1-10
1.16	Entropy Change for Ideal Gas - General Equation.....	1-10
1.17	State of a Substance	1-10
1.18	Pure Substance.....	1-10
1.19	Phase Transformation at Constant Pressure-formation of Steam.....	1-10
1.20	Properties of Steam.....	1-11
1.21	Steam Tables and Their Uses	13
1.22	Temperature - Entropy (T-S) and Enthalpy - Entropy (H-S) Diagrams for Steam	1-13
1.23	Compressed Liquid	1-16
1.24	Heat Transfer	1-18
1.25	Modes of Heat Transfer.....	1-18
1.26	Heat Transfer by Conduction	1-18
1.27	Fourier's Law of Heat Conduction.....	1-18
1.27.1	Heat Conduction Through a Thick Wall	1-18
1.27.2	Analogy between Heat Conduction and Electrical System.....	1-19
1.27.3	Composite Walls	1-19

1.28	Convection	1-20
1.29	Overall Heat Transfer Coefficient, U	1-21
1.30	Heat Transfer in an Infinitely Long Cylinder	1-22
1.31	Heat Transfer Through a Hollow Sphere	1-22
1.32	Heat Transfer Through a Composite Cylinder with Conduction and Convection.....	1-23
1.33	Thermal Insulation.....	1-23
1.34	Radiation	1-24
1.35	Stefan - Boltzmann Law of Radiation.....	1-24

Unit - I**Chapter 2 : Introduction to Refrigeration 2-1 to 2-22**

2.1	Development of Refrigeration.....	2-1
2.2	Definition of Refrigeration	2-1
2.2.1	Definition of Air Conditioning	2-1
2.2.2	Difference between Refrigeration and Air Conditioning.....	2-2
2.2.3	Application of Refrigeration in Food Processing	2-2
2.3	Applications of Refrigeration.....	2-2
2.4	Non-cyclic Refrigeration Systems.....	2-3
2.4.1	Ice Refrigeration	2-3
2.4.2	Evaporative Refrigeration	2-3
2.4.3	Refrigeration by Dry Ice.....	2-4
2.5	Refrigeration by Expansion of Air	2-4
2.6	Refrigeration by Throttling of Gas	2-4
2.7	Vapour Compression Refrigeration System.....	2-5
2.8	Steam Jet Refrigeration System.....	2-6
2.9	Liquid Gas Refrigeration.....	2-7
2.10	Production of Low Temperature by Magnetic Cooling.....	2-7
2.11	Concept of Heat Engine, Heat Pump and Refrigerating Machines.....	2-8
2.11.1	Performance of Heat Engine, Heat Pump and a Refrigerator	2-8
2.11.2	Concept of EER, SEER and IPLV	2-9
2.12	BEE Star Rating	2-9
2.13	Units of Refrigeration - Tons of Refrigeration (TR).....	2-10
2.14	The Carnot Refrigerator.....	2-10
2.14.1	Limitations of Carnot Cycle with Air or Gas as Refrigerant.....	2-11
2.14.2	Carnot Refrigerator with Vapour as Refrigerant	2-11
2.15	Introduction to Refrigerants	2-12

2.15.1	Definition of a Refrigerant.....	2-12
2.15.2	Brief History of Refrigerants.....	2-12
2.16	Classification of Refrigerants.....	2-13
2.17	Classification of Primary Refrigerants.....	2-13
2.18	Designation of Refrigerants.....	2-14
2.19	Secondary Refrigerants.....	2-14
2.19.1	Substances Used as Secondary Refrigerants.....	2-15

Unit - II

Chapter 3 : Vapour Compression System 3-1 to 3-34

3.1	Limitations of Air Refrigeration Cycle.....	3-1
3.2	The Vapour Compression Refrigeration System.....	3-1
3.2.1	Advantages and Disadvantages of Vapour Compression System over Air Refrigeration System.....	3-2
3.2.2	System Equipment Nomenclature.....	3-2
3.3	Pressure - Enthalpy (p-h) Chart for Refrigerants.....	3-3
3.4	Thermodynamic Analysis of Vapour Compression Refrigeration Cycle.....	3-3
3.4.1	When the Vapour is Dry-saturated at the End of Compression.....	3-3
3.4.2	Vapour Compression Cycle when Vapour is Wet at the End of Compression.....	3-5
3.4.3	Vapour Compression Cycle when the Vapour is Dry-saturated at Entry to Compressor.....	3-6
3.4.4	Assumptions in Theoretical Vapour Compression Cycle.....	3-6
3.5	Wet Compression Vs Dry Compression.....	3-6
3.6	Effect of Operating Variables on Performance of Vapour Compression Refrigeration System.....	3-7
3.6.1	Effect of Superheat in Suction Vapour.....	3-7
3.6.2	Effect of Liquid Subcooling.....	3-7
3.6.3	Effect of Change in Suction Pressure or Evaporator Pressure.....	3-8
3.6.4	Effect of Change of High Side Pressure or Discharge Pressure or Condenser Pressure.....	3-8
3.6.5	Representation of Sub-cooled and Superheated VCC.....	3-9
3.7	Expansion Cylinder Vs Throttle Valve.....	3-9
3.8	Thermodynamic Properties of Saturated Refrigerants.....	3-10
3.9	Actual Vapour Compression Refrigeration Cycle.....	3-25
3.10	Methods of Improvement in Simple Saturated Vapour Compression Cycle.....	3-26
3.10.1	Simple Saturated Cycle with Flash Chamber.....	3-26

3.10.2	Simple Saturated Cycle with Subcooling of Refrigerant by Vapour Refrigerant Leaving the Evaporator.....	3-27
3.10.3	Simple Saturated Cycle with Subcooling of Liquid Refrigerant by the Liquid Refrigerant from Expansion Valve.....	3-28
3.10.4	Simple Saturated Cycle with Accumulator.....	3-28
3.11	Waste Heat Recovery Opportunities in Refrigeration System.....	3-32
3.11.1	Utilization of Waste Heat in Refrigerators.....	3-32

Unit - III

Chapter 4 : Compound Vapour Compression System 4-1 to 4-19

4.1	Limitations and Drawbacks of Simple Vapour Compression Refrigeration Cycle.....	4-1
4.2	Multistage Vapour Compression System.....	4-2
4.2.1	Multistage Compression with Intercooling between the Stages.....	4-2
4.2.2	Intermediate Pressure for Minimum Work.....	4-3
4.3	Types of Multistage Vapour Compression System with Intercooler and Single Load.....	4-3
4.4	Multiple Evaporator at the Same Temperature and Single Compressor System.....	4-3
4.5	Two Stage Compression with Water Intercooler and Liquid Sub-cooler.....	4-5
4.6	Two Stage Compression with Water Intercooler, Liquid Sub-cooler and Liquid Flash Chamber.....	4-6
4.7	Two Stage Compression with Water Intercooler, Liquid Subcooler and Flash Intercooler.....	4-8
4.8	Multiple Evaporator and Compressor Systems.....	4-9
4.9	Multiple Evaporator at the Same Temperature and Single Compressor System.....	4-9
4.10	Multiple Evaporators at Different Temperatures with Single Compressor, Individual Expansion Valves and Back Pressure Valve System.....	4-10
4.11	Multiple Evaporators at Different Temperatures with Single Compressor, Multiple Expansion Valves (E.V.) and Back Pressure Valves (B.P.V.).....	4-11
4.12	Multiple Evaporators with Individual Compressors and Individual Expansion Valves.....	4-12
4.13	Multiple Evaporators with Individual Compressors and Multiple Expansion Valves.....	4-13
4.14	Multiple Evaporators with Compound Compression and Individual Expansion Valves.....	4-14

4.15	Cascade System of Refrigeration.....	4-15
4.15.1	Limitations of Single Stage Vapour Compression System for Production of Low Temperature.....	4-15
4.15.2	Applications of Low Temperature Refrigeration	4-16
4.15.3	Cascade System	4-16
4.15.4	C.O.P of Cascade System Assuming Reversed Carnot Cycle.....	4-17

Chapter 5 : Vapour Absorption System 5-1 to 5-24

5.1	Introduction.....	5-1
5.1.1	Origin of the Absorption System.....	5-1
5.1.2	Principle of Basic Liquid Absorbent System (Ammonia Water)	5-2
5.1.3	Terms and Definitions	5-2
5.2	Refrigerant - Solvent Properties	5-2
5.2.1	Desirable Properties of Solvent.....	5-2
5.2.2	Desirable Properties of Refrigerant -Solvent Combination	5-3
5.2.3	Characteristics of Ammonia	5-3
5.3	Simple Ammonia - Water Vapour Absorption System.....	5-3
5.4	Practical Ammonia - Water Vapour Absorption System.....	5-4
5.5	Comparison between Vapour Absorption and Vapour Compression System	5-5
5.6	C.O.P of an Ideal Vapour Absorption System.....	5-6
5.7	Domestic Electrolux (NH ₃ -H ₂) Refrigerator.....	5-9
5.8	Lithium Bromide Absorption Refrigeration System	5-11
5.8.1	Double - Effect Li-Br Absorption System.....	5-13
5.8.2	Comparison between Aqua-NH ₃ with Li-Br-H ₂ O Vapour Absorption System.....	5-14
5.8.3	Solar Based Li Br - H ₂ O Vapour Absorption System for Space Cooling	5-14
5.8.4	Applications of Vapour Absorption System	5-16
5.9	New Mixtures for Vapour Absorption System.....	5-16
5.10	Theory of Mixtures.....	5-16
5.11	Temperature - Concentration (t - z) Diagram for Binary Mixtures.....	5-17
5.12	Enthalpy Concentration Diagram (h - z).....	5-18
5.12.1	Representation of (NH ₃ - H ₂ O) Ideal Vapour Absorption Cycle Enthalpy- Concentration Chart.....	5-18
5.13	Adiabatic Mixing of Two Streams	5-19

Unit - IV

Chapter 6 : Refrigerants for Vapour Compression System 6-1 to 6-14

6.1	Desirable Properties of a Good Refrigerant.....	6-1
6.1.1	Thermodynamic Properties of Refrigerants.....	6-1
6.1.2	Chemical Properties of Refrigerants.....	6-2
6.1.3	Physical Properties of Refrigerants	6-3
6.1.4	Other Properties of Refrigerants.....	6-3
6.1.5	Properties of an Ideal Refrigerant.....	6-3
6.2	Properties of Important Refrigerants.....	6-4
6.3	Selection of a Refrigerant	6-5
6.4	Zeotropes and Azeotropes Refrigerants.....	6-6
6.4.1	Azeotropic Refrigerants	6-6
6.4.2	Zeotropic Mixture of Refrigerants	6-6
6.5	Effect of CFC's on Ozone Depletion and Global Warming	6-7
6.5.1	Ozone Depletion	6-7
6.5.2	Global Warming	6-8
6.6	Montreal Protocol.....	6-8
6.7	Search of Alternative Refrigerants of CFC's.....	6-9
6.8	Promising Alternatives to CFC's Refrigerants	6-9
6.8.1	HCFC, R-123 (Replacement to CFC, R-11)	6-9
6.8.2	HFC – R-245 Ca (As replacement to CFC R-11)	6-9
6.8.3	Certain Mixtures of Refrigerants as Replacement CFC's R-11, R-12 and HCFC R-22	6-10
6.8.4	Substitutes for CFC, R-12 Refrigerant.....	6-10
6.9	Kyoto Protocol and TEWI	6-11
6.10	Natural Refrigerants.....	6-11
6.11	The Indian Scene.....	6-13

Chapter 7 : Air Conditioning & Human Comfort (Basic Psychrometris & Human Comfort) 7-1 to 7-38

7.1	Psychrometry and Psychrometric Properties.....	7-1
7.2	Psychrometric Relations	7-2
7.2.1	Dalton's Law of Partial Pressure	7-2
7.2.2	Specific Humidity or Humidity Ratio.....	7-2
7.2.3	Relative Humidity (ϕ).....	7-3
7.2.4	Degree of Saturation (μ).....	7-3
7.2.5	Measurement of Wet Bulb Temperature and RH by Sling Psychrometer.....	7-4
7.2.5.1	Humidistat	7-4
7.2.6	Dry Bulb Temperature (DB or tdb).....	7-5

7.2.7	Enthalpy of Air (h).....	7-5	8.5.2	Surface Area	8-4
7.2.8	Thermodynamic Wet Bulb Temperature or Adiabatic Saturation of Air.....	7-5	8.5.3	Temperature Difference.....	8-4
7.2.9	Dew Point Temperature (DPT)	7-6	8.6	Infiltration	8-5
7.2.10	Vapour Density or Absolute Humidity	7-6	8.7	Ventilation	8-6
7.2.11	Specific Volume	7-6	8.8	Outside Air Load.....	8-6
7.3	Psychrometric Chart.....	7-11	8.9	Occupancy Heat Load	8-6
7.4	Psychrometric Processes.....	7-12	8.10	Lighting	8-6
7.5	Adiabatic Mixing of Air Streams.....	7-12	8.11	Equipment.....	8-6
7.6	Sensible Heating	7-13	8.12	Product Brought in.....	8-7
7.7	Sensible Cooling	7-14	8.13	System Heat Gain	8-7
7.8	Humidification and Dehumidification of Air	7-15	8.14	Equipment Selection	8-7
7.9	Cooling and Dehumidification.....	7-16	8.15	RSHF, ERSHF	8-8
7.10	Adiabatic Cooling or Evaporative Cooling or Cooling with Humidification Process.....	7-17	8.16	Psychrometric Analysis	8-8
7.11	Heating with Humidification	7-18	8.16.1	Analysis when Outside Air is Mixed after Cooling Coil.....	8-9
7.12	Chemical Dehumidification or Sorbent Dehumidification (Heating with Dehumidification)	7-19	8.17	Psychrometric Analysis of Uncommon Load Patterns.....	8-10
7.13	Spray Processes	7-19	8.18	Partial Load Analysis.....	8-11
7.14	Introduction to Air Conditioning.....	7-34	8.18.1	Air Flow Control.....	8-11
7.14.1	Industrial Air Conditioning.....	7-34	8.18.2	Return Air Bypass	8-11
7.14.2	Comfort Air Conditioning	7-34	8.18.3	Reheating.....	8-12
7.15	Basic Air Conditioning Cycle.....	7-34	8.18.4	Capacity Control of Compressor.....	8-12
7.16	Inside Design Condition.....	7-35	8.19	Winter Air Conditioning.....	8-12
7.16.1	Industrial Application	7-35	8.19.1	Heat Load/Loss Estimate	8-12
7.16.2	Thermodynamics of Human Body	7-35	8.19.2	Psychrometric Analysis	8-12
7.16.3	Effective Temperature	7-35			
7.16.4	Human Comfort Chart	7-36			

Unit - V

Unit - VI

Chapter 8 : Air Conditioning Process Calculations (Load Analysis) 8-1 to 8-27

8.1	Indoor Air Quality Requirements.....	8-1
8.2	Outside Design Conditions	8-1
8.3	Sources of Heat Load / Cooling Load	8-1
8.3.1	Building Survey	8-2
8.4	Heat Gain through Glass	8-2
8.4.1	Factors Affecting Solar Radiation at a Place	8-2
8.4.2	Factors Affecting Solar Radiation Entering the Room.....	8-3
8.4.3	Method of Estimation.....	8-3
8.5	Heat Load through Opaque Surface	8-3
8.5.1	Overall Heat Transfer Coefficient.....	8-4

Chapter 9 : Distribution of Air 9-1 to 9-24

9.1	Introduction	9-1
9.2	Supply Air Duct	9-1
9.2.1	Material	9-1
9.2.2	Classification of Duct.....	9-1
9.2.3	Shape of Duct	9-2
9.2.4	Size of Duct.....	9-2
9.2.5	Obstruction.....	9-2
9.2.6	Bends, Tees and Branch Take Offs.....	9-2
9.2.7	Fire Dampers	9-3
9.3	Flow Through Duct	9-3
9.4	Pressure Losses in the Duct.....	9-3
9.5	Loss of Pressure Due to Friction	9-4
9.5.1	Friction Factor 'f'.....	9-4
9.6	Equivalent Diameter of a Circular Duct or a Rectangular Duct.....	9-4

9.7	Friction Chart for Circular Ducts	9-5	10.2.2	Split Air Conditioner.....	10-2
9.8	Dynamic Losses in Duct Systems	9-8	10.2.3	Package Air Conditioners	10-3
9.8.1	Pressure Loss due to Enlargement	9-8	10.3	Central / All Year Round Air Conditioning System	10-4
9.8.2	Pressure Loss Due to Contraction.....	9-9	10.4	Air Conditioning Systems	10-4
9.8.3	Pressure Loss at Entry or Exit from Duct.....	9-9	10.5	Direct Expansion System	10-5
9.8.4	Pressure Loss in Bends, Tees, and Branch Offs	9-9	10.6	All Water System	10-5
9.8.5	Equivalent Lengths of Fittings.....	9-9	10.7	All Air System.....	10-6
9.9	Methods of Duct Design	9-9	10.7.1	Variable Air Volume (VAV) System	10-7
9.9.1	Velocity Reduction Method.....	9-10	10.8	Air-water System	10-7
9.9.2	Equal Friction Method.....	9-10	10.9	Expansion and Flow Control Devices in Refrigeration.....	10-8
9.9.3	Static Regain Method	9-10	10.9.1	Float Valve	10-8
9.9.4	Design of Duct by Equal Friction Method.....	9-10	10.9.2	Automatic Expansion Valve (AXV).....	10-8
9.10	Pressure Drop in Ducts	9-11	10.9.3	Thermostatic Expansion Valve (TXV)	10-8
9.11	Room Air Distribution	9-18	10.9.4	Capillary Tube	10-9
9.12	Types of Outlets	9-19	10.10	Operating and Safety Controls	10-10
9.13	Location of Outlet	9-19	10.10.1	Thermostat	10-10
9.14	Return Air System	9-20	10.10.2	Low Pressure Cutout.....	10-11
9.15	Methods of Noise Control	9-22	10.10.3	High Pressure Cutout	10-11
Chapter 10 : Air Conditioning Systems and Controls			10.10.4	Oil Failure Cutout	10-11
10-1 to 10-12			• Appendix A.....	A-1 to A-10	
10.1	Introduction	10-1	• Appendix B.....	B-1 to B-7	
10.2	Unitary System	10-1			
10.2.1	Window Air Conditioner	10-1			

□□□
