

**INDEX****UNIT I**

**Syllabus** : Basic concepts, Advantages of DBMS over file processing systems, Data abstraction, Database languages, Data models, Data independence, Components of a DBMS, Overall structure of DBMS, Multi-user DBMS architecture, System catalogs, Data Modeling: Basic concepts, Entity, attributes, relationships, constraints, keys.

**Chapter 1 : Introduction to Database**

<b>Management System</b>	<b>1-1 to 1-20</b>
1.1 Database Concept.....	1-1
1.1.1 Process of Database Management.....	1-2
1.1.2 History of Database System.....	1-2
1.1.3 Purpose of Database.....	1-2
1.1.4 Characteristics of DBMS .....	1-3
1.1.5 File System Vs Database System.....	1-3
1.2 Overall structure of DBMS.....	1-4
1.2.1 Three Level Architecture for Database.....	1-4
1.2.1(A) Introduction.....	1-5
1.2.1(B) Database System architecture .....	1-5
1.2.1(C) Data Abstraction.....	1-6
1.2.1(D) Data Independence .....	1-6
1.2.1(E) Difference Between Logical and Physical data Independence.....	1-7
1.3 Database System Detailed(Multiuser DBMS ) Architecture .....	1-7
1.3.1 Query Processor Components.....	1-8
1.3.2 Storage Manager / Storage Management.....	1-9
1.3.3 Transaction Management.....	1-9
1.4 Database Users.....	1-9
1.4.1 Database Administrator (DBA).....	1-10
1.5 Database Model .....	1-11
1.5.1 Benefits of Data Modeling .....	1-11
1.5.2 Basic Building Block of Data Model.....	1-12
1.5.3 Types of Data Models .....	1-13
1.5.3(A) Hierarchical Model.....	1-13
1.5.3(B) Network Database Model .....	1-14

1.5.3(C) Relational Model.....	1-15
1.5.3(D) Entity Relationship Model.....	1-17
1.5.3(E) Object Model.....	1-17
1.6 Comparison of All Data Models .....	1-18
1.7 System catalog .....	1-19
1.8 Database Language .....	1-19

**UNIT II**

**Syllabus : ER and EER diagrams** : Components of ER model, Conventions, Converting ER diagrams into tables

**Relational Model** : Basic concepts, Attributes and Domains, Codd's rules. **Relational Integrity** : Nulls, Entity, Referential integrities, Enterprise constraints, Views, Schema diagram . .

**Chapter 2 : E-R and EER Diagrams 2-1 to 2-25**

2.1 ER Model .....	2-1
2.1.1 ER Diagrams.....	2-1
2.1.2 Entities .....	2-2
2.1.3 Attributes.....	2-2
2.2 Relationships .....	2-4
2.2.1 Constraints on Relationship.....	2-4
2.3 Sample ER Model.....	2-6
2.4 Converting ER Diagram into Tables .....	2-7
2.4.1 Entity to Tables .....	2-7
2.4.2 Attributes to Columns of Table .....	2-8
2.4.3 Relationships to Tables .....	2-9
2.5 Enhanced Entity Relationship (EER).....	2-10
2.6 Sub Class - Super Class and Inheritance.....	2-11
2.7 Specialization.....	2-11
2.8 Generalization.....	2-12
2.9 Aggregation.....	2-13
2.10 Converting EER Diagram into Tables.....	2-13
2.11 Legacy System Model .....	2-14
2.11.1 Legacy System Structures.....	2-15
2.12 Solved Examples for EER and ER Model.....	2-15

**Chapter 3 : Relational Model and Integrity 3-1 to 3-10**

3.1	Relational Data Model .....	3-1
3.1.1	Relation / Relational Table .....	3-1
3.1.2	Attributes / Fields.....	3-2
3.1.3	Tuple / Records .....	3-2
3.1.4	Domain .....	3-2
3.2	E. F. Codd's Rule for RDBMS .....	3-2
3.2.1	Overview of Codd's Rule.....	3-2
3.2.2	Codd's Rule In Details .....	3-3
3.3	Key Concept .....	3-5
3.3.1	Types of Keys.....	3-5
3.4	Relational Integrity.....	3-7
3.4.1	Types of Relational Integrity.....	3-7
3.5	Enterprise Constraints.....	3-8
3.5.1	Unique Constraint.....	3-8
3.5.2	Primary Key Constraint .....	3-9
3.6	Schema diagrams.....	3-9

**UNIT III**

**Syllabus : Introduction to SQL :** Characteristics and advantages SQL Data Types, Literals, DDL, DML, SQL Operators Tables: Creating, Modifying, Deleting, Views : Creating, Dropping, Updation using Views, Indexes, Nulls.

**SQL DML Queries :** SELECT query and clauses, Set operations, Tuple Variables, Set comparison, Ordering of Tuples , Aggregate Functions, Nested Queries, Database Modification using SQL Insert, Update, Delete Queries, Stored Procedure, Triggers, Programmatic SQL : Embedded SQL, Dynamic SQL, ODBC

**Chapter 4 : Introduction to SQL 4-1 to 4-5**

4.1	Overview of SQL .....	4-1
4.1.1	Role of SQL .....	4-1
4.1.2	Characteristics and Advantages of SQL .....	4-2
4.2	MySQL Data Types .....	4-2
4.2.1	Built-in Data Types .....	4-2
4.2.2	Literals.....	4-4
4.3	Data Definition Language (DDL) .....	4-4
4.4	Data Manipulation Language (DML) .....	4-4
4.5	Data Control Language (DCL).....	4-5
4.6	Transaction Control Language (TCL).....	4-5

**Chapter 5 : Tables 5-1 to 5-6**

5.1	Tables .....	5-1
5.1.1	Handling Tables Using Data Definition Language (DDL) .....	5-1
5.1.2	Creating Tables Using CREATE Command .....	5-1
5.1.3	Modifying Table Using ALTER Command .....	5-1
5.1.4	Removing Table using DROP Command.....	5-2
5.1.5	Renaming Table.....	5-2
5.1.6	Truncate Table.....	5-2
5.2	Data Integrity Constraints in Tables.....	5-2
5.2.1	Domain Relational Constraint – Business Rule Constraint .....	5-3
5.2.2	Entity Relational Constraints.....	5-4
5.2.3	Referential Integrity – Foreign Key .....	5-4
5.3	Data Manipulation Language (DML).....	5-5

**Chapter 6 : Views 6-1 to 6-6**

6.1	Introduction of Views .....	6-1
6.2	Creating a Views.....	6-2
6.3	Dropping Views.....	6-3
6.4	Modifying a Views .....	6-3
6.5	Renaming Views .....	6-3
6.6	Advantages and Disadvantages of Views .....	6-4
6.7	SQL Indexes .....	6-4

**Chapter 7 : SQL Queries 7-1 to 7-27**

7.1	SELECT Statement.....	7-1
7.1.1	SELECT Clause - To Select all Columns .....	7-1
7.1.2	SELECT Clause – To Select Specific Columns .....	7-1
7.1.3	SELECT Clause – To Select Unique Records .....	7-2
7.2	Ordering of Types .....	7-2
7.2.1	Ordering Query Results - ORDER BY Clause.....	7-2
7.3	SQL Operations .....	7-3
7.3.1	Filtering Query Results - WHERE Operator .....	7-3
7.3.1(A)	Row Selection – WHERE Clause .....	7-3
7.3.2	Arithmetic Operators .....	7-4
7.3.3	Comparison Operators .....	7-4
7.3.4	Logical Operators (AND, OR, NOT) .....	7-5
7.3.5	Range Searching Operators (BETWEEN).....	7-5
7.3.6	Pattern Matching Operation – LIKE Operator.....	7-5
7.4	SET Operations .....	7-7
7.4.1	UNION .....	7-7

7.4.2	INTERSECT .....	7-8
7.4.3	EXCEPT .....	7-8
7.4.4	Nesting SET Operations.....	7-8
7.5	Aggregate Functions .....	7-8
7.5.1	Types of Aggregate Functions .....	7-8
7.5.1(A)	COUNT () .....	7-9
7.5.1(B)	SUM () .....	7-9
7.5.1(C)	AVG ().....	7-9
7.5.1(D)	MIN().....	7-10
7.5.1(E)	MAX() .....	7-10
7.5.1(F)	Summary of Aggregate Functions.....	7-10
7.6	GROUP BY Clause - Grouping Query Results .....	7-10
7.7	HAVING Clause – Filtering grouped Query Results ..	7-11
7.7.1	Apply Conditions with GROUP BY .....	7-11
7.8	GROUP BY and Aggregate Function .....	7-12
7.9	SQL Joins and Predicates (Join Conditions).....	7-12
7.9.1	Cartesian Product / Cross Join.....	7-12
7.9.2	Inner Join.....	7-13
7.9.3	Outer Join .....	7-15
7.9.3(A)	Left Outer Join .....	7-16
7.9.3(B)	Right Outer Join.....	7-16
7.9.3(C)	Full Outer Join .....	7-16
7.10	Nested Sub Queries .....	7-17
7.10.1	Independent Subquery .....	7-17
7.10.2	Multiple Row Subquery .....	7-18
7.11	Set Membership .....	7-18
7.11.1	IN .....	7-18
7.11.2	ANY .....	7-19
7.11.3	ALL .....	7-20
7.11.4	EXISTS Clause.....	7-20
7.11.5	NOT EXISTS clause.....	7-21
7.12	Correlated Sub Queries.....	7-21
7.13	Solved Examples.....	7-23

### **Chapter 8 : Stored Procedures 8-1 to 8-6**

8.1	Stored Procedure .....	8-1
8.1.1	Creating Stored Procedure.....	8-1
8.1.2	Executing Stored Procedure .....	8-2
8.1.3	Parameter Types in Stored Procedure.....	8-2
8.1.4	Parameter Modes in Stored Procedure.....	8-2
8.1.5	Altering Stored Procedure .....	8-3
8.1.6	Dropping Stored Procedure.....	8-4

8.2	Trigger.....	8-4
8.2.1	Components of Trigger (E-C-A model) – How to Apply Trigger ?.....	8-4
8.2.2	Trigger Syntax.....	8-4
8.2.3	Trigger Types.....	8-5
8.2.4	Trigger Example.....	8-5
8.2.5	Trigger Operations.....	8-5
8.2.6	Trigger Advantages \ Uses of Trigger.....	8-6
8.2.7	Trigger Disadvantages.....	8-6
8.2.8	Solution for Mutating Table Error.....	8-6

### **Chapter 9 : Programmatic SQL 9-1 to 9-3**

9.1	Embedded (Static) SQL .....	9-1
9.2	Interactive (Dynamic) SQL.....	9-2
9.2.1	Working with Various Languages .....	9-2
9.2.2	Advantages .....	9-2
9.2.3	Disadvantages .....	9-3
9.2.4	Applications.....	9-3
9.2.5	Comparison between Static and Dynamic SQL .....	9-3

### **UNIT IV**

**Syllabus : Relational Databases Design :** Purpose of Normalization, Data Redundancy and Update Anomalies, Functional Dependencies. The process of Normalization: 1NF, 2NF, 3NF, BCNF.

**Introduction to Query Processing :** Overview, Measures of Query cost, Selection and Join operations, Evaluation of Expressions

**Introduction to Query optimization :** Estimation, Transformation of Relational Expression

### **Chapter 10 : Relational Database Design 10-1 to 10-20**

10.1	Functional Dependencies .....	10-1
10.1.1	Solved Examples on Functional Dependencies .....	10-2
10.1.2	Types of Functional Dependencies .....	10-3
10.2	FD Properties (Armstrong's Axioms/ Closures of FD).....	10-5
10.3	Decomposition Using FD .....	10-6
10.3.1	Goals.....	10-6
10.3.2	Desirable Properties of Decomposition .....	10-7
10.3.2(A)	Lossless-join Decomposition .....	10-7
10.3.2(B)	Dependency Preservation .....	10-8
10.3.2(C)	Repetition of information.....	10-8

10.4	Normalization.....	10-9
10.4.1	Features of Good Database Design.....	10-10
10.4.1(A)	Purpose of Normalisation to Remove Pitfalls in Database Design .....	10-10
10.6	First Normal Form (1NF) .....	10-12
10.7	Second Normal Form (2NF) .....	10-12
10.8	Third Normal Form (3NF) .....	10-15
10.9	Boyce Codd Normal Form (BCNF).....	10-16
10.10	Fourth Normal Form (4NF).....	10-17
10.11	Fifth Normal Form (5NF) and Join Dependency .....	10-18

### Chapter 11 : Query Processing 11-1 to 11-20

11.1	Introduction to Query Processing.....	11-1
11.2	Typical Query Processing in DBMS .....	11-1
11.2.1	Steps of Query Processing.....	11-2
11.3	Measures of a Query Cost .....	11-3
11.4	Selection Operation.....	11-4
11.5	Join Operations .....	11-7
11.5.1	Nested Loop Join.....	11-8
11.5.2	Blocks Nested Loop Join.....	11-9
11.5.3	Indexed Nested Loop .....	11-10
11.5.4	Merge Join.....	11-11
11.5.5	Hash Join.....	11-12
11.6	Evaluation of Expressions – Materialisation and Pipelining.....	11-14
11.7	Translations of Relational Expressions .....	11-16
11.8	Solved Example.....	11-18

## UNIT V

**Syllabus : Transaction Management** : Basic concept of a Transaction, Properties of Transactions, Database architecture, Concept of Schedule, Serial Schedule.

**Serializability** : Conflict and View, Cascaded Aborts Recoverable and Non recoverable Schedules.

**Concurrency Control** : Need Locking methods Dead locks, Time stamping Methods. Optimistic Techniques, Multi-version Concurrency Control.

**Different crash recovery methods** : Shadow-Paging and Log-Based Recovery : Deferred and Immediate, Checkpoints.

### Chapter 12 : Transaction Management 12-1 to 12-13

12.1	Transaction.....	12-1
12.1.1	Concept of Transaction .....	12-1
12.1.2	Transaction Management Architecture .....	12-2

12.1.3	Transaction States – Database Transaction Architecture.....	12-3
12.1.3(A)	Transaction States .....	12-3
12.1.4	Fundamental Properties of Transaction/ ACID Properties .....	12-4
12.2	Transactions Schedules (Concept of Schedules).....	12-6
12.3	Serial Schedule.....	12-6
12.3.1	Concurrent Schedule .....	12-7
12.4	Serializability/Serializable Schedule .....	12-8
12.4.1	Conflict Serializability .....	12-8
12.4.2	View Serializability .....	12-9
12.5	Precedence Graph.....	12-10
12.5.1	Solved Problems.....	12-11
12.6	Recoverability / Recoverable and No Recoverable Schedules .....	12-12
12.6.1	Recoverable Schedules.....	12-12
12.6.2	Cascade Less Schedules /Cascaded Aborts / Cascaded Rollbacks .....	12-12

### Chapter 13 : Concurrency Control 13-1 to 13-15

13.1	Need of Concurrency Control .....	13-1
13.2	Concurrency Control Schemes.....	13-3
13.3	Lock Based Protocols .....	13-3
13.3.1	Working of Locking Protocol / Locking Scheduler / Locking Manager.....	13-4
13.3.2	Granting Locks.....	13-6
13.3.3	Rejecting Locks.....	13-6
13.4	Two-Phase Locking (2PL) Protocol .....	13-6
13.4.1	Modified Versions of Two-phase Locking Protocol.....	13-7
13.5	Concept of Deadlock .....	13-7
13.5.1	Approaches for Deadlock Prevention .....	13-8
13.5.2	Deadlock Detection and Recovery .....	13-9
13.6	Timestamp Based Protocols.....	13-10
13.7	Thomas' Write Rule .....	13-12
13.8	Optimistic Methods – Validation Based Protocol.....	13-13
13.9	Multi-version Concurrency Control Scheme .....	13-14
13.9.1	Multi-version Technique Based on Timestamp Ordering .....	13-14
13.9.2	Multi-version Two-Phase Locking Using Certify Locks.....	13-14

**Chapter 14 : Recovery Methods 14-1 to 14-12**

14.1	Database Recovery Concepts.....	14-1
14.2	Log-Based Recovery.....	14-1
14.2.1	Types of Transaction Log.....	14-2
14.2.2	Working of Log Based Protocol.....	14-2
14.2.3	Deferred-Modification Technique (REDO Algorithm).....	14-2
14.2.4	Immediate-Modification Technique (UNDO Algorithm).....	14-5
14.3	Recovery Related Structures – Checkpoint.....	14-7
14.3.1	Problems in This Approach.....	14-7
14.3.2	Need of Checkpoints.....	14-7
14.3.3	Working.....	14-7
14.3.4	Advantages.....	14-8
14.3.5	Disadvantages.....	14-8
14.4	Shadow Paging.....	14-8
14.4.1	Overview.....	14-8
14.4.2	Method.....	14-8
14.4.3	Process of Recovery.....	14-9
14.4.4	Advantages.....	14-9
14.4.5	Disadvantages.....	14-9
14.5	Query Optimization in SQL.....	14-9
14.5.1	Goals of Query Optimization.....	14-10
14.5.2	Query Optimization Approaches / Performance Tuning.....	14-10
14.5.3	Query Optimizers.....	14-11
14.6	Query Optimization in NoSQL.....	14-11

**UNIT VI**

**Syllabus : Database Architectures** : Centralized and Client-Server Architectures, 2 Tier and 3 Tier Architecture, Introduction to Parallel Database, Key elements of Parallel Database Processing, Architecture of Parallel Databases, Introduction to Distributed Databases, Architecture of Distributed Databases, Distributed Database Design.

**Emerging Database Technology** : Introduction to NoSQL Database-Internet Databases, Cloud Databases, Mobile Databases , SQLite Databases , XML Databases.

**Chapter 15 : Database Architecture 15-1 to 15-22**

15.1	Client Server Architecture / Multiuser DBMS Architectures.....	15-1
15.1.1	Client-Server Architecture Types.....	15-1
15.1.1(A)	Single Tier Architecture / Centralized Database Architecture.....	15-1

15.1.1(B)	Two Tier Architecture.....	15-1
15.1.1(C)	Three Tier Architecture.....	15-2
15.1.1(D)	N Tier Architecture.....	15-3
15.1.1(E)	Goals of Client-Server Architecture.....	15-3
15.2	Parallel Databases System.....	15-4
15.2.1	Goals of Parallel Databases.....	15-5
15.3	System Parameters / Measures of Performance.....	15-5
15.3.1	Throughput-Output Efficiency.....	15-5
15.3.2	Response Time.....	15-5
15.3.3	Speed Up.....	15-5
15.3.4	Scale Up.....	15-5
15.4	Architecture of Parallel Databases.....	15-6
15.4.1	Types of Parallel Databases.....	15-6
15.4.1(A)	Shared Memory System.....	15-6
15.4.1(B)	Shared Disk System.....	15-6
15.4.1(C)	Shared Nothing Disk System.....	15-7
15.4.1(D)	Hierarchical System.....	15-8
15.5	Parallel Query Evaluation.....	15-8
15.5.1	Types of Parallel Query Evaluation.....	15-8
15.5.1(A)	Pipeline Parallelism.....	15-8
15.5.1(B)	Inter Query Parallelism.....	15-8
15.5.1(C)	Intra Query Parallelism.....	15-9
15.6	Introduction to Distributed Databases.....	15-10
15.6.1	Distributed Databases System Concepts.....	15-10
15.6.2	Advantages of Distributed Database System.....	15-11
15.6.3	Design Issues of Distributed Database System.....	15-12
15.7	Types of Distributed Databases.....	15-13
15.7.1	Homogeneous Distributed Database System.....	15-13
15.7.2	Heterogeneous Distributed Database System.....	15-13
15.8	Architecture of Distributed Databases.....	15-14
15.9	Data Fragmentation / Distributed Database Design.....	15-17
15.9.1	Introduction.....	15-18
15.9.2	Fragmentation Schema.....	15-18
15.9.3	Types of Data Fragmentation.....	15-18
15.9.3(A)	Horizontal Fragmentation.....	15-18
15.9.3(B)	Vertical Fragmentation.....	15-20
15.9.3(C)	Mixed (Hybrid) Fragmentation.....	15-20

<b>Chapter 16 : NoSQL Database</b>		<b>16-1 to 16-17</b>	
16.1	Introduction to NoSQL Database .....	16-1	
16.1.1	Case Study NoSQL (SQL vs NoSQL) .....	16-1	
16.1.2	Business Drivers of NoSQL.....	16-2	
16.1.3	Benefits of NoSQL.....	16-2	
16.2	Internet Database .....	16-3	
16.3	Mobile Databases.....	16-5	
16.3.1	Mobile Computing Architecture .....	16-5	
16.3.2	Characteristics of Mobile Environments .....	16-6	
16.4	Cloud Databases .....	16-7	
16.4.1	Cloud Features .....	16-7	
16.4.2	Cloud Types .....	16-7	
16.5	Mobile Cloud Computing (MCC) Architecture .....	16-9	
16.5.1	Benefits of Mobile Cloud Computing.....	16-10	
16.6	Introduction to SQLite Database .....	16-11	
16.6.1	Features of SQLite.....	16-11	
16.6.2	Applications of SQLite .....	16-11	
16.7	XML Document and Database.....	16-12	
16.7.1	Approaches for Storing XML Documents .....	16-12	
16.7.2	Extracting XML Documents from Relational Databases.....	16-12	
16.7.3	Breaking Cycles to Convert Graphs into Trees .....	16-14	
16.7.4	Other Steps for Extracting XML Documents from Databases.....	16-16	
16.8	MongoDB .....	16-16	
16.8.1	Collection and Document.....	16-16	
16.8.2	Document Database .....	16-16	
16.8.3	MongoDB Schema.....	16-17	
16.8.4	Comparision MongoDB and RDBMS.....	16-17
