

MODULE 1

Chapter 1 : Introduction to Analysis of Algorithm		1-1 to 1-27
1.1	Introduction.....	1-1
1.1.1	What is Algorithm?.....	1-1
1.1.2	Properties of Algorithm.....	1-1
1.1.3	How to Write an Algorithm ?.....	1-2
1.2	Performance Analysis.....	1-3
1.2.1	Space Complexity.....	1-3
1.2.2	Time Complexity.....	1-5
1.2.3	Growth of Function.....	1-6
1.2.4	Asymptotic Notation.....	1-7
1.2.4(A)	Big Oh.....	1-8
1.2.4(B)	Big Omega.....	1-9
1.2.4(C)	Big Theta.....	1-9
1.3	Mathematical Background for Algorithm Analysis.....	1-10
1.3.1	Framework for Analysis of Non-Recursive Algorithms.....	1-11
1.3.2	Framework for Analysis of Recursive Algorithms.....	1-14
1.4	Complexity Class.....	1-16
1.4.1	Introduction to Complexity Theory.....	1-16
1.4.2	P Problems.....	1-17
1.4.3	NP Problem.....	1-17
1.4.4	Difference between P and NP.....	1-18
1.4.5	NP-Completeness and Reducibility.....	1-18
1.4.6	NP-Completeness Proofs.....	1-19
1.4.6(A)	Vertex Cover Problem.....	1-19
1.4.6(B)	Clique Problem.....	1-21
1.4.7	NP-Hard Problem.....	1-21
1.4.8	Comparison between NP Hard and NP Complete.....	1-22
1.5	Analysis of Selection Sort and Insertion Sort.....	1-22
1.5.1	Selection Sort.....	1-22
1.5.2	Insertion Sort.....	1-24
Chapter 2 : Recurrence		2-1 to 2-7
2.1	The Substitution Method.....	2-1
2.2	Recursion Tree.....	2-4
2.3	Master Method.....	2-5

MODULE 2

Chapter 3 : Divide and Conquer		3-1 to 3-29
3.1	General Method.....	3-1
3.1.1	Introduction.....	3-1
3.1.2	Control Abstraction.....	3-2
3.1.3	Efficiency Analysis.....	3-2
3.1.4	Sorting.....	3-3
3.2	Merge Sort.....	3-3
3.3	Quick Sort.....	3-9
3.4	Binary Search.....	3-23
3.5	Min-Max Problem.....	3-26
3.6	Strassen's Matrix Multiplication.....	3-28

MODULE 3

Chapter 4 : Greedy Algorithms		4-1 to 4-38
4.1	General Method.....	4-1
4.1.1	Introduction.....	4-1
4.1.2	Control Abstraction.....	4-1
4.1.3	Characteristics.....	4-2
4.1.4	Applications of Greedy Approach.....	4-3
4.1.5	Divide and Conquer vs. Greedy Algorithms.....	4-3
4.1.6	Dynamic Programming Vs Greedy Approach.....	4-3
4.2	Single Source Shortest Path.....	4-3
4.3	Knapsack Problem.....	4-13
4.3.1	Fractional Knapsack Problem.....	4-13
4.4	Job Sequencing.....	4-16
4.5	Minimum Spanning Tree.....	4-19
4.5.1	Basics of Graph.....	4-19
4.5.2	Prim's Algorithm for MST.....	4-20
4.5.3	Kruskal's Algorithm.....	4-27
4.5.4	Difference between Prim's and Kruskal's Algorithm.....	4-35
4.6	Optimal Storage on Tapes.....	4-36
4.6.1	Storage on Single Tape.....	4-36
4.6.2	Storage on Multiple Tapes.....	4-37

MODULE 4

Chapter 5 : Dynamic Programming		5-1 to 5-61
5.1	General Method.....	5-1
5.1.1	Introduction.....	5-1
5.1.2	Control Abstraction.....	5-2
5.1.3	Characteristics of Dynamic Programming.....	5-2
5.1.4	Applications.....	5-2
5.2	Principle of Optimality.....	5-2
5.3	Elements of Dynamic Programming.....	5-3
5.4	Divide and Conquer Vs Dynamic Programming..	5-3

5.5	Multistage Graph	5-4
5.6	Single Source Shortest Path	5-7
5.7	All Pair Shortest Path	5-10
5.8	Assembly Line Scheduling	5-15
5.9	0/1 Knapsack	5-20
5.9.1	First Approach	5-20
5.10	Travelling Salesman Problem	5-45
5.11	Longest Common Subsequence	5-51

MODULE 5

Chapter 6 : Backtracking & Branch and Bound

6-1 to 6-35

6.1	Backtracking	6-1
6.1.1	General Method	6-1
6.1.1(A)	Introduction	6-1
6.1.1(B)	Terminology	6-2
6.1.2	Control Abstraction	6-3
6.1.2(A)	Recursive Backtracking Method	6-3
6.1.2(B)	Iterative Backtracking Method	6-4
6.1.3	Applications of Backtracking	6-4
6.1.4	8-Queen Problem	6-4
6.1.5	Sum of Subset Problem	6-8
6.1.6	Graph Coloring	6-15
6.2	Branch and Bound	6-18
6.2.1	General Method	6-18

6.2.2	Backtracking Vs Branch and Bound	6-19
6.2.3	Applications of Backtracking	6-20
6.2.4	Control Abstraction	6-20
6.2.4(A)	LC Search	6-20
6.2.4(B)	Control Abstraction for Least Cost Search	6-20
6.2.4(C)	Bounding	6-21
6.2.4(D)	Control Abstraction for FIFO Branch and Bound	6-21
6.2.5	15 Puzzle Problem	6-22
6.2.6	Travelling Salesman Problem	6-23
6.2.6(A)	LCBB using Static State Space Tree	6-23
6.2.6(B)	LCBB using Dynamic State Space Tree	6-31
6.2.7	Comparison between Divide and Conquer, Dynamic Programming and Backtracking	6-35

MODULE 6

Chapter 7 : String Matching

7-1 to 7-11

7.1	Introduction	7-1
7.2	The Naïve String Matching Algorithms	7-1
7.3	The Rabin Karp Algorithm	7-4
7.4	String Matching with Finite Automata	7-6
7.5	The Knuth-Morris-Pratt Algorithm	7-8
	• Lab Manual	L-1 to L-19
