

**UNIT I****Chapter 1 : Introduction to CIM****1-1 to 1-11****Syllabus :**

- 1.1 Traditional Product Cycle Diagram**-Role of Marketing, R&D, Design, PPC, Quality Control and Sales Departments. Disadvantages and Limitations of Traditional Product Cycle.
- 1.2 Current Production Needs**- Production Rate, Quality, Accuracy, Repeatability, Flexibility, Survival.
- 1.3 CIM**-Concept, Advantages and Benefits of CIM.
- 1.4 Elements of CIM**- Computer Aided Design (CAD), Computer Process Planning (CAPP), Computer Aided Manufacturing Control (CAMC), and Computer Aided Business Function (CABF).
- 1.5 CAD/CAM/CIM Product Cycle Diagram**- Customer, Marketing, Computer Aided Design (CAD), Computer Aided Process Planning (CAPP), Computer Aided Manufacturing Control (CAMC), Computer Aided Business Function (CABF)

1.1	Traditional (Conventional) Product Cycle.....	1-2
1.2	Advantages and Limitations of Traditional Product Cycle	1-3
1.2.1	Advantages of Traditional Product Cycle	1-3
1.2.2	Limitations of Traditional Product Cycle	1-3
1.3	Current Production Needs	1-3
1.4	CAD/CAM Product Cycle.....	1-4
1.5	Advantages and Limitations of CAD/CAM Product Cycle	1-5
1.5.1	Advantages of CAD/CAM Product Cycle	1-5
1.5.2	Limitations of CAD/CAM Product Cycle	1-6
1.6	Computer Integrated Manufacturing (CIM).....	1-6
1.6.1	Concept of Computer Integrated Manufacturing (CIM)	1-6
1.6.2	Benefits of CIM	1-7
1.6.3	Elements of CIM (Four Islands of Automation of CIM)	1-8
1.6.4	Computer Hardware Layout of CIM	1-10

UNIT II**Chapter 2 : Product Cycle Development through CIM****2-1 to 2-29****Syllabus :**

- 2.1 Computer Aided Design (CAD)**-Geometric, Modeling, Finite Element Analysis and Optimization, Evaluation and Design review (CAE), Concept of Concurrent Engineering, and List of software for CAE, Simulation, Automated Drafting and Generation of Report.
- 2.2 Computer Aided Process Planning (CAPP)**- Concept of CAPP, Structure of Processes Planning Software, Methods of CAPP- Variant, Generative. Computerized Material Resource Planning (CMRP), Computerized Work Scheduling.

2.3	Computer Aided Manufacturing Control (CAMC) - to generate computer program in machining. Interfacing part program to CNC. Computerized Control Monitoring and Control, Computer Aided Quality Control (CAQC).Programmable Logic Control (PLC), Software List like SCADA etc.
2.4	Computer Aided Business Functions (CABF) -Enterprise Resource Planning (ERP)-role of ERP in business, advantage and applications of ERP software, Material Resource Planning(MRP) –role of MRP in business, advantages and benefits. MRP softwares. Customer Relationship Management (CRM) - role of CRM in business, advantage and applications.CRM software.
2.5	Product Lifecycle Management (PLM) - role of PLM in business, advantage and applications. PLM software.
2.6	Supply Chain management (SCM) - role of SCM in business, advantage and applications. SCM software.

2.1	Systems of CIM.....	2-2
2.2	Computer Aided Design	2-2
2.2.1	Introduction to Computer Aided Design (CAD)	2-2
2.2.2	Processes in Computer Aided Design	2-3
2.2.3	Geometric Modeling	2-3
2.2.4	Comparison between Wire Frame Modeling and Solid Modeling	2-6
2.2.5	Geometry and Topology	2-7
2.2.6	Finite Element Analysis	2-8
2.2.7	Optimization	2-9
2.2.8	Evaluation and Engineering Review	2-9
2.2.9	Automated Drafting	2-9
2.2.10	Presentation of Report	2-9
2.2.11	CAE Software	2-10
2.2.12	Introduction to Concurrent Engineering	2-10
2.2.13	Concurrent Engineering	2-10
2.3	Computer Aided Process Planning (CAPP).....	2-11
2.3.1	Process Planning	2-11
2.3.2	Problems Associated with Conventional Process Planning	2-12
2.3.3	Computer Aided Process Planning (CAPP)	2-12
2.3.4	Types of Computer Aided Process Planning (CAPP)	2-12
2.3.5	Comparison between variant (retrieval) CAPP and generative CAPP system	2-15
2.3.6	Advantages (Benefits) of CAPP	2-15
2.3.7	Computerized Material Requirement Planning (CMRP)	2-16
2.4	Computer Aided Manufacturing and Control (CAMC)	2-17

2.4.1	Computer Aided Manufacturing (CAM)	2-17
2.4.2	Computer Aided Manufacturing and Control (CAMC)	2-18
2.4.3	Part Programming	2-18
2.4.4	Steps in Part Programming	2-18
2.4.5	Computer Aided Quality Control (CAQC)	2-19
2.4.6	Programmable Logic Control (PLC)	2-20
2.5	Computer Aided Business Functions.....	2-21
2.5.1	Computer Aided Business Functions (CABF)	2-21
2.5.2	Material Resource Planning (MRP)	2-21
2.5.3	Enterprise Resource Planning (ERP).....	2-23
2.5.4	Customer Relationship Management (CRM)	2-23
2.6	Introduction to Product Lifecycle Management (PLM).....	2-23
2.6.1	Role (Need) of Product Lifecycle Management	2-23
2.6.2	Product Lifecycle Management	2-24
2.6.3	Phases (Stages) of Product Lifecycle Management (PLM)	2-24
2.6.4	Benefits of Using Product Lifecycle Management	2-25
2.7	Introduction to Supply Chain Management	2-26
2.7.1	Steps in Supply Chain	2-26
2.7.2	Logistics and Supply Chain Management	2-26
2.7.3	Supply Chain Network (SCN)	2-27
2.7.4	Components Supply Chain Network	2-27
2.7.5	Example of Supply Chain Network	2-27
2.7.6	Supply Chain in Business	2-28

UNIT III**Chapter 3 : CIM Hardware, Software, Networking & DBMS****3-1 to 3-18****Syllabus :**

- 3.1 CIM Networking**-Types of Network and its Characteristics', Applications. Types of Network Topologies-Star, Bus and Ring Topology.
- 3.2 Component of Networking**-Application Software for CIM, Network Software and Network Hardware.
- 3.3 Data Base Management System (DBMS)** - Data Base Types - Hierarchical Data Base, Network Data Base, Relational Data Base, Object Oriented Data Base. Functions of Data Base Management System. Advantages of DBMS.

3.1	CIM Networking	3-2
3.1.1	Classification of Networks	3-2
3.2	Local Area Network (LAN) System	3-3
3.2.1	Advantages of LAN	3-4
3.2.2	Limitations of LAN	3-4
3.3	Types of Network Topologies	3-4
3.3.1	Bus (linear) Network	3-4
3.3.2	Ring (Loop) Network	3-5
3.3.3	Star (Radial) Network	3-6
3.3.4	Hybrid (Combined) Networks	3-7
3.4	Components of CIM Networking	3-8
3.4.1	CIM Network Hardware	3-8
3.5	Database Management System	3-9
3.5.1	Database	3-9
3.5.2	Database Management	3-9
3.5.3	Definition of Database	3-9
3.6	Functions (Application) of Database Management System (DBMS)	3-10
3.7	Advantages of Database Management System	3-11
3.8	Types of Database	3-13
3.8.1	Hierarchical Model	3-13
3.8.2	Network Model	3-15
3.8.3	Object Oriented Database Model	3-16
3.8.4	Relational Database Models	3-17
3.8.5	Comparison of All Data Models	3-18

UNIT IV**Chapter 4 : Group Technology and Flexible Manufacturing System****4-1 to 4-25****Syllabus :**

4.1 Group Technology - concept, basis for developing part families, part classification and coding with example, concept of cellular manufacturing. Advantages and limitations.

4.2 Flexible Manufacturing System - Introduction, concept, definition and need, sub systems of FMS, comparing with other manufacturing approaches.	
4.3 Major elements of FMS - workstations, material handling and storage system, computer control system and human resource.	
4.4 Classification based on flexibility - dedicated FMS, random order.	
4.5 Classification based on types of layouts - inline layout type, rotary layout, rectangular layout, loop layout type ladder layout type.	
4.6 Applications and benefits of FMS, advantages and disadvantages of FMS.	

4.1	Group Technology	4-2
4.1.1	Comparison of Process Layout and Group Technology (Cellular) Layout	4-2
4.1.2	Part Family	4-3
4.1.3	Machine Cells	4-4
4.2	Basis (Methods) of Grouping Parts into Part Families	4-5
4.2.1	Visual Inspection	4-6
4.2.2	Composite Part Method	4-6
4.2.3	Production Flow Analysis (PFA)	4-6
4.2.4	Parts Classification and Coding	4-7
4.3	Advantages and Limitations of Group Technology.....	4-9
4.3.1	Advantages of Group Technology	4-9
4.3.2	Limitations of Group Technology	4-10
4.4	Cellular Manufacturing.....	4-11
4.4.1	Objectives of Cellular Manufacturing	4-11
4.5	Introduction to Flexible Manufacturing Systems (FMS).....	4-11
4.5.1	Introduction and Definition of FMS	4-11
4.5.2	Need of FMS	4-12
4.5.3	Objectives (Requirements) of Flexible Manufacturing Systems	4-12
4.5.4	Flexibilities in Flexible Manufacturing System	4-13
4.6	Major Elements (Subsystems) of Flexible Manufacturing System (FMS).....	4-15
4.7	Classification (Types) of Flexible Manufacturing Systems	4-16
4.7.1	Classification of FMS Based on Number of Machines	4-17
4.7.2	Classification of FMS Based on Flexibility of System	4-19
4.7.3	Classification of FMS Based on Type of Layout	4-20

4.8	Advantages, Limitations and Applications of Flexible Manufacturing Systems.....	4-22
4.8.1	Advantages (Benefits) of Flexible Manufacturing Systems	4-22
4.8.2	Limitations of Flexible Manufacturing Systems	4-23
4.8.3	Applications of Flexible Manufacturing Systems	4-23
4.9	Planning and Implementation of Flexible Manufacturing System.....	4-23
4.10	Comparison of Types of Manufacturing Systems	4-24

UNIT V

Chapter 5 : Automation

5-1 to 5-14

Syllabus :

- 5.1 Automation** - Define, need of automation, high and low cost automation, examples of automations.
- 5.2 Elements of automation** - Power source, control unit and feedback control.
- 5.3 Types of Automations** - Fixed (Hard) ,automation, programmable automations and Flexible automations (Soft).Comparison of types of automations .
- 5.4 Strategies in Automation** - Simplification, specializations of operations, multiple operations, integration of work stations, increased flexibility, automated material handling storage system, on line inspection, on line monitoring, processes control and optimization, control of plant operations and computer integrated manufacturing.

5.1	Automation.....	5-2
5.1.1	Definition of Automation	5-2
5.1.2	Need for Automation	5-2
5.1.3	High and Low Cost Automation	5-3
5.2	Elements of Automation	5-4
5.3	Types of Automation	5-5
5.3.1	Comparison of Types of Automation Systems	5-6
5.4	Advantages and Limitations of Automation.....	5-7
5.4.1	Advantages of Automation	5-7
5.4.2	Limitations of Automation	5-9
5.5	Migration to Automation.....	5-10
5.6	Strategies in Automation	5-11
5.7	Stages of Automation.....	5-13

**UNIT VI****Chapter 6 : Robotics****6-1 to 6-44****Syllabus :**

- 6.1 Introduction to robotics** - definition of robot and robotics, advantages disadvantages.
- 6.2 Basic components of robot** - manipulator, end effectors, actuators, sensors, controller, processor and software.
- 6.3 Robot joints** - linear, orthogonal, rotational, twisting and revolving.
- 6.4 Degree of freedom of robot** - vertical, radial, rotational traverse, wrist pitch, wrist yaw, wrist roll.
- 6.5 Actuators** - mechanical, hydraulic, pneumatic and electric.
- 6.6 End effectors** - grippers and types.
- 6.7 Robot sensors** - classification of sensors.
- 6.8 Basic configuration of robot** - Cartesian, cylindrical, polar(spherical)
- 6.9 Applications of robot** - loading, unloading, material handling, processing operations, assembly and inspection.

6.1	Introduction to Industrial Robot.....	6-2
6.1.1	RIA Definition of Robot	6-2
6.1.2	Generations of Robots	6-2
6.1.3	Advantages of Robots	6-2
6.1.4	Limitations (Disadvantages) of Robots	6-3
6.1.5	Robotics	6-3
6.2	Basic Components (Anatomy) of Robot.....	6-4
6.3	Robot Joints	6-6
6.4	Degrees of Freedom of Robot	6-7
6.4.1	Degrees of Freedom of Arm	6-8
6.4.2	Degrees of Freedom of End Effector (Wrist)	6-8
6.5	End Effectors of Robot	6-8
6.5.1	End Effectors and Types of End Effectors	6-8
6.5.2	Types of Grippers	6-9
6.5.3	Factors to be Considered in Selection of Grippers (End Effectors)	6-15
6.5.4	Design of Grippers	6-17
6.6	Manipulators.....	6-22
6.7	Actuators (Drives) for Robots	6-22

6.7.1	Mechanical Actuators	6-23
6.7.2	Hydraulic Actuators	6-26
6.7.3	Pneumatic Actuators	6-26
6.7.4	Electric Actuators	6-26
6.7.5	Comparison of Electric, Hydraulic and Pneumatic Actuators	6-27
6.8	Robot Controllers	6-28
6.9	Robot Sensors.....	6-29
6.9.1	Types of Sensors	6-29
6.10	Types of Robots	6-31
6.10.1	Non-Servo-Controlled Robots	6-31
6.10.2	Servo-Controlled Robots	6-32
6.11	Types of Basic Configurations of Robot.....	6-33
6.11.1	Cartesian Configuration Robots	6-33
6.11.2	Cylindrical Configuration Robots	6-34
6.11.3	Spherical (Polar) Configuration Robots	6-34
6.11.4	Articulated (Jointed-Arm) Configuration Robots	6-35
6.12	Suitability of Robots.....	6-36
6.13	Applications of Robots in Manufacturing Industry	6-37
6.13.1	Machine Loading and Unloading	6-37
6.13.2	Material Handling	6-38
6.13.3	Welding	6-38
6.13.4	Spray Painting	6-39
6.13.5	Machining Operations	6-39
6.13.6	Assembly	6-39
6.13.7	Inspection	6-39
6.14	Applications of Robots in Other Areas.....	6-40
6.15	Methods of Robot Programming.....	6-41
6.16	Parameters in Robot Specifications and Selection of Robot.....	6-41
6.16.1	Typical Specifications of Robot	6-43
	• Time Management Sheet for Writing Answers	T-1
	• Model Question Papers.....	Q- 1 to Q-4
