

Chapter 1 : Introduction to Wireless Communication Systems 1-1 to 1-44

Syllabus : Evolution of mobile communications, Mobile Radio System around the world, Types of Wireless communication System, Comparison of Common wireless system, Trend in Cellular radio and personal communication. Second generation Cellular Networks, Third Generation (3G) Wireless Networks , Wireless Local Loop(WLL),Wireless Local Area network(WLAN), Bluetooth and Personal Area Networks.

<p>1.1 Introduction1-2</p> <p> 1.1.1 Wireless Communication1-2</p> <p> 1.1.2 Need of Wireless Communication1-2</p> <p>1.2 Evolution of Mobile Communications1-3</p> <p>1.3 Mobile Radiotelephony in the U.S.1-4</p> <p> 1.3.1 Cellular Radiotelephony1-4</p> <p> 1.3.2 AMPS1-4</p> <p> 1.3.3 Spectrum Allocated to the U.S. Cellular Radio Service1-5</p> <p> 1.3.4 Digital Cellular Telephony1-5</p> <p> 1.3.5 CDMA Based Systems1-5</p> <p>1.4 Mobile Radio Systems Around the World1-6</p> <p> 1.4.1 AMPS1-6</p> <p> 1.4.2 Narrowband-AMPS (N-AMPS)1-7</p> <p> 1.4.3 CDMA IS-951-8</p> <p> 1.4.4 GSM (Global System for Mobile Communications)1-8</p> <p> 1.4.5 UMTS (Universal Mobile Telecommunication Service)1-8</p> <p> 1.4.6 CDMA 20001-9</p> <p>1.5 Examples of Wireless Communication Systems1-9</p> <p> 1.5.1 Important Definitions1-9</p> <p> 1.5.2 Paging Systems1-10</p> <p> 1.5.3 Cordless Telephone Systems1-12</p> <p> 1.5.4 Cellular Telephone System1-12</p> <p> 1.5.5 Comparison of Wireless Systems1-15</p> <p>1.6 Trends in Cellular Radio and Personal Communications1-16</p>	<p>1.6.1 Advantages of Wireless Communication Systems1-17</p> <p>1.6.2 Disadvantages of Wireless Communication Systems1-17</p> <p>1.6.3 Applications of Wireless Communication Systems1-17</p> <p>1.7 Wireless Generations1-17</p> <p> 1.7.1 First Generation Cellular Networks1-18</p> <p>1.8 Growth of Cellular Communication1-19</p> <p>1.9 Second Generation Cellular Networks1-20</p> <p> 1.9.1 Types of 2G Standards1-20</p> <p> 1.9.2 Technical Specifications1-21</p> <p> 1.9.3 Features of 2G Systems1-22</p> <p> 1.9.4 Evolution to 2.5G Mobile Radio Networks1-22</p> <p> 1.9.5 Evolution for 2.5-G TDMA Standards1-24</p> <p> 1.9.5.1 HSCSD for 2.5-G GSM1-24</p> <p> 1.9.5.2 GPRS for 2.5- G GSM and IS-1361-24</p> <p> 1.9.5.3 EDGE for 2.5-G GSM and IS-1361-26</p> <p> 1.9.6 IS-95 B for 2.5-G CDMA1-27</p> <p> 1.9.7 Comparison of HSCSD, GPRS and EDGE1-28</p> <p>1.10 Third Generation (3-G) Wireless Networks1-28</p> <p> 1.10.1 Features of Third Generation1-28</p> <p> 1.10.2 Services Provided by 3G Systems1-29</p> <p> 1.10.3 Advantages of 3-G Networks1-29</p> <p> 1.10.4 3G W-CDMA (UMTS)1-30</p> <p> 1.10.5 Comparison of GSM and W-CDMA1-31</p> <p> 1.10.6 Comparison of Various Mobile System Generations1-32</p> <p>1.11 Fixed Wireless Networks1-32</p> <p> 1.11.1 Wireless Local Loop (WLL)1-33</p> <p> 1.11.2 Wireless Local Area Network (WLAN)1-33</p> <p>1.12 Bluetooth and Personal Area Networks1-36</p> <p> 1.12.1 Principle of Bluetooth1-37</p> <p> 1.12.1 Radio interface1-37</p>
--	--

1.13	Bluetooth Architecture	1-38	2.5.2	Dynamic Channel Assignment (DCA)	2-11
1.13.1	Piconets	1-38	2.5.3	Hybrid Channel Assignment	2-12
1.13.2	Scatternets	1-39	2.5.4	Difference Between FCA and DCA	2-12
1.13.3	Comparison of Piconet and Scatternet	1-40	2.6	Cellular System Operation and Planning	2-12
1.14	Bluetooth Protocol Stack	1-40	2.6.1	System Architecture	2-12
1.14.1	Logical Link Control and Adaptation Protocol (L2CAP)	1-42	2.6.2	Location Updating and Call Setup	2-13
1.14.2	Applications of Bluetooth	1-43	2.7	Hand Off	2-14
	• Review Questions	1-44	2.7.1	Handoff Strategies	2-15
Chapter 2 : The Cellular Concept		2-1 to 2-32	2.7.2	Dwell Time	2-16
Syllabus : The Cellular Concept : System Design Fundamentals : Cellular system, Hexagonal geometry cell and concept of frequency reuse, Channel Assignment Strategies, Distance to frequency reuse ratio, Channel and co-channel interference reduction factor, S/I ratio consideration and calculation for Minimum Co-channel and adjacent interference, Handoff Strategies, Umbrella Cell Concept, Improving Coverage and Capacity in Cellular System-Cell splitting, Cell sectorization, Repeaters, Micro cell zone concept, Channel antenna system design considerations.			2.7.3	Different Types of Hand Offs	2-16
2.1	Cellular Concept.....	2-2	2.7.4	Cell Dragging	2-17
2.1.1	Advantages of Cellular Concept	2-2	2.7.5	Comparison of Hard and Soft Handoffs	2-18
2.2	The Basic Cellular System	2-2	2.7.6	Comparison of Delayed and Queued Handoffs	2-18
2.2.1	Structure of Cellular Phone System	2-3	2.7.7	Umbrella Cell Approach	2-18
2.2.2	Advantages of Cellular Concept	2-4	2.7.8	Prioritizing Handoffs	2-18
2.3	Hexagonal Cell Geometry	2-5	2.8	Interference and System Capacity	2-19
2.4	Frequency Reuse	2-6	2.8.1	Co-channel Interference and System Capacity	2-20
2.4.1	Advantages of Frequency Reuse	2-6	2.8.2	The S/I Ratio of a Mobile System	2-21
2.4.2	Frequency Reuse Schemes	2-6	2.8.3	Channel Planning for Wireless Systems	2-23
2.4.3	Analysis of Frequency Reuse Concept	2-7	2.8.4	Adjacent Channel Interference	2-23
2.4.4	Capacity of Cellular System (C)	2-7	2.8.5	Power Control for Reducing Interference	2-24
2.4.5	Frequency Reuse Distance	2-8	2.9	Improving Coverage and Capacity in Cellular Systems	2-24
2.4.6	Selection of Cluster Size	2-9	2.9.1	Cell Splitting	2-25
2.5	Channel Assignment Strategies	2-11	2.9.2	Cell Sectoring	2-26
2.5.1	Fixed Channel Assignment (FCA)	2-11	2.9.3	Repeaters for Range Extension	2-28
			2.9.4	A Microcell Zone Concept	2-29
			2.9.5	Comparison between Cell Sectoring and Cell Splitting	2-29
			2.9.6	Types of Cells	2-30
			2.10	Channel Antenna System Design Considerations	2-30
			2.10.1	Antenna Requirements.....	2-30
				• Review Questions	2-32

Chapter 3 : Mobile Radio Propagation 3-1 to 3-42

Syllabus : Mobile Radio Propagation Model, Small Scale Fading and diversity : Large scale path loss : Free Space Propagation loss equation, Path-loss of NLOS and LOS systems, Reflection, Ray ground reflection model, Diffraction, Scattering, Link budget design, Maximum Distance Coverage formula, Empirical formula for path loss, Indoor and outdoor propagation models, Small scale multipath propagation, Statistical models for multipath fading channels and diversity techniques in brief.

<p>3.1 Introduction3-2</p> <p> 3.1.1 Radio Wave Propagation3-2</p> <p> 3.1.2 Multipath Propagation3-3</p> <p> 3.1.3 Multipath Fading.....3-3</p> <p>3.2 Propagation Models3-3</p> <p>3.3 Free Space Propagation Model3-4</p> <p> 3.3.1 Friis Free Space Equation3-5</p> <p> 3.3.2 EIRP3-5</p> <p> 3.3.3 Path Loss3-5</p> <p> 3.3.4 Validity of Friis Model3-6</p> <p> 3.3.5 Fraun-hofer Region3-6</p> <p> 3.3.6 Received Power in Terms of Reference Distance3-6</p> <p>3.4 Basic Propagation Mechanisms3-8</p> <p>3.5 Reflection3-8</p> <p> 3.5.1 Reflection from Dielectrics3-8</p> <p> 3.5.2 Plots of Reflection Coefficients3-10</p> <p> 3.5.3 Brewster Angle3-11</p> <p> 3.5.4 Reflection from Perfect Conductors ...3-12</p> <p>3.6 Ground Reflection (Two Ray) Model3-12</p> <p> 3.6.1 Advantages of Two Ray Model3-14</p> <p>3.6.2 Disadvantage of Two Ray Model3-14</p> <p>3.7 Diffraction3-15</p> <p> 3.7.1 Huygen’s Principle3-15</p> <p> 3.7.2 Fresnel Zone Geometry3-15</p> <p> 3.7.3 Knife-edge Diffraction Model3-17</p> <p> 3.7.4 Multiple Knife-Edge Diffraction3-18</p>	<p>3.8 Scattering3-19</p> <p>3.9 Link Budget Design3-20</p> <p> 3.9.1 Log-Distance Path Loss Model3-20</p> <p> 3.9.2 Log-normal Shadowing3-21</p> <p>3.10 Maximum Distance Coverage Formula3-21</p> <p>3.11 Empirical Formula for Path Loss3-22</p> <p>3.12 Outdoor Propagation Models3-23</p> <p> 3.12.1 Okumura Propagation Model3-23</p> <p> 3.12.2 Hata Model3-25</p> <p> 3.12.3 Longley-Rice Propagation Model3-25</p> <p> 3.12.4 Durkin’s Propagation Model3-26</p> <p>3.13 Indoor Propagation Models3-27</p> <p> 3.13.1 Partition Losses (Same Floor of a Building)3-27</p> <p> 3.13.2 Partition Losses between Floors3-28</p> <p> 3.13.3 Log-distance Path Loss Model3-29</p> <p> 3.13.4 Ericsson Multiple Breakpoint Model3-29</p> <p> 3.13.5 Attenuation Factor Model3-29</p> <p>3.14 Signal Penetration into Buildings3-31</p> <p>3.15 Concept of Fading3-31</p> <p> 3.15.1 Small Scale Multipath Propagation3-32</p> <p> 3.15.2 Effects of Small Scale Fading3-32</p> <p> 3.15.3 Coherence Bandwidth3-33</p> <p> 3.15.4 Doppler Shift3-33</p> <p> 3.15.5 Types of Small Scale Fading3-34</p> <p>3.16 Statistical Models for Multipath Fading Channels3-35</p> <p> 3.16.1 Clarke’s Model for Flat Fading3-35</p> <p> 3.16.2 Simulation of Clarke and Gans Fading Model3-36</p> <p> 3.16.3 Level crossing and Fading Statistics3-36</p> <p> 3.16.4 Two-Ray Rayleigh Fading Model3-36</p> <p> 3.16.5 Saleh and Valenzuela Indoor Statistical Model3-37</p> <p>3.17 Diversity Reception3-38</p> <p>3.18 Diversity Techniques3-38</p>
---	---

3.19 Types of Diversity Techniques 3-39	4.5.7 CDMA Applications4-13
3.19.1 Space Diversity 3-40	4.6 Spread-Spectrum Multiple Access (SSMA)4-13
3.19.2 Polarization Diversity 3-40	4.6.1 Model of Spread Spectrum Modulation System4-14
3.19.3 Frequency Diversity 3-41	4.6.2 Types of Spread Spectrum Technique 4-15
3.19.4 Time Diversity 3-41	4.7 Direct Sequence Spread Spectrum (DSSS) Multiple Access4-15
• Review Questions..... 3-41	4.7.1 Advantages of DS-SS System4-16
Chapter 4 : Multiple Access Techniques 4-1 to 4-28	4.7.2 Disadvantages of DS-SS System4-17
Syllabus : Introduction, Comparisons of multiple Access Strategies TDMA,CDMA, FDMA, OFDM, CSMA Protocols.	4.7.3 Applications of DS-SS System4-17
4.1 Multiple Access.....4-2	4.8 Frequency Hop Spread Spectrum (FH-SS) Multiple Access4-17
4.1.1 Frequency Division Duplexing (FDD)4-2	4.8.1 Operation of FHSS4-18
4.1.2 Time Division Duplexing (TDD)4-3	4.8.2 Types of Frequency Hopping4-18
4.2 Multiple Access Techniques4-3	4.8.3 Advantages of FH-SS System4-19
4.2.1 Types of Multiple Access Based on the Bandwidth Availability4-4	4.8.4 Disadvantages of FH-SS System4-19
4.3 Frequency Division Multiple Access (FDMA)4-4	4.8.5 Applications of FHSS4-19
4.3.1 Features of FDMA4-4	4.8.6 Comparison of DS-SS and FHSS4-19
4.3.2 Nonlinear Effects in FDMA4-5	4.9 Orthogonal Frequency Division Multiplexing (OFDM)4-19
4.3.3 Number of FDMA Channels4-5	4.9.1 Orthogonality4-20
4.3.4 Merits of FDMA4-6	4.9.2 Assigning the Subcarriers4-20
4.3.5 Demerits of FDMA4-6	4.9.3 Generation of OFDM Signals4-21
4.4 Time Division Multiple Access (TDMA)4-6	4.9.4 OFDM-PAPR (OFDM-Peak-to-peak Average Power Ratio)4-21
4.4.1 Number of Channels in TDMA System4-7	4.9.5 Comparison of FDM and OFDM4-22
4.4.2 Efficiency of TDMA System4-7	4.10 OFDMA (Orthogonal Frequency Division Multiple Access)4-22
4.4.3 TDMA Features4-8	4.10.1 Features of OFDMA4-23
4.4.4 Advantages of TDMA4-8	4.10.2 Disadvantage of OFDMA4-23
4.4.5 Advantages of TDMA over FDMA4-8	4.10.3 Applications of OFDMA4-23
4.4.6 Disadvantages of TDMA4-9	4.11 CSMA Protocols4-24
4.4.7 Problems with FDMA and TDMA4-9	4.11.1 Types of CSMA4-24
4.5 Code Division Multiple Access (CDMA)4-9	4.11.2 Flow diagram of CSMA-CA4-24
4.5.1 Spread Spectrum and CDMA 4-10	4.11.3 RTS/CTS Handshake4-24
4.5.2 Basic Structure of CDMA System 4-11	4.11.4 Types of CSMA / CA4-26
4.5.3 Salient Features of CDMA Systems 4-11	4.12 Comparison of Multiple Access Strategies4-27
4.5.4 Multiple Access Techniques in Cellular Systems 4-12	• Review Questions..... 4-28
4.5.5 Advantages of CDMA 4-13	
4.5.6 Disadvantages 4-13	

**Chapter 5 : Wireless Systems-GSM 5-1 to 5-40**

Syllabus : GSM system architecture, Radio interface, Protocols, Localization and calling, Handover, Authentication and security in GSM, GSM speech coding.

5.1	Global System for Mobile (GSM).....	5-2	5.6.6	LAI (Location Area Identity)	5-16
5.2	GSM System Architecture	5-2	5.6.7	IMSEI (International MS Equipment Identity) / IMEI (International Mobile Equipment Identity)	5-17
5.2.1	Detail Architecture of GSM	5-3	5.6.8	MS Roaming Number (MSRN)	5-17
5.2.2	Various Subsystems in GSM	5-4	5.6.9	TMSI [Temporary Mobile Subscriber Identity]	5-18
5.2.3	MS (Mobile Station)	5-4	5.7	GSM Channels	5-18
5.2.4	BSS (Base Station Subsystem)	5-5	5.8	GSM Logical Channel	5-18
5.2.5	NSS (Network Switching Subsystem)	5-5	5.8.1	GSM Traffic Channels (TCHs)	5-19
5.2.6	OMSS : Operation and Maintenance Subsystem	5-7	5.8.2	GSM Control Channels (CCH)	5-19
5.2.7	Characteristics / Features of GSM Standard	5-7	5.9	Frame Structure of GSM System	5-21
5.3	GSM Radio Interface	5-8	5.10	GSM Burst Structures	5-22
5.3.1	GSM air Interface Specifications	5-10	5.10.1	Normal Burst / Frame Structure of GSM System	5-22
5.4	GSM Signalling Protocol Architecture	5-11	5.10.2	Frequency Correction Burst	5-23
5.4.1	GSM Interfaces	5-12	5.10.3	Synchronization Burst	5-23
5.4.2	Mobile Station-Base Transceiver Station Signaling Protocols	5-12	5.10.4	Access Burst	5-24
5.4.3	Abis Interface / Base Transceiver Station (BTS)-Base Station Controller (BSC) Signaling Protocols	5-13	5.10.5	Dummy Burst	5-24
5.4.4	A Interface / Base Station Controller (BSC) – Mobile Switching Centre (MSC) Signaling Protocols	5-14	5.11	Call Routing in GSM	5-24
5.5	Signalling System - 7 (SS7)	5-14	5.11.1	An Example of Call Routing	5-26
5.5.1	Primary Characteristics of SS7	5-14	5.12	PLMN Interfaces.....	5-28
5.5.2	Functions of SS7	5-14	5.13	Calling in GSM	5-28
5.5.3	Features of SS7	5-14	5.13.1	Location Updating	5-29
5.6	GSM Addresses and Identifiers	5-14	5.13.2	Mobile Terminated Call	5-29
5.6.1	IMSI (International Mobile Subscriber Identity)	5-15	5.13.3	Mobile Originated Call	5-30
5.6.2	MSIN (Mobile Subscriber Identification Number)	5-15	5.14	GSM Handoff or Handover	5-30
5.6.3	MSRN (Mobile Station Roaming Number)	5-15	5.14.1	Handover in GSM	5-31
5.6.4	Subscriber Identity Module (SIM)	5-16	5.14.2	Types of Handovers in GSM	5-31
5.6.5	Mobile System ISDN (MSISDN)	5-16	5.15	Security in GSM	5-32
			5.15.1	Access Control and Authentication	5-32
			5.15.2	Confidentiality	5-33
			5.15.3	Anonymity	5-33
			5.15.4	Authentication in GSM	5-33
			5.15.5	Authentication Algorithm A-3	5-34
			5.15.6	Data Encryption Process using A-5 and A-8 Algorithm	5-34
			5.16	GSM Services	5-35
			5.16.1	Teleservices	5-35

5.16.2	Data Services / Bearer Services	5-36	6.7	Forward and Reverse Channel Modulation Process	6-16
5.16.3	Bearer Services	5-36	6.7.1	Forward Channel Modulation Process	6-16
5.16.4	Supplementary Services	5-37	6.7.2	Reverse Channel Modulation Process	6-16
5.17	Applications of GSM	5-37	6.8	IS-95 CDMA Call Processing	6-16
5.17.1	Other Applications of GSM	5-39	6.9	IS-95 CDMA Packet and Frame Format	6-17
5.18	Advantages of GSM	5-39	6.9.1	IS-95 Forward Channels Frame Format	6-17
5.19	Disadvantages of GSM	5-39	6.9.2	Frame Formats of Reverse Channel	6-19
	• Review Questions	5-39	6.10	Handoffs in IS-95 CDMA	6-20
Chapter 6 : Wireless Systems-IS-95		6-1 to 6-32	6.10.1	Soft handoff	6-20
Syllabus : Concept of spread spectrum, Architecture of IS-95 CDMA system, Air interface, CDMA forward channels, CDMA reverse channels, Soft handoff, CDMA features, CDMA 2000 cellular technology, GPRS system architecture.			6.10.2	Hard handoff	6-20
6.1	Introduction to 2G Cellular Systems	6-2	6.10.3	Inter-sector or Softer handoff	6-20
6.1.1	Evolution from 2G to 3G Cellular Networks	6-2	6.10.4	Soft-softer handoff	6-21
6.2	Interim Standard CDMA IS-95	6-2	6.11	Comparison of GSM and IS-95	6-21
6.2.1	Types of Channels in IS-95 System	6-3	6.12	Advantages of CDMA IS-95	6-21
6.3	Frequency and Channel Specifications of CDMA IS-95	6-3	6.13	Disadvantages of CDMA IS-95	6-22
6.3.1	Frequency Specifications of IS-95	6-4	6.14	Evolution from GSM to 3G Networks	6-22
6.3.2	Features of CDMA IS-95	6-4	6.15	GPRS - General Packet Radio Service	6-23
6.3.3	Forward Link	6-4	6.15.1	Features of GPRS	6-23
6.3.4	Reverse Link	6-5	6.15.2	GPRS Architecture	6-24
6.3.5	Interferences in CDMA IS-95 System	6-5	6.15.3	Advantages of GPRS	6-25
6.4	CDMA IS-95 System Architecture	6-6	6.15.4	Disadvantages of GPRS	6-25
6.5	CDMA Air Interface	6-7	6.15.5	Applications of GPRS	6-26
6.5.1	Classification of CDMA IS-95 Channels	6-10	6.15.6	Comparison of GSM and GPRS	6-26
6.5.2	IS-95 Air interface Standards	6-11	6.16	Need of 3G Technology	6-26
6.6	IS - 95 CDMA Channel Structure	6-11	6.16.1	Advantages of 3G Wireless Networks	6-27
6.6.1	The IS-95 CDMA Forward Channels	6-11	6.16.2	Disadvantages of 3G Wireless Networks	6-27
6.6.2	The IS-95 CDMA Reverse Channels	6-13	6.16.3	Applications of 3G Networks	6-27
6.6.3	Comparison of Forward and Reverse IS-95 CDMA Channels	6-15	6.16.4	Various 3G Standards	6-27
			6.17	CDMA 2000 Technology	6-28
			6.17.1	Advanced Versions of CDMA 2000	6-28
			6.17.2	Specifications of CDMA 2000	6-29
			6.17.3	Forward and Reverse Channels	6-29
			6.17.4	Handoff and Power Control	6-29
			6.17.5	Features of CDMA 2000	6-30
			6.17.6	Advantages of CDMA 2000	6-30

6.17.7	Disadvantages of CDMA 2000	6-30	7.9.3	802.11 Network Architecture	7-13
6.17.8	Comparison of IS-95 and CDMA 2000	6-30	7.9.4	Types of Stations	7-14
	• Review Questions	6-31	7.10	The Physical Layer	7-15
Chapter 7 : Recent Trends		7-1 to 7-44	7.10.1	Various PHY Specifications	7-15
Syllabus : Introduction to Wi-Fi, WiMAX, ZigBee Networks, Software Defined Radio, UWB Radio, Wireless Adhoc Network and Mobile Portability, Security issues and challenges of Wireless networks.					
7.1	Introduction to WLAN/Wi-Fi.....	7-2	7.11	MAC Sublayer	7-16
7.1.1	IEEE Standards	7-2	7.11.1	RTS and CTS Messages	7-16
7.1.2	Wi-Fi	7-2	7.11.2	The Retry Counters	7-17
7.1.3	ISM Band	7-2	7.11.3	Distributed Co-ordination Function (DCF)	7-17
7.2	Architectural Comparison of Wired and Wireless LANs	7-3	7.11.4	Hidden Station Problem	7-19
7.3	WLAN Equipment	7-4	7.12	Point Co-ordinate Function (PDF)	7-19
7.3.1	LAN Adapter	7-4	7.12.1	Fragmentation	7-20
7.3.2	Access Point (AP)	7-4	7.12.2	Exposed Station Problem	7-20
7.3.3	Outdoor LAN Bridges	7-5	7.13	Framing in WLAN	7-20
7.4	Characteristics of WLANs	7-5	7.13.1	Advantages of WLANs	7-22
7.4.1	Attenuation	7-5	7.13.2	Disadvantages of WLAN	7-22
7.4.2	Interference	7-6	7.13.3	Applications of Wireless LAN	7-22
7.4.3	Multipath Propagation	7-6	7.14	Wireless MAN (WMAN)	7-23
7.4.4	Error	7-6	7.14.1	Wi-MAX	7-23
7.5	Design Goals for WLANs	7-6	7.14.2	Wi-Bro (Wireless Broadband)	7-23
7.5.1	Factors Considered to Deploy WLAN	7-7	7.14.3	Need of WMAN.....	7-23
7.6	Medium Access Control	7-8	7.15	IEEE 802.16 (Wi-MAX)	7-24
7.7	MAC Protocol Issues	7-8	7.15.1	Wi-Max Standards	7-24
7.7.1	Hidden Terminal Problem	7-9	7.15.2	Structure of WMAN	7-24
7.7.2	Exposed Station Problem	7-9	7.15.3	IEEE Project 802.16 (Wi-Max)	7-25
7.8	WLAN Technologies	7-10	7.15.4	Spectrum Allocation	7-25
7.8.1	IR (Infrared) Technology	7-10	7.15.5	Specifications of IEEE 802.16	7-25
7.8.2	UHF Narrowband Technology	7-11	7.15.6	Advantages of IEEE 802.16 (Wi-MAX)	7-26
7.8.3	Spread Spectrum Technology	7-11	7.15.7	Disadvantages of Wi-MAX	7-26
7.9	IEEE 802.11 Standard for WLAN	7-12	7.15.8	Uses / Applications of Wi-Max	7-26
7.9.1	Classification of WLANs	7-12	7.15.9	Comparison of WiFi and WiMax.....	7-26
7.9.2	The IEEE 802.11 Protocol Stack	7-12	7.16	Wireless PAN (WPAN)	7-27
			7.17	ZigBee (IEEE 802.15.4)	7-27
			7.17.1	Features of ZigBee	7-27
			7.17.2	Radio Specifications	7-28
			7.18	ZigBee Topologies	7-28
			7.18.1	Star Topology	7-28
			7.18.2	Mesh (Peer to Peer) Topology	7-28
