

**Chapter 1 : Introduction to Image Processing** **1-1 to 1-9**

1.1	Introduction.....	1-1
1.2	What do we Mean by Image Processing ?.....	1-1
1.3	Images .....	1-2
1.4	The Electromagnetic Spectrum.....	1-3
1.5	Units of Intensity.....	1-3
1.6	The Inverse Square Law .....	1-4
1.7	The Human Visual System.....	1-4
1.7.1	Image Formation in Eye .....	1-6
1.7.2	Visual Phenomena .....	1-6
1.8	Object Recognition .....	1-9

**Chapter 2 : Image Sensing and Acquisition** **2-1 to 2-17**

2.1	Introduction.....	2-1
2.2	Image Types .....	2-7
2.3	Image File Formats .....	2-15

**Chapter 3 : Sampling and Quantization** **3-1 to 3-13**

3.1	Introduction.....	3-1
3.2	Sampling.....	3-1
3.3	Quantization.....	3-5
3.3.1	Difference between Spatial and Tonal Resolutions .....	3-8
3.4	Isopreference Curves .....	3-8
3.5	Non-uniform Sampling.....	3-9
3.6	Point Spread Function.....	3-9
3.7	Physical Resolution.....	3-11

**Chapter 4 : Image Enhancement in Spatial Domain** **4-1 to 4-41**

4.1	Introduction .....	4-1
4.2	Spatial Domain Methods .....	4-1
4.3	Point Processing.....	4-2
4.4	Neighbourhood Processing.....	4-12
4.4.1	Low Pass Filtering (Smoothing) .....	4-13
4.4.2	Noise .....	4-13
4.4.3	Low Pass Averaging Filter.....	4-14
4.4.4	Low Pass Median Filtering.....	4-18
4.5	Highpass Filtering .....	4-20
4.6	High-Boost Filtering .....	4-22
4.7	Zooming.....	4-24
4.7.1	Replication .....	4-24
4.7.2	Linear Interpolation.....	4-25
4.8	Solved Examples .....	4-27

**Chapter 5 : Histogram Modeling** **5-1 to 5-33**

5.1	Introduction .....	5-1
5.2	Linear Stretching .....	5-3
5.3	Histogram Equalization .....	5-6
5.4	Histogram Specification .....	5-15
5.5	Additional Examples on Histogram Modeling.....	5-21

**Chapter 6 : Image Enhancement in Frequency Domain** **6-1 to 6-42**

6.1	Introduction .....	6-1
6.2	The Fourier Transform .....	6-1
6.3	1-Dimensional Fourier Transform.....	6-3
6.4	2-Dimensional Fourier Transform.....	6-5
6.4.1	Properties of Discrete Fourier Transform .....	6-8
6.4.2	Image Enhancement in Frequency Domain.....	6-16

6.5 Low Pass Frequency Domain Filters ..... 6-17

6.5.1 Ideal Low Pass Filter (ILPF) ..... 6-18

6.5.2 Butterworth Low Pass Filters (BLPF)..... 6-21

6.5.3 Gaussian Low Pass Filter (GLPF) ..... 6-22

6.6 High Pass Frequency Domain Filters ..... 6-24

6.6.1 Ideal High Pass Filters (IHPF)..... 6-24

6.6.2 Butterworth High Pass Filters (BHPF) ..... 6-25

6.6.3 Gaussian High Pass Filters (GHPF)..... 6-26

6.6.4 High Boost Filtering (Unsharp Masking / High Frequency Emphasis) ..... 6-27

6.7 Homomorphic Filtering ..... 6-28

6.8 Periodic Noise (Sinusoidal Noise) ..... 6-30

6.9 Relationship between Filtering in the Spatial and Frequency Domain ..... 6-33

6.9.1 Generating  $h(x, y)$  from  $H(u, v)$  : ..... 6-33

6.9.2 Generating  $H(u, v)$  from  $h(x, y)$  ..... 6-34

6.9.3 Comparison of Spatial Domain Processing and Transform Domain Processing..... 6-35

**Chapter 7 : Image Segmentation 7-1 to 7-62**

7.1 Introduction..... 7-1

7.2 Image Segmentation based on Discontinuities ..... 7-2

7.2.1 Point Detection ..... 7-2

7.2.2 Line Detection ..... 7-2

7.2.3 Edge Detection ..... 7-3

7.3 Detection of Edges..... 7-4

7.3.1 Computing the Gradient ..... 7-5

7.4 Finding Gradients using Masks ..... 7-6

7.4.1 Roberts Mask ..... 7-7

7.4.2 Prewitts and Sobel Operators..... 7-8

7.4.3 Compass Operators..... 7-11

7.5 Image Segmentation using the Second Derivative- The Laplacian.....7-13

7.5.1 Canny Edge Detector.....7-17

7.6 Edge Linking .....7-17

7.6.1 Local Processing.....7-17

7.6.2 Hough Transform .....7-18

7.7 Global Processing via Graph - Theoretic Techniques .....7-34

7.8 Connectivity .....7-36

7.9 Distance Transform .....7-38

7.10 Region based Segmentation (Segmentation based on Similarities) .....7-40

7.10.1 Region Growing.....7-41

7.10.2 Region Splitting .....7-44

7.10.3 Region Merging .....7-46

7.10.4 Split and Merge.....7-46

7.11 Image Segmentation based on Thresholding.....7-48

7.11.1 Global Thresholding .....7-49

7.11.2 Local Thresholding .....7-50

7.11.3 Optimum Thresholding .....7-53

7.12 Edge Relaxation.....7-54

7.13 Border Tracing.....7-55

7.14 Additional Solved Examples.....7-56

**Chapter 8 : Image Compression 8-1 to 8-42**

8.1 Introduction ..... 8-1

8.2 Redundant and Irrelevant Data..... 8-1

8.3 Error Criteria ..... 8-2

8.3.1 Objective Error Criteria..... 8-2

8.3.2 Subjective Error Criteria ..... 8-3

8.4 Lossless Compression Techniques..... 8-3

8.4.1 Dictionary based Coding..... 8-4

8.4.1(A) Run Length Encoding (RLE) ..... 8-4

8.4.2 Statistical Coding..... 8-4

8.4.3 Huffman Encoding..... 8-5

8.5 Arithmetic Coding..... 8-9

8.6 Lossy Compression ..... 8-16

8.6.1 Improved Grey Scale (IGS) Quantization..... 8-16

8.6.2 Predictive Coding (Differential Pulse Code Modulation - DPCM) ..... 8-21

8.6.3 Transform Coding (JPEG Coding) ..... 8-22

8.7 Image Compression Model..... 8-30

8.7.1 Comparison of Lossless Compression and Lossy Compression..... 8-32

8.8 Vector Quantization..... 8-41

8.9 Data Redundancies ..... 8-41

**Chapter 9 : Colour Image Processing 9-1 to 9-17**

9.1 Introduction..... 9-1

9.2 Colour Models..... 9-2

9.2.1 RGB Colour Model ..... 9-2

9.2.2 NTSC Colour Model..... 9-4

9.2.3 YCbCr Colour Model ..... 9-6

9.2.4 CMY and CMYK Models ..... 9-7

9.2.5 HSI Colour Model ..... 9-8

9.3 Pseudo-Colouring ..... 9-10

9.4 Full-Colour Image Processing..... 9-11

9.4.1 Colour Image Smoothing (Low Pass Averaging) ..... 9-12

9.4.2 Colour Image Sharpening High Pass Filtering..... 9-14

9.5 Colour Segmentation..... 9-15

9.5.1 Segmentation using HSI Model ..... 9-15

9.5.2 Segmentation using RGB Model..... 9-16

**Chapter 10 : Wavelet Transform 10-1 to 10-17**

10.1 Introduction .....10-1

10.2 Short Time Fourier Transform (STFT).....10-2

10.3 Wavelet Decomposition .....10-3

10.4 The Continuous Wavelet Transform (CWT).....10-3

10.5 Multi-Resolution Analysis .....10-5

10.6 The Scaling Function.....10-6

10.7 The Discrete Wavelet Transform (DWT).....10-8

10.8 Hierarchical Filter Bank for Wavelet Decomposition .....10-9

10.9 Relationship between Filters and Wavelet Shapes.....10-11

10.10 The Two-Dimensional Discrete Wavelet Transform.....10-13

10.11 Extra References.....10-16

**Chapter 11 : Introduction to Video 11-1 to 11-13**

11.1 Introduction .....11-1

11.2 Basics of Video ..... 11-1

11.3 Persistence of Vision.....11-2

11.4 Scanning.....11-2

11.4.1 Horizontal Scanning.....11-3

11.4.2 Vertical Scanning.....11-3

11.4.3 Blanking Interval .....11-4

11.4.4 Aspect Ratio.....11-4

11.4.5 Interlaced and Progressive Scanning .....11-4

11.4.5(A) Progressive Scanning .....11-4

11.4.5(B) Interlaced Scanning.....11-5

11.5 Gamma Correction .....11-6

11.6 Colour Video Signals .....11-6

11.7 Composite Video .....11-7

11.8 Component Video .....11-8

11.9	Digital Video .....	11-9	12.4.2	Pixel based Region of Support .....	12-4
11.9.1	Sampling of Video Signals.....	11-9	12.4.3	Block based Region of Support .....	12-4
11.9.2	The Rec.601 Video Format.....	11-10	12.4.4	Object based Region of Support .....	12-5
11.9.3	Digital Video from a Digital Camera .....	11-10	12.5	Motion Estimation Methods .....	12-5
11.9.4	Process of Capturing Digital Image / Video.....	11-11	12.6	Motion Estimation Algorithms.....	12-6
11.10	Interline Transfer .....	11-11	12.6.1	Phase Correlation Method.....	12-6
11.11	Frame Transfer .....	11-12	12.6.2	Optical Flow Equation.....	12-6
11.12	Advantages of Digital Video.....	11-12	12.6.3	Block Matching Method.....	12-8
<b>Chapter 12 : Motion Estimation</b>			<b>12-1 to 12-10</b>		
12.1	Introduction.....	12-1	12.7	Search Techniques .....	12-8
12.2	2-D Motion and Optical Flow .....	12-2	12.7.1	Exhaustive Search Block Matching Algorithm (EMBA).....	12-8
12.3	Motion Estimation .....	12-3	12.7.2	Hierarchical Search Method .....	12-9
12.4	Region of Support.....	12-4	12.8	Video Segmentation .....	12-9
12.4.1	Global Region of Support .....	12-4	12.8.1	Video Coding Standards .....	12-9
