Unit 1 : Matrices - I 1-1 to 1-36

1.1 Introduction 1-1
1.2 Matrix 1-1
1.3 Algebra of Matrices 1-1
1.3.1 Equality of Matrices 1-1
1.3.2 Addition/Subtraction of Matrices 1-1
1.3.3 Scalar Multiplication 1-2
1.3.4 Multiplication 1-2
1.3.5 Transpose Matrix 1-3
1.3.6 Properties of Matrices 1-3
1.3.6(A) Properties of Addition and Subtraction 1-3
1.3.6(B) Properties of Matrix Multiplication 1-3
1.3.6(C) Properties of Scalar Multiplication 1-3
1.3.6(D) Properties of the Transpose of a Matrix 1-3
1.4 Types of Matrices 1-3
1.4.1 Row and Column Matrices 1-3
1.4.2 Zero /Null Matrix 1-4
1.4.3 Square Matrix 1-4
1.4.4 Diagonal Matrix 1-4
1.4.5 Scalar Matrix 1-4
1.4.6 Unit/Identity Matrix 1-4
1.4.7 Upper Triangular Matrix 1-4
1.4.8 Lower Triangular Matrix 1-4
1.4.9 Symmetric Matrix 1-4
1.4.10 Skew-Symmetric Matrix 1-4
1.5 Determinants 1-4
1.5.1 Easy Way to Find Determinant 1-5
1.5.1(A) Laplace's Expansion 1-5
1.5.1(B) Sarru's Scheme for the 3 × 3 Determinant 1-5
1.5.2 Properties of Determinants 1-5
1.6 Other Properties 1-5
1.6.1 Singular & Non-Singular 1-5
1.6.2 Minor of an Element 1-5
1.6.3 Cofactor of a_{ij} 1-6
1.6.4 Adjoint of a Matrix 1-6
1.6.5 Inverse of A 1-6
1.6.5(A) Inverse by Adjoint Method 1-6
1.6.5(B) Quick Approach to Find Inverse of a Matrix 1-6
1.7 Elementary Transformations of Matrix 1-7
1.8 Equivalent Matrix 1-7
1.9 Minor in Non-Square Matrix 1-7
1.10 The Rank of Matrix 1-7
1.10.1 Definition 1-7
1.10.2 Methods to Find Rank of Matrix 1-7
1.10.2(A) Echelon Form 1-8
1.10.2(B) Normal Form 1-10
1.10.3 Properties of Rank 1-12
1.11 System of Linear Algebraic Equations 1-13
1.11.1 Linear Equations and Matrix Notation 1-13
1.11.2 Existence of Solution of System of Linear Equations 1-13
1.11.3 Geometric Interpretation 1-14
1.11.4 Augmented Matrix (A, B) 1-14
1.11.5 Independent and Dependent Variables 1-15
1.11.6 Solution of Non-homogeneous System of Linear Equations 1-15
1.11.7 Methods of Solutions of System of Linear Equations 1-15
1.11.7(A) Rank Method 1-15
1.11.7(B) Inverse Method (for the case m=n) 1-23
1.11.8 System of Homogeneous Equations 1-24
1.12 Vectors, Linearly Dependent and Independent Vectors 1-27
1.12.1 Linear Combination of Vectors 1-27
1.12.2 Linearly Dependent Vectors 1-27
1.12.3 Linearly Independent Vectors 1-27
1.13 Linear Transformation 1-31
1.14 Orthogonal Transformation 1-33
1.15 Orthogonal Matrix 1-34

Unit 2 : Matrices - II 2-1 to 2-39

2.1 Introduction 2-1
2.2 Eigen Values and Eigen Vectors 2-1
2.2.1 Characteristic Vectors or Eigen Vectors 2-2
2.3 Properties of Eigen Values and Eigen Vectors 2-2
2.3.1 Properties of Eigen Values 2-2
2.3.2 Properties of Eigen Vectors 2-3
2.4 Important Results 2-3
2.5 Eigen Values and Eigen Vectors for Symmetric & Non-Symmetric Matrix 2-3
2.6 Method to Find Eigen Values and Eigen Vectors for given Matrix A of Order 3 × 3 2-4
2.6.1 Type I : Matrix with Non-repeated Eigen Values 2-4
2.6.2 Type II : Matrix with Repeated Eigen Values 2-11
2.7 Cayley-Hamilton Theorem 2-18
2.8 Steps for Problem Solving 2-19
2.9 Similar Matrices 2-23
2.10 Diagonalization of a Matrix 2-24
2.11 Powers of Matrix 2-24
2.12 Quadratic Form 2-29
2.12.1 Matrix Representation of Quadratic Form 2-30
2.13 Change of Variable in Quadratic Form 2-30
2.14 The Principal Axes Theorem 2-30
2.14.1 Geometrical Meaning of Principal Axes 2-30

TechKnowledge Publications

2.15 Reduction of Quadratic Form to Canonical Form 2-31
2.15.1 Index and Signature of the Quadratic Form 2-31
2.15.2 Definiteness and Eigen Values 2-31
2.16 Reduction of Quadratic Form to Canonical Form by Orthogonal Transformation 2-32
2.17 Matrix Transformation 2-37
2.17.1 Rotation 2-37
2.17.2 Reflection 2-38
2.17.3 Translation 2-38
2.17.4 Scaling 2-39

Unit 3 : Differential Calculus - I 3-1 to 3-27

3.1 Introduction 3-1
3.2 Rolle's Theorem 3-1
3.2.1 Alternative Statement of Rolle's Theorem 3-1
3.3 Lagrange's Mean Value Theorem [First Mean Value Theorem of Differential Calculus] ... 3-4
3.3.1 Alternative Statement of Lagrange's Mean Value Theorem 3-5
3.4 Cauchy's Mean Value Theorem [Second Mean Value Theorem] 3-10
3.4.1 Alternative Statement of Cauchy's Mean Value Theorem [CMVT] 3-10
3.5 Successive Derivative 3-13
3.5.1 Derivation of n^{th} Differential Coefficient of some Standard Functions .. 3-13
3.6 n^{th} Derivative using Partial Fraction 3-18
3.6.1 Partial Fraction 3-18
3.7 Leibnitz's Theorem 3-23

Unit 4 : Differential Calculus - II 4-1 to 4-22

4.1 Introduction 4-1
4.2 Maclaurin's Theorem 4-1
4.2.1 Standard Expansion 4-1
4.3 Alternative Methods to Find Expansion of Functions 4-4
4.3.1 Use of Differentiation and Integration 4-4
4.3.2 Use of Substitutions 4-5
4.3.3 Use of Standard Expansion 4-6
4.4 Taylor's Theorem 4-9
4.5 Indeterminate Forms 4-12
4.5.1 L'Hospital Rule (or Cauchy's Rule) 4-12
4.5.2 Transformation of $\frac{\infty}{\infty}$, $0 \times \infty$ and $\infty - \infty$ Forms to $\frac{0}{0}$ Form 4-13
4.5.3 Steps to Solve Problems on Indeterminate Forms $\frac{0}{0}$, $\frac{\infty}{\infty}$, $0 \times \infty$ and $\infty - \infty$ 4-14
4.5.4 The Indeterminate Forms 0^0, ∞^0, 1^∞ 4-18

Unit 5 : Differential Equations 5-1 to 5-28

5.1 Introduction 5-1
5.1.1 Ordinary Differential Equation (ODE) 5-1
5.1.2 Partial Differential Equation (PDE) 5-1
5.1.3 Order of a Differential Equation 5-1
5.1.4 Degree of a Differential Equation 5-2
5.1.5 Formation of DE 5-2
5.2 Solution of a Differential Equation and Arbitrary Constants 5-3
5.2.1 Variable Separable Form (V.S. Form) 5-4
5.2.2 Reducible to Variable Separable Form by Substitution 5-4
5.2.3 Homogeneous Differential Equation 5-6
5.2.4 Non-Homogeneous Differential Equations Reducible to Homogeneous Form 5-8
5.2.5 Exact Differential Equation 5-12
5.2.6 Reducible to Exact Differential Equation ... 5-14
5.2.7 Rules to Find Integrating Factor 5-14
5.2.8 Linear Differential Equations [L.D.E.] 5-20
5.2.9 Differential Equations Reducible to Linear D.E. 5-24
5.2.10 Transforming into Polar Form 5-28

Unit 6 : Applications of Differential Equations 6-1 to 6-19

6.1 Introduction 6-1
6.2 Orthogonal Trajectories 6-1
6.2.1 Family of Curves 6-1
6.2.2 Trajectories 6-1
6.2.3 Orthogonal Trajectories 6-1
6.2.4 Procedure to Find Orthogonal Trajectory 6-2
6.3 Newton's Law of Cooling 6-4
6.4 Simple Electric Circuit 6-7
6.5 Kirchhoff's Voltage Law 6-7
6.5.1 L-R Circuit 6-7
6.5.2 R-C Circuit 6-8
6.6 Rectilinear Motion 6-11
6.6.1 D'Alembert's Principle 6-11
6.7 One Dimensional Heat Flow 6-16

TechKnowledge Publications
