

**UNIT I****Chapter 1 : Basics of Cloud Computing 1-1 to 1-56**

Syllabus : Overview, Applications, Intranets and the Cloud, Your Organization and Cloud Computing- Benefits, Limitations, Security Concerns. Software as a Service (SaaS) -Understanding the Multitenant Nature of SaaS Solutions, Understanding SOA, Platform as a Service (PaaS) - IT Evolution Leading to the Cloud, Benefits of PaaS Solutions, Disadvantages of PaaS Solutions, Infrastructure as a Service (IaaS) - Understanding IaaS, Improving Performance through Load Balancing, System and Storage Redundancy, Utilizing Cloud-Based NAS Devices, Advantages, Server Types, Identity as a Service (IDaaS)

1.1	Introduction to Cloud Computing.....	1-1
1.1.1	Concept Building – Consuming Services -vs- Owning Products	1-1
1.1.2	What is Cloud Computing ?	1-2
1.1.3	Goals of Cloud Computing.....	1-3
1.1.4	Applications of Cloud Computing	1-5
1.1.5	Advantages of Cloud Computing.....	1-6
1.1.6	Disadvantages of Cloud Computing.....	1-6
1.2	Origins and Influences	1-6
1.3	Basic Concepts and Terminologies	1-7
1.4	Security, Risks and Challenges in Cloud Computing.	1-10
1.4.1	Concept Building - Shared Responsibility Model.....	1-10
1.4.2	Cloud Security Risks and Countermeasures	1-11
1.5	Roles in Cloud Computing	1-20
1.6	Boundaries in Cloud Computing.....	1-21
1.7	Cloud Characteristics.....	1-22
1.7.1	On-Demand Self-Service	1-22
1.7.2	Broad Network Access.....	1-23
1.7.3	Resource Pooling	1-23
1.7.4	Rapid Elasticity	1-24
1.7.5	Measured Service.....	1-24
1.8	Cloud Delivery (Service) Models	1-25
1.8.1	Concept Building – Service Delivery Models	1-25
1.8.2	Cloud Service Models.....	1-25
1.8.2(A)	Software as a Service (SaaS).....	1-26
1.8.2(B)	Platform as a Service (PaaS).....	1-28
1.8.2(C)	Infrastructure as a Service (IaaS).....	1-29
1.8.3	Resource Management-Wise Comparison.....	1-32
1.8.4	Characteristics-Wise Comparison	1-32

1.8.5	Cloud Pyramid	1-32
1.9	Cloud Deployment Models.....	1-33
1.9.1	Private Cloud	1-33
1.9.2	Public Cloud	1-34
1.9.3	Community Cloud	1-36
1.9.4	Hybrid Cloud.....	1-36
1.9.5	Comparison of Cloud Deployment Models	1-38
1.10	Summary of Cloud Characteristics, Service Model, and Deployment Model	1-38
1.10.1	Types of Cloud	1-38
1.10.2	Intercloud or Federated Cloud	1-39
1.11	Cloud Enabling Technologies	1-39
1.11.1	Broadband Networks and Internet Architecture	1-40
1.11.2	Data Center Technology	1-42
1.11.3	Virtualization Technology.....	1-43
1.11.4	Web Technology.....	1-44
1.11.5	Multi-tenant Technology.....	1-46
1.11.5(A)	Comparison between Single-Tenant and Multi-Tenant Applications.....	1-47
1.11.6	Service Technology or Service Oriented Architecture (SOA).....	1-47
1.12	Identity as a Service (IDaaS)	1-48
1.12.1	IAM Challenges in the Cloud.....	1-49
1.12.2	Identity Management Lifecycle.....	1-50
1.12.3	Types of Identity Providers Used in the Cloud.....	1-51
1.12.4	Identity Federation	1-52
1.12.4(A)	Components of Identity Federation	1-53

UNIT II**Chapter 2 : Data Storage and Security in Cloud****2-1 to 2-28**

Syllabus : Cloud file systems : GFS and HDFS, Bigtable, HBase, and Dynamo, Cloud data stores : Datastore and SimpleDB, Gautam Shrauf, Cloud Storage - Overview, Cloud Storage Providers. Securing the Cloud - General Security Advantages of Cloud-Based Solutions, Introducing Business Continuity and Disaster Recovery, Disaster Recovery - Understanding the Threats

2.1	Cloud File Systems	2-1
2.1.1	General Architecture of Cloud File Systems.....	2-2
2.1.1(A)	Client-Server Architecture	2-2
2.1.1(B)	Cluster-based Architecture.....	2-2
2.2	Google File System (GFS).....	2-3
2.2.1	Characteristics and Features of GFS	2-3
2.2.2	Architecture of GFS	2-4

2.3	Hadoop Distributed File System (HDFS).....	2-4	3.2.1	Physical Server / Hardware.....	3-2
2.3.1	Characteristics and Features of HDFS.....	2-4	3.2.2	Virtualization Layer	3-2
2.3.2	Architecture of HDFS	2-5	3.2.3	Virtual Machines (VM).....	3-4
2.4	Bigtable	2-5	3.2.4	Guest Operating System (OS)	3-6
2.4.1	Characteristics and Features of Bigtable.....	2-6	3.2.5	Applications (App).....	3-7
2.4.2	Architecture of Bigtable.....	2-6	3.2.6	Summary of Mapping Virtualization Components to Cloud Computing	3-8
2.5	HBase.....	2-8	3.3	Advantages / Needs / Applications / Goals of Virtualization.....	3-8
2.5.1	Characteristics and Features of HBase.....	2-8	3.3.1	Server Consolidation and Resource Optimisation	3-9
2.5.2	Architecture of HBase	2-8	3.3.2	Improved Productivity and Operational Efficiency	3-9
2.6	Dynamo	2-9	3.3.3	Cost Savings	3-10
2.6.1	Characteristics and Features of Dynamo	2-10	3.3.4	Improved Security	3-10
2.6.2	Architecture of Dynamo	2-10	3.3.5	Improved Resiliency	3-11
2.7	Cloud Data Stores	2-11	3.4	Challenges / Limitations of Virtualization	3-12
2.7.1	Google Cloud Datastore	2-11	3.4.1	Could be a Single Point of Failure	3-12
2.7.1(A)	Comparison Between Cloud Datastore and Relational Database.....	2-12	3.4.2	Not Everything can be Virtualized	3-12
2.7.1(B)	How Google Cloud Datastore Works.....	2-12	3.4.3	Requires Skilled Staff	3-13
2.7.2	Amazon SimpleDB.....	2-13	3.4.4	Virtual Machine Sprawl	3-13
2.7.2(A)	How Amazon SimpleDB Works.....	2-13	3.4.5	Capacity Planning is Hard	3-13
2.7.3	Cloud Storage (Overview and Providers)	2-14	3.4.6	Managing Licenses	3-14
2.8	Securing the Cloud	2-14	3.5	Implementation Levels of Virtualization	3-14
2.8.1	Security Advantages of Cloud-Based Solutions	2-14	3.5.1	Instruction Set Architecture (ISA) Level Virtualization.....	3-14
2.8.1(A)	Cloud Based Benefits	2-15	3.5.2	Hardware Abstraction Layer (HAL) Level Virtualization.....	3-15
2.8.1(B)	Staffing and Expertise.....	2-15	3.5.3	Operating System Level Virtualization.....	3-15
2.8.1(C)	Cross Pollination.....	2-15	3.5.4	Library Level Virtualization	3-16
2.8.2	Business Continuity and Disaster Recovery	2-15	3.5.5	Application Level Virtualization	3-17
2.8.2(A)	Benefits of Business Continuity Planning	2-16	3.5.6	Comparison between various Implementation Levels of Virtualization	3-19
2.8.2(B)	Types of Disruptive Events (or Threats)	2-16	3.6	Virtualization Structures / Tools and Mechanisms	3-19
2.8.2(C)	Business Continuity Planning Process	2-19	3.6.1	Type 1 : Baremetal Hypervisor	3-19
2.8.2(D)	Business Continuity in the Cloud Era	2-25	3.6.1(A)	Xen	3-20
UNIT III					
Chapter 3 : Virtualization	3-1 to 3-52				
Syllabus : Implementation Levels of Virtualization, Virtualization Structures / Tools and Mechanisms, Types of Hypervisors, Virtualization of CPU, Memory and I/O Devices, Virtual Clusters and Resource Management, Virtualization for Data-Center Automation, Common Standards, The Open Cloud Consortium, Open Virtualization Format, Standards for Application Developers, Browsers (Ajax), Data (XML, JSON), Solution Stacks (LAMP and LAPP), Syndication (Atom, Atom Publishing Protocol and RSS), Standards for Security					
3.1	Introduction to Virtualization.....	3-1	3.6.2	Type 2 : Hosted Hypervisor	3-22
3.2	Core Components of Virtualization.....	3-2	3.6.3	Comparison between Type 1 and Type 2 Hypervisor	3-23
			3.6.4	Types of Hardware-Level Virtualization	3-23
			3.6.4(A)	Full Virtualization using Binary Translation	3-24
			3.6.4(B)	OS Assisted Virtualization or Paravirtualization	3-25
			3.6.4(C)	Hardware-Assisted Virtualization	3-26
			3.6.4(D)	Comparison between Types of Hardware-Level Virtualization	3-27
			3.7	Virtualization of CPU, Memory and I/O Devices	3-27
			3.7.1	CPU Virtualization	3-27
			3.7.2	Memory Virtualization	3-28
			3.7.3	I/O Device Virtualization	3-28

3.8	Virtual Clusters and Resource Management.....	3-29	4.1	Services Offered by Amazon Web Services (AWS)	4-1
3.8.1	Virtual Clusters	3-29	4.1.1	Amazon EC2	4-3
3.8.2	Characteristics of Virtual Clusters	3-30	4.1.1(A)	Characteristics and Features of EC2.....	4-3
3.8.3	Live VM Migration.....	3-31	4.1.1(B)	Creating an EC2 Instance.....	4-4
3.8.3(A)	Advantages of Live VM Migration.....	3-31	4.1.2	Amazon Virtual Private Cloud (VPC).....	4-11
3.8.3(B)	Live VM Migration Steps	3-31	4.1.2(A)	Characteristics of Amazon VPC.....	4-11
3.9	Virtualization for Data Center Automation	3-33	4.1.2(B)	Creating a VPC.....	4-14
3.9.1	Nimbus	3-33	4.2	AWS Storage and Content Delivery.....	4-15
3.9.2	Eucalyptus	3-34	4.2.1	Amazon S3.....	4-15
3.9.3	OpenNebula	3-35	4.2.1(A)	Characteristics and Features of S3	4-15
3.9.4	OpenStack.....	3-35	4.2.1(B)	Creating an Amazon S3 Bucket	4-16
3.9.5	VMware vSphere	3-36	4.2.1(C)	Managing Objects in S3.....	4-22
3.10	Common Standards.....	3-37	4.2.2	Amazon EBS	4-29
3.10.1	The Open Cloud Consortium / The Open Commons Consortium (OCC).....	3-38	4.2.2(A)	Characteristics and Features of Amazon EBS	4-29
3.10.2	Open Virtualization Format (OVF).....	3-38	4.2.2(B)	Creating and Attaching an EBS Volume to an EC2 Instance.....	4-30
3.10.2(A)	Characteristics of OVF	3-39	4.2.2(C)	Amazon EBS Snapshots.....	4-32
3.10.2(B)	Lifecycle of an OVF based Virtual System	3-39	4.2.3	Amazon EFS	4-35
3.10.3	AJAX	3-40	4.2.3(A)	Characteristics and Features of Amazon EFS.....	4-35
3.10.4	XML	3-40	4.3	Amazon CloudFront.....	4-35
3.10.5	JSON.....	3-41	4.3.1	Characteristics and Features of Amazon CloudFront.....	4-37
3.10.5(A)	Comparison between JSON and XML	3-42	4.4	Amazon Elastic Load Balancing Service	4-38
3.10.6	Solution Stack - LAMP and LAPP	3-42	4.4.1	Introduction to Load Balancers	4-38
3.10.7	Syndication.....	3-43	4.4.1(A)	Load Balancer Algorithms (Method, Schemes, Techniques).....	4-38
3.10.7(A)	Really Simple Syndication (RSS).....	3-45	4.4.1(B)	Performance Benefits of using a Load Balancer.....	4-39
3.10.7(B)	Atom	3-46	4.4.2	Introduction to Amazon ELB	4-40
3.11	Standards for Security	3-48	4.4.2(A)	Characteristics and Features of Amazon ELB.....	4-41
3.11.1	Transport Layer Security (TLS).....	3-48	4.4.2(B)	Comparison between Types of ELB	4-41
3.11.2	Identity Federation	3-49	4.4.2(C)	Creating and Verifying ELB.....	4-41

UNIT IV**Chapter 4 : Amazon Web Services 4-1 to 4-48**

Syllabus : Services offered by Amazon, Hands-on Amazon , EC2 - Configuring a server, Virtual Amazon Cloud, AWS Storage and Content Delivery, Identify key AWS storage options, Describe Amazon EBS, Creating an Elastic Block Store Volume, Adding an EBS Volume to an Instance, Snapshotting an EBS Volume and Increasing, Performance, Create an Amazon S3 bucket and manage associated objects, AWS Load Balancing Service, Introduction, Elastic Load Balancer, Creating and Verifying Elastic Load Balancer

UNIT V**Chapter 5 : Ubiquitous Clouds and the Internet of Things 5-1 to 5-27**

Syllabus : Cloud Trends in Supporting Ubiquitous Computing, Performance of Distributed Systems and the Cloud, Enabling Technologies for the Internet of Things (RFID, Sensor Networks and ZigBee Technology, GPS), Innovative Applications of the Internet of Things (Smart Buildings and Smart Power Grid, Retailing and Supply-Chain Management, Cyber-Physical System), Online Social and Professional Networking

5.1	Cloud Trends in Supporting Ubiquitous Computing.....	5-1
5.1.1	Cloud Mashup	5-2
5.1.1(A)	Advantages of Cloud Mashup	5-3
5.1.1(B)	Disadvantages of Cloud Mashup	5-3
5.1.2	Mobile Cloud Computing.....	5-3
5.1.2(A)	Comparison between Cloud and Cloudlet	5-4
5.2	Performance of Distributed Systems and the Cloud	5-4
5.3	Enabling Technologies for the Internet of Things	5-6
5.3.1	Architecture of IoT	5-6
5.3.2	Radio-Frequency Identification (RFID)	5-8
5.3.2(A)	How RFID Works ?	5-9
5.3.2(B)	Application of RFID in IoT	5-9
5.3.2(C)	Advantages of RFID.....	5-10
5.3.2(D)	Disadvantages of RFID.....	5-10
5.3.3	Wireless Sensor Networks (WSN)	5-10
5.3.4	ZigBee Technology.....	5-10
5.3.4(A)	Benefits of ZigBee	5-11
5.3.4(B)	ZigBee Technical Specifications	5-11
5.3.4(C)	ZigBee Architecture	5-12
5.3.5	Global Positioning System (GPS)	5-13
5.3.5(A)	How GPS Works?.....	5-14
5.3.5(B)	IoT with GPS	5-15
5.4	Benefits of using Wireless Network for Ubiquitous Computing.....	5-15
5.5	Challenges and Outlook of Ubiquitous Systems.....	5-16
5.6	Innovative Applications of the Internet of Things	5-16
5.6.1	Smart Buildings.....	5-17
5.6.2	Smart Power Grid	5-18
5.6.2(A)	Characteristics of Smart Power Grid	5-19
5.6.2(B)	Applications of Smart Power Grid	5-19
5.6.3	Retailing and Supply-Chain Management	5-19
5.6.4	Cyber-Physical System (CPS)	5-21
5.6.4(A)	Architecture of CPS	5-21
5.7	Online Social and Professional Networking.....	5-22
5.7.1	Facebook.....	5-22

5.7.1(A)	Architecture of Facebook	5-23
5.7.2	Twitter.....	5-24
5.7.2(A)	Architecture of Twitter.....	5-24

UNIT VI**Chapter 6 : Future of Cloud Computing 6-1 to 6-23**

Syllabus : How the Cloud Will Change Operating Systems,
Location-Aware Applications, Intelligent Fabrics, Paints
and More, The Future of Cloud TV, Future of
Cloud-Based Smart Devices, Faster Time to Market for
Software Applications, Home-Based Cloud Computing,
Mobile Cloud, Autonomic Cloud Engine, Multimedia
Cloud, Energy Aware Cloud Computing, Jungle
Computing, Docker at a Glance : Process Simplification,
Broad Support and Adoption, Architecture, Getting the
Most from Docker, The Docker Workflow

6.1	How the Cloud Will Change Operating Systems	6-1
6.2	Location-Aware Applications	6-2
6.3	Intelligent Fabrics.....	6-4
6.4	Intelligent Paint	6-5
6.5	The Future of Cloud TV	6-5
6.6	Future of Cloud-Based Smart Devices	6-7
6.7	Faster Time to Market for Software Applications	6-7
6.8	Home-Based Cloud Computing	6-9
6.9	Mobile Cloud.....	6-9
6.10	Autonomic Cloud Engine	6-9
6.11	Multimedia Cloud	6-11
6.12	Energy Aware Cloud Computing	6-12
6.13	Jungle Computing	6-13
6.14	Docker at a Glance	6-14
6.14.1	Architecture of Docker	6-14
6.14.2	Building a Docker Image	6-15
6.14.3	Docker Workflow	6-16
6.14.4	Process Simplification	6-18
6.14.5	Broad Support and Adoption	6-19
6.14.6	Getting the Most from Docker	6-21
6.14.7	Comparison between VMs and Containers	6-22
