

UNIT I

Chapter 1 : Embedded Systems 1-1 to 1-11

Syllabus : Introduction to Embedded systems, Characteristics, Challenges, Processors in Embedded systems, hardware Unit s and devices in an embedded system - Power source, memory, real-time clocks, timers, reset circuits, watchdog-timer reset, Input-output ports, buses and interfaces, ADC, DAC, LCD, LED, Keypad, pulse dialer, modem, transceivers, embedded software, software are tools for designing an embedded system.

- ✓ **Syllabus Topic :** Introduction to Embedded Systems 1-1
- 1.1 Introduction to Embedded Systems 1-1
- ✓ **Syllabus Topic :** Characteristics, Challenges 1-2
- 1.2 Characteristics and Challenges of Embedded System 1-2
- 1.2.1 Design Metrics 1-2
- 1.2.2 Embedded System Design Challenges 1-3
- ✓ **Syllabus Topic :** Processors in Embedded Systems 1-4
- 1.3 Processors in Embedded Systems 1-4
- 1.3.1 FPGA and CPLD 1-4
- ✓ **Syllabus Topic :** Hardware Units and Devices in an Embedded System 1-5
- 1.4 Hardware Units and Devices in an Embedded System 1-5
- 1.4.1 Embedded System Components 1-5
- 1.4.2 Peripheral and Memory components of an Embedded System 1-5
- 1.4.3 Power Supply, Oscillator and RESET Circuits 1-6
- ✓ **Syllabus Topic :** Power Source 1-6
- 1.4.3.1 Power Supply 1-6
- 1.4.3.2 Oscillators 1-6
- ✓ **Syllabus Topic :** Reset Circuit 1-7
- 1.4.3.3 Reset Circuit 1-7
- ✓ **Syllabus Topic :** Real Time Clock 1-7
- 1.4.3.4 Real Time Clock 1-7
- ✓ **Syllabus Topic :** Timer 1-7
- 1.4.3.5 Timer and Counter 1-7
- ✓ **Syllabus Topic :** Watchdog Timer Reset 1-8
- 1.4.3.6 Watchdog Timer Reset 1-8
- ✓ **Syllabus Topic :** Input-Output Ports, LCD, LED 1-8
- 1.4.3.7 Input-Output Ports, LCD, LED 1-8
- ✓ **Syllabus Topic :** ADCs and DACs 1-8

- 1.4.3.8 ADCs and DACs 1-8
- ✓ **Syllabus Topic :** Buses and Interfaces 1-9
- 1.4.3.9 Buses and Interfaces 1-9
- ✓ **Syllabus Topic :** Keypads and Pulse Dialer 1-9
- 1.4.3.10 Keys, Keypads and Pulse Dialer 1-9
- ✓ **Syllabus Topic :** Modem, Transceivers 1-9
- 1.4.3.11 Modem and Transceivers 1-9
- ✓ **Syllabus Topic :** Embedded Software, Software are Tools for Designing an Embedded System 1-9
- 1.5 Embedded Software 1-9
- 1.5.1 Embedded System Design Process or selection of hardware and software 1-9
- 1.5.2 Software Tools for Designing Embedded System 1-11
- 1.5.3 Real Time Operating System 1-11
- Chapter Ends 1-11

UNIT II

Chapter 2 : Embedded System on Chip (SOC)

2-1 to 2-44

Syllabus : Embedded SOC, ASIC, IP core, ASIP, ASSP, examples of embedded systems. Advanced architectures / processors for embedded systems- ARM, SHARC, DSP, Superscalar Units. Processor organization, Memory organization, Performance metrics for a processor, memory map and addresses, Processor selection and memory selection for real-time applications. Networked embedded systems- I2C, CAN, USB, Fire wire. Internet enabled systems - TCP, IP, UDP. Wireless and mobile system Protocols- IrDA, Bluetooth, 802.11, ZigBee.

- ✓ **Syllabus Topic :** Embedded ASIC, ASIP 2-1
- 2.1 Embedded ASIC, ASIP 2-1
- 2.1.1 Application Specific Integrated Circuit (ASIC) and Application Specific Instruction Set Processor (ASIP) 2-1
- ✓ **Syllabus Topic :** ASSP, DSP 2-1
- 2.1.2 Digital Signal Processors (DSP) and Application Specific Processor (ASP) 2-1
- ✓ **Syllabus Topic :** Embedded SOC 2-3
- 2.1.3 System On Chip (SOC) 2-3
- ✓ **Syllabus Topic :** IP Core 2-3
- 2.1.4 IP Core 2-3
- ✓ **Syllabus Topic :** Examples of Embedded Systems 2-4
- 2.2 Types and Examples of Embedded Systems 2-4

2.2.1	Small Scale Embedded Systems.....	2-4	✓	Syllabus Topic : Performance Metrics and Selection of Processor for Real-time Applications	2-29
2.2.2	Medium Scale Embedded Systems	2-5			
2.2.3	Sophisticated Embedded Systems	2-5		2.9	Performance Metrics and Selection of Processor for Real-time Applications.....
✓	Syllabus Topic : Advanced Architectures / Processors for Embedded Systems.....	2-6		2.9.1	Embedded System Design Process or Selection of Hardware and Software
2.3	Advanced Architectures / Processors for Embedded Systems	2-6		2.10	Memory
2.3.1	Architecture of 8051.....	2-6		2.10.1	Data Memories : SRAM and DRAM.....
2.3.2	Important Features of 8051 Architecture.....	2-7		2.10.2	Program Memories
2.3.3	Accumulator (ACC).....	2-7		2.10.3	Characteristics, Quality Attributes and Optimization Challenges of Design Metric in Embedded System
2.3.4	B Register.....	2-7		✓	Syllabus Topic : Memory Map and Addresses
2.3.5	Arithmetic and Logic Unit (ALU).....	2-7		2.10.4	Memory Map and Addresses
2.3.6	Memory Organisation	2-7		2.10.5	Memory Chip Size and Numbers
2.3.7	Input / Output Ports	2-8		✓	Syllabus Topic : Memory Selection for RTOS
2.3.8	Counters and Timers	2-8		2.11	Memory Metrics and Selection for Real-time Applications
2.3.9	Serial Data Input and Output	2-13		✓	Syllabus Topic : Networked Embedded Systems - I ² C
2.3.10	Interrupts	2-15		2.12	Networked Embedded Systems.....
✓	Syllabus Topic : Acorn RISC Machine (ARM)	2-16		2.12.1	I ² C
2.4	The Acorn RISC Machine (ARM)	2-16		✓	Syllabus Topic : Controller Area Network (CAN).....
2.4.1	RISC Properties.....	2-16		2.12.2	Controller Area Network (CAN) Protocol
2.4.2	ARM Family Core Architecture	2-17		2.12.2.1	Features of CAN Standard.....
2.5	Introduction to Sun SPARC Family.....	2-18		2.12.2.2	CAN Message Format
✓	Syllabus Topic : SHARC.....	2-18		✓	Syllabus Topic : Fire Wire.....
2.6	Analog Devices SHARC Processors.....	2-18		2.12.3	Fire Wire or IEEE 1394 bus Standard.....
✓	Syllabus Topic : Superscalar Processors.....	2-19		✓	Syllabus Topic : USB
2.7	Superscalar Processors.....	2-19		2.12.4	USB (v2.0).....
2.7.1	Pipelining in Superscalar Processors.....	2-19		2.12.4.1	Features of USB
2.7.2	Superscalar in Pentium 1 Processor.....	2-19		2.12.4.2	USB Transfers
2.7.3	Pentium Processor Block Diagram	2-20		2.12.4.3	USB Commands.....
2.7.4	Integer Pipelining Stages.....	2-23		✓	Syllabus Topic : Internet Enabled Systems - TCP, IP, UDP
2.7.5	Instruction Pairability Mechanism	2-25		2.13	Internet Enabled Systems.....
2.7.5.1	Register Contention.....	2-25		2.13.1	Transport Control Protocol (TCP)
2.7.6	Floating Point Pipeline Stages	2-26		2.13.2	User Datagram Protocol (UDP)
2.7.6.1	Floating Point Instruction Pairing	2-26		2.13.3	Internet Protocol (IP)
✓	Syllabus Topic : Processor Organization, Memory Organization,	2-27		✓	Syllabus Topic : Wireless and Mobile System Protocols - IrDA, Bluetooth, 802.11, ZigBee
2.8	Processor and Memory Organization.....	2-27		2.14	Wireless and Mobile System Protocols.....
2.8.1	Microprocessor and Microcontroller	2-27		2.14.1	IrDA
				2.14.2	Bluetooth
				2.14.3	Zig-Bee.....

2.14.3.1 Interfacing ZIGBEE..... 2-43
 2.14.4 Introduction to WLAN or 802.11..... 2-43
 • Chapter Ends..... 2-44

UNIT III

Chapter 3 : I/O Communication 3-1 to 3-17

Syllabus : Devices and communication buses : Types of I/O communication, types of serial communication, Serial protocols, Devices and buses- RS-232C, RS-485, HDLC, SPI, SCI, SI, SDIO. Parallel ports and interfacing. Parallel device protocols : ISA, PCI, PCI/X, ARM bus, Wireless devices.

✓ **Syllabus Topic** : Devices and Communication Buses 3-1

3.1 Devices and Communication Buses 3-1

✓ **Syllabus Topic** : Types of Input/Output Communication..... 3-1

3.1.1 Types of Communication Systems 3-1

✓ **Syllabus Topic** : Types of Serial Communication..... 3-2

3.1.2 Serial Transmission Formats 3-2

3.1.2(A) Asynchronous Data Transfer 3-2

3.1.2(B) Synchronous Data Transfer..... 3-2

✓ **Syllabus Topic** : Serial Protocols, Devices and Buses : RS 232 C 3-3

3.2 SCI 3-3

3.2.1 RS 232 Standard 3-3

✓ **Syllabus Topic** : RS 485 3-4

3.2.2 RS 485 3-4

3.2.2(A) RS - 232 VS RS – 485..... 3-6

✓ **Syllabus Topic** : Serial Interface 3-6

3.2.3 Serial Interface (SI) Bus..... 3-6

✓ **Syllabus Topic** : SDIO..... 3-6

3.2.4 Secure Digital Input Output (SDIO) Standard..... 3-6

✓ **Syllabus Topic** : Serial Peripheral Interface (SPI) Bus 3-7

3.2.5 Serial Peripheral Interface (SPI) Bus 3-7

✓ **Syllabus Topic** : High-Level Data Link Control (HDLC) Bus 3-8

3.2.6 High-Level Data Link Control (HDLC) Bus 3-8

✓ **Syllabus Topic** : Parallel Ports and Interfacing..... 3-8

3.3 Parallel Ports and Interfacing 3-8

✓ **Syllabus Topic** : Parallel Device Protocols : ISA 3-8

3.4 The ISA Bus 3-8

3.4.1 8-bit ISA Bus 3-8

3.4.2 The 16-bit ISA Bus 3-9

3.4.3 The Extended ISA (EISA) Bus 3-9

3.4.4 The VESA (Video Electronics Standards Association) Local Bus 3-9

3.4.5 Applications if ISA Bus 3-10

3.4.6 ISA Timers 3-10

✓ **Syllabus Topic** : Parallel Device Protocol : PCI..... 3-10

3.5 The Peripheral Component Interconnect (PCI) Bus 3-10

3.5.1 Features of PCI Bus 3-11

3.5.2 Configuration Space of PCI Card..... 3-12

3.5.3 PCI Interface with the Processor 3-13

3.5.4 Classification or Variants of PCI Bus 3-14

✓ **Syllabus Topic** : PCI-X..... 3-14

3.5.5 PCI-X..... 3-14

3.5.6 Applications of PCI Bus 3-15

3.5.7 BIOS for PCI..... 3-15

✓ **Syllabus Topic** : ARM Bus 3-16

3.6 ARM Bus (AMBA)..... 3-16

✓ **Syllabus Topic** : Wireless Devices 3-17

3.7 Wireless Devices 3-17

3.7.1 Introduction to Wireless Sensor Networks 3-17

• Chapter Ends..... 3-17

UNIT IV

Chapter 4 : Real Time Operating System 4-1 to 4-53

Syllabus : Introduction to real-time operating systems. Hard versus soft real-time systems and their timing constraints. Temporal parameters of real-time process: Fixed, Jittered and sporadic release times, execution time. Types of real-time tasks, Precedence constraints and data dependency among real-time tasks, other types of dependencies for real-time tasks. Functional parameters and Resource parameters of real-time process, Real-time applications: Guidance and control, Signal processing, Multimedia, real-time databases. Real-time task and task states, task and data. Approaches to real-time scheduling : clock driver, weighted round-robin, priority-driven-Fixed priority and dynamic priority algorithms - Rate Monotonic (RM), Earliest-Deadline-First (EDF), Latest-Release-Time (LRT), Least-Slack-Time-First (LST). Static and Dynamic systems, on-line and off-line scheduling, Scheduling a-periodic and sporadic real-time tasks.

✓ **Syllabus Topic** : Introduction to Real-time Operating systems..... 4-1

4.1	Introduction to Real-Time Operating Systems	4-1	4.9.2	Hardware Block Diagram	4-15
✓	Syllabus Topic : Hard Versus Soft Real-time Systems and their Timing Constraints	4-2	4.9.3	System Model (FSM / UML).....	4-16
4.2	Hard/Soft Real time Systems and their Timing Constraints.....	4-2	4.9.4	Software Architecture (Modules, Drivers).....	4-16
4.2.1	Temporal Parameters of Real Time Process : Release Time and Execution Time	4-2	4.9.5	Component/Hardware Selection	4-16
4.2.2	Hard Real-time Systems.....	4-2	4.10	Medical Monitoring System.....	4-16
4.2.3	Soft Real-time Systems	4-2	4.10.1	Requirement Analysis.....	4-17
4.2.4	Hard-time Constraints.....	4-2	4.10.2	Hardware Block Diagram	4-17
✓	Syllabus Topic : Types of Real-time Tasks	4-3	4.10.3	System Model (FSM / UML).....	4-17
4.2.5	Types of Real Time Tasks	4-3	4.10.4	Software Architecture (Modules, Drivers).....	4-18
✓	Syllabus Topic : Temporal Parameters of Real-time Process : Fixed, Jittered and Sporadic Release Times, Execution Time	4-3	4.10.5	Component/Hardware Selection	4-18
4.2.6	RTOS Concepts : Release Time, Execution Time	4-3	4.11	Temperature/Pressure Control	4-18
✓	Syllabus Topic : Precedence Constraints and Data Dependency among Real-time Tasks, Other Types of Dependencies for Real-time Tasks	4-4	4.11.1	Requirement Analysis.....	4-18
4.3	Constraints of Real Time Tasks : Precedence, Data Dependency, Other Dependency	4-4	4.11.2	Hardware Block Diagram	4-19
✓	Syllabus Topic : Functional Parameters and Resource Parameters of Real-time Process	4-4	4.11.3	System Model (FSM / UML).....	4-19
4.3.1	Functional and Resource Parameters.....	4-4	4.11.4	Software Architecture (Modules, Drivers).....	4-20
4.4	Real Time System : Types.....	4-5	4.11.5	Component/Hardware Selection	4-20
4.4.1	Small Scale Embedded Systems.....	4-5	4.12	Automated Vending Machine.....	4-20
4.4.2	Medium Scale Embedded Systems	4-6	4.12.1	Requirement Analysis.....	4-20
4.4.3	Sophisticated Embedded Systems	4-6	4.12.2	Hardware Block diagram.....	4-20
4.5	Design Approaches and Considerations	4-6	4.12.3	System Model (FSM / UML).....	4-21
4.5.1	RTOS Vs GPOS	4-7	4.12.4	Software Architecture (Modules, Drivers).....	4-21
4.6	The Real Time Operating System.....	4-7	4.12.5	Component/Hardware Selection	4-22
4.7	Characteristics of an RTOS	4-12	4.13	Digital Camera.....	4-22
4.7.1	Real World Issues	4-13	4.13.1	Requirement Analysis.....	4-22
✓	Syllabus Topic : Real-time Applications : Guidance and Control, Signal Processing, Multimedia, Real-time Databases	4-13	4.13.2	Hardware Block Diagram	4-22
4.8	Missile Control.....	4-13	4.13.3	System Model (FSM / UML).....	4-23
4.8.1	Requirement Analysis.....	4-13	4.13.4	Software Architecture (Modules, Drivers).....	4-23
4.8.2	Hardware Block Diagram	4-13	4.13.5	Component/Hardware Selection	4-23
4.8.3	System Model (FSM / UML).....	4-14	4.14	Media Player.....	4-23
4.8.4	Software Architecture (Modules, Drivers).....	4-14	4.14.1	Requirement Analysis.....	4-23
4.8.5	Component/Hardware Selection	4-14	4.14.2	Hardware Block Diagram	4-23
4.9	Car Cruise Control	4-15	4.14.3	System Model (FSM / UML).....	4-24
4.9.1	Requirement Analysis	4-15	4.14.4	Software Architecture (Modules, Drivers).....	4-24
			4.14.5	Component/Hardware Selection	4-24
			✓	Syllabus Topic : Real-time Task and Task States, Task and Data	4-25
			4.15	Real-time Task and Task States.....	4-25
			4.15.1	Concepts of Real Time Tasks, Process and Threads	4-25
			4.15.2	Tasks.....	4-25
			4.15.2.1	Types of Real time Task	4-26
			4.15.3	Thread.....	4-28
			4.16	Multitasking	4-29

4.16.1	Types of Multitasking	4-30
4.17	Real-time Scheduling	4-30
4.17.1	Task Scheduling	4-30
✓	Syllabus Topic : Approaches to Real-time Scheduling	4-31
4.17.2	Approaches to Real-time Scheduling	4-31
4.17.3	Clock Driven Approach	4-32
✓	Syllabus Topic : Weighted Round-robin approach	4-32
4.17.4	Weighted Round-robin Approach	4-32
✓	Syllabus Topic : Priority Driven-Fixed and Dynamic	4-32
4.17.5	Priority Driven	4-32
✓	Syllabus Topic : Static and Dynamic Systems	4-32
4.18	Static and Dynamic Systems	4-32
✓	Syllabus Topic : Offline and Online Scheduling	4-33
4.19	Offline and Online Systems	4-33
✓	Syllabus Topic : Scheduling a-periodic and Sporadic Real-time Tasks	4-33
4.20	Scheduling of Periodic, Aperiodic and Sporadic Real-time Tasks	4-33
4.20.1	Non-preemptive Scheduling	4-33
4.20.1.1	First - Come - First - Served (FCFS) / FIFO Scheduling	4-34
4.20.1.2	Last - Come - First - Served (LCFS) / LIFO Scheduling	4-35
4.20.1.3	Shortest Job First (SJF) Scheduling	4-36
4.20.1.4	Priority Based Scheduling	4-37
4.20.2	Preemptive Scheduling	4-39
4.20.2.1	Preemptive Shortest Job First Scheduling (SJF) / Shortest Remaining Time (SRT)	4-39
4.20.2.2	Round Robin (RR) Scheduling	4-40
4.20.2.3	Priority Based Scheduling	4-41
✓	Syllabus Topic : Least Slack Time Scheduling	4-43
4.20.2.4	Least Slack Time Scheduling	4-43
✓	Syllabus Topic : Latest Release Time (LRT)	4-43
4.20.2.5	Latest Release Time (LRT) Scheduling	4-43
4.20.3	Types of Real-Time Task Scheduling Algorithms	4-43
✓	Syllabus Topic : Clock driven approach	4-43
4.20.3.1	Clock-Driven Scheduling	4-43
✓	Syllabus Topic : Rate Monotonic (RM), Earliest-Deadline-First (EDF)	4-46
4.20.3.2	Event-driven Scheduling	4-46

• Chapter Ends	4-53
----------------------	------

UNIT V

Chapter 5 : Inter-process Communication

5-1 to 5-16

Syllabus : Resources and resource access control-Assumption on resources and their usage, Enforcing mutual exclusion and critical sections, resource conflicts and blocking, Effects of resource contention and resource access control - priority inversion, priority inheritance. Inter-process communication-semaphores, message queues, mailboxes and pipes. Other RTOS services-Timer function, events, Interrupts - enabling and disabling interrupts, saving and restoring context, interrupt latency, shared data problem while handling interrupts. Interrupt routines in an RTOS environment.

✓	Syllabus Topic : Resources and Resource Access Control	5-1
5.1	Resources and Resource Access Control	5-1
✓	Syllabus Topic : Assumption on Resources and their usage	5-1
5.1.1	Assumptions on Resources and their Usage	5-1
✓	Syllabus Topic : Enforcing Mutual Exclusion and Critical Sections	5-1
5.1.2	Enforcement of Mutual Exclusion and Critical Sections	5-1
✓	Syllabus Topic : Resource Conflicts and Blocking	5-1
5.1.3	Resource Conflicts and Blocking	5-1
✓	Syllabus Topic : Effects of Resource Contention and Resource Access Control	5-2
5.2	Resource Contention and Resource Access Control	5-2
5.2.1	Task Synchronization	5-2
✓	Syllabus Topic : Priority Inversion	5-3
5.2.2	Priority Inversion	5-3
✓	Syllabus Topic : Priority Inheritance	5-5
5.2.3	Solutions to Priority Inversion	5-5
5.2.4	Semaphore Operations	5-5
✓	Syllabus Topic : Shared Data Problem while Handling Interrupts	5-5
5.2.5	Shared Data Problem and Techniques to Overcome	5-5
5.2.6	Dead Locks	5-8
✓	Syllabus Topic : Inter-process Communication-Semaphores, Message Queues, Mailboxes and Pipes	5-8
5.3	Inter-process Communication	5-8

5.3.1 Task Management..... 5-8

5.3.2 Inter-Task Communication and Synchronization..... 5-9

✓ **Syllabus Topic** : Message Queues..... 5-10

5.3.3 Message Queues..... 5-10

✓ **Syllabus Topic** : Mail Boxes 5-11

5.3.4 Mail Boxes 5-11

✓ **Syllabus Topic** : Pipes 5-12

5.3.5 Pipes 5-12

5.3.6 Inter-Process Communication (IPC) and Synchronization using Data Structures 5-13

✓ **Syllabus Topic** : Other RTOS Services-Timer Function, Events, Interrupts - Enabling and Disabling Interrupts, Saving and Restoring Context..... 5-13

5.4 Other RTOS Services 5-13

5.4.1 Shared Memory 5-13

5.4.2 Event or Signal Function..... 5-14

5.4.3 Remote Procedure Call (RPC) and Sockets 5-14

5.5 Interrupt in an RTOS Environment..... 5-14

✓ **Syllabus Topic** : Interrupt Latency..... 5-14

5.5.1 Interrupt Latency..... 5-14

✓ **Syllabus Topic** : Interrupt Routines in an RTOS Environment..... 5-15

5.5.2 Interrupt Service Routine (ISR)..... 5-15

5.5.3 Interrupt Priorities 5-15

5.5.4 Interrupt Nesting 5-16

• Chapter Ends..... 5-16

UNIT VI

Chapter 6 : Multiprocessor Scheduling 6-1 to 6-43

Syllabus : Multiprocessor Scheduling, resource access control and synchronization in Real-time Operating system. Real-time communication: Model, priority-based service disciplines for switched networks, weighted round-robin service disciplines, Medium access-control protocols for broadcast networks, internet and resource reservation protocols, real-time protocols. Software development process for embedded system: Requirements engineering, Architecture and design of an embedded system, Implementation aspects in an embedded system, estimation modeling in embedded software. Validation and debugging of embedded systems. Embedded software development tools. Debugging techniques. Real-time operating systems: Capabilities of commercial real-time operating systems, QNX/Neutrino, Microc/OS-II, VxWorks, Windows CE and RTLinux.

✓ **Syllabus Topic** : Multiprocessor Scheduling, resource access control and synchronization in Real-time Operating system. 6-1

6.1 Multiprocessor Scheduling, Resource Access Control and Synchronization in Real-time Operating System 6-1

6.1.1 Model of Multiprocessor and Distributed System 6-1

6.1.2 Multiprocessing scheduling..... 6-2

6.1.3 Model of Multiprocess Scheduling 6-3

6.1.4 Task assignment in multiprocessor scheduling..... 6-5

6.1.4(A) Characteristics of task assignment 6-6

6.1.4(B) Strategies of Task Assignment 6-6

6.1.5 Multiprocessor Priority Ceiling Protocol (MPCP) 6-7

6.1.6 Elements of Scheduling Algorithm for End to End Periodic Tasks 6-7

✓ **Syllabus Topic** : Real-time Communication 6-8

6.2 Real-time Communication 6-8

6.2.1 Model of Real Time Communication 6-9

6.2.2 Priority-Based Service Disciplines for Switched Networks 6-10

✓ **Syllabus Topic** : Weighted Round-Robin Service Disciplines (WRR) 6-12

6.2.3 Weighted Round-Robin Service Disciplines (WRR) ...6-12

✓ **Syllabus Topic** : Medium Access-Control (MAC) Protocols for Broadcast Networks..... 6-13

6.2.4 Medium Access-Control (MAC) Protocols for Broadcast Networks 6-13

✓ **Syllabus Topic** : Internet and Resource Reservation Protocols..... 6-15

6.2.5 Internet and Resource Reservation Protocols 6-15

✓ **Syllabus Topic** : Real-Time Protocols 6-18

6.2.6 Real-Time Protocols 6-18

✓ **Syllabus Topic** : Software Development Process for Embedded System 6-21

6.3 Software Development Process for Embedded System 6-21

✓ **Syllabus Topic** : Requirements Engineering. 6-21

6.3.1 Requirements Engineering 6-21

6.3.2 Architecture and Design of an Embedded System..... 6-24

✓ **Syllabus Topic** : Implementation Aspects in an Embedded System..... 6-27

6.3.3 Implementation Aspects in an Embedded System..... 6-27

✓ **Syllabus Topic** : Estimation Modelling in Embedded Software 6-28

6.3.4 Estimation Modeling in Embedded Software..... 6-28

<p>✓ Syllabus Topic : Validation and Debugging of Embedded Systems 6-30</p> <p>6.3.5 Validation and Debugging of Embedded Systems 6-30</p> <p>✓ Syllabus Topic : Embedded Software Development Tools 6-31</p> <p>6.4 Embedded Software Development Tools 6-31</p> <p>6.4.1 Host and Target Machines 6-32</p> <p>6.4.2 Linkers/Locators for Embedded Software 6-33</p> <p>6.4.3 Getting Embedded Software into Target System 6-34</p> <p>✓ Syllabus Topic : Embedded Software Debugging Techniques 6-34</p> <p>6.5 Embedded Software Debugging Techniques 6-34</p> <p>6.5.1 Testing Your Host Machine..... 6-34</p> <p>6.5.2 Instruction Set Simulator..... 6-35</p> <p>6.5.3 Using Laboratory Tools..... 6-36</p> <p>✓ Syllabus Topic : Real-time Operating Systems : Capabilities of Commercial Real-time Operating Systems 6-37</p>	<p>6.6 Real-time Operating Systems : Capabilities of Commercial Real-time Operating Systems6-37</p> <p>✓ Syllabus Topic : QNX/Neutrino, MicroC/OS-II, VxWorks, Windows CE and RTLinux.....6-39</p> <p>6.7 Real-time Operating Systems : Examples6-39</p> <p>6.7.1 QNX/Neutrino 6-39</p> <p>6.7.2 MicroC/OS-II..... 6-41</p> <p>6.7.3 VxWorks..... 6-41</p> <p>6.7.4 Windows CE..... 6-42</p> <p>6.7.5 RTLinux 6-42</p> <ul style="list-style-type: none"> • Chapter Ends..... 6-43 • Appendix A : Solved University Question Papers of March 2019 and May 2019 A-1 to A-8
