

Chapter 1 : Introduction to Flowchart and Programming Language : MATLAB, SCILAB and Python 1-1 to 1-17

1.1 Introduction to Flowchart..... 1-1

1.2 Introduction to Programming Language..... 1-2

1.3 MATLAB..... 1-2

1.3.1 MATLAB Operators and Associated Functions..... 1-2

1.3.2 Input and Output Commands..... 1-4

1.4 SCILAB..... 1-7

1.5 Python..... 1-15

1.5.1 Python Operators and Associated Functions..... 1-15

1.5.2 Output Display Commands..... 1-16

UNIT-I

Chapter 2 : Roots of Equation 2-1 to 2-51

Syllabus : Bracketing method and Newton-Raphson method.

2.1 Introduction..... 2-1

2.1.1 Graphical Representation of Root..... 2-2

2.1.2 Types of Equations/Functions..... 2-2

2.2 Classification of Iterative Methods 2-2

2.2.1 Bracketing Method or Interval Method..... 2-2

2.2.2 Open Method..... 2-3

2.3 Bisection Method 2-3

2.3.1 Advantages and Disadvantages of Bisection Method..... 2-12

2.4 Regula-Falsi (False Position) Method 2-21

2.5 Newton Raphson Method (NRM) 2-33

2.5.1 Concept of Convergence in NRM..... 2-46

2.5.2 Concept of Divergence in NRM..... 2-46

Chapter 3 : Simultaneous Equations 3-1 to 3-39

Syllabus : Solution of simultaneous equations : Gauss Elimination Method with Partial pivoting, Gauss-Seidel method, Thomas algorithm for Tri-diagonal Matrix.

3.1 Introduction 3-1

3.1.1 Gauss Elimination Method..... 3-2

3.2 Gauss Elimination Method with Partial Pivoting3-11

3.3 Gauss-Seidel Method3-15

3.4 Thomas Algorithm for Tri-diagonal Matrix3-27

3.4.1 Advantages of Partial Pivoting3-35

UNIT-II

Chapter 4 : Ordinary Differential Equations [ODE] 4-1 to 4-35

Syllabus : Taylor series method, Euler Method, Runge-Kutta 4th order. Simultaneous equations using Runge-Kutta 2nd order method.

4.1 Introduction 4-1

4.2 Taylor Series Method..... 4-1

4.3 Euler Method..... 4-7

4.4 Runge-Kutta Fourth Order Method4-16

4.5 Simultaneous Equations using Runge-Kutta Second Order Method.....4-26

Chapter 5 : Partial Differential Equations [PDE] 5-1 to 5-25

Syllabus : Finite difference method, Simple Laplace method, PDE's Parabolic explicit solution, Elliptic explicit solution.

5.1 Introduction to Finite Difference Method..... 5-1

5.2 Simple Laplace Method 5-4

5.3 PDEs - Parabolic Explicit Solution.....5-14

UNIT-III

Chapter 6 : Numerical Integration 6-1 to 6-59

Syllabus : Numerical Integration (1D) : Trapezoidal rule, Simpson’s 1/3rd Rule, Simpson’s 3/8th Rule), Gauss Quadrature 2 point and 3 point method.

Double Integration : Trapezoidal rule, Simpson’s 1/3rd Rule.

6.1 Introduction..... 6-1

6.2 Numerical Integration by Newton Cotes Quadrature Formula 6-2

6.3 Trapezoidal Rule (TR) for Single Integration... 6-3

6.3.1 Trapezoidal Rule for One Interval 6-3

6.3.2 Composite Integration Rules 6-3

6.4 Simpson’s 1/3rd Rule for Single Integration..... 6-9

6.4.1 Simpson’s 1/3rd Rule for Two Subintervals 6-9

6.4.2 Composite Integration Rules 6-9

6.5 Simpson’s 3/8th Rule for Single Integration .. 6-17

6.5.1 Simpson’s 3/8th Rule for Three Equal Subintervals 6-17

6.5.2 Composite Integration Rules 6-18

6.6 Gauss Legendre 2 Point and 3 Point Formula 6-27

6.7 Trapezoidal Rule for Double Integration..... 6-33

6.8 Simpson’s 1/3rd Rule for Double Integration..... 6-44

UNIT-IV

Chapter 7 : Curve Fitting 7-1 to 7-29

Syllabus : Least square technique - first order, power equation, exponential equation and quadratic equation.

7.1 Introduction..... 7-1

7.1.1 Principle of Least Squares 7-1

7.1.2 Least Square Technique-Straight Line..... 7-1

7.2 Fitting Exponential/Power Equation..... 7-6

7.3 Least Square Technique-Quadratic Equation/Parabola Equation ($y = ax^2 + bx + c$) 7-20

Chapter 8 : Regression Analysis 8-1 to 8-29

Syllabus : Linear regression, Nonlinear regression, Multiple regressions, Polynomial regression. Lagrange’s interpolation, Numerical interpolation and differentiation using Newton’s forward method, inverse interpolation (Lagrange’s method only).

8.1 Introduction 8-1

8.1.1 Lagrange’s Interpolation 8-1

8.2 Newton’s Forward Interpolation..... 8-9

8.3 Inverse Interpolation (Lagrange’s Method Only) 8-18

8.4 Numerical Differentiation using Newton’s Forward Method 8-24

UNIT-V

Chapter 9 : Statistics 9-1 to 9-36

Syllabus : Measures of central tendency : mean, median, mode. Measurement of variability and dispersion : Standard deviation, standard error, variance, range. Measure of shape : Skewness, kurtosis Statistical diagram : scattered diagram, histogram, pie charts, and measure of association between two variables. Correlation : Karl Pearson’s Coefficient of correlation and its mathematical properties, Spearman’s Rank correlation and its interpretations.

9.1 Introduction 9-1

9.1.1 Objectives and Requisites of a Good Average 9-1

9.2 Types of Averages or Measures of Central Tendency 9-1

9.3	Arithmetic Mean.....	9-2	9.10	Kurtosis.....	9-17
9.3.1	Computation of Arithmetic Mean.....	9-2	9.10.1	Types of Kurtosis Curve.....	9-17
9.3.2	Properties of Arithmetic Mean.....	9-3	9.11	Statistical Diagram.....	9-17
9.3.3	Merits and Demerits of Arithmetic Mean.....	9-3	9.11.1	Graphical Representation of Frequency Distribution.....	9-17
9.4	Median.....	9-4	9.11.2	Histogram.....	9-18
9.4.1	Computation of Median.....	9-4	9.11.3	Diagrams.....	9-22
9.4.2	Merits and Demerits of Median.....	9-5	9.11.4	Need for Diagrams.....	9-22
9.5	Mode.....	9-6	9.11.5	Guidelines for Drawing Diagrams.....	9-22
9.5.1	Computation of Mode.....	9-6	9.11.6	Pie Diagram.....	9-22
9.5.2	Merits and Demerits of Mode.....	9-7	9.12	Measure of Association between Two Variables.....	9-23
9.6	Measures of Variation/Dispersion.....	9-7	9.13	Correlation.....	9-24
9.6.1	Introduction.....	9-7	9.13.1	Types of Correlation.....	9-25
9.6.2	Requirements of a Good Measure of Dispersion.....	9-7	9.14	Methods of Studying Correlation.....	9-25
9.6.3	Absolute and Relative Measures of Dispersion.....	9-8	9.14.1	Scatter Diagram.....	9-25
9.6.4	Types of Measures of Dispersion.....	9-8	9.14.2	Interpretation of Scatter Diagram.....	9-26
9.7	Range.....	9-8	9.14.3	Covariance.....	9-27
9.7.1	Computation of Range.....	9-8	9.14.4	Karl Pearson's Coefficient of Correlation or Product Moment Correlation Coefficient.....	9-27
9.7.2	Merits and Demerits of Range.....	9-8	9.15	Properties of Correlation Coefficient.....	9-28
9.7.3	Applications of Range.....	9-9	9.16	Interpretation of 'r'.....	9-29
9.8	Variance and Standard Deviation.....	9-9	9.17	Spearman's Rank Correlation Coefficient (Formula with and without Ties).....	9-30
9.8.1	Computation of Variance.....	9-9	UNIT-VI		
9.8.2	Standard Deviation.....	9-9	<hr/>		
9.8.3	Variance and Standard Deviation of Combined Group.....	9-10	Chapter 10 : Probability 10-1 to 10-80		
9.8.4	Merits and Demerits of Variance.....	9-10	<hr/>		
9.8.5	Coefficient of Variation.....	9-10	Syllabus : Joint, conditional and marginal probability, Bayes' theorem, independence, theorem of total probability, expectation and variance, random variables. Probability distributions : Binomial, Poisson, Geometric, Uniform, Exponential, Gamma, Normal and Chi-square.		
9.9	Measure of Shape : Skewness and Kurtosis.....	9-12	10.1	Classical Definition of Probability.....	10-1
9.9.1	Introduction.....	9-12	10.1.1	Joint and Marginal Probability.....	10-1
9.9.2	Idea of Symmetric Distribution.....	9-13	<hr/>		
9.9.3	Skewness of a Frequency Distribution.....	9-13			
9.9.4	Empirical Relation between Mean, Median and Mode.....	9-14			
9.9.5	Measures of Skewness.....	9-14			

10.2	Conditional Probability	10-2	10.18	Binomial Distribution	10-31
10.3	Independence of Two Events	10-5	10.18.1	Mean and Variance of Binomial Distribution.....	10-33
10.4	Partition of Sample Space	10-8	10.18.2	Recurrence Relation for Binomial Probabilities	10-34
10.5	Theorem of Total Probability	10-8	10.18.3	Fitting of Binomial Distribution.....	10-35
10.6	Bayes' Theorem	10-9	10.18.4	Additive Property of Binomial Distribution.....	10-37
10.7	Univariate Probability Distribution	10-12	10.19	Geometric Distribution	10-37
10.7.1	Discrete Random Variable	10-13	10.19.1	Mean and Variance of Geometric Distribution.....	10-38
10.8	Probability Distribution	10-13	10.19.2	Recurrence Relation for Geometric Probabilities.....	10-38
10.8.1	Probability Distribution of a Function of Random Variable.....	10-14	10.19.3	Real Life Situations where Geometric Distribution is Used	10-38
10.9	Distribution Function or Cumulative Probability Function	10-15	10.20	Poisson Distribution	10-39
10.9.1	Properties of Distribution Function.....	10-15	10.20.1	Mean, Variance and Mode.....	10-40
10.10	Mathematical Expectation	10-17	10.20.2	Recurrence Relation between Probabilities of Poisson Distribution.....	10-42
10.10.1	Expectation of a Function of a Discrete Random Variable.....	10-19	10.20.3	Fitting of Poisson Distribution.....	10-44
10.11	Variance	10-20	10.20.4	Additive Property of Poisson Distribution	10-45
10.11.1	Properties of Variance	10-20	10.20.5	Poisson Distribution as a Limiting Form of Binomial Distribution	10-46
10.12	Univariate Continuous Probability Distributions	10-22	10.20.6	Moment Generating Function of Poisson Distribution.....	10-47
10.12.1	Continuous Random Variable	10-22	10.21	Introduction to Continuous Probability Distribution	10-47
10.12.2	Continuous Probability Density Functions	10-22	10.22	Uniform Distribution	10-47
10.13	Distribution Function or Cumulative Distribution Function	10-25	10.22.1	Distribution Function.....	10-48
10.13.1	Properties of Distribution Function.....	10-25	10.22.2	Mean and Variance.....	10-48
10.14	Mean, Variance and Standard Deviation for Continuous Random Variable (r.v.)	10-26	10.22.3	Applications of Uniform Distribution.....	10-48
10.15	Bivariate Probability Distribution	10-28	10.23	Exponential Distribution	10-51
10.15.1	Joint Probability Distribution.....	10-28	10.23.1	Distribution Function.....	10-52
10.15.2	Marginal Probability Distributions.....	10-29	10.23.2	Mean and Variance.....	10-52
10.16	Probability Distributions	10-29	10.23.3	Applications of Exponential Distribution.....	10-52
10.17	Bernoulli Distribution	10-30			
10.17.1	Mean and Variance of Bernoulli Distribution.....	10-30			

<p>10.23.4 Lack of Memory Property10-52</p> <p>10.23.5 Moment Generating Function of Exponential Distribution.....10-53</p> <p>10.24 Gamma Distribution10-57</p> <p>10.24.1 Moment Generating Function (m.g.f)10-57</p> <p>10.24.2 Additive Property of Gamma Distribution.....10-58</p> <p>10.25 Normal Distribution10-58</p> <p>10.25.1 Properties of Normal Distribution.....10-59</p> <p>10.25.2 Computation of Probabilities10-59</p> <p>10.25.3 Fitting of Normal Distribution10-67</p> <p>10.25.4 Normal Approximation to Binomial Distribution10-68</p> <p>10.25.5 Normal Approximation to Poisson Distribution10-69</p> <p>10.25.6 Moment Generating Function of Normal Distribution10-70</p> <p>10.26 Chi-square Distribution10-70</p> <p>10.26.1 Additive Property of Chi-square Distribution.....10-70</p> <p>10.26.2 The Relation between Chi-square and Gamma Random Variable10-71</p> <p>10.27 Binomial Probability Distribution Using Python10-71</p> <p>10.28 Poisson's Probability Distribution Using Python10-72</p> <p>10.29 Geometric Probability Distribution Using Python10-74</p>	<p>11.3.2 Row or Column Matrix.....11-2</p> <p>11.3.3 Square matrix.....11-2</p> <p>11.3.4 Diagonal matrix.....11-2</p> <p>11.3.5 Scalar Matrix.....11-2</p> <p>11.3.6 Unit Matrix.....11-2</p> <p>11.3.7 Upper Triangular Matrix11-2</p> <p>11.3.8 Lower Triangular Matrix11-3</p> <p>11.3.9 Transpose of a matrix.....11-3</p> <p>11.3.10 Symmetric Matrix.....11-3</p> <p>11.3.11 Skew Symmetric Matrix.....11-3</p> <p>11.4 Determinant of Matrix.....11-3</p> <p>11.4.1 Singular Matrix.....11-3</p> <p>11.5 Minor of an Element11-4</p> <p>11.6 Cofactor of an Element11-4</p> <p>11.7 Adjoint of a Matrix11-4</p> <p>11.8 Inverse of a Matrix11-4</p> <p>11.9 Operations on Matrices.....11-4</p> <p>11.9.1 Equality of matrices11-4</p> <p>11.9.2 Scalar multiplication.....11-4</p> <p>11.9.3 Addition/Subtraction of Matrices.....11-4</p> <p>11.9.3.1 Properties of Addition and Subtraction of Matrices.....11-5</p> <p>11.9.4 Multiplication of matrices.....11-5</p> <p>11.9.4.1 Properties of Matrix Multiplication.....11-6</p> <p>11.9.4.2 Properties of the Transpose of a Matrix11-6</p> <p>11.10 Elementary transformations of matrix.....11-6</p> <p>11.11 Equivalent Matrix.....11-6</p> <p>11.12 Solved Examples11-7</p> <p>11.13 Vector Algebra11-12</p> <p>11.13.1 Scalar11-13</p> <p>11.13.2 Vector.....11-13</p>
---	---

<p>Chapter 11 : Linear Algebra 11-1 to 11-27</p>	
--	--

Syllabus : Review of matrix operations, vector and vector spaces, linear mapping.

<p>11.1 Introduction..... 11-1</p> <p>11.2 Matrices 11-1</p> <p>11.3 Types of Matrices..... 11-1</p> <p>11.3.1 Null Matrix 11-1</p>	
--	--

11.13.3	Position Vector	11-13	11.18.3	Vector (or Cross) Product of Two Vectors.....	11-16
11.14	Types of Vectors.....	11-13	11.18.4	Properties vector product	11-17
11.14.1	Null Vector	11-13	11.18.5	Scalar Triple Product.....	11-17
11.14.2	Unit Vector.....	11-13	11.18.6	Properties Scalar Triple Product.....	11-17
11.14.3	Equal Vector.....	11-13	11.18.7	Vector Triple Product.....	11-18
11.14.4	Collinear Vector.....	11-14	11.19	Solved Examples	11-18
11.14.5	Negative Vector	11-14	11.20	Vector Spaces	11-21
11.15	Addition of Vectors	11-14	11.20.1	Solved Examples.....	11-22
11.15.1	Properties of addition of Vectors	11-14	11.20.2	Subspaces.....	11-24
11.16	Multiplication of Vector by scalar	11-14	11.20.3	Linear Combination	11-25
11.16.1	Properties of multiplication of vector by scalar:.....	11-15	11.20.4	Linear Span	11-25
11.17	Components of a vector	11-15	11.20.5	Linear Independence and Linear Dependence	11-25
11.18	Product of Two Vectors	11-16	11.20.6	Basis.....	11-26
11.18.1	Scalar (or dot) Product of Two Vectors.....	11-16	11.21	Linear Mapping	11-26
11.18.2	Properties scalar product.....	11-16
