

**UNIT 1****Chapter 1 : Distribution Systems 1-1 to 1-36**

Syllabus : Classification of supply systems (State Only) (i) DC, 2-wire system, (ii) Single phase two wire ac system, (iii) Three phase three wire ac supply system, (iv) Three phase four wire ac supply system. Comparison between overhead and underground systems (For above mentioned systems) on the basis of volume requirement for conductor. AC Distribution System : Types of primary and secondary distribution systems, calculation of voltage drops in ac distributors (Uniform and Non Uniform Loading) (Numerical) Economics of power transmission : Economic choice of conductor (Kelvin's law) (Derivation and Numerical) Distribution Feeders: Design considerations of distribution feeders; radial and ring types of primary feeder's voltage levels, energy losses in feeders.

- 1.1 Single Line Diagram of A.C. Power Supply Scheme....1-1
1.2 Classification of Transmission System1-2
1.2.1 Advantages of High Voltage for Power Transmission.....1-3
1.2.2 Disadvantages of High Voltage for Power Transmission.....1-3
1.2.3 Classification of Distribution System.....1-3
1.2.4 Comparison on the Basis of Conductor Volume1-3
1.3 Volume of Conductor Required for Different Overhead Systems and Comparison of Volume1-3
1.3.1 D.C. 2-Wire System with Mid-Point Earthed1-3
1.3.2 A.C. Single Phase 2-Wire System with Mid-Point Earthed.....1-4
1.3.3 Three Phase, 3-Wire System1-4
1.3.4 Three Phase, 4-Wire Systems.....1-5
1.3.5 Comparison of Volume required for Conductors in Overhead System w.r.t to Volume of 2-Wire d.c. System1-6
1.4 Conductor Volume and Comparison of the Same in Different Systems of Underground Cables.....1-6
1.4.1 Two-Wire d.c. System with Mid-point Earthed1-6
1.4.2 A. C. Single Phase, 2-Wire with Mid-point Earthed.....1-6
1.4.3 3-Phase 3-Wire System1-7

- 1.4.4 3-Phase, 4-Wire System1-7
1.4.5 Comparison of Volume required for Conductors in "Under-ground" System w.r.t to Volume of 2-Wire d.c. System1-8
1.4.6 Comparison of Overhead Line and Underground Cables.....1-8
1.4.6.1 Advantages and Disadvantages of Overhead and Underground Systems.....1-9
1.4.7 Examples on Conductor Volume1-9
1.5 General Classification of Transmission Systems.....1-10
1.5.1 Introduction (Feeder and Distributors)1-10
1.6 Classification of Distribution System.....1-11
1.6.1 Selection of Scheme of Distribution System.....1-11
1.6.2 Primary Distribution System (Feeder Lines)1-12
1.6.2.1 Types of Primary Distribution1-12
1.6.3 Secondary Distribution (Distributor Lines).....1-12
1.6.4 Radial System1-13
1.6.5 Ring Main System1-13
1.6.6 Interconnected System.....1-13
1.7 Requirements of Feeder/Distribution System1-14
1.7.1 Comparison of Feeder and Distributor.....1-14
1.8 Design Considerations of Feeder/Distributor1-14
1.8.1 Size of Feeder and Voltage Drops and Energy Losses.....1-16
1.9 D.C. Distribution1-17
1.10 A. C. System Calculation.....1-18
1.10.1 Methods of Solving A. C. Distribution Problems1-18
1.10.1.1 Power Factor Referred to the Receiving End Voltage.....1-18
1.10.1.2 Power Factor Referred to the Respective Load Voltages1-20
1.10.2 3-Phase A. C. Distribution1-22
1.10.3 Example with Point Load and a 3-Phase Motor1-22
1.11 Economics of Power Transmission.....1-26
1.11.1 Economic Choice of Conductor Size1-27
1.11.2 Graphical Illustration of Kelvin's.....1-28

1.11.3	Limitations of Kelvin's Law	1-28
1.12	Economic choice of A. C. Transmission Voltage	1-29

UNIT 2**Chapter 2 : Substation and Earthing 2-1 to 2-33**

Syllabus : Substation : Classification of substations, Various equipments used in substation with their specifications, Bus bar arrangements in the substation: Simple arrangements like single bus bar, sectionalized single bus bar, main and transfer bus bar system with relevant diagrams. Earthing : Necessity of Earthing, Types of earthing system (Equipment and Neutral), and Maintenance Free Earthing system. Methods of testing earth resistance, Different electrode configurations (Plate and Pipe electrode), Tolerable step and touch voltages, Steps involved in design of substation earthing grid as per IEEE standard 80 – 2000.

2.1	Introduction (What is a Sub-station?)	2-1
2.2	Classification and Types of Substations	2-1
2.2.1	According to Service Requirements.....	2-1
2.2.2	According to the Constructional Features.....	2-2
2.3	Comparison of Outdoor and Indoor Substation.....	2-2
2.4	Location of Substation and Site Selection	2-2
2.4.1	Outdoor Substations.....	2-2
2.5	Standard Symbols for Equipment Used in Substation	2-3
2.6	Bus-bar Arrangements in Substations	2-5
2.6.1	Bus-Bars System Arrangement in Sub-Stations	2-5
2.6.1.1	Single Bus-Bar System	2-5
2.6.1.2	Single Bus-Bar System with Sectionalisation.....	2-5
2.6.1.3	Duplicate Bus-Bar System.....	2-6
2.6.1.4	One and Half Breaker Arrangement for Bus-Bar.....	2-7
2.6.1.5	Mesh Arrangement of Bus-Bars in Substation	2-7
2.6.1.6	Main and Transfer Bus-bar System	2-8
2.7	Sub-Station Equipments their Locations and Functions.....	2-8
2.8	Single Line Diagram Showing Different Substation Apparatus.....	2-9
2.9	Indoor/Outdoor Substation Main Components and their Purpose	2-10
2.10	Layouts of Substations	2-10
2.10.1	Floor Mounted Outdoor Substation.....	2-11

2.10.2	Platform Mounted Outdoor Substation.....	2-11
2.10.3	Pole Mounted Substation	2-11
2.10.4	Indoor Substation Layout.....	2-12
2.10.5	Underground Substation Layout	2-12
2.11	Big Size Double Circuit Substation	2-13
2.12	Electric Installation and Earth Testing	2-13
2.12.1	Necessity of Earthing	2-13
2.12.2	Types of Earthing	2-14
2.12.2.1	Plate Earthing	2-15
2.12.2.2	Pipe Earthing	2-15
2.12.3	Indian Electricity Rules for Earthing.....	2-15
2.12.4	What Can Happen if the Neutral is not Grounded ?	2-18
2.12.5	Earth Fault.....	2-18
2.12.6	System Grounding and Advantages of Grounding (Objectives of Sub-Station Grounding)	2-19
2.13	Methods of Neutral Grounding.....	2-20
2.13.1	Solid Grounding.....	2-20
2.13.2	Resistance Grounding	2-21
2.13.3	Reactance Grounding.....	2-21
2.13.4	Arc Suppression Coil Grounding (Peterson Coil Grounding)	2-22
2.13.5	Voltage Transformer Earthing.....	2-22
2.13.6	Symbolic Representation of Neutral Earthing for Different Equipments.....	2-23
2.13.7	Comparison of Different Types of Neutral Grounding Systems	2-23
2.14	Sub-Station Earthing	2-24
2.14.1	Equipment Earthing for Safety-Earthing System.....	2-24
2.14.2	Grounding of Sub-Stations	2-27
2.15	Design of Earthing Grid	2-28
2.15.1	Earth Fault Current.....	2-28
2.15.2	Soil Resistivity	2-28
2.15.3	Fault Clearing Time	2-29
2.15.4	Area Covered by Sub-Station	2-29
2.16	Various Methods of Measuring / Testing of Earth-Resistance	2-29

2.16.1	Testing of Installation for Earthing	2-29
2.16.2	Effectiveness of Earthing.....	2-29
2.16.3	Measurement of Insulation Resistance.....	2-30
2.16.3.1	Fall of Potential Method.....	2-30
2.16.3.2	Earth Tester	2-30
2.16.3.3	Earth Loop Tester.....	2-31
2.16.4	Methods of Reducing Earth Resistance.....	2-31
2.17	Testing and Commissioning of Sub-Station.....	2-32
2.17.1	Maintenance of Sub-Station	2-32

UNIT 3**Chapter 3 : Maintenance & Condition Monitoring****3-1 to 3-29**

Syllabus : Importance and necessity of maintenance, different maintenance strategies like breakdown maintenance, planned/preventive maintenance and condition based maintenance. Planned and preventive maintenance of transformer, Induction motor and Alternators. Insulation stressing factors, Insulation deterioration, polarization index, dielectric absorption ratio. Concept of condition monitoring of electrical equipments. Advance tools and techniques of condition monitoring, Thermography.

Failure modes of transformer, Condition monitoring of oil as per the IS/IEC standards, Filtration/reconditioning of insulating oil, Condition monitoring of transformer bushings, on load tap changer, dissolved gas analysis, degree of polymerization. Induction motor fault diagnostic methods

– Vibration Signature Analysis, Motor Current Signature Analysis.

Hot Line Maintenance - Meaning and advantages, special types of non-conducting Materials used for tools for hot line maintenance.

3.1	Maintenance.....	3-1
3.1.1	Importance of Maintenance	3-1
3.1.2	Advantages of Maintenance	3-1
3.2	Attention for Rotating Machines.....	3-1
3.2.1	Attention for Static Machine (Transformer)	3-2
3.3	Different Maintenance Strategies (Classifications).....	3-3
3.3.1	Routine Maintenance.....	3-3
3.3.2	Preventive Maintenance	3-3
3.3.2.1	Basic aspects in Preventive Maintenance.....	3-4

3.3.2.2	Procedure of Developing Preventive Maintenance Schedule	3-4
3.3.2.3	Factors Affecting Preventive Maintenance.....	3-4
3.3.2.4	Advantages and Disadvantages of Preventive Maintenance.....	3-5
3.3.3	Breakdown Maintenance (Corrective).....	3-5
3.3.4	Planned Maintenance (Scheduled Maintenance).....	3-6
3.3.5	Predictive or Condition Based Maintenance	3-6
3.3.5.1	Advantages and Disadvantages of Predictive (Condition based) Maintenance	3-6
3.4	Frequency of Inspection	3-7
3.5	Total Productive Maintenance	3-7
3.6	Comparison of Breakdown Maintenance with Preventive Maintenance	3-8
3.7	Comparison of Condition Based Maintenance with Preventive Maintenance	3-8
3.8	Preventive Maintenance of Induction Motor.....	3-8
3.8.1	Importance (Objectives) of Preventive Maintenance of Motor	3-8
3.8.2	Effect of Absence of Maintenance or Ignorance Towards Maintenance	3-9
3.8.3	Maintenance Schedule for Induction Motors (Planned Schedule).....	3-9
3.8.4	Preventive Maintenance of Induction Motor.....	3-10
3.8.5	Activities in Preventive Maintenance of Motors.....	3-10
3.9	Maintenance Schedule for Synchronous Machine (Alternator)	3-11
3.10	Factors Affecting Life of Transformers.....	3-12
3.10.1	Maintenance Schedule for Transformers of Capacities Less than 1000 kVA (as per IS 1886-1967)	3-13
3.10.2	Maintenance Schedule for Transformers 1000 kVA and Above (Planned Schedule)	3-13
3.10.3	Routine Preventive Maintenance of a Transformers	3-15
3.11	Insulation.....	3-15

3.11.1	Introduction	3-15	3.22	Transformer Oil and its Impurities	3-34
3.11.2	Properties of Insulating Materials	3-15	3.22.1	Testing of Transformer Oil.....	3-34
3.12	Factors Affecting Life of Insulating Materials (Insulation Stressing Factors)	3-17	3.23	Factors Reducing Breakdown Strength of Transformer Oil	3-36
3.13	Insulation Failure (Deterioration of Insulation).....	3-18	3.23.1	As per IS Standard, Specification of Transformer Oil	3-36
3.14	Properties of Liquid Insulation (Transformer-Oil)	3-18	3.23.2	Testing (Condition Monitoring) of Transformer Oil	3-36
3.14.1	Deterioration (Contamination) of Liquid Insulation (Transformer Oil)	3-19	3.23.2.1	Oil Test Cell.....	3-37
3.15	Measurement of Insulation Resistance.....	3-19	3.23.3	Various Components of Test-cell and Function of these Components.....	3-38
3.15.1	By using Megger	3-19	3.23.3.1	Procedure of Testing the Oil in Test Cell (As per IS).....	3-39
3.15.2	Insulation Resistance Measurement by Voltmeter Method	3-20	3.24	Oil Purification, Reconditioning and Filtering Methods.....	3-39
3.15.3	Dielectric Absorption Test by using Hand Driven Megger	3-20	3.24.1	Centrifugal Purifier.....	3-39
3.15.4	Polarization Index by Megger	3-21	3.24.2	Stream Line Filter (Vacuum Type).....	3-40
3.15.5	Insulation Resistance by Two Meggers	3-21	3.24.3	Filters using Activated Earth Media	3-42
3.16	Condition Monitoring.....	3-21	3.25	High Voltage Bushing	3-42
3.16.1	Meaning of Condition Monitoring (Or Concept of Condition Monitoring)	3-21	3.25.1	The Types of Bushing are	3-42
3.16.2	Purpose of Condition Monitoring (Objectives).....	3-22	3.25.2	Measurement of Power Factor and $\tan \delta$	3-45
3.16.3	Role of Condition Monitoring	3-22	3.25.2.1	Power Factor Test	3-45
3.16.4	General Benefits of Condition Monitoring	3-22	3.25.2.2	Partial Discharge Test :	3-46
3.16.5	Difference between Condition Monitoring and Preventive Maintenance	3-22	3.25.2.3	Infrared Thermography	3-46
3.17	Types of Condition Monitoring Systems	3-22	3.26	Condition Monitoring of ON-Load Tap-Changer.....	3-46
3.18	Tools and Techniques of Condition Monitoring	3-23	3.26.1	Introduction to Tap-Changer of a Transformer.....	3-46
3.19	Thermography	3-24	3.26.2	ON-Load Tap-Changer (OLTC)	3-48
3.19.1	Thermography Instrument	3-25	3.26.3	Cause of Failure are Due to.....	3-48
3.19.2	Role of thermography in Electrical field	3-28	3.26.4	Common Problems on ON-Load Tap Changer	3-49
3.20	Various Failure Modes of Transformer	3-29	3.26.5	Preventive cares are taken as follows	3-49
3.20.1	Detailed Study of Failures Causes, Remarks etc.....	3-30	3.26.6	Condition Monitoring [Different Diagnostic Techniques].....	3-49
3.20.2	Failures due to Structural Defects	3-32	3.26.6.1	Differential Temperature Measurement	3-49
3.20.3	Over Fluxing Failure	3-32	3.26.6.2	Dissolved Gas-Analysis.....	3-49
3.21	Condition Monitoring of Transformer	3-32			

3.26.6.3 Special "Gas in Oil" Monitoring	3-50	3.34 Induction Motor Fault Diagnostic Methods.....	3-64
3.26.6.4 Dynamic Resistance Measurements	3-50	3.34.1 Temperature Measurement and Diagnosis.....	3-64
3.26.6.5 Motor Torque Measurement	3-50	3.34.2 Vibration Measurement and Diagnosis	3-64
3.26.6.6 Acoustic Measurement : (New Technique)	3-51	3.35 Electrical Parameters Measurement and Diagnosis (Signature Analysis).....	3-66
3.26.6.7 Summary.....	3-51		
3.27 Dissolved Gas Analysis (DGA)	3-52	3.36 Induction Motor Fault Monitoring Methods and Remedies	3-67
3.27.1 Composition of Transformer Oil.....	3-52	3.37 Hot Line maintenance	3-70
3.27.2 Condition of Oil In Fault Condition	3-52	3.37.1 Meaning of Hot Line Maintenance	3-70
3.27.3 Classification Faults	3-52	3.37.2 Advantages of Hot Line Maintenance	3-70
3.27.4 Normal Range of Dissolved Gases in Healthy Oil.....	3-53	3.37.3 Tools and non conducting materials used for Hot line maintenance.....	3-70
3.27.5 Methods of Diagnosis in DGA.....	3-53	3.37.4 Properties of Fiber glass/epoxy material used for hot sticks	3-71
3.27.5.1 Roger's Ratio Method.....	3-53	3.37.5 Precautions to be taken for hot stick.....	3-72
3.27.5.2 IEC Basic Ratio Method	3-53		
3.27.5.3 Duval Triangle Method.....	3-54		
3.27.5.4 Kay Gas Analysis Method	3-54		
3.28 Degree of Polymerization	3-54		
3.28.1 Insulation Systems in Transformer	3-55		
3.28.2 Definition of Degree of Polymerization (DP)	3-55		
3.28.2.1 Table of Furan Analysis.....	3-55	Syllabus : Purpose of estimating and costing, qualities of good estimator, essential elements of estimating and costing, tender, guidelines for inviting tenders, quotation, price catalogue, labor rates, schedule of rates and estimating data (only theory),	
3.29 IS Specifications of Testing of Bushings and Testing of Transformer Oil.....	3-55		
3.29.1 IS Specification of Testing of Bushings	3-55	4.1 Introduction	4-1
3.29.1.1 Power Frequency Tests.....	3-56	4.1.1 Purpose of Estimating and Costing	4-1
3.29.1.2 Impulse Tests.....	3-57	4.1.2 Aims of Estimating and Costing.....	4-1
3.29.1.3 Other Tests	3-58	4.1.3 Problems to be faced if estimating / costing not done..	4-1
3.30 Methods/Techniques and Different Tests used for Condition Monitoring.....	3-58	4.2 Qualities of a Good Estimator.....	4-2
3.31 Introduction	3-61	4.3 Essential Elements of Estimating and Costing	4-2
3.31.1 Condition Monitoring of Induction Motor	3-61	4.3.1 Purpose of Estimating and Costing	4-2
3.32 Failure Modes or Various Abnormal Conditions in an Induction Motor	3-63	4.3.2 Things required by the Estimator for Estimate.....	4-2
3.32.1 Failure Modes.....	3-63	4.3.3 Proforma for Making Estimate	4-3
3.33 Root Causes of Failure in Induction Motor.....	3-63	4.3.4 Purpose of Estimate.....	4-3
		4.3.5 Rough Estimate.....	4-3
		4.3.6 Detailed Estimate	4-3
		4.3.7 Supplementary Estimate	4-3

UNIT 4**Chapter 4 : Basics of Estimation and Costing****4-1 to 4-12**

4.3.8	Documents to be attached with Detailed Estimate.....	4-3	5.3.1.1	Sequence	5-11
4.4	Concept of Contract	4-4	5.3.2	Schedule of Labour Rates	5-11
4.4.1	Contractors.....	4-4	5.3.3	Schedule of Rates and Estimating Data	5-11
4.4.2	Qualities of a Good Contractor	4-4	5.3.4	Determination of Size of Conductor for the Line	5-12
4.4.3	Types of Contracts	4-4	5.3.4.1	Current Carrying Capacity	5-12
4.5	Tender.....	4-4	5.3.4.2	Voltage Drop	5-12
4.5.1	Earnest Money	4-4	5.3.4.3	Minimum Permissible Size	5-12
4.5.2	Tender Notice.....	4-4	5.4	Conductor Size Calculation for Residential and Commercial Wiring.....	5-12
4.6	Inviting Tenders(Guidelines for Inviting Tenders).....	4-5	5.4.1	Examples on Conductor Size	5-13
4.6.1	Tender Form	4-5	5.5	Internal Wiring For Residential and Commercial Purposes.....	5-14
4.6.2	Specimen Tender.....	4-5	5.5.1	Wires used for Wiring Purpose.....	5-14
4.6.3	Procedure to be followed by Contractor to Fill the Tender	4-6	5.5.2	Wiring System	5-14
4.6.4	Procedure of Opening Tender	4-7	5.5.3	General Guidelines For Residential Wiring	5-14
4.6.5	Comparative Statement.....	4-8	5.6	General Rules for Residential and Commercial Wiring Work	5-15
4.7	Quotations.....	4-8	5.7	Residential Wiring Methods	5-15
4.7.1	Quotation Format	4-8	5.7.1	Looping out from Switch and Ceiling Rose	5-15
4.7.2	Comparative Statement of Quotation.....	4-9	5.7.2	Looping out from Switch	5-15
4.7.3	Proforma of Comparative Statement	4-9	5.7.3	Looping out from Ceiling Rose	5-16
4.8	Comparison of Quotation and Tender.....	4-9	5.7.4	Looping out from Junction Box	5-16
4.9	Price Catalogue.....	4-10	5.8	Residential Wiring Procedure	5-17
4.10	Labor Rates, Schedule of Rates and Estimating data	4-10	5.9	Before Energizing the New- Electrical Installation the Following Different Tests Must be Carried Out	5-17
4.11	Labor Change / Rates / Cost	4-10	5.10	Estimation of Wiring Work for Residential Wiring	5-18

UNIT 5

Chapter 5 : Installation and Estimation of Distribution System 5-1 to 5-34

Syllabus : Introduction cable sizing, Estimation and conductor size calculations of internal wiring for Residential and Commercial (Numerical) installations and estimate for underground LT service lines.

5.1	Construction of Cable.....	5-1	5.11	Service Lines.....	5-24
5.2	Cable Conductors.....	5-1	5.11.1	Overhead Service Line	5-24
5.2.1	Cable Insulation.....	5-2	5.11.1.1	Estimation for Service Line of Fig. 5.11.1	5-25
5.3	Estimation	5-2	5.11.1.2	Estimation for 3-phase Overhead Service Line.....	5-25
5.3.1	Steps in Estimation (OR Factors to be considered)	5-2	5.11.2	Underground Low Tension (LT) Service Line.....	5-27
			5.12	Installation and Estimation of Material and Costing of L.T. Service Line (Underground).....	5-28
			5.13	Estimation for Commercial Installation	5-29

5.14	Price Catalogue.....	5-34
------	----------------------	------

UNIT 6**Chapter 6 : Testing and Electrical Safety 6-1 to 6-40**

Syllabus : Understanding CAT Ratings & Using CAT rated Instrument, Electrical Installation Testing Procedures- Insulation resistance test between installation and earth, Insulation resistance test between conductors (use of GUARD Terminal in IR test & Application) (methods used for IR Testing) Testing of polarity, Testing of earth continuity paths (Applications of PAT Tester "Portable Appliance Tester" in commercial like hotels, hospital & Industry also) and Earth resistance test (methods for earth testing 2-pole, 3-pole new methods clamp on type where we can performs test in Live)

Contents of first aid box, treatment for cuts, burns and electrical shock. Procedures for first aid (e.g. removing casualty from contact with live wire and administering artificial respiration). Various statutory regulations (Electricity supply regulations, factory acts and Indian electricity rules of Central Electricity Authority (CEA), Classification of hazardous area. (Introduction to OSHA)

6.1	Understanding CAT Ratings and Using CAT rated Instruments	6-1
6.2	Electrical Installation Testing Procedures	6-3
6.3	Insulation resistance test between installation and earth.....	6-4
6.4	Insulation Resistance Test Between Conductors.....	6-4
6.5	Testing of polarity.....	6-5
6.6	Earth resistance test or Testing of Earth continuity paths	6-6
6.7	Precautions to be taken during IR Testing.....	6-6
6.8	Use of Guard terminal in IR test	6-7
6.9	Portable Appliance Tester (PAT)	6-8
6.9.1	Electrical classes in PAT testing.....	6-8
6.9.2	Pat Testing Process	6-10
6.9.1.1	Checking by the operator.....	6-10
6.9.1.2	Formal visual inspections	6-10
6.9.1.3	Visual inspections And Electrical Testing	6-11

6.9.1.4	Earth Bond Test Or Earth Continuity Test	6-11
6.9.1.5	Low Current Continuity Test:	6-11
6.9.1.6	High Current Bond Test.....	6-11
6.9.1.7	Insulation Test.....	6-12
6.9.1.8	Differential Leakage Test.....	6-12
6.9.1.9	Leakage Current Test.....	6-12
6.9.1.10	Load Test	6-12
6.9.1.11	Flash Testing.....	6-12
6.10	Earthing for Electrical Installation-	6-12
6.10.1	Testing of Installation for Earthing	6-12
6.10.2	Effectiveness of Earthing.....	6-13
6.11	Methods of Measuring Earth Resistance	6-13
6.11.1	3 pole method	6-13
6.11.1.1	Earth Tester	6-14
6.11.2	2-point (dead earth) method	6-15
6.12	Clamp on type (Live measurement) of Earth resistance	6-15
6.13	Contents of First Aid Box.....	6-16
6.14	Objectives of Safety	6-16
6.14.1	Terms and Definitions in Safety.....	6-17
6.14.2	Electric Accidents (Meaning and Reasons)	6-18
6.14.3	How Electrical Accidents can be Avoided ?	6-19
6.14.4	Tools used in Electrical Works and also Safety Devices	6-19
6.15	Reasons for Getting Electric Shocks	6-22
6.15.1	Factors Affecting the Severity of Shock and Body Resistance (R)	6-22
6.16	Procedure for first aid, Removing Casualty from Contract with Liver Wire and Administering Artificial Respiration	6-23
6.16.1	Cure of Electric Shock (Rescuing Electrocuted Person)	6-24
6.16.2	Different Methods of Artificial Respiration to be Administered	6-24
6.17	Precaution to be Taken while Working on Electrical Installation	6-27

6.17.1	Concept of Permit System.....	6-28	6.20.1	For Major works in Factories, maintenance, Repairshops	6-34
6.17.2	Causes of Fire due to Electric Faults and Precautions to be taken.....	6-28	6.21	Additional Important Topics	6-36
6.17.2.1	Attack on the Fire	6-29	6.21.1	Precautions to be Taken to Safe Guard Equipments	6-36
6.18	Electric Hazards, Types and their Effects on Human Bodies	6-29	6.21.2	Types of Different Fire Extinguishers.....	6-37
6.18.1	Hazard due to Electric Shock	6-30	6.21.2.1	Advantages of CO ₂ Extinguisher over Other Types	6-38
6.18.2	Hazard due to an Electric Arc	6-31	6.21.2.2	Operation of Fire Extinguisher	6-38
6.18.3	Hazard due to Blast.....	6-31	6.22	General Safety Principles about Chemical Substances and Water	6-39
6.19	General Safety Principles about Chemical Substances and Water	6-32			
6.19	Stratutory Regulations	6-32			
6.20	Central Electricity Authority (CEA).....	6-32			

- **Lab Manual**.....L-1 to L-22

List of Experiment.......... L-1

Experiment 1 : Single line diagram of 132 or 220 or 400 kV substation (based on actual field visit) Symbols, Plate or Pipe earthing..... L-2

Experiment 2 : Estimation for 11 kV Feeders and Substation L-3

Experiment 3 : Project report on area electrification. (Design of Earthing Grid)..... L-3

Experiment 4 : Measurement of Dielectric Absorption Ratio and Polarization Index of Insulation..... L-6

Experiment 5 : Study of troubleshooting of electrical equipment based on actual visit to repair workshop (i) Three phase induction motor (ii) Transformer (iii) Power Cable..... L-6

Experiment 6 : Study of thermograph images and analysis based on these images..... L-7

Experiment 7 : Assignment-Construction, working and troubleshooting of any two household electrical equipments (Fan, Mixer, Electric Iron, Washing machines, Electric Oven, Microwave-Limited to electrical faults.)L-12

Experiment 8 : Study the various types of earthing for electrical appliances / systems, Practice of earthing and Measurement of Earth resistance of Campus premises..... L-16

Experiment 9 : Design, Estimation and costing of earthing pit and earthing connection for computer lab, Electrical machines lab, HT Substation..... L-17

Experiment 10 : Measurement of insulation resistance of motors and cables.....L-22

- **University In-Sem Exam Questions and Answer**.....I-1 to I-23

- **Exam Oriented Key Points.....**.....K-1 to K-12
