

<b>Chapter 1 : Introduction and Foundation of HCI</b>		<b>1-1 to 1-46</b>
1.1	Introduction .....	1-1
1.2	What is HCI? .....	1-3
1.3	Basic Human Ability .....	1-8
1.3.1	Vision .....	1-8
1.3.2	Hearing .....	1-9
1.3.3	Touch .....	1-9
1.3.4	Human Memory .....	1-9
1.3.4(A)	Short-Term Memory .....	1-10
1.3.4(B)	Long-Term Memory .....	1-11
1.4	Computers .....	1-11
1.4.1	Speed .....	1-11
1.4.2	Interfaces .....	1-11
1.4.3	Widgets .....	1-11
1.4.4	Effect on Interaction .....	1-11
1.5	Human .....	1-11
1.5.1	Human Memory .....	1-11
1.5.2	Attention Span .....	1-12
1.5.3	Visual Perception .....	1-12
1.5.4	Psychology .....	1-12
1.5.5	Ergonomics .....	1-12
1.6	Thinking .....	1-12
1.6.1	Reasoning .....	1-13
1.6.2	Problem Solving .....	1-14
1.6.2(A)	Gestalt Theory .....	1-15
1.6.2(B)	Problem Space Theory .....	1-15
1.6.2(C)	Analogy in Problem Solving .....	1-16
1.6.3	Emotion .....	1-16

1.6.4	Individual Difference.....	1-17
1.6.5	Psychology and Design of Interactive Systems.....	1-18
1.6.5(A)	Guidelines.....	1-19
1.6.5(B)	Models to Support Design.....	1-19
1.6.5(C)	Techniques for Evaluation.....	1-20
1.7	The Computer.....	1-20
1.7.1	Text Entry Device.....	1-20
1.7.1(A)	The Alphanumeric Keyboard.....	1-20
1.7.2	Positioning, Pointing, and Drawing.....	1-21
1.7.2(A)	The Mouse.....	1-21
1.7.2(B)	Trackball and Thumbwheel.....	1-22
1.7.2(C)	Joystick and Keyboard Nipple.....	1-22
1.7.2(D)	Touch-Sensitive Screens (Touchscreens).....	1-22
1.7.2(E)	Stylus and Light Pen.....	1-23
1.7.2(F)	Digitizing Tablet.....	1-23
1.7.2(G)	Eyegaze.....	1-23
1.7.2(H)	Cursor Keys and Discrete Positioning.....	1-23
1.7.3	Display Devices.....	1-23
1.7.3(A)	Bitmap Displays : Resolution and Color.....	1-24
1.7.3(B)	Technologies.....	1-24
1.7.3(C)	Large Displays and Situated Displays.....	1-24
1.7.3(D)	Digital Paper.....	1-25
1.7.4	Devices for Virtual Reality and 3D Interaction.....	1-25
1.7.4(A)	Positioning in 3D space.....	1-25
1.7.4(B)	3D displays.....	1-27
1.8	The Interactions.....	1-28
1.8.1	Models of Interaction.....	1-28
1.8.1(A)	The Terms of Interaction.....	1-28
1.8.1(B)	The Execution Evaluation Cycle.....	1-29

1.8.1(C)	The Interaction Framework.....	1-29
1.8.2	Frameworks and HCI.....	1-30
1.8.3	Ergonomics.....	1-30
1.8.3(A)	Arrangement of Controls and Displays.....	1-30
1.8.3(B)	The Physical Environment of the Interaction.....	1-31
1.8.3(C)	Health Issues.....	1-31
1.8.3(D)	The Use of Color .....	1-32
1.8.3(E)	Ergonomics and HCI.....	1-32
1.8.4	Interaction Styles.....	1-32
1.8.4(A)	Command Line Interface.....	1-33
1.8.4(B)	Menus.....	1-33
1.8.4(C)	Natural Language .....	1-33
1.8.4(D)	Question/Answer and Query Dialog.....	1-34
1.8.4(E)	Form-Fills and Spreadsheets .....	1-34
1.8.4(F)	The WIMP Interface .....	1-34
1.8.4(G)	Point-and-Click Interfaces.....	1-34
1.8.4(H)	Three-Dimensional Interfaces .....	1-35
1.8.5	Ergonomics.....	1-35
1.8.5(A)	Arrangement of Controls and Displays.....	1-35
1.8.5(B)	The Physical Environment of The Interaction .....	1-36
1.8.5(C)	Health Issues.....	1-36
1.8.5(D)	The Use of Color .....	1-37
1.8.5(E)	Ergonomics and HCI.....	1-37
1.8.6	Elements of WIMP Interface .....	1-37
1.8.6(A)	Windows.....	1-37
1.8.6(B)	Icons.....	1-38
1.8.6(C)	Pointers.....	1-38
1.8.6(D)	Menus.....	1-38
1.8.6(E)	Buttons .....	1-39

1.8.6(F)	Toolbars .....	1-39
1.8.6(G)	Palettes .....	1-39
1.8.6(H)	Dialog Boxes.....	1-39
1.8.7	Interactivity.....	1-40
1.8.8	Measurable Human Factors.....	1-40
1.8.8(A)	Understanding Experience .....	1-40
1.8.8(B)	Designing Experience.....	1-41
1.8.8(C)	Physical Design and Engagement.....	1-41
1.8.8(D)	Managing Value .....	1-41
1.8.9	The Context of Interaction .....	1-42
1.9	Importance of User Interface.....	1-42
1.9.2	Brief History of Human Computer Interface.....	1-42
1.10	Good and Poor Design.....	1-43
1.10.1	What to Design? .....	1-43
1.10.2	What is Interaction Design? .....	1-43
1.10.3	Importance of Good Design.....	1-44

---

**Chapter 2 : Human Perspective in Interaction Design Process**
**2-1 to 2-26**

2.1	Introduction .....	2-1
2.2	Know Your User/Client .....	2-4
2.2.1	Understanding How People Interact with Computers.....	2-4
2.2.2	Important Human Characteristics in Design.....	2-4
2.2.3	Human Considerations in Design of Business Systems .....	2-6
2.2.4	Human Interaction Speeds .....	2-8
2.2.5	Performance Versus Preference .....	2-10
2.2.6	Methods of Gaining an Understanding of Users.....	2-10
2.2.7	Miller's Law .....	2-11
2.3	Design Guidelines.....	2-12
2.3.1	Navigating the Interface.....	2-13

2.3.2	Organizing the Display.....	2-13
2.3.3	Getting User's Attention.....	2-14
2.3.4	Facilitating Data Entry.....	2-14
2.4	Principles.....	2-15
2.4.1	Determine User's Skill Level.....	2-15
2.4.2	Identify the Tasks.....	2-15
2.4.3	Choose an Interaction Style.....	2-16
2.4.4	Natural Language.....	2-16
2.4.5	Eight Golden Rules of Interface Design.....	2-16
2.4.6	Prevent Errors.....	2-18
2.4.7	Ensuring Human Control while Increasing Automation.....	2-19
2.5	Theories.....	2-19
2.5.1	Design-by-Level.....	2-21
2.5.2	Stages of Action.....	2-22
2.5.3	Consistency.....	2-22
2.5.4	Contextual Theories.....	2-23
2.5.5	Dynamic Theories.....	2-24

---

**Chapter 3 : Interaction Styles and HCI in Software Process**
**3-1 to 3-24**

3.1	Introduction.....	3-1
3.2	Design.....	3-2
3.2.1	Process of Interaction Design.....	3-6
3.3	Interaction Styles.....	3-8
3.3.1	Command Line Interface.....	3-8
3.3.2	Menus.....	3-8
3.3.3	Form – Fills-In.....	3-8
3.3.4	Direct Manipulation.....	3-9
3.4	Graphical User Interface.....	3-10
3.4.1	Popularity of Graphics.....	3-10

3.4.2	Concept of Direct Manipulation .....	3-11
3.4.3	Advantages, Disadvantages and Characteristics of Graphical User Interface .....	3-11
3.5	Web User Interface.....	3-13
3.5.1	Popularity of the Web .....	3-14
3.5.2	Characteristics of Web .....	3-14
3.5.3	Merging of Graphical Business Systems and Web Characteristics of Intranet Versus Internet .....	3-15
3.5.4	Web Page Versus Application Design.....	3-15
3.5.5	Principles for User Interface Design .....	3-17
3.5.6	Software Life Cycle .....	3-17
3.5.7	Usability Engineering.....	3-19
3.5.8	Iterative Design and Prototyping .....	3-20
3.5.9	Design Rationale .....	3-23

---

**Chapter 4 : Usability Evaluation and Universal Design**
**4-1 to 4-20**

4.1	Introduction .....	4-1
4.2	User Interface Design Process .....	4-3
4.2.1	Designing for People: Seven Commandments .....	4-4
4.2.2	Usability Assessment in the Design Process .....	4-6
4.2.3	Common Usability Problems .....	4-6
4.2.4	Practical and Objective Measures of Usability .....	4-7
4.2.5	Formative and Summative Evaluation.....	4-8
4.2.6	Usability Specifications for Evaluation .....	4-8
4.2.7	Analytic Methods .....	4-9
4.2.8	Model Based Analysis.....	4-9
4.2.9	GOMS Model.....	4-10
4.2.10	Empirical Methods: Experimental Evaluation .....	4-11
4.2.11	Field Studies.....	4-11
4.2.12	Usability Testing in Laboratory .....	4-11
4.2.13	Controlled Experiments .....	4-12

4.2.14	Heuristic Evaluation.....	4-12
4.2.15	Cognitive Walkthrough.....	4-14
4.3	Evaluation Framework.....	4-15
4.3.1	Paradigms and Techniques .....	4-15
4.3.2	DECIDE : A Framework to Guide Evaluation .....	4-15
4.3.3	Universal Design Principles .....	4-15
4.3.4	Multi-Modal Interaction .....	4-17
4.3.5	Designing for Diversity.....	4-18

**Chapter 5 : HCI Paradigms****5-1 to 5-28**

5.1	Introduction .....	5-1
5.2	Paradigms for Interaction.....	5-5
5.2.1	Time Sharing.....	5-5
5.2.2	Video Display Units .....	5-6
5.2.3	Programming Toolkits .....	5-6
5.2.4	Personal Computing.....	5-6
5.2.5	The Metaphor .....	5-6
5.2.6	Direct Manipulation .....	5-6
5.2.7	Hypertext.....	5-6
5.2.8	Computer-Supported Cooperative Work.....	5-7
5.2.9	Agent Based Interfaces .....	5-7
5.3	Ubiquitous Computing.....	5-7
5.3.1	Sensor-based and Context-Aware Interaction.....	5-10
5.3.2	Data Integrity Versus Data Immunity.....	5-13
5.3.3	Handling Missing Data .....	5-13
5.3.4	Data Entry and Usability .....	5-14
5.3.5	Auditing Versus Editing.....	5-14
5.3.6	Retrieval in Physical World.....	5-15
5.3.7	Retrieval in Digital World.....	5-16
5.3.8	Constrained Natural Language Output .....	5-16
5.3.9	Five Stage Search Framework.....	5-17
5.3.10	Dynamic queries and faceted search .....	5-18

5.3.11	The Social Aspects of Search.....	5-18
5.4	Pattern Recognition .....	5-19
5.4.1	Introduction .....	5-21
5.4.2	Examples.....	5-23
5.4.3	Role of Machine Learning.....	5-23
5.4.4	Pattern Recognition Process.....	5-26
5.4.5	Pattern Recognition in HCI .....	5-26

**Chapter 6 : HCI for Mobile and Handheld Devices****6-1 to 6-25**

6.1	Introduction .....	6-1
6.2	Designing for Mobile and Other Devices.....	6-7
6.2.1	Anatomy of a Mobile App .....	6-8
6.2.2	Mobile Form Factors.....	6-9
6.2.3	Handheld Format Apps.....	6-9
6.2.4	Tablet Format Apps.....	6-10
6.2.5	Mini-Tablet Format Apps .....	6-10
6.2.6	Mobile Navigation, Content, and Control Idioms.....	6-10
6.2.7	Navigation and Toolbars.....	6-11
6.2.8	Drawers.....	6-12
6.2.9	Tap-to-Reveal and Direct Manipulation.....	6-12
6.2.10	Searching, Sorting and Filtering.....	6-14
6.2.11	Welcome and Help Screens .....	6-16
6.2.12	Multi-Touch Gestures .....	6-18
6.2.13	Inter-App Integration .....	6-19
6.2.14	Android Accessibility Guidelines.....	6-21
6.3	Other Devices .....	6-22
6.3.1	Designing for Kiosks .....	6-22
6.3.2	Designing for 10-Foot Interfaces.....	6-22
6.3.3	Designing for Automotive Interfaces.....	6-23
6.3.4	Designing for Audible Interfaces .....	6-23
	• Multiple Choice Questions .....	M-1 to M-34
