

**Unit-I****Chapter 1 : AC Fundamentals 1-1 to 1-30**

Syllabus : Generation of alternating voltage, Phasor representation of sinusoidal quantities, R, L, C circuit elements, its voltage and current response.

1.1	Introduction	1-2	1.5.9	Average Value	1-9
1.2	Classification of Electric Networks	1-2	1.5.10	Form Factor	1-11
1.2.1	Active or Passive Networks	1-2	1.5.11	Crest Factor or Peak Factor (K_p)	1-11
1.2.2	Unilateral or Bilateral Networks	1-2	1.5.12	Solved MSBTE Examples	1-11
1.2.3	Linear or Nonlinear Networks	1-2	1.6	Phasor Representation of an Alternative Quantity	1-15
1.3	Circuit Elements	1-2	1.7	Phase of an Alternating Quantity	1-16
1.3.1	Resistor and Resistance	1-2	1.7.1	Phase Angle	1-16
1.3.2	Conductance G	1-3	1.7.2	Phase Difference	1-16
1.3.3	Capacitors and Capacitance	1-3	1.7.3	Leading and Lagging Phase Difference	1-16
1.3.4	Inductors	1-4	1.8	Mathematical Representation of Phasor	1-18
1.4	Generation of Alternating Voltage	1-4	1.8.1	Polar Representation	1-18
1.4.1	Graphical and Mathematical Representation of Sinusoidal AC Quantities	1-5	1.8.2	Rectangular Representation	1-18
1.5	Definitions of Various Terms Associated with Waveforms	1-6	1.8.3	Conversion from Polar to Rectangular	1-18
1.5.1	Waveform	1-6	1.8.4	Rectangular to Polar Conversion	1-18
1.5.2	Instantaneous Value	1-6	1.8.5	Addition and Subtraction of Phasors (using Rectangular Form)	1-18
1.5.3	Cycle	1-7	1.8.6	Multiplication and Division of Phasors (using Polar Form)	1-18
1.5.4	Time Period or Periodic Time (T)	1-7	1.9	Single Phase AC Circuits	1-21
1.5.5	Frequency	1-7	1.9.1	Reactance and Impedance	1-21
1.5.6	Amplitude	1-8	1.9.2	Inductive Reactance (X_L)	1-21
1.5.7	Peak and Peak to Peak Voltage	1-8	1.9.3	Capacitive Reactance (X_C)	1-21
1.5.8	Effective or R.M.S. Value	1-9	1.9.4	Impedance (Z)	1-21
			1.10	Purely Resistive AC Circuit	1-22
			1.10.1	Analysis of the Purely Resistive AC Circuit	1-22

1.10.2	Voltage and Current Waveforms and Equations	1-22	2.1.1	Reactance and Impedance	2-2
1.10.3	Phasor Diagram	1-23	2.1.2	Reactance	2-2
1.10.4	Impedance of the Purely Resistive Circuit	1-23	2.1.3	Inductive Reactance (X_L)	2-2
1.10.5	Average Power (P_{av})	1-23	2.1.4	Capacitive Reactance (X_C)	2-2
1.11	Purely Inductive AC Circuit	1-23	2.1.5	Impedance (Z)	2-2
1.11.1	Equations for Current i and Voltage v ..	1-24	2.2	Concept of Impedance Triangle	2-2
1.11.2	Waveforms and Phasor Diagram	1-25	2.3	Important Terms Related to Power	2-3
1.11.3	Power in a Purely Inductive Circuit	1-25	2.3.1	Apparent Power (S)	2-3
1.11.4	Impedance of a Purely Inductive Circuit	1-25	2.3.2	Real Power or True Power or Active Power (P)	2-3
1.12	Purely Capacitive AC Circuit	1-27	2.3.3	Reactive Power or Imaginary Power (Q)	2-3
1.12.1	Equation for Voltage and Current	1-27	2.3.4	Different Powers and Their Units	2-4
1.12.2	Current and Voltage Waveforms and Phasor Diagram	1-28	2.3.5	Power Factor	2-4
1.12.3	Power in Purely a Capacitive AC Circuit	1-28	2.3.6	Importance (Significance) of Power Factor	2-5
1.12.4	Impedance of a Purely Capacitive Circuit	1-29	2.3.7	Causes of Low Power Factor	2-5
1.12.5	Comparison of Purely Inductive and Purely Capacitive Circuits	1-29	2.3.8	Power Triangle	2-5
1.13	I-Scheme Questions and Answers	1-30	2.4	AC Circuits with Series Elements	2-6
•	Review Questions	1-30	2.5	The Series R-L Circuit	2-6
Unit-I			2.5.1	Phasor Diagram	2-6
Chapter 2 : Single Phase AC Series Circuits			2.5.2	Impedance of L-R Series Circuit	2-7
2-1 to 2-48			2.5.3	Impedance Triangle	2-7
Syllabus : R-L, R-C, R-L-C combination of AC series circuit, Impedance, Reactance, Impedance triangle, Power factor, Active power, Reactive power, Apparent power, Power triangle and vector diagram, Resonance, Bandwidth, Quality factor and voltage magnification in series R-L, R-C and R-L-C circuit.			2.5.4	Voltage and Current Waveforms	2-7
2.1	Single Phase AC Circuits.....	2-2	2.5.5	Average Power in Series L-R Circuit	2-8
			2.5.6	Power Triangle for L-R Series Circuit	2-8
			2.5.7	Apparent Power (S)	2-8

2.5.8	Real Power or True Power or Active Power (P)	2-8	2.8.1	Resonance in Series RLC Circuit	2-33
2.5.9	Reactive Power or Imaginary Power (Q)	2-9	2.8.2	Resonant Frequency (f_r)	2-33
2.5.10	Power Factor	2-9	2.8.3	Phasor Diagrams of RLC Series Resonant Circuit	2-34
2.5.11	Q-Factor	2-9	2.8.4	Impedance at Resonance	2-35
2.6	The Series R-C Circuit	2-15	2.8.5	Current at Resonance	2-36
2.6.1	Phasor Diagram	2-15	2.8.6	Phase Angle of Series Resonant Circuit	2-36
2.6.2	Impedance of RC Series Circuit	2-16	2.8.7	Voltage and Current	2-36
2.6.3	Impedance Triangle (Series R-C Circuit)	2-16	2.8.8	Variation of Power Factor	2-36
2.6.4	Phase Relationship between Voltage and Current (Series R-C Circuit)	2-16	2.8.9	The Q-Factor (Quality Factor) of a Series Resonant Circuit	2-37
2.6.5	Average Power in Series R-C Circuit	2-17	2.8.10	Bandwidth of a Series Resonant Circuit	2-37
2.6.6	Power Triangle for R-C Series Circuit	2-17	2.8.11	Magnification in Series Resonant Circuit	2-38
2.6.7	Various Powers and Power Factor	2-17	2.8.12	Characteristics of Series Resonant Circuit	2-39
2.6.8	Q-Factor	2-18	2.9	I-Scheme Solved Examples	2-43
2.7	An R-L-C Series Circuit	2-22	2.10	I-Scheme Questions and Answers	2-47
2.7.1	Importance of the Values of Reactances	2-22		• Review Questions.....	2-46
2.7.2	Phasor Diagrams	2-22			
2.7.3	Phasor Diagram for : $X_L > X_C$	2-22			
2.7.4	Phasor Diagram for : $X_L < X_C$	2-23			
2.7.5	Phasor Diagram for : $X_L = X_C$	2-23			
2.7.6	Impedance of Series LCR Circuit	2-23			
2.7.7	Impedance Triangle for an LCR Circuit	2-24			
2.7.8	Power Supplied to the R.L.C. Circuit	2-24			
2.7.9	Power Triangle	2-24			
2.7.10	Various Powers and Power Factors of RLC Series Circuit	2-24			
2.7.11	Figure of Merit or Q-factor	2-25			
2.8	Resonance	2-32			

Unit-II

Chapter 3 : Single Phase AC Parallel Circuits

3-1 to 3-31

Syllabus : R-L, R-C, R-L-C parallel combination of AC circuits, Impedance, Reactance, Phasor diagram, Impedance triangle, R-L, R-C, R-L-C parallel AC circuit, Power factor, Active power, Apparent power, Reactive power, Power triangle, Resonance in parallel R-L, R-C, R-L-C circuit, Bandwidth, Quality factor and Voltage magnification.

3.1	A.C. Parallel Circuit	3-2	3.7.1	Conductance and Susceptance	3-8
	3.1.1 Two Impedances in Parallel	3-2	3.7.2	Admittance Triangle	3-8
3.2	Multiplication and Division of Impedances	3-2	3.7.3	Solved Examples on Parallel Circuits	3-9
	3.2.1 Multiplication of Impedances	3-3	3.8	Resonance in Parallel RLC Circuit	3-16
	3.2.2 Division of Impedances	3-3	3.8.1	Resonant Frequency (f_r)	3-17
3.3	Parallel AC Circuits	3-3	3.8.2	Dynamic Impedance at Resonance (Z_D)	3-17
3.4	Resistance in Parallel with Pure Inductance (R-L Parallel Circuit)	3-3	3.8.3	Current and Voltage	3-18
	3.4.1 Phasor Diagram	3-4	3.8.4	Phase Angle of Parallel Resonant Circuit	3-18
	3.4.2 Impedance	3-4	3.8.5	Why is the Parallel Circuit Called a Rejector Circuit ?.....	3-19
	3.4.3 Voltage and Current Waveforms	3-4	3.8.6	Q-Factor of the Parallel Circuit	3-19
	3.4.4 Power Factor	3-4	3.8.7	Effect of Q on Bandwidth	3-19
	3.4.5 Active Power (P)	3-4	3.8.8	Magnification in Parallel Resonant Circuit	3-20
	3.4.6 Reactive Power (Q)	3-5	3.8.9	Current Through C	3-20
	3.4.7 Apparent Power (S)	3-5	3.8.10	Characteristics of Parallel Resonant Circuit	3-20
3.5	Resistance in Parallel with Pure Capacitance	3-5	3.8.11	Comparison of Series and Parallel Resonant Circuits	3-21
	3.5.1 Phasor Diagram	3-5	3.9	MSBTE Questions and Answers	3-27
	3.5.2 Impedance	3-5	3.10	I-Scheme Solved Examples	3-27
	3.5.3 Voltage and Current Waveforms	3-5	3.11	I-Scheme Questions and Answers	3-30
	3.5.4 Power Factor	3-6		• Review Questions.....	3-26
	3.5.5 Active Power (P)	3-6			
	3.5.6 Reactive Power (Q)	3-6			
	3.5.7 Apparent Power (S)	3-6			
3.6	Series Combination of R and L in Parallel with Capacitor	3-6			
	3.6.1 Phasor Diagram	3-6			
	3.6.2 Impedance	3-6			
	3.6.3 Power Factor	3-7			
3.7	The Concept of Admittance	3-7	4.1	Introduction to Polyphase AC Circuits	4-2

Unit-III

Chapter 4 : Three Phase Circuits 4-1 to 4-32

Syllabus : Phasor and complex representation of three phase supply, Phase sequence and polarity. Types of three phase connections, Phase and line quantities in three phase star and delta system, Balanced and unbalanced load. Neutral shift in unbalanced load, Three phase power, Active, Reactive and Apparent power in star and delta system.

4.1.1	Why to use a Polyphase System ?.....	4-2	4.7.1	Line Voltages and Phase Voltages for Delta Connected Supply	4-17
4.1.2	How Many Phases ?	4-2	4.7.2	Phase and Line Voltages in Delta Connections	4-18
4.1.3	Three Phase Supply Waveforms	4-2	4.7.3	Line Current and Phase Current for Delta Connection	4-18
4.2	Advantages of Polyphase Systems over Single Phase System	4-2	4.7.4	The Complete Phasor Diagram for Delta Load	4-19
4.2.1	Comparison of Single Phase and Three Phase Systems	4-3	4.7.5	Power Relations	4-20
4.3	Generation of Three Phase Emf	4-3	4.7.6	Power Triangle	4-20
4.3.1	Complex and Phasor Representation of the Three Phase Voltages	4-4	4.7.7	Power Factor	4-21
4.3.2	Concept of Symmetrical or Balanced System 4-5		4.7.8	Comparison of Star and Delta Connections	4-21
4.3.3	Concept of Phase Sequence	4-5	4.8	Applications of 3 Phase AC Circuits	4-29
4.4	Types of Three Phase Supply Connections	4-5	4.9	I-Scheme Solved Examples.....	4-30
4.4.1	Star Connection (Wye Connection)	4-6	4.10	MSBTE Questions and Answers	4-31
4.4.2	Delta Connection	4-6	4.11	I-Scheme Questions and Answers	4-32
4.5	Types of Loads	4-6		• Review Questions.....	4-30
4.5.1	Balanced or Unbalanced Load	4-6	Unit-IV		
4.5.2	Comparison of Balanced and Unbalanced Load	4-7	Chapter 5 : Principles of DC Circuit Analysis		
4.5.3	Neutral Shift in Unbalanced Load	4-8	5-1 to 5-37		
4.6	Relations between Voltages and Current for a Balanced Star Load	4-8	Syllabus : Source transformation, Star/delta and Delta/star transformations, Mesh analysis, Node analysis.		
4.6.1	Line Voltages and Phase Voltages	4-8	5.1	Basic Definitions.....	5-2
4.6.2	Typical Values of Line and Phase Voltages for Star Connected Supply	4-8	5.1.1	Network or Circuit	5-2
4.6.3	Relation between Phase and Line Current	4-9	5.1.2	Concept of Open and Short Circuit	5-2
4.6.4	Relation between Phase and Line Voltages	4-9	5.1.3	Branch, Mesh and Node	5-2
4.6.5	The Complete Phasor Diagram	4-10	5.2	Source Transformation	5-3
4.6.6	Power Relations	4-10	5.2.1	Conversion of Voltage Source to Current Source	5-3
4.6.7	Power Triangle	4-11	5.2.2	Conversion of Current Source to Voltage Source	5-4
4.6.8	Power Factor for Star Load	4-11	5.2.3	Voltage Sources in Series	5-5
4.6.9	Solved Examples on Star Load	4-11	5.2.4	Current Sources in Parallel	5-5
4.7	Voltage, Current and Power Relation in a Balanced Delta Load	4-17			

<p>5.3 Star-Delta and Delta-Star Transformation 5-6</p> <p> 5.3.1 The Star Network 5-6</p> <p> 5.3.2 The Delta Network 5-6</p> <p> 5.3.3 Delta-Star Transformation 5-7</p> <p> 5.3.4 Star to Delta Conversion 5-9</p> <p>5.4 Kirchhoff's Laws 5-10</p> <p> 5.4.1 Kirchhoff's Current Law (KCL) 5-10</p> <p> 5.4.2 Node Based Analysis (Nodal Analysis) 5-12</p> <p>5.5 Mesh or Loop and Sign Convention 5-21</p> <p> 5.5.1 Kirchhoff's Voltage Law (or Mesh or Loop Law) 5-22</p> <p> 5.5.2 Procedure to be Followed to Solve an Example using Kirchhoff's Laws 5-22</p> <p> 5.5.3 Mesh Analysis or Maxwell's Loop Current Method 5-24</p> <p>5.6 MSBTE Questions and Answers 5-32</p> <p>5.7 I-Scheme Solved Examples 5-32</p> <p>5.8 I-Scheme Questions and Answers 5-36</p> <p> • Review Questions 5-32</p>	<p>6.3 Superposition Theorem 6-3</p> <p> 6.3.1 Statement of the Superposition Theorem 6-3</p> <p> 6.3.2 Steps to be Followed to Apply the Superposition Theorem 6-3</p> <p> 6.3.3 Applications of the Superposition Theorem 6-3</p> <p> 6.3.4 Drawbacks of the Superposition Theorem 6-3</p> <p> 6.3.5 Examples on Superposition Theorem 6-4</p> <p>6.4 Thevenin's Theorem..... 6-19</p> <p> 6.4.1 Steps for the Thevenin's Theorem 6-21</p> <p> 6.4.2 Advantages of Thevenin's Theorem 6-21</p> <p> 6.4.3 Where can't We Apply the Thevenin's Theorem ? 6-21</p> <p> 6.4.4 Applications of the Thevenin's Theorem 6-21</p> <p> 6.4.5 Drawbacks of the Thevenin's Theorem 6-22</p> <p> 6.4.6 Solved Examples on Thevenin's Theorem 6-22</p> <p>6.5 Norton's Theorem 6-33</p> <p> 6.5.1 Statement of Norton's Theorem 6-33</p> <p> 6.5.2 Equivalence between Thevenin's and Norton's Theorems 6-34</p> <p> 6.5.3 Applications of the Norton's Theorem 6-35</p> <p>6.6 Maximum Power Transfer Theorem 6-46</p> <p> 6.6.1 Statement of Maximum Power Transfer Theorem 6-46</p>
---	---

Unit-V

Chapter 6 : Network Theorems 6-1 to 6-62

Syllabus : Superposition theorem, Thevenin's theorem, Norton's theorem, Maximum power transfer theorem, Reciprocity theorem, Duality in electric circuits.

6.1 Introduction 6-2
6.2 Types of Networks 6-2
6.2.1 Active or Passive Networks 6-2
6.2.2 Unilateral or Bilateral Networks 6-2
6.2.3 Linear or Nonlinear Networks 6-2

6.6.2	Condition for Maximum Power Transfer	6-47	6.8	Principle of Duality	6-55
6.6.3	Applications of Maximum Power Transfer Theorem	6-47	6.8.1	Graphical Method of Constructing a Dual Network	6-56
6.7	Reciprocity Theorem	6-53	6.9	I-Scheme Solved Examples	6-58
6.7.1	Explanation of Reciprocity Theorem	6-53	6.10	I-Scheme Questions and Answers	6-61
6.7.2	Drawbacks of the Reciprocity Theorem	6-55		• Review Questions	6-58
