

UNIT - I

Chapter 1 : Functions	1-1 to 1-11
1.1 Introduction	1-1
1.2 Functions	1-1
1.3 Domain, Co-domain and the Range of A Function	1-1
1.4 Direct and Inverse Images of A Function	1-5
1.4.1 Direct Image of A Set.....	1-5
1.4.2 Inverse Image of A Function.....	1-5
1.5 Types of Function	1-6
Chapter 2 : Relations	2-1 to 2-36
2.1 Introduction	2-1
2.2 Relations	2-1
2.2.1 Ordered Pairs.....	2-1
2.3 The Cartesian Product of Sets	2-1
2.4 Relations on Sets	2-2
2.4.1 Inverse of a Relation	2-2
2.5 The Compositions of Relation	2-3
2.6 Representation of Relation	2-3
2.6.1 The Diagraph of A Relation.....	2-5
2.7 Properties of Relation	2-8
2.7.1 Definition : Equivalence classes of An Equivalence Relation.....	2-12
2.8 Partition of Set	2-16
2.9 Closure Operations	2-18
2.10 Warshall's Algorithm	2-20
2.11 Partial Order Relations	2-22
2.12 Hasse Diagrams	2-23
2.13 Lattices	2-25
2.14 Dual of a Lattice	2-28

Chapter 3 : Recurrence Relations		3-1 to 3-34
3.1	Introduction	3-1
3.2	Definition	3-1
	3.2.1 Recurrence Relation.....	3-1
	3.2.2 Linear Recurrence Relation with Constant Coefficients.....	3-2
3.3	Formulation of Recurrence Relation	3-2
3.4	Solution of Recurrence Relation	3-8
	3.4.1 Solution of Homogeneous Recurrence Relation	3-8
3.5	Solving Linear Homogeneous Recurrence Relations with Constant Coefficient of Degree Two when Characteristic Equation has Distinct Roots and Only One Root	3-16
	3.5.1 Distinct Roots Theorem.....	3-16
	3.5.2 Single – Root Theorem.....	3-17
	3.5.3 Particular Solution of Non linear Homogeneous Recurrence Relation.....	3-18
3.6	Solving Recurrence Relations by Backtracking Method	3-27
3.7	Solving Recurrence Relations by Generating Function Method	3-28
3.8	Sorting Algorithm	3-30
3.9	Application of Recurrence relation	3-32
	3.9.1 Formulation and Solving Recurrence Relation of Towers of Hanoi Problem.....	3-32
	3.9.2 Formulation and Solving Recurrence Relation of Fibonacci Numbers.....	3-32
	3.9.3 Formulation and Solving Recurrence Relation of Intersection of Lines in a Plane	3-33

UNIT - II

Chapter 4 : Counting Principles		4-1 to 4-12
4.1	Introduction	4-1
4.2	Principles of Counting	4-1
	4.2.1 Addition Principle of Counting (Sum Rule).....	4-1
	4.2.2 Multiplication Principle of Counting.....	4-1
	4.2.3 Two-way Counting.....	4-2

4.2.4	Tree Diagram for Solving Counting Problems	4-2
4.3	Pigeon - Hole Principle.....	4-4
4.4	Combinatorial Proof.....	4-5
4.5	Principle of Inclusion-Exclusion (Sieve Formula) (Without Proof).....	4-8
<hr/> Chapter 5 : Permutations and Combinations		5-1 to 5-16
5.1	Introduction.....	5-1
5.2	Permutations.....	5-1
5.2.1	r Permutation of n Elements.....	5-5
5.2.2	r -Combination of n Elements	5-5
5.2.3	Binomial Numbers.....	5-5
5.2.4	Permutation with Repetitions from Distinct Objects.....	5-6
5.2.5	n Permutation with Constrained Repetitions	5-7
5.2.6	Multinomial Theorem.....	5-7
5.2.7	Combinations with Unlimited Repetitions	5-8
5.3	Combination with Indistinct Objects.....	5-9
5.3.1	Distinct Objects in Distinct Cells	5-9
5.3.2	Indistinguishable Objects in Distinct Cells	5-9
5.3.3	Distinct Objects in Indistinguishable Cells	5-10
5.3.4	Indistinguishable Objects and Indistinguishable Cells	5-10
5.4	Combination with Identities	5-13
5.4.1	Pascal's Identity	5-13
5.4.2	Vandermonde's Identity.....	5-13
5.4.3	Binomial Theorem	5-14
<hr/> Chapter 6 : Languages, Grammars and Machines		6-1 to 6-10
6.1	Introduction to Languages and Grammars	6-1
6.2	Phrase-Structure Grammars.....	6-1
6.3	Regular Expression and Regular languages	6-2

6.4	Derivation Tree.....	6-3
6.5	Finite State Machines.....	6-4
6.6	Finite State Automata.....	6-5
6.7	Godel Numbers.....	6-6
6.8	Turing Machines.....	6-7

UNIT - III

Chapter 7 : Graphs	7-1 to 7-28
---------------------------	--------------------

7.1	Introduction.....	7-1
	7.1.1 Basic Concept.....	7-1
7.2	Definitions.....	7-1
7.3	Representation of Graph.....	7-5
7.4	Some Important Graphs.....	7-8
7.5	Path, Connectivity.....	7-12
7.6	Directed Graphs.....	7-13
7.7	Warshall's Algorithm, Shortest Paths.....	7-14
7.8	Linked Representation of Graph.....	7-17
7.9	Operation on Graphs with Algorithms.....	7-20

Chapter 8 : Trees	8-1 to 8-22
--------------------------	--------------------

8.1	Introduction.....	8-1
8.2	Tree.....	8-1
	8.2.1 Properties of Tree Graph.....	8-2
	8.2.2 Equivalent Properties of Tree.....	8-3
8.3	Directed Tree or rooted tree.....	8-7
8.4	Binary Tree.....	8-7
	8.4.1 Definition (Binary Rooted Tree).....	8-7
	8.4.2 Level of Vertex.....	8-8
	8.4.3 Height of Binary Tree.....	8-9

8.5	Tree Traversal.....	8-10
8.5.1	Ordered Rooted Trees.....	8-10
8.5.2	Preorder Traversal.....	8-10
8.5.3	Inorder Traversal.....	8-11
8.5.4	Postorder Traversal.....	8-12
8.5.5	Prefix Notation.....	8-14
8.6	Complete and Extended Binary Trees.....	8-15
8.6.1	Complete Binary Trees.....	8-15
8.6.2	Extended Binary Trees : 2-Trees.....	8-16
8.7	Representing Binary Tree in the Memory.....	8-16
8.7.1	Linked Representation of Binary Trees.....	8-17
8.8	Binary Search Tree.....	8-17
8.8.1	Representation.....	8-18
8.8.2	Basic Operations.....	8-18
8.8.3	Node.....	8-18
8.8.4	Inserting in a Binary Search Tree.....	8-19
8.8.5	Deleting in a Binary Search Tree.....	8-20
➤	Model Question Paper – I.....	M-1 to M-3
➤	Model Question Paper – II.....	M-4 to M-5
