

**Chapter 1 : Review of Thermodynamics and Heat Transfer 1-1 to 1-31**

**1.1 Introduction..... 1-1**

**1.2 Thermodynamics System ..... 1-1**

**1.3 Dimensions and Units ..... 1-1**

**1.4 Energy ..... 1-2**

**1.5 Ideal Gas Equation..... 1-3**

**1.6 Enthalpy ..... 1-3**

**1.7 Specific Heats of a Gas ..... 1-3**

**1.8 First Law of Thermodynamics ..... 1-3**

**1.9 Application of First Law of Thermodynamics to Closed System (Non-Flow) Processes ..... 1-4**

1.9.1 A Constant Volume Process..... 1-4

1.9.2 A Constant Pressure Process ..... 1-4

1.9.3 Constant Temperature or Isothermal Process..... 1-5

1.9.4 Hyperbolic Process..... 1-5

1.9.5 Reversible Adiabatic Process ..... 1-5

1.9.6 Reversible Polytropic Process ..... 1-6

1.9.7 The Combination of Polytropic Law  $p \cdot V^n = C$  and Equation of State,  $pV = mRT$  ..... 1-6

**1.10 Application of First Law of Thermodynamics to Steady Flow Open Systems..... 1-6**

**1.11 Mechanical Work in a Steady Flow Process..... 1-8**

**1.12 Second Law of Thermodynamics ..... 1-9**

**1.13 Carnot’s Theorem ..... 1-9**

**1.14 Entropy ..... 1-9**

**1.15 Principle of Increase of Entropy ..... 1-9**

**1.16 Entropy Change for Ideal Gas - General Equation..... 1-9**

**1.17 State of a Substance..... 1-10**

**1.18 Pure Substance ..... 1-10**

**1.19 Phase Transformation at Constant Pressure-Formation of Steam ..... 1-10**

**1.20 Properties of Steam ..... 1-11**

**1.21 Steam Tables and Their Uses ..... 1-12**

**1.22 Temperature - Entropy (T-S) and Enthalpy - Entropy (h-S) Diagrams for Steam..... 1-13**

**1.23 Compressed Liquid ..... 1-15**

**1.24 Heat Transfer ..... 1-17**

**1.25 Modes of Heat Transfer..... 1-17**

**1.26 Heat Transfer by Conduction..... 1-17**

**1.27 Fourier’s Law of Heat Conduction..... 1-17**

1.27.1 Heat Conduction through a Thick Wall..... 1-17

1.27.2 Analogy between Heat Conduction and Electrical System ..... 1-18

1.27.3 Composite Walls ..... 1-18

**1.28 Convection..... 1-19**

**1.29 Overall Heat Transfer Coefficient, U ..... 1-20**

**1.30 Heat Transfer in an Infinitely Long Cylinder ..... 1-21**

**1.31 Heat Transfer Through a Hollow Sphere ..... 1-21**

**1.32 Heat Transfer through a Composite Cylinder with Conduction and Convection ..... 1-21**

**1.33 Thermal Insulation..... 1-22**

**1.34 Radiation ..... 1-22**

**1.35 Stefan - Boltzmann Law of Radiation ..... 1-23**

**Chapter 2 : Development of Refrigeration and Refrigerants 2-1 to 2-33**

**Introduction and refrigerant :** Brief history and need of refrigeration and air conditioning, methods of producing cooling, ton of refrigeration, coefficient of performance, types and applications of refrigeration and air conditioning systems, Recapitulation of desirable properties of refrigerants, secondary refrigerants, future industrial refrigerants.

**2.1 Development of Refrigeration..... 2-1**

**2.2 Definition of Refrigeration ..... 2-1**

2.2.1 Definition of Airconditioning ..... 2-1

2.2.2 Difference between Refrigeration and Airconditioning..... 2-2

2.2.3	Application of Refrigeration in Food Processing...	2-2	<b>2.18</b>	<b>Deep Freezers</b> .....	<b>2-15</b>
2.2.4	Applications of Refrigeration .....	2-2	<b>2.19</b>	<b>Ice Making Plant</b> .....	<b>2-15</b>
<b>2.3</b>	<b>Systems of Refrigeration /</b>		2.19.1	Block or Can Ice Plant .....	2-15

<b>2.16</b>	<b>Refrigerators</b> .....	<b>2-12</b>	<b>Chapter 3 : Air Refrigeration</b> <span style="float: right;"><b>3-1 to 3-29</b></span>		
2.16.1	Components of Refrigeration System.....	2-13	<b>Air refrigeration</b> : Aircraft refrigeration, working and analysis of Simple, Bootstrap, Reduced ambient and Regenerative air refrigeration systems.		
2.16.2	Precautions during Usage of Refrigerator				
	(Thermodynamic Significance) .....	2-14			
<b>2.17</b>	<b>Water Coolers</b> .....	<b>2-14</b>			

**3.1 Review of Bell Coleman or Reversed Brayton or Reversed Joule Air Refrigeration Cycle..... 3-1**

3.1.1 Advantages of Bell Coleman Cycle ..... 3-2

3.1.2 Disadvantages of Bell-Coleman Cycle ..... 3-3

**3.2 Application of Air Cycle Refrigeration for Aircrafts and Need of Airconditioning of Aircrafts..... 3-3**

3.2.1 Advantages of Air Refrigeration System for Aircraft Cooling..... 3-3

**3.3 Methods of Air Refrigeration Systems ..... 3-3**

**3.4 Simple Air Cooling System ..... 3-4**

**3.5 Simple Air Evaporative Cooling System ..... 3-10**

**3.6 Bootstrap Air Refrigeration System ..... 3-13**

**3.7 Boot Strap Air Evaporative Cooling System ... 3-16**

**3.8 Reduced Ambient Air Cooling System ..... 3-19**

**3.9 Regenerative Air Cooling System ..... 3-21**

**3.10 Comparison of Various Aircraft Cooling Systems ..... 3-25**

**Chapter 4 : Compound Compression VCR System  
4-1 to 4-47**

**Compound Compression VCR System :** Multiple evaporators with back pressure valves and with multiple expansion valves without flash inter cooling. Analysis of two evaporators with flash intercooler and individual expansion valve and multiple expansion valve, cascade refrigeration system

**4.1 Review of (p-h) Charts and Basic Concepts of Vapour Compression Refrigeration (VCR) Cycles..... 4-1**

4.1.1 Pressure Enthalpy(p-h) Chart for Refrigerants..... 4-1

4.1.2 Thermodynamic Analysis of Vapour Compression Refrigeration Cycle..... 4-1

4.1.2.1 When the Vapour is Dry-saturated at the End of Compression..... 4-1

4.1.2.2 Vapour Compression Cycle when Vapour is Wet at the End of Compression ..... 4-4

4.1.2.3 Vapour Compression Cycle when the Vapour is Dry-saturated at Entry to Compressor (Ideal Cycle or Standard Cycle) ..... 4-4

4.1.2.4 Assumptions in Theoretical Vapour Compression Cycle ..... 4-4

4.1.3 Definition of Subcooled or Under- Cooled Liquid ..... 4-5

4.1.3.1 Definition of Under cooling..... 4-5

**4.2 Limitations and Drawbacks of Simple Vapour Compression Refrigeration Cycle ..... 4-5**

**4.3 Multistage Vapour Compression System..... 4-6**

4.3.1 Multistage Compression with Intercooling Between the Stages..... 4-6

4.3.2 Intermediate Pressure for Minimum Work..... 4-7

**4.4 Types of Multistage Vapour Compression System with Intercooler and Single Load ..... 4-8**

**4.5 Two Stage Compression with Liquid Intercooler ..... 4-8**

**4.6 Two Stage Compression with Water Intercooler and Liquid Sub-cooler.....4-11**

**4.7 Two Stage Compression with Water Intercooler, Liquid Sub-cooler and Liquid Flash Chamber .....4-13**

4.7.1 Two Stage Compression with Flash Chamber but without Intercooler and Liquid Sub-Cooler .....4-15

**4.8 Two Stage Compression with Water Intercooler, Liquid Subcooler and Flash Intercooler .....4-19**

**4.9 Multiple Evaporator and Compressor Systems .....4-22**

**4.10 Multiple Evaporator at the Same Temperature and Single Compressor System .....4-23**

**4.11 Multiple Evaporators at Different Temperatures with Single Compressor, Individual Expansion Valves and Back Pressure Valve System .....4-24**

**4.12 Multiple Evaporators at Different Temperatures with Single Compressor, Multiple Expansion Valves (E.V.) and Back Pressure Valves (B.P.V.) .....4-27**

**4.13 Multiple Evaporators with Individual Compressors and Individual Expansion Valves .....4-29**

**4.14 Multiple Evaporators with Individual Compressors and Multiple Expansion Valves 4-31**

**4.15 Multiple Evaporators with Compound Compression and Individual Expansion Valves ..... 4-33**

**4.16 Multiple Evaporator System with Compound Compression, Individual Expansion Valves and Flash Intercoolers..... 4-36**

**4.17 Multiple Evaporator System with Compound Expansion, Multiple Expansion Valves and Flash Intercoolers..... 4-38**

**4.18 Cascade System of Refrigeration ..... 4-40**

4.18.1 Limitations of Single Stage Vapour Compression System for Production of Low Temperature..... 4-40

4.18.2 Applications of Low Temperature Refrigeration 4-41

4.18.3 Cascade System ..... 4-41

4.18.4 COP of Cascade System Assuming Reversed Carnot Cycle..... 4-42

**Chapter 5 : Vapour Absorption Refrigeration System 5-1 to 5-29**

Absorption refrigeration system : Practical H<sub>2</sub>O-NH<sub>3</sub> cycle, LiBr-H<sub>2</sub>O system and its working, h-x diagram and simple calculation of various process like adiabatic mixing and mixing with heat transfer, throttling.

**5.1 Introduction..... 5-1**

5.1.1 Origin of the Absorption System..... 5-1

5.1.2 Principle of Basic Liquid Absorbent System (Ammonia Water) ..... 5-2

5.1.3 Terms and Definitions ..... 5-2

**5.2 Refrigerant – Solvent Properties ..... 5-3**

5.2.1 Desirable Properties of Solvent..... 5-3

5.2.2 Desirable Properties of Refrigerant-Solvent Combination..... 5-3

5.2.3 Characteristics of Ammonia..... 5-3

**5.3 Simple Ammonia-Water Vapour Absorption System ..... 5-3**

**5.4 Practical Ammonia-Water Vapour Absorption System ..... 5-4**

**5.5 Comparison between Vapour Absorption and Vapour Compression System..... 5-5**

**5.6 COP of an Ideal Vapour Absorption System ..... 5-6**

**5.7 Domestic Electrolux (NH<sub>3</sub> – H<sub>2</sub>) Refrigerator ..... 5-9**

**5.8 Lithium Bromide Absorption Refrigeration System ..... 5-12**

5.8.1 Double - Effect Li-Br Absorption System..... 5-13

5.8.2 Comparison between Aqua-NH<sub>3</sub> with Li Br-H<sub>2</sub>O Vapour Absorption System..... 5-14

5.8.3 Solar Based Li Br - H<sub>2</sub>O Vapour Absorption System for Space Cooling..... 5-15

5.8.4 Applications of Vapour Absorption System ..... 5-16

**5.9 New Mixtures for Vapour Absorption System..... 5-16**

**5.10 Theory of Mixtures ..... 5-16**

**5.11 Temperature - Concentration (t - z) Diagram for Binary Mixtures..... 5-17**

**5.12 Enthalpy Concentration Diagram (h - z) or (h - x) Diagram ..... 5-18**

5.12.1 Representation of (NH<sub>3</sub> - H<sub>2</sub>O) Ideal Vapour Absorption Cycle Enthalpy- Concentration Chart..... 5-19

**5.13 Adiabatic Mixing of Two Streams..... 5-19**

**Chapter 6 : Refrigeration System Controls 6-1 to 6-25**

**Refrigeration system components** : Types, construction, working, comparison and selection of compressors, condensers, expansion devices and evaporators; refrigeration piping accessories, evacuation and charging of refrigerant, properties and classification of thermal insulation.

**6.1 Introduction ..... 6-1**

**6.2 Compressor..... 6-1**

**6.3 Reciprocating Compressor ..... 6-1**

6.3.1 Construction and Working ..... 6-1

6.3.2 Performance of Reciprocating Compressor..... 6-2

6.3.3 Parts of Reciprocating Compressors ..... 6-4

6.3.4 Lubrication..... 6-5

6.3.5 Capacity Control ..... 6-6

**6.4 Rotary Compressor..... 6-7**

**6.5 Centrifugal Compressor ..... 6-7**

**6.6 Screw Compressor ..... 6-8**

**6.7 Scroll Compressor ..... 6-8**

6.7.1 Comparison and Selection of Compressor..... 6-9

**6.8 Hermetically Sealed Compressor ..... 6-10**

**6.9 Condensers..... 6-10**

6.9.1 Air Cooled Condensers ..... 6-10

6.9.2 Water Cooled Condensers..... 6-11

6.9.3 Water Cooling Devices..... 6-12

6.9.4 Evaporative Condenser ..... 6-13

**6.10 Expansion and Flow Control Devices ..... 6-13**

6.10.1 Float Valve ..... 6-13

6.10.2 Automatic Expansion Valve (AXV)..... 6-13

6.10.3 Thermostatic Expansion Valve (TXV) ..... 6-14

6.10.4 Capillary Tube ..... 6-15

**6.11 Evaporator..... 6-16**

6.11.1 Air Cooling Evaporators..... 6-16

6.11.2 Liquid Chilling Evaporator..... 6-16

6.11.3 DX and Flooded Evaporators..... 6-17

**6.12 Accessories..... 6-18**

6.12.1 Oil Separator..... 6-18

6.12.2 Receiver ..... 6-18

6.12.3 Dryer..... 6-19

6.12.4 Strainer..... 6-19

6.12.5 Sight Glass ..... 6-19

**6.13 Controls ..... 6-19**

6.13.1 Thermostat..... 6-19

6.13.2 Low Pressure Cutout ..... 6-20

6.13.3 High Pressure Cutout..... 6-20

6.13.4 Oil Failure Cutout ..... 6-20

**6.14 Piping in Refrigeration System ..... 6-20**

**6.15 Insulation in Refrigeration ..... 6-21**

6.15.1 Desirable Properties of Insulating Materials..... 6-21

6.15.2 Classification of Insulation..... 6-21

6.15.3 Insulating Materials used in Refrigeration Equipment..... 6-22

**6.16 Services Operations ..... 6-22**

6.16.1 Small Domestic Plant.....6-22

6.16.2 Large Plants .....6-23

**Chapter 7 : Human Comfort and Load Analysis**  
**7-1 to 7-44**

**Human comfort and Load analysis :** Selection of inside design conditions, thermal comfort, heat balance equation for a human being, factors affecting thermal comfort, Effective temperature, comfort chart and factors governing effective temperature, selection of outside design conditions.

Site survey, outdoor and indoor design conditions, classification of loads flywheel effect of building material and its use in design, effect of wall construction on cooling load, instantaneous heat gain (IHG) and instantaneous cooling load (ICL) heat transmission through sunlit and shaded glass using tables, method of reduction of solar heat gain through glass, calculations of cooling load TETD due to sunlit and shaded roof and walls using tables, ventilation and air infiltration, load due to outside air, heat gain from occupants; electric lights; product; electric motor and appliances, load calculations for automobiles, use of load estimation sheet.

**7.1 Introduction to Airconditioning ..... 7-1**

7.1.1 Industrial Air Conditioning ..... 7-1

7.1.2 Comfort Air Conditioning..... 7-2

7.1.3 Factors Affecting Human Comfort ..... 7-2

**7.2 Psychrometry and Psychrometric Properties ..... 7-3**

**7.3 Psychrometric Chart ..... 7-5**

**7.4 Psychrometric Processes ..... 7-6**

7.4.1 Adiabatic Mixing of Air Streams ..... 7-6

7.4.2 Sensible Heating ..... 7-7

7.4.3 Sensible Cooling..... 7-7

7.4.4 Humidification and Dehumidification of Air ..... 7-8

7.4.5 Cooling and Dehumidification Process..... 7-8

7.4.6 Adiabatic Cooling or Evaporative Cooling or Cooling with Humidification..... 7-9

7.4.7 Heating with Humidification Process.....7-10

7.4.8 Heating with Dehumidification Process..... 7-10

**7.5 Introduction to Basic concept of Air-conditioning Design ..... 7-10**

**7.6 Outside Design Conditions ..... 7-11**

**7.7 Inside Design Conditions ..... 7-11**

7.7.1 Industrial Application ..... 7-11

7.7.2 Comfort Applications (Thermal Analysis of Human Body)..... 7-11

7.7.2.1 Factors Affecting Human Comfort..... 7-12

7.7.3 Effective Temperature..... 7-12

**7.8 Human Comfort Chart ..... 7-13**

**7.9 Sources of Heat Load ..... 7-13**

**7.10 Heat Gain through Glass ..... 7-14**

7.10.1 Factors Affecting Solar Radiation at a Place ..... 7-14

7.10.2 Factors Affecting Solar Radiation Entering the Room..... 7-15

7.10.3 Instantaneous Heat Gain (IHG) and Instantaneous cooling load (ICL) ..... 7-15

7.10.4 Method of Estimation ..... 7-15

**7.11 Heat Load through Opaque Surface ..... 7-16**

7.11.1 Overall Heat Transfer Coefficient..... 7-16

7.11.2 Surface Area..... 7-16

7.11.3 Temperature Difference ..... 7-17

7.11.4 Flywheel Effect in Load Calculation ..... 7-18

**7.12 Infiltration ..... 7-18**

**7.13 Ventilation ..... 7-19**

**7.14 Outside Air Load..... 7-19**

**7.15 Occupancy Heat Load ..... 7-20**

**7.16 Lighting..... 7-20**

**7.17 Equipment ..... 7-20**

**7.18 Product Brought in..... 7-20**

**7.19 System Heat Gain ..... 7-20**

**7.20 Equipment Selection..... 7-21**

**7.21 RSHF, ERSHF ..... 7-21**

**7.22 Psychrometric Analysis of Estimated Heat Load..... 7-22**

**7.23 Psychrometric Analysis of Uncommon Load Patterns ..... 7-23**

**7.24 Partial Load Analysis ..... 7-24**

7.24.1 Air Flow Control ..... 7-24

7.24.2 Return Air Bypass..... 7-24

7.24.3 Reheating ..... 7-25

7.24.4 Capacity Control of Compressor ..... 7-25

**7.25 Winter Air Conditioning ..... 7-25**

7.25.1 Heat Load/Loss Estimate..... 7-25

7.25.2 Psychrometric Analysis..... 7-26

**Chapter 8 : Duct Design and Air Distribution**

**8-1 to 8-18**

**Duct design and air distribution** : Function; classification and economic factors influencing duct layout, equal friction, velocity reduction and static regain methods of duct design, use of friction chart, dynamic losses and its determination, Requirements of air distribution system, air distribution, grills, outlets, application, location.

**8.1 Introduction ..... 8-1**

**8.2 Supply Air Duct..... 8-1**

8.2.1 Material..... 8-1

8.2.2 Sound Absorbing Materials for Ducts ..... 8-1

8.2.3 Classification of Duct and Economic Factors..... 8-2

8.2.4 Shape of Duct..... 8-2

8.2.5 Size of Duct..... 8-3

8.2.6 Obstruction..... 8-3

8.2.7 Bends, Tees and Branch Take Offs..... 8-3

8.2.8 Fire Dampers..... 8-3

**8.3 Flow Through Duct ..... 8-3**

**8.4 Pressure Losses in the Duct..... 8-4**

**8.5 Loss of Pressure Due to Friction..... 8-4**

8.5.1 Friction Factor 'f' ..... 8-4

**8.6 Equivalent Diameter of a Circular Duct or a Rectangular Duct..... 8-5**

**8.7 Friction Chart for Circular Ducts ..... 8-5**

**8.8 Dynamic Losses in Duct..... 8-8**

8.8.1 Pressure Loss Due to Enlargement ..... 8-9

8.8.2 Pressure Loss Due to Contraction..... 8-9

8.8.3 Pressure Loss at Entry or Exit from Duct ..... 8-9

8.8.4 Pressure Loss in Bends, Tees, and Branch Offs..... 8-9

8.8.5 Equivalent Lengths of Fittings ..... 8-9

**8.9 Methods of Duct Design ..... 8-10**

8.9.1 Velocity Reduction Method ..... 8-10

8.9.2 Equal Friction Method or Equal Pressure Loss Method..... 8-11

8.9.3 Static Regain Method..... 8-11

8.9.4 Design of Duct by Equal Friction Method..... 8-11

**8.10 Pressure Drop in Ducts..... 8-12**

**8.11 Room Air Distribution ..... 8-13**

**8.12 Types of Outlets..... 8-14**

**8.13 Location of Outlet ..... 8-14**

**8.14 Return Air System ..... 8-14**

**Chapter 9 : Airconditioning Systems 9-1 to 9-19**

**Air-conditioning systems** : Classification, system components, all air; all water; and air-water systems, room air conditioners, packaged air conditioning plant, central air conditioning systems, split air conditioning systems.

**9.1 Introduction..... 9-1**

**9.2 Unitary System..... 9-1**

9.2.1 Window Air Conditioner..... 9-2

9.2.2 Split Air Conditioner ..... 9-2

9.2.3 Package Air Conditioners ..... 9-3

**9.3 Central Air Conditioning System ..... 9-3**

**9.4 Air Conditioning Systems ..... 9-4**

**9.5 Direct Expansion System ..... 9-5**

**9.6 All Water System..... 9-5**

**9.7 All Air System..... 9-6**

**9.8 Air-water System ..... 9-7**

**9.9 Air Conditioning Equipments ..... 9-8**

**9.10 Air Cleaners ..... 9-8**

9.10.1 Choice of the Filter..... 9-8

9.10.2 Types of Filters..... 9-8

9.10.3 Installation and Maintenance of Filters ..... 9-10

**9.11 Cooling Coil..... 9-10**

**9.12 Heating Device..... 9-10**

**9.13 Humidifier ..... 9-11**

**9.14 Fans..... 9-12**

9.14.1 Introduction..... 9-12

9.14.2 Axial Fans ..... 9-13

9.14.3 Centrifugal Fans ..... 9-13

9.14.4 Fan Classification ..... 9-14

9.14.5 Fan Laws..... 9-15

9.14.6 System Balance..... 9-15

9.14.7 Selection of Fan..... 9-16

9.14.8 Fan Control..... 9-17

**9.15 Passive Heating and Cooling ..... 9-17**

- **Appendix A..... A-1 to A-9**
