

**Unit I**

**Chapter 1 : DSP Preliminaries and Applications**

**1-1 to 1-25**

1.1 Introduction.....1-1

1.2 Digital Signal Processing System.....1-2

1.2.1 Advantages of Digital Signal Processing over Analog Signal Processing .....1-3

1.2.2 Difference between Digital and Analog Signal Processing.....1-4

1.2.3 Limitations .....1-4

1.3 Signals.....1-4

1.3.1 Continuous and Discrete Time Signals .....1-4

1.3.2 Continuous Valued and Discrete Valued Signals .....1-6

1.3.3 Deterministic and Random Signals .....1-6

1.4 Concept of Frequency in Continuous and Discrete Time Signals.....1-6

1.4.1 Concept of Frequency in Continuous Time Signals .....1-6

1.4.2 Concept of Frequency in Discrete Time Signals1-7

1.4.3 Converting a Analog Signal to a Discrete Time Signal .....1-8

1.5 Aliasing.....1-9

1.5.1 Solved Examples on Aliasing .....1-9

1.6 Sampling Theorem.....1-13

1.6.1 Proof of Sampling Theorem (Sampling of Analog-Signals) ..... 1-13

1.6.2 Frequency Domain Representation of Sampling ..... 1-14

1.6.3 Recovery of Analog Signals ..... 1-16

1.6.4 Nyquist Rate..... 1-19

1.7 Basic Elements of a DSP system..... 1-19

1.7.1 Solved Examples on DSP system..... 1-19

1.8 Mapping between Analog Frequencies and Digital Frequencies ..... 1-24

1.9 Concept of Basis Function and Orthogonality.. 1-24

1.10 Applications of DSP ..... 1-25

**Chapter 2 : Discrete Time Signals and Systems**

**2-1 to 2-25**

2.1 Introduction .....2-1

2.1.1 Representation of Discrete Time Signals.....2-1

2.1.2 Elementary Discrete Time Signals .....2-2

2.2 Classification of Discrete Time Signals .....2-4

2.2.1 Even and Odd Signals .....2-5

2.2.2 Periodic and Aperiodic Signals .....2-7

2.2.3 Energy and Power Signals .....2-8

2.3 Operation on Signals .....2-10

2.3.1 Time Shifting .....2-10

2.3.2 Time Reversal .....2-11

<p>2.3.3 Time Scaling.....2-12</p> <p>2.3.4 Scalar Multiplication .....2-13</p> <p>2.3.5 Signal Addition and Multiplication.....2-13</p> <p>2.4 Discrete Time Systems .....2-14</p> <p>2.4.1 Representation of a Signal in Terms of Weighted Sum of Shifted Discrete Impulse .....2-17</p> <p>2.5 Impulse Response and Convolution.....2-18</p> <p>2.5.1 Computation of Linear Convolution .....2-19</p> <p>2.5.2 Linear Convolution Using Graphical Method ....2-19</p> <p>2.5.2(A) Solved Examples on Graphical Method .....2-19</p> <p>2.5.3 Linear Convolution using Tabular Method.....2-23</p> <p>2.5.3(A) Solved Examples on Tabular Method.....2-23</p> <p>2.6 Correlation.....2-24</p>	<p>3.3.2 Z-transform of a Delayed Unit Impulse <math>\delta(n - k)</math> ..... 3-10</p> <p>3.3.3 Z-transform of a Unit Step <math>u(n)</math> ..... 3-11</p> <p>3.3.4 Z-Transform of Unit Ramp ..... 3-12</p> <p>3.4 Properties of Z-Transforms ..... 3-12</p> <p>3.4.1 Linearity ..... 3-13</p> <p>3.4.2 Time Shift..... 3-14</p> <p>3.4.3 Scaling ..... 3-14</p> <p>3.4.4 Time Reversal..... 3-15</p> <p>3.4.5 Differentiation Property ..... 3-15</p> <p>3.4.6 Convolution ..... 3-16</p> <p>3.4.7 Initial Value Theorem ..... 3-17</p> <p>3.4.8 Final Value Theorem..... 3-17</p> <p>3.5 Solved Examples ..... 3-18</p> <p>3.6 Inverse Z-Transform ..... 3-29</p> <p>3.6.1 Long Division Method ..... 3-30</p> <p>3.6.2 Partial Fraction Expansion Method ..... 3-32</p> <p>3.7 Relationship between the Z-Transform and Other Transforms..... 3-41</p> <p>3.7.1 Relationship between Laplace Transform and Z-Transform ..... 3-42</p> <p>3.7.2 Relationship between Fourier Transform and Z-Transform ..... 3-42</p> <p>3.7.3 Relationship between DFT and ZT ..... 3-43</p>
---	--

**Unit II**

**Chapter 3 : Z-Transform 3-1 to 3-43**

<p>3.1 Introduction of Z-Transform.....3-1</p> <p>3.2 Definition of Z-Transform .....3-1</p> <p>3.2.1 Advantages of Z Transform.....3-1</p> <p>3.2.2 Region of Convergence (ROC) .....3-2</p> <p>3.2.3 Solved Examples on Z- Transform.....3-2</p> <p>3.3 Z-Transform of Standard Sequence.....3-10</p> <p>3.3.1 Z-transform of Unit Impulse <math>\delta(n)</math> ..... 3-10</p>
--

**Chapter 4 : Analysis of Systems using Z-Transform**

**4-1 to 4-27**

4.1 Introduction.....4-1

4.1.1 Relation between Pole and Time Domain .....4-1

4.2 Transfer Function .....4-7

4.3 Checking Causality and Stability using Z-Transform .....4-14

4.4 Unilateral Z-Transform .....4-15

4.4.1 Solved Problems .....4-17

**Unit III**

**Chapter 5 : Discrete Fourier Transform (DFT)**

**5-1 to 5-78**

5.1 The Fourier Transform .....5-1

5.2 Discrete Time Fourier Transform .....5-2

5.2.1 DTFT of Standard Signals.....5-2

5.3 Properties of DTFT.....5-4

5.3.1 Linearity.....5-4

5.3.2 Time Shifting .....5-4

5.3.3 Time Reversal .....5-5

5.3.4 Differentiation .....5-5

5.3.5 Convolution Theorem.....5-6

5.3.6 Windowing (Modulation) Theorem .....5-6

5.4 Relationship between DTFT and DFT .....5-7

5.5 Discrete Fourier Transform (DFT).....5-8

5.5.1 DFT of Simple Signals .....5-8

5.6 The Fourier Spectrum .....5-18

5.7 Inverse Discrete Fourier Transform (IDFT).....5-19

5.8 Computing DFT by Matrix Method .....5-20

5.8.1 Solved Examples on DFT Matrix Method.....5-24

5.9 Discrete Fourier Transform (DFT) Properties .....5-34

5.9.1 Linearity .....5-34

5.9.2 Periodicity .....5-35

5.9.3 Circular Time Shift .....5-37

5.9.4 Circular Frequency Shift .....5-43

5.9.5 Time Reversal.....5-45

5.9.6 Symmetry Property .....5-46

5.9.7 Complex Conjugate Property.....5-51

5.9.8 Parseval's Theorem .....5-51

5.9.9 Multiplication of Two Sequences .....5-53

5.9.10 Circular Convolution.....5-53

5.10 Circular Convolution.....5-54

5.10.1 Concentric Circle Method.....5-54

5.10.2 Matrix Method .....5-56

5.10.3 Getting Linear Convolution from Circular Convolution.....5-57

5.11 Filtering of Long Duration Signals.....5-68

5.11.1 Overlap - Save Method .....5-69

5.11.2 Overlap - Add Method .....5-71

5.12 Summary of DFT Properties .....5-75

5.13 Discrete Cosine Transform (DCT) .....5-75

**Chapter 6 : Fast Fourier Transform 6-1 to 6-43**

6.1 Introduction .....6-1

6.2 Computational Complexity of DFT .....6-1

6.3 Radix-2 Decimation In Time FFT (DIT-FFT) .....6-2

6.3.1 Bit Reversal Format .....6-6

6.3.2 Solved Examples on DIT-FFT.....6-7

6.4 Radix Decimation in Frequency FFT (DIF-FFT)...6-18

6.4.1 Solved Examples on DIF-FFT.....6-21

6.5 Computational Complexity Comparison between DFT and FFT .....6-31

6.5.1 Computation of Inverse DFT using FFT Algorithms .....6-32

6.5.2 Filtering using FFT Algorithms.....6-38

**Unit V**

**Chapter 7 : Basics of Digital Filter 7-1 to 7-18**

7.1 Introduction .....7-1

7.2 Basics of Filters .....7-1

7.2.1 Analog Filters.....7-1

7.2.2 Digital Filters .....7-2

7.2.3 Drawing the Frequency Response of Digital Filter.....7-2

7.3 Ideal Filter Responses .....7-4

7.4 Basics of Filtering .....7-6

7.4.1 Ideal Filters .....7-6

7.5 Types of Digital filters.....7-8

7.5.1 Difference between IIR and FIR .....7-9

7.5.2 Additional Points in Filters .....7-10

7.6 Minimum, Maximum and Mixed Phase Systems .7-14

**Chapter 8 : FIR Filter Design 8-1 to 8-38**

8.1 Introduction .....8-1

8.1.1 Characteristics of FIR Filters .....8-1

8.1.2 Linear Phase .....8-2

8.2 Designing of FIR Filters .....8-2

8.2.1 Designing FIR Filters using Windows .....8-3

8.3 Windowing Techniques.....8-3

8.3.1 Rectangular Window.....8-3

8.3.1(A) Gibbs Phenomena .....8-11

8.3.2 Hamming, Hanning, Blackman Window .....8-14

8.3.3 Kaiser Window.....8-16

8.3.3(A) Design Steps of Kaiser Window .....8-17

8.4 Designing FIR Filters using Frequency Sampling Method.....8-18

8.5 Solved Examples on FIR Filter Design .....8-20

8.6 Solved Examples .....8-33

**Unit IV**

**Chapter 9 : IIR Filter Design 9-1 to 9-48**

9.1 Introduction .....9-1

9.2 Stability of IIR filter .....9-1

9.2.1 Approach of IIR Filter Design.....9-2

9.3 Impulse Invariance Method.....9-2

9.3.1 Solved Examples on Impulse Invariance Method ..9-4

<p>9.4 Impulse Invariance Mapping of S-plane to Z-plane .....9-8</p> <p>9.4.1 Disadvantage of Impulse Invariant Method .....9-10</p> <p>9.5 Bilinear Transformation Method .....9-10</p> <p>9.5.1 Frequency Warping.....9-12</p> <p>9.5.2 Comparison between Impulse Invariance and Bilinear Transformation Method .....9-12</p> <p>9.5.2 Solved Examples on Bilinear Transformation Method .....9-13</p> <p>9.6 Design of Analog Butterworth Filter .....9-17</p> <p>9.6.1 Steps Involved in Designing Butterworth Lowpass Filter .....9-19</p> <p>9.6.2 Solved Examples on Butterworth Filter .....9-19</p> <p>9.7 Design of Analog Chebyshev Filter .....9-31</p> <p>9.7.1 Solved Examples on Chebyshev Filter.....9-33</p> <p>9.7.2 Elliptic Filter.....9-37</p> <p>9.7.3 Comparison between Butterworth Filter, Chebyshev Filter and Elliptic Filter.....9-39</p> <p>9.8 Frequency Transformation .....9-39</p> <p>9.8.1 Frequency Transformation in the Analog Domain.....9-40</p> <p>9.9 Solved Examples .....9-43</p> <hr/> <p><b>Chapter 10 : Filter Structure 10-1 to 10-28</b></p> <hr/> <p>10.1 Introduction of Filter Structure.....10-1</p> <p>10.1.1 Advantages of Filter Structure.....10-1</p> <p>10.1.2 Block Diagram Representation .....10-1</p>	<p>10.2 Structure for IIR Filter ..... 10-2</p> <p>10.2.1 Direct Form I Structure ..... 10-2</p> <p>10.2.2 Direct Form II Structure ..... 10-6</p> <p>10.2.3 Cascade Form Structures..... 10-9</p> <p>10.2.4 Parallel Form Structure..... 10-11</p> <p>10.3 Solved Examples on IIR Filter..... 10-12</p> <p>10.4 FIR Filter Structure Realization..... 10-22</p> <p>10.4.1 Direct Form Structure ..... 10-22</p> <p>10.4.2 Cascade Form Structure..... 10-23</p> <p>10.5 Structure for Linear Phase FIR Filters ..... 10-23</p> <p>10.5.1 Solved Examples of FIR Filter Structure Realization ..... 10-25</p> <p>10.6 Finite Word Length Effect in Digital Filter ..... 10-27</p>
--	---

**Unit VI**

---

**Chapter 11 : Introduction to Image Processing  
(2-D Signal Processing) 11-1 to 11-11**

---

<p>11.1 Introduction ..... 11-1</p> <p>11.2 What do we Mean by Image Processing ? ..... 11-1</p> <p>11.3 Images ..... 11-2</p> <p>11.4 Image Types ..... 11-3</p> <p>11.5 Image File Formats ..... 11-5</p> <p>11.6 Sampling and Quantization..... 11-7</p> <p>11.7 Isopreference Curves..... 11-10</p>
---

**Chapter 12 : DSP Processors and Applications)**

**12-1 to 12-9**

12.1 Introduction to General Purpose and Special Purpose DSP Processors.....12-1

12.2 Comparison of General Purpose Microprocessor with DSP Processors.....12-1

12.3 General Purpose Digital Signal Processors .....12-2

12.4 A General Purpose of DSP Processor  
TMS 320 C54 XX .....12-3

12.5 Speech Coding and Compression ..... 12-6

12.6 Applications of DSP for ECG Signal ..... 12-7

12.6.1 Types of Noises which Affects ECG Signal ..... 12-8

12.6.2 De-noising of ECG Signals ..... 12-8

12.7 Harmonic Analysis and Measurements ..... 12-9

12.8 DSP based Protective Relaying..... 12-9
