

Unit I**Chapter 1 : Historical Background And Development
Of Profession Of Pharmacy 1-1 to 1- 20**

Syllabus : History of profession of Pharmacy in India in relation to pharmacy education, industry and organization, Pharmacy as a career, Pharmacopoeias : Introduction to IP, BP, USP and Extra Pharmacopoeia.

1.1	Introduction.....	1-1
1.2	History of Pharmacy Profession	1-1
1.3	Development of Pharmacy Profession in India.....	1-2
1.4	History of Pharmaceutical Industry in India.....	1-3
1.5	Scope of Pharmacy.....	1-5
1.6	Pharmacy as Career.....	1-7
1.6.1	Areas of Career in Pharmacy Profession.....	1-7
1.7	Pharmacopoeias	1-11
1.7.1	British Pharmacopoeia (BP).....	1-11
1.7.1(A)	British Pharmaceutical Codex (BPC)	1-12
1.7.1(B)	British Pharmacopoeia (Veterinary)	1-13
1.7.1(C)	British National Formulary (BNF).....	1-13
1.7.2	United States Pharmacopoeia (USP).....	1-13
1.7.3	Indian Pharmacopoeia (IP).....	1-14
1.7.4	Martindale : The Extra Pharmacopoeia.....	1-15
1.7.5	European Pharmacopoeia	1-16
1.7.6	Ayurvedic Pharmacopoeia	1-16
1.7.7	Merck Index	1-17
1.7.8	Materia Medica.....	1-18

Chapter 2 : Dosage Forms 2-1 to 2-20

Syllabus : Introduction to dosage forms, classification and definitions.

2.1	Introduction.....	2-1
2.2	Need of a Dosage Form	2-2
2.3	Dosage Form Design	2-3
2.3.1	Diseases Related Factors (Therapeutic Factors).....	2-3

2.3.2	The Patient Related Factors.....	2-4
2.3.3	Biopharmaceutical Factors	2-4
2.3.4	The Drug Related Factors (Pre-formulation Studies)	2-9
2.4	Classification of Dosage Forms.....	2-10
2.4.1	Classification According to Physical State.....	2-10
2.4.2	Classification according to Route of Administration	2-11
2.4.3	Classification based on sterility	2-11
2.4.4	Classification according to Drug Release Pattern.....	2-12
2.5	Types of Dosage Form.....	2-12
2.5.1	Oral Dosage Forms.....	2-12
2.5.1(A)	Oral Liquid Dosage forms	2-12
2.5.1(B)	Oral Solid Dosage forms	2-14
2.5.2	Topical Dosage forms	2-14
2.5.2(A)	Topical Dispersed Dosage forms	2-14
2.5.2(B)	Topical Solid Dosage Forms.....	2-14
2.5.2(C)	Topical Liquid Dosage Forms.....	2-14
2.5.2(D)	Topical Semisolid	2-14
2.5.3	Rectal	2-15
2.5.4	Injectables	2-16
2.5.5	Implants.....	2-16
2.6	Modified Release Drug Delivery System	2-16
2.6.1	Requirements of Drug Candidate for Sustained or Controlled Release Drug Delivery	2-17
2.6.2	Technologies for Sustained/ Controlled Release Drug Delivery	2-17
2.6.3	Advantages of Sustained/ Controlled Release Drug Delivery	2-18
2.6.4	Limitations of Sustained/ Controlled Release Drug Delivery	2-18

Chapter 3 : Prescription 3-1 to 3-12

Syllabus : Definition, parts of prescription, handling of prescription and errors in prescription.

3.1	Introduction.....	3-1
3.2	Parts of a Prescription.....	3-1
3.3	Types of Prescription	3-4
3.4	Handling a Prescription.....	3-5
3.5	Error in Prescriptions	3-7

Chapter 4 : Posology 4-1 to 4-9

Syllabus : Definition, factors affecting posology. Pediatric dose calculations based on age, body weight and body surface area.

4.1	Introduction.....	4-1
4.2	Factors Affecting the Dose of Drug.....	4-1
4.3	Calculation of Paediatric Dose.....	4-4
4.3.1	According to Age.....	4-5
4.3.1(A)	Young's Formula.....	4-5
4.3.1(B)	Dilling's Formula	4-5
4.3.1(C)	Cowling's Formula	4-6
4.3.1(D)	Fried's Formula.....	4-6
4.3.1(E)	Bastedo's Formula	4-7
4.3.1(F)	Gubin's Chart.....	4-7
4.3.2	According to Body Weight.....	4-7
4.3.2 (A)	Clark' Formula	4-7
4.3.3	According to Body Surface Area	4-8

Unit II**Chapter 5 : Pharmaceutical Calculations 5-1 to 5-11**

Syllabus : Weights and measures : Imperial and Metric system, Calculations involving percentage solutions, alligation, proof spirit and isotonic solutions based on freezing point and molecular weight.

5.1	Introduction.....	5-1
5.2	Systems of Weights and Measures	5-1

5.2.1	Metric System	5-1
5.2.2	Imperial System	5-2
5.3	Conversion of Units	5-3
5.4	Percentage Solution	5-4
5.5	Alligation Method.....	5-5
5.6	Isotonicity (Iso-osmotic) Calculations	5-6
5.7	Proof Spirit.....	5-10

Chapter 6 : Powders 6-1 to 6-22

Syllabus : Definition, classification, advantages and disadvantages, Simple and compound powders – official preparations, dusting powders, effervescent, efflorescent and hygroscopic powders, eutectic mixtures, Geometric dilutions.

6.1	Introduction.....	6-1
6.1.1	Advantages of Powders	6-1
6.1.2	Disadvantages of Powders	6-2
6.2	Classification of Powders.....	6-2
6.2.1	Bulk Powders	6-3
6.2.1(A)	For Internal Use	6-3
6.2.1(B)	Bulk Powders for External Use	6-4
6.2.2	Divided Powders.....	6-7
6.3	Preparation of Powders (Compounding and Dispensing)	6-11
6.4	Powder Properties Relevant to Pharmaceutical Formulations.....	6-13
6.4.1	Particle Sizes and Size Distribution.....	6-13
6.4.2	Bulk Density.....	6-13
6.4.3	Surface Area and Porosity	6-13
6.4.4	Roughness and Texture.....	6-14
6.4.5	Wettability.....	6-14
6.4.6	Flow.....	6-14
6.4.7	Moisture Absorption Capacity.....	6-14

6.5	Evaluation of Powders.....	6-14
6.5.1	Organoleptic Properties.....	6-14
6.5.2	The Particle Size and the Size Distribution.....	6-14
6.5.3	Flow Properties.....	6-15
6.6	Special Powders (Effervescent, Efflorescent, Hygroscopic Powders and Eutectic Mixtures)	6-16
6.6.1	Effervescent Granules	6-16
6.6.2	Efflorescent Powders	6-17
6.6.3	Hygroscopic and Deliquescent Powders.....	6-17
6.6.4	Eutectic Mixtures.....	6-18
6.7	Formulation of Talcum Powder and Tooth Powder	6-18
6.7.1	Formulation of Talcum powder	6-18
6.7.2	Formulation of Tooth Powder	6-19

Chapter 7 : Liquid Dosage Forms 7-1 to 7-17

Syllabus : Advantages and disadvantages of liquid dosage forms. Excipients used in formulation of liquid dosage forms. Solubility enhancement techniques.

7.1	Introduction.....	7-1
7.1.1	Advantages of Liquid Dosage Forms	7-1
7.1.2	Disadvantages of Liquids Dosage Forms	7-2
7.2	Solubility of Solution.....	7-2
7.2.1	Factors Affecting Solubility	7-3
7.3	Rate of Solution	7-3
7.4	Excipients used in Formulation of Solution.....	7-4
7.5	Methods to Enhance Aqueous Solubility	7-10
7.6	Pre-formulation Considerations.....	7-11
7.7	Manufacturing Processes.....	7-12
7.8	Evaluation of Solutions.....	7-13
7.9	Evaluation Tests for Solutions (Organoleptic Evaluation).....	7-15
7.10	Classification of Liquid Dosage Forms	7-15

Unit III

Chapter 8 : Monophasic Liquids 8-1 to 8-21

Syllabus : Definitions and preparations of Gargles, Mouthwashes, Throat Paint, Eardrops, Nasal drops, Enemas, Syrups, Elixirs, Liniments and Lotions.

8.1	Introduction.....	8-1
8.1.1	Characteristics of Monophasic liquid Dosage Forms.....	8-1
8.1.2	Advantages and Disadvantages of Monophasic liquid Dosage Forms	8-1
8.1.3	Ingredient used in Monophasic liquid Dosage Forms.....	8-2
8.2	Formulation Consideration.....	8-2
8.3	Manufacturing of Monophasic Liquids	8-5
8.3.1	Method of Preparation.....	8-5
8.3.2	Packaging of Liquid Dosage Forms.....	8-5
8.3.3	Labeling of Liquid Dosage Forms.....	8-6
8.4	Classification of Monophasic Dosage Forms	8-6
8.4.1	Monophasic Liquid Internal use	8-7
8.4.1(A)	Syrups.....	8-7
8.4.1(B)	Elixirs.....	8-9
8.4.1(C)	Linctuses	8-11
8.4.1(D)	Aromatic Waters.....	8-11
8.4.2	Monophasic liquid External use.....	8-11
8.4.2(A)	Mouth Washes	8-11
8.4.2(B)	Gargles.....	8-13
8.4.2(C)	Throat Paints.....	8-13
8.4.2(D)	Enema.....	8-15
8.4.2(E)	Eye Drops	8-15
8.4.2(F)	Ear Drops	8-16
8.4.2(G)	Nasal Drops.....	8-17
8.4.2(H)	Liniments	8-17
8.4.2(I)	Lotions.....	8-18
8.4.2(K)	Collodion.....	8-20

Chapter 9 : Biphasic Liquids 9-1 to 9-32

Syllabus : Suspensions : Definition, advantages and disadvantages, classifications, Preparation of suspensions; Flocculated and Deflocculated suspension and stability problems and methods to overcome.

Emulsions : Definition, classification, emulsifying agent, test for the identification of type of Emulsion, Methods of preparation and stability problems and methods to overcome..

9.1	Introduction.....	9-1
9.2	Suspensions	9-1
9.2.1	Advantages of Suspensions.....	9-2
9.2.2	Disadvantages of Suspensions.....	9-2
9.2.3	Attributes Desired of Suspensions (Ideal Properties of Suspension).....	9-2
9.2.4	Applications of Suspensions.....	9-3
9.2.5	Classification of Suspensions	9-3
9.2.5(A)	Classification based on the Route of Administration	9-3
9.2.5(B)	Classification based on the Proportion of Solid Particles.....	9-4
9.2.5(C)	Classification based on the Electrokinetic Nature of Solid Particles.....	9-4
9.2.5(D)	Classification based on the Size of Solid Particle.....	9-6
9.2.6	Stability of Suspension.....	9-6
9.2.6(A)	Factors Affecting Stability of Suspension	9-7
9.2.6(B)	Methods to Overcome Stability Problem.....	9-7
9.2.7	Formulation of Suspensions.....	9-8
9.2.8	Preparation of Suspensions.....	9-13
9.2.8(A)	Precipitation Methods.....	9-14
9.2.8(B)	Dispersion Methods	9-14
9.2.10	Packing, Labelling and Storage of Suspension	9-15
9.3	Emulsions	9-16
9.3.1	Ideal Characteristics of an Emulsion	9-16
9.3.2	Advantages of Emulsions.....	9-16
9.3.3	Disadvantages of Emulsion.....	9-17

9.3.4	Applications of Emulsion.....	9-17
9.3.5	Classification of Emulsion.....	9-17
9.3.5(A)	Depending on the type of dispersed phase	9-18
9.3.5(B)	Depending on the size of droplets.....	9-19
9.3.5(C)	Depending on the physical state	9-19
9.3.5(D)	Depending on the route of administration.....	9-19
9.3.6	Stability of Emulsions	9-19
9.3.7	Identification of Emulsion Type.....	9-21
9.3.8	Formulation of Emulsion	9-22
9.3.10	Preparation of Emulsions	9-28
9.3.10(A)	Continental or Dry Gum Method.....	9-28
9.3.10(B)	English or Wet Gum Method.....	9-29
9.3.10(C)	Bottle or Forbes Bottle Method.....	9-29
9.3.10(D)	Auxiliary Method	9-30
9.3.10(E)	In-situ Soap Method	9-30
9.2.11	Packing, Labelling and Storage of Emulsion.....	9-30

Unit IV & V**Chapter 10 : Semisolid Dosage Forms 10-1 to 10-29**

Syllabus : Definitions, classification, mechanisms and factors, influencing dermal penetration of drugs. Preparation of ointments, pastes, creams, and gels. Excipients used in semisolid dosage forms. Evaluation of semisolid dosages forms.

10.1	Introduction.....	10-1
10.1.1	Ideal Properties of Semisolid Dosage Forms.....	10-1
10.1.2	Advantages of Semisolids Dosage Forms.....	10-1
10.1.3	Disadvantages of Semisolids Dosage Forms.....	10-2
10.2	Mechanism and Factors Influencing Dermal Penetration of Drugs	10-2
10.2.1	Anatomy and Physiology of Skin	10-2
10.2.2	Percutaneous Absorption	10-4
10.2.3	Flux and its Measurements	10-5
10.2.4	Factors Affecting Drugs Properties	10-5
10.2.4(A)	Drug Related Factors.....	10-5

10.2.4(B) Vehicle Related Factors.....	10-5	10.5	Special Precaution while Manufacturing Semisolids	10-24
10.2.4(C) Patient Related Factors.....	10-6	10.6	Filling, Packaging and Storage	10-24
10.3 Types of Semisolid Dosage Forms.....	10-6	10.7	Evaluation Parameters of Semisolids	10-25
10.3.1 Ointments.....	10-7	<hr/>		
10.3.1(A) Ideal Properties of Ointment.....	10-7	Chapter 11 : Suppositories 11-1 to 11-23		
10.3.1(B) Advantages and Disadvantage of Ointments.....	10-7	Syllabus : Definition, types, advantages and disadvantages, types of bases, methods of preparations. Displacement value and its calculations, evaluation of suppositories.		
10.3.1(C) Classification of Ointments.....	10-7	11.1	Introduction	11-1
10.3.1(D) Formulation of Ointments	10-9	11.1.1	Features of Suppositories	11-1
10.3.1(E) Method of Preparation of Ointments.....	10-13	11.2	Types of Suppositories.....	11-2
10.3.2 Pastes.....	10-14	11.3	Formulation of Suppositories	11-3
10.3.2(A) Features of Pastes	10-15	11.4	Methods of Preparation of Suppositories	11-8
10.3.2(B) Types of Pastes.....	10-15	11.4.1	Moulding / Hot process/Fusion Method.....	11-8
10.3.2(C) Formulation of Pastes.....	10-15	11.4.2	Hand Rolling	11-13
10.3.2(D) Method Preparation of Pastes.....	10-16	11.4.3	Compression Molding.....	11-14
10.3.2(E) Difference between Ointment and Paste.....	10-17	11.5	Problems in Formulation of Suppositories	11-14
10.3.3 Creams.....	10-17	11.6	Manufacturing Defects	11-15
10.3.3(A) Features of Creams	10-17	11.7	Evaluation of Suppositories.....	11-16
10.3.3(B) Advantages of Creams	10-17	11.8	Packaging, Storage and Labelling of Suppositories and Pessaries.....	11-21
10.3.3(C) Types of Creams.....	10-18	11.9	Marketed Suppositories and Pessaries.....	11-22
10.3.3(D) Formulation of Creams	10-18	<hr/>		
10.3.3(E) Preparation of Creams	10-18	Chapter 12 : Incompatibilities 12-1 to 12-16		
10.3.3(F) Difference between Ointments and Creams	10-20	Syllabus : Definition, classification, physical, chemical and therapeutic incompatibilities with examples.		
10.3.3(G) Difference between creams and pastes	10-20	12.1	Introduction	12-1
10.3.4 Gels.....	10-20	12.2	Types of Incompatibilities	12-1
10.3.4(A) Features of Gels	10-20	12.2.1	Physical Incompatibility	12-1
10.3.4(B) Classification of Gels.....	10-21	12.2.2	Chemical Incompatibility	12-5
10.3.4(C) Formulation of Gels	10-21	12.2.3	Therapeutic Incompatibility	12-13
10.3.4(D) Methods of Preparation of Gels.....	10-23	<hr/>		
10.4 Formulation Considerations for semisolids	10-23			
10.4.1 Criteria for selection of semisolid bases.....	10-23			
10.4.2 Selection of Vehicle	10-24			
10.4.3 Homogenization of semisolids.....	10-24
