

**Chapter 1 : Coal Based Thermal Power Plants****1-1 to 1-44**

Layout of modern coal power plant, site selection criteria, Rankine cycle and its improvisations. Supercritical Pressure Boilers, FBC Boilers, Steam and Heat rate, Binary cycle.

1.1 Rankine Cycle	1-1
1.1.1 Steam Rate and Heat Rate.....	1-2
1.1.2 Work Ratio w_r	1-3
1.2 Deviations from Theoretical Vapour Cycles (Isentropic Efficiency of Turbine)	1-3
1.3 Improvisations of Rankine Cycle (Methods of Improving Ranking cycle Efficiency)	1-4
1.4 Reheat Cycle	1-4
1.5 Ideal Regenerative Cycle	1-5
1.6 Practical Regenerative Cycle	1-6
1.6.1 Advantages of Regenerative Cycle.....	1-7
1.6.2 Disadvantages of Regenerative Cycle.....	1-7
1.6.3 Types of Feed Water Heaters.....	1-8
1.7 Disposal of Bled Steam Condensation (Method of Feed Water Heating)	1-8
1.7.1 Direct Contact Feed Water Heaters.....	1-9
1.7.2 Drain Pump Method.....	1-9
1.7.3 All Drains in Hot-Well Method.....	1-9
1.7.4 Cascade Method.....	1-10
1.8 Basic Concept of Electrical Power Generation and it's Efficiency	1-20
1.9 Classification of Generating Power Station or Power Plants	1-21
1.9.1 Classification of Steam Power Plants.....	1-21
1.10 Factors Affecting Selection of Site for Power Station	1-21
1.11 Schematic Diagram of a Steam Power Plants	1-23
1.11.1 Characteristics of Steam Power Plants.....	1-23
1.12 Essentials of a Steam Power Plant	1-24
1.12.1 General Layout of Steam Power Plant.....	1-24
1.12.2 Characteristics of Steam Power Plants.....	1-25
1.12.3 Essential Systems and Components of a Steam Power Plant.....	1-25
1.13 Advantages and Disadvantages of Steam Power Plants	1-26
1.14 High Pressure Boilers (Modern Boilers)	1-29

1.14.1 Supercritical Pressure Boilers.....	1-30
1.14.2 Advantages and Disadvantages of Supercritical Pressure Boilers Over Subcritical Pressure Boilers.....	1-30
1.15 Advantages of High Pressure Modern Boilers	1-30
1.16 Supercritical Pressure Boiler	1-31
1.16.1 Benson Boiler.....	1-31
1.16.2 Combined Cycle Unit of Super-Critical Pressure Cycles.....	1-32
1.16.3 Super Critical Pressure Steam Stations.....	1-33
1.17 Fluidized Bed Combustion (FBC) Systems	1-34
1.17.1 Principle of Operation of Fluidized Bed Combustion System.....	1-34
1.18 Basic Arrangement of FBC System	1-35
1.18.1 Advantages of Fluidized Bed Combustion Systems.....	1-35
1.18.2 Disadvantages of Fluidized Bed Combustion Systems.....	1-36
1.19 Fluidized Bed Combustion Boilers (FBCB)	1-36
1.19.1 Classification of Fluidized Bed Combustion Boilers.....	1-36
1.20 Circulating Fluidized Bed Combustion Boilers (CFBCB)	1-36
1.21 Pressurized Fluidized Bed Combustion Boiler (PFBCB)	1-38
1.22 Binary Vapour Cycles	1-39

Chapter 2 : Steam Nozzles**2-1 to 2-28**

Steam Nozzles

2.1 Isentropic Flow of Fluid in Ducts of Varying Cross-Section (Nozzles and Diffusers)	2-1
2.1.1 Nozzles.....	2-2
2.1.2 Diffusers.....	2-2
2.2 Velocity and Mass Flow Rate of Steam in a Nozzle	2-3
2.2.1 Velocity of Steam at Exit.....	2-3
2.2.2 Mass Flow Rate Per Unit Area.....	2-4
2.2.3 Condition for Maximum Discharge (Critical Pressure Ratio).....	2-5
2.2.4 The Value of Adiabatic Expansion Index 'n' and Critical Pressure Ratio.....	2-5

2.2.5	Velocity at Throat under Maximum Discharge.....	2-5	3.12	Degree of Reaction, R_D.....	3-31
2.2.6	Equation for Maximum Mass Flow Rate	2-6	3.12.1	Velocity Diagram	3-31
2.3	Types of Nozzles.....	2-7	3.12.2	Work, Power and Efficiency.....	3-32
2.4	Effect of Friction and Nozzle Efficiency	2-7	3.12.3	Blade Height	3-32
2.4.1	Effect of Nozzle Friction.....	2-8	3.13	Condition for Maximum Blade	
2.4.2	Nozzle or Velocity Coefficient, C_C	2-9		Efficiency in Case of 50% Reaction Turbine ...	3-32
2.4.3	Coefficient of Discharge, C_d	2-9	3.14	Governing of Steam Turbines	3-44
2.5	Method of Solving Problems on Nozzles	2-9	3.14.1	Throttle Governing.....	3-45
2.6	Supersaturated or Metastable Flow		3.14.2	Nozzles Governing.....	3-46
	Through Nozzles	2-22	3.14.3	By-pass Governing.....	3-46
<hr/>			3.15	Emergency Governors	3-47
Chapter 3 : Steam Turbines		3-1 to 3-65	3.16	Comparisons.....	3-47
Steam turbines, combined cycle power plants and co-generation systems.			3.16.1	Comparison between Impulse and Reaction Turbines	3-47
3.1	Introduction to Steam Turbines.....	3-1	3.16.2	Comparison between Throttle and Nozzle Control Governing.....	3-48
3.2	Types of Steam Turbines	3-2	3.17	Attachment of Turbine Blades to Rotor.....	3-48
3.3	Advantages of Steam Turbines	3-2	3.17.1	De-Laval Blade Attachment.....	3-49
3.4	Classification of Steam Turbines.....	3-2	3.17.2	Inverted-T Attachment.....	3-49
3.5	Compounding of Steam Turbines	3-3	3.17.3	Serrated Blade Root.....	3-49
3.5.1	Velocity Compound Impulse Turbine (Curtis Turbine).....	3-3	3.17.4	Straddle Blade Attachment	3-50
3.5.2	Pressure Compounded Impulse Turbine (Rateau Turbine).....	3-4	3.17.5	Side Entry Blades	3-50
3.5.3	Pressure - Velocity Compounded Impulse Turbine.....	3-5	3.17.6	Attachment of Parson's Reaction Turbine Blades	3-50
3.5.4	Reaction Turbine.....	3-5	3.18	Turbine Glands and Packing Devices	3-51
3.6	Impulse Turbines.....	3-6	3.18.1	Labyrinth Glands/Packings.....	3-51
3.6.1	Velocity Diagram for Moving Blades	3-6	3.18.2	Labyrinth Glands or Diaphragm Glands for Impulse Turbines.....	3-52
3.6.2	Calculations for Work, Power and Efficiencies.....	3-7	3.18.3	Carbon Ring Gland.....	3-52
3.6.3	Definitions : Blade Velocity Coefficient and Blade Speed Ratio	3-9	3.18.4	Water Sealed Glands.....	3-53
3.7	Condition for Maximum Diagram Efficiency for Impulse Turbines.....	3-9	3.19	Losses in Steam Turbines	3-53
3.8	Velocity Diagram for a Velocity Compounded Impulse Turbine	3-17	3.20	Types of Internal Losses in Steam Turbines ...	3-53
3.8.1	Workdone and Efficiencies.....	3-19	3.20.1	Nozzle Losses	3-53
3.8.2	Condition for Maximum Efficiency	3-19	3.20.2	Blade Friction Losses	3-54
3.9	Advantages/Disadvantages of Velocity Compounded Impulse Turbine	3-21	3.20.3	Disc Friction Losses	3-54
3.10	Reheat Factor (R.F)	3-27	3.20.4	Partial Admission Losses or Blade Windage Losses	3-54
3.11	Reaction Turbines	3-30	3.20.5	Gland Leakage Losses or Clearance Losses.....	3-54
			3.20.6	Residual Velocity Losses.....	3-54
			3.20.7	Carry-Over Loss	3-54
			3.20.8	Radiation Losses.....	3-55
			3.21	External Losses in Steam Turbines.....	3-55

<p>3.22 Co-generation..... 3-55</p> <p>3.23 Combined Power and Heating Cycle for Industrial Applications (Back Pressure and Pass Out Turbines) 3-55</p> <p>3.23.1 The ideal co-generation plant (Back Pressure Turbine)..... 3-56</p> <p>3.23.2 Practical co-generation plant with adjustable loads (Pass Out Turbine)..... 3-57</p> <hr/> <p>Chapter 4 : Steam Condensers And Cooling Towers 4-1 to 4-28</p> <hr/> <p style="text-align: center;">Steam Condensers and Cooling Towers.</p> <p>4.1 Introduction..... 4-1</p> <p>4.2 Elements of Condensing Plant 4-2</p> <p>4.3 Types of Condenser..... 4-3</p> <p>4.3.1 Comparison between Jet and Surface Condensers 4-3</p> <p>4.4 Jet Condensers 4-3</p> <p>4.4.1 Classification..... 4-4</p> <p>4.4.2 Low Level - Counter Flow Jet Condenser..... 4-4</p> <p>4.4.3 Low Level - Parallel Flow Jet Condenser 4-5</p> <p>4.4.4 High Level Jet Condenser or Barometric Jet Condenser 4-5</p> <p>4.4.5 Ejector Condenser..... 4-5</p> <p>4.5 Surface Condensers..... 4-6</p> <p>4.5.1 Double Pass Surface Condenser 4-6</p> <p>4.5.2 Down Flow Surface Condenser..... 4-7</p> <p>4.5.3 Central Flow Condenser..... 4-7</p> <p>4.6 Requirements of a Modern Condenser..... 4-7</p> <p>4.7 Evaporative Condenser 4-8</p> <p>4.8 Merits of Jet, Barometric Jet and Surface Condensers..... 4-8</p> <p>4.8.1 Jet Condensers 4-8</p> <p>4.8.2 Surface Condensers..... 4-8</p> <p>4.9 Sources of Air in the Condenser and the Effects of Air Leakages on Condenser Performance 4-9</p> <p>4.9.1 Methods for Obtaining Maximum Vacuum in Condenser 4-9</p> <p>4.10 Vacuum 4-9</p> <p>4.11 Dalton's Law of Partial Pressure..... 4-10</p> <p>4.12 Vacuum Efficiency of Condenser..... 4-10</p> <p>4.13 Condenser Efficiency 4-11</p> <p>4.14 Air Pumps 4-11</p>	<p>4.14.1 Edward's Air-Pump..... 4-11</p> <p>4.14.2 Steam Jet Air Ejector..... 4-12</p> <p>4.15 Determination of Circulating Water Required in the Condenser 4-12</p> <p>4.16 Necessity of Cooling Ponds and Cooling Towers..... 4-21</p> <p>4.16.1 Types of Cooling Systems..... 4-22</p> <p>4.17 Types of Cooling Towers 4-23</p> <p>4.17.1 Natural Draught Cooling Towers..... 4-23</p> <p>4.17.2 Forced Draught Cooling Tower 4-23</p> <p>4.17.3 Induced Draught Cooling Tower 4-24</p> <p>4.17.4 Air Cooled or Dry Type Cooling Towers..... 4-24</p> <p>4.17.4.1 Direct Type Dry Cooling Tower 4-24</p> <p>4.17.4.2 Indirect Type Dry Cooling Towers..... 4-25</p> <p>4.18 Cooling Ponds 4-26</p> <p>4.19 Performance of Cooling Towers 4-26</p> <hr/> <p>Chapter 5 : Boiler Draught, Fuel And Ash Handling And Feed Water Treatment 5-1 to 5-52</p> <hr/> <p style="text-align: center;">Subsystems of thermal power plants - Draught system, Fuel and ash Handling, Feed water treatment.</p> <p>5.1 Natural Draught 5-1</p> <p>5.2 Height of Chimney (Natural Draught) 5-1</p> <p>5.2.1 Draught in Terms of the Hot Gas Column..... 5-2</p> <p>5.2.2 Conditions for Maximum Discharge through a Chimney 5-3</p> <p>5.2.3 Height of Hot Gas Column under Maximum Discharge..... 5-3</p> <p>5.3 Artificial Draught..... 5-7</p> <p>5.3.1 Types of Artificial Draught 5-7</p> <p>5.3.2 Advantages of Artificial Draught over Natural Draught 5-8</p> <p>5.3.3 Types of Fan Draught..... 5-8</p> <p>5.4 Comparison between Induced and Forced Draught 5-8</p> <p>5.5 Comparison between Natural Draught and Artificial Draught..... 5-9</p> <p>5.6 Power Required to Drive a Fan..... 5-9</p> <p>5.7 Fuels and Their Transportation 5-12</p> <p>5.7.1 Coal Transportation..... 5-12</p> <p>5.8 Requirement of Good Coal Handling Plant at Site..... 5-12</p>
------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

5.9	Coal Handling	5-12	5.22.1	Hydraulic Ash Handling System.....	5-32
5.9.1	Coal Delivery.....	5-13	5.22.2	Pneumatic Ash Handling System.....	5-33
5.9.2	Unloading.....	5-13	5.22.3	Mechanical Ash Handling System	5-33
5.9.3	Preparation of Coal.....	5-13	5.23	Dust Collection System	5-33
5.9.4	Transfer of Coal.....	5-14	5.23.1	Types of Dust Collectors	5-34
5.9.5	Storage of Coal.....	5-16	5.23.2	Mechanical Dust Collectors	5-34
5.9.6	Inplant Handling.....	5-17	5.23.2.1	Gravitational Dry Type Dust Collectors	5-34
5.9.7	Weighing of Coal.....	5-17	5.23.2.2	Wet Type Mechanical Dust Collectors (Scrubbers).....	5-34
5.9.8	Magnetic Separators	5-17	5.23.2.3	Cyclone Type Mechanical Dust Collector.....	5-34
5.9.9	Crushers.....	5-17	5.23.3	Electrostatic Dust Collectors (ESP)	5-35
5.10	Coal Burning System	5-18	5.24	Introduction	5-36
5.10.1	Selection of Firing Methods.....	5-18	5.25	Necessity of Feed Water Treatment in Boilers	5-36
5.11	Solid Fuel Firing	5-18	5.25.1	Sludge and Scale Formation.....	5-37
5.11.1	Advantages of Stoker Firing.....	5-18	5.25.2	Caustic Embrittlement.....	5-38
5.11.2	Disadvantages of Stoker Firing.....	5-18	5.25.3	Boiler Corrosion	5-38
5.12	Classification of Stoker Firing	5-18	5.25.4	Priming and Foaming.....	5-38
5.13	Overfeed Stokers	5-19	5.26	Feed Water Treatment	5-38
5.13.1	Types of Overfeed Stokers.....	5-19	5.26.1	Mechanical Treatment of Feed Water.....	5-39
5.13.1.1	Chain Grate Stoker	5-19	5.26.2	Chemical Treatment.....	5-39
5.13.1.2	Spreader Stoker.....	5-20	5.26.3	Reverse Osmosis (RO)	5-43
5.14	Underfeed Stokers	5-21	5.26.4	Thermal Treatment.....	5-44
5.14.1	Types of Underfeed Stokers	5-21	5.27	Internal Treatment of Feed Water	5-45
5.14.1.1	Single Retort Type Underfeed Stokers	5-21	<hr/>		
5.14.1.2	Multi-Retort Underfeed Stoker.....	5-22	Chapter 6 : Gas Turbine Power Plants 6-1 to 6-62		
5.15	Pulverized Coal System	5-23	<div style="border: 1px solid black; padding: 5px;"> <p>Gas Turbine Power Plant : Classification, Open and Closed cycle, Gas turbine fuels, Actual Brayton cycle, Optimum pressure ratio for maximum thermal efficiency, Work ratio, Air rate, Effect of operating variables on the thermal efficiency and work, Cooling of gas turbine blade, combined steam and gas turbine plant.</p> </div>		
5.16	Pulverized Fuel Handling System	5-24			
5.16.1	Unit System	5-25			
5.16.2	Central or Bin System.....	5-26			
5.17	Pulverizing Mills	5-26			
5.18	Pulverized Coal Burners	5-28			
5.19	Classification of Pulverized Coal Burners	5-29			
5.19.1	Vertical Long Flame Burner	5-29			
5.19.2	Turbulent or Short Flame Burners	5-29			
5.19.3	Tangential Burners.....	5-30			
5.19.4	Cyclone Burners.....	5-30			
5.20	Oil Burners	5-31	6.1	Introduction	6-1
5.20.1	Classification of Oil Burners.....	5-31	6.2	Fuels for Gas Turbine Power Plants	6-1
5.21	Necessity of Ash Disposal	5-31	6.3	Gas Turbine Materials - Requirement and Selection	6-2
5.22	Ash Handling Systems	5-32	6.4	Classification of Gas Turbine Cycles	6-2
			6.4.1	Open Cycle Gas Turbine.....	6-2

6.4.2	Closed Cycle Gas Turbine	6-3	6.22	Components and Accessories of a Gas Turbine Power Plant.....	6-55
6.4.3	Advantages and Disadvantages of Closed Cycle Gas Turbine Over Open Cycle Gas Turbine.....	6-3	6.22.1	Components.....	6-55
6.5	Brayton Cycle for Gas Turbines.....	6-4	6.22.2	Accessories.....	6-57
6.5.1	Effect of Maximum Temperature on Cycle Efficiency and Work Ratio (R _w).....	6-6	6.23	Cooling of Turbine Blades.....	6-57
6.6	Optimum Pressure Ratio for Maximum Net Work.....	6-7	6.23.1	External Air Cooling of Blades.....	6-58
6.6.1	Intermediate Temperature T ₂ for Optimum Work.....	6-7	6.23.2	Internal Cooling of Turbine Blades	6-58
6.6.2	Equation for Maximum Work Output.....	6-8	6.23.3	Liquid Cooling of Turbine Blades.....	6-58
6.7	Actual Gas Turbine Cycle	6-8	<hr/>		
6.7.1	Effect of Parameters on Performance of the Cycle.....	6-10	Chapter 7 : Nuclear Power Plants 7-1 to 7-19		
6.8	A Simple Gas Turbine - A Steady Flow Machine	6-10	<p>Nuclear Power Plant : Basics of Nuclear Engineering, Layout and subsystems of Nuclear Power Plants, Working of Nuclear Reactors : Boiling Water Reactor (BWR), Pressurized Water Reactor (PWR), CANADA Deuterium-Uranium reactor (CANDU), Breeder, Gas Cooled and Liquid Metal Cooled Reactors, Brief about the Nuclear program in India, Safety measures for Nuclear Power plants .</p>		
6.9	Methods of Improving the Thermal Efficiency and Specific Work Output of Gas Turbine Cycle	6-22	7.1	Nuclear Power Plants - Why ?.....	7-1
6.10	Gas Turbine Cycle with Regeneration	6-22	7.2	Advantages of Nuclear Power Plants	7-1
6.10.1	Actual Brayton Cycle with Regeneration.....	6-23	7.3	Disadvantages of Nuclear Power Plants	7-2
6.11	Gas Turbine (Cycle) with Intercooling	6-25	7.4	Structure of Atom	7-2
6.12	Gas Turbine Cycle with Reheating	6-26	7.5	Chemical and Nuclear Reactions	7-3
6.12.1	Conclusions	6-27	7.6	Nuclear Binding Energy	7-3
6.13	Gas Turbine Cycle with Water Injection	6-29	7.7	Nuclear Fission.....	7-3
6.14	Co-generation.....	6-42	7.7.1	Fission of ${}_{92}\text{U}^{235}$	7-4
6.15	Combined Gas Turbine Cycle Power Plants....	6-42	7.8	Nuclear Fusion.....	7-4
6.15.1	Combined Gas Turbine Cycle with Vapour Power Cycle.....	6-42	7.9	Distinguish between Fission and Fusion Reactions.....	7-4
6.15.2	Combined Gas Turbine Cycle with Nuclear Power Plant.....	6-43	7.10	Conversion of Nuclear Energy	7-5
6.15.3	Efficiency of Combined Cycles	6-44	7.11	Elements of a Nuclear Power Plant	7-6
6.16	Repowering.....	6-45	7.12	Main Components of a Nuclear Reactor and their Functions.....	7-6
6.17	Combined Cycle with Gas Production from Coal.....	6-45	7.13	Classification of Reactors	7-8
6.17.1	Integrated Gasification Combined Cycle (IGCC)...	6-46	7.14	Types of Nuclear Reactor Power Plants.....	7-9
6.17.2	Combined Cycle using Pressurized Fluidized Bed Combustion (PFBC)	6-47	7.15	The Pressurized Water Reactor (PWR) Power Plant.....	7-9
6.18	Combined Cycle with Organic Fluids.....	6-48	7.15.1	Advantages of PWR.....	7-10
6.19	Parameters Affecting the Thermodynamic Efficiency of Combined Cycles.....	6-49	7.15.2	Disadvantages of PWR.....	7-10
6.20	Combined Cycle Power Plants in India.....	6-50	7.16	The Boiling Water Reactor (BWR) Power Plant.....	7-10
6.21	Advantages of Combined Cycles.....	6-50			

7.16.1	Advantages of BWR.....	7-11	8.7.2.1	Selection of Site of Dams	8-8
7.16.2	Disadvantages of BWR.....	7-11	8.7.2.2	Choice of Dams	8-8
7.17	The Gas Cooled Reactors (GCR).....	7-11	8.7.3	Type of Spillways	8-9
7.18	CANDU Reactor Power Plant	7-12	8.7.4	Conduits (Canal, Flumes, Tunnel, Pipe line, Penstock).....	8-11
7.19	Liquid Metal Reactor or Sodium Graphite Reactor (SGR) Power Plant.....	7-13	8.8	Classification of Hydro-Electric Power Plants	8-11
7.20	Liquid Metal Fast Breeder Reactors (LMFBR).....	7-14	8.9	Plants Based on Availability of Head	8-12
7.21	Selection of Site for Nuclear Power Plants	7-14	8.9.1	Low Head Plants	8-12
7.22	Nuclear Power Plants in India	7-15	8.9.2	Medium Head Plants.....	8-12
7.22.1	Other Nuclear Power Plants Planned in India	7-15	8.9.3	High Head Plants	8-12
7.23	Nuclear Waste Disposal.....	7-15	8.10	Plants Based on Type of Loads	8-12
7.23.1	Safety of Nuclear Reactors.....	7-16	8.11	Plants Based on Quantity of Water Available.....	8-13
7.24	Comparison between Nuclear and Conventional Thermal Power Plants	7-16	8.11.1	Run-off River Plants Without Pondage	8-13
<hr/>			8.11.2	Run-off River Plants with Pondage	8-13
Chapter 8 : Power From Renewable Energy 8-1 to 8-75			8.11.3	Storage Type Plants	8-13
<hr/>			8.11.4	Pumped Storage Peak Load Plants.....	8-13
Power from Renewable Energy : Hydro electric Power Plants - Classification, Typical Layout and Associated components including Turbines, Principle, Construction and working of Wind. Tidal, Solar Photovoltaic (SPV), Solar Thermal, Geo Thermal and Fuel Cell Power systems.			8.11.5	Mini and Micro Hydel Power Plants	8-14
8.1	Hydro-Electric Power Plants	8-1	8.12	Preventive Maintenance of Hydro Power Plants.....	8-14
8.1.1	Principle of Operation of Hydro - Electric Power Plants.....	8-1	8.13	Interconnected System between Hydro and Steam Power Plants	8-14
8.2	Advantages and Disadvantages of Hydro Power Plants over other Power Plants.....	8-1	8.14	Important Hydro - Electric Power Plants in India.....	8-15
8.3	Hydrology	8-2	8.15	Comparison of Steam, Hydro-Electric, Gas and Diesel Power Plants.....	8-15
8.3.1	Hydrological Cycle	8-2	8.16	Hydraulic Turbines.....	8-16
8.3.2	Flow Duration Curve and Power Duration Curves.....	8-3	8.16.1	Basic Classification of Hydraulic Turbines	8-17
8.4	Hydrographs.....	8-3	8.17	Construction and Working of Pelton Wheel	8-17
8.5	Mass Curve.....	8-4	8.18	Francis Reaction Turbines.....	8-19
8.5.1	Pondage and Storage.....	8-4	8.18.1	Comparison Between Impulse Turbine and Reaction Turbine.....	8-21
8.6	Selection of Site for Hydro-Electric Power Plants.....	8-5	8.19	Axial Flow Reaction Turbines - Propeller and Kaplan Turbines.....	8-21
8.7	Schematic Layout of Hydro-Electric Power Plant.....	8-5	8.19.1	Comparison between Francis and Kaplan Turbines	22
8.7.1	Operation of hydro-electric power plant.....	8-8	8.20	Governing of Turbines.....	8-23
8.7.2	Types and Choice of Dams	8-8	8.20.1	Governing System for Turbines of a Hydro-Electric Power Plant	8-23
			8.20.2	Governing Mechanism	8-24
			8.20.3	Governing of Pelton Turbine	8-24
			8.20.4	Governing Mechanism of a Francis Turbine	8-25

8.20.5	Governing Mechanism for Kaplan Turbine	8-26	8.40	Hot Dry Rock (HDR) Resources	8-41
8.21	Types Surge Tank	8-27	8.41	Scope for Geothermal Energy in India	8-42
8.22	Environmental Impact of Hydroelectric Power Plants.....	8-28	8.42	Environmental Problems of Geothermal Energy	8-42
8.23	Introduction to Wind Power System.....	8-28	8.43	Introduction to Fuel Cells.....	8-42
8.24	Causes of Wind.....	8-28	8.44	Advantages and Disadvantages of Fuel Cells over Conventional Power Plants	8-43
8.25	Advantages and Disadvantages of Wind Energy	8-29	8.44.1	Advantages.....	8-43
8.25.1	Applications of Wind Energy.....	8-29	8.44.2	Disadvantages.....	8-43
8.25.2	Wind Data and Energy Estimation.....	8-29	8.45	Principle of Operation of Fuel Cells.....	8-43
8.26	Classification of Wind Mills.....	8-30	8.45.1	Chemical Reactions with Alkaline H ₂ – O ₂ Fuel Cell	8-44
8.26.1	Horizontal Axis Wind Mills	8-31	8.45.2	Chemical Reaction with Acidic Electrolyte (H ₂ SO ₄).....	8-44
8.26.2	Vertical Axis Wind Mills	8-31	8.46	Classification of Fuel Cells.....	8-45
8.27	Horizontal Axis Wind Turbine\ (HAWT) Generator	8-32	8.47	Phosphoric Acid Fuel Cells (PAFC)	8-45
8.28	Vertical Axis Wind Turbine (VAWT)	8-33	8.48	Molten Carbonate Fuel Cell (MCFC).....	8-46
8.29	Tidal Energy.....	8-33	8.49	Polymer Electrolyte Membrane Fuel Proton/Cell (PEMFC) or Solid Polymer Fuel Cell (SPFC).....	8-46
8.29.1	Limitations of Tidal Energy.....	8-33	8.50	Solid Oxide Fuel Cells (SOFC)	8-47
8.29.2	Availability of Tidal Power in India and Locations	8-34	8.50.1	Regenerative Fuel Cells (RFC)	8-48
8.30	Tidal Power Plants(Single Basin System)	8-34	8.51	Performance Analysis for Fuel Cells	8-49
8.30.1	Tidal Power Plant-Double Basin System	8-35	8.51.1	E.M.F. of a Fuel Cell.....	8-49
8.31	Advantages of Tidal Power	8-35	8.52	Losses in Fuel Cells	8-50
8.32	Disadvantages of Tidal Power	8-35	8.53	Selection of Fuel Cells	8-51
8.33	Types of Hydraulic Turbines for Tidal Power Plants System.....	8-35	8.54	Present Status and Limitations of Fuel Cells..	8-51
8.34	Estimation of Tidal Power in Single Basin System	8-36	8.55	Types of Solar Thermal Power Plants	8-52
8.35	Geothermal Energy	8-37	8.55.1	Low Temperature Solar Power System.....	8-52
8.35.1	Advantages of Geothermal Energy	8-38	8.55.2	Medium Temperature Solar Power Plant	8-53
8.35.2	Disadvantages of Geothermal Energy	8-38	8.55.3	High Temperature Solar Thermal Power Plants..	8-54
8.36	Origin and Types of Geothermal Energy.....	8-38	8.56	Solar Chimney Power Plant.....	8-55
8.36.1	Types of Geothermal Resources.....	8-39	8.57	Introduction of Solar Photovoltaic System.....	8-55
8.37	Applications of Geothermal Energy.....	8-39	8.58	Advantages of Solar Photo Voltaic Systems.....	8-56
8.37.1	Difference between Conventional Steam Power Plants and Geothermal Power Plants.....	8-39	8.59	Drawbacks of Solar Photo Voltaic Systems	8-56
8.38	Applications of Hydrothermal Resources	8-39	8.60	Basics of Photovoltaics	8-56
8.38.1	Vapour Dominated or Dry Steam System (Super heated steam system).....	8-40	8.60.1	Photovoltaic Materials.....	8-56
8.38.2	Liquid Dominated or Wet Steam System.....	8-40	8.60.2	Basic Principle of Operation	8-56
8.39	Other Applications of Geothermal Fluid for Low Temperature Systems	8-41			

<p>8.61 Solar Photovoltaic Cell Materials..... 8-58</p> <p>8.62 PhotoVoltaic Principles..... 8-58</p> <p>8.63 Performance of Cell (Current - Voltage Characteristics) 8-59</p> <p>8.63.1 Solar Cell Efficiency 8-60</p> <p>8.63.2 Factors Limiting the Efficiency of Solar Cell..... 8-60</p> <p>8.64 Solar Photovoltaic Systems 8-61</p> <p>8.64.1 Photovoltaic Array 8-61</p> <p>8.64.2 Inverter 8-61</p> <p>8.64.3 Energy Storage 8-62</p> <p>8.64.4 System Charge Control (Battery Controllers) 8-62</p> <p>8.64.5 Balance of Systems and Components..... 8-63</p> <p>8.65 Types of Solar Photovoltaic Systems..... 8-63</p> <p>8.65.1 Stand Alone System..... 8-63</p> <p>8.65.2 Grid Connected Systems 8-64</p> <p>8.66 Applications of Solar PV Systems..... 8-65</p> <p>Chapter 9 : Energy, Economic And Environmental Issues Of Power Plants 9-1 to 9-42</p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p>Energy, Economic and Environmental issues of Power plants : Power tariff types, Load distribution parameters, load curve, Comparison of site selection criteria, relative merits and demerits, Capital and Operating Cost of different power plants. Pollution control technologies including Waste Disposal Options for Coal and Nuclear Power Plants.</p> </div> <p>9.1 Introduction..... 9-1</p> <p>9.2 Cost of Electrical Energy..... 9-1</p> <p>9.2.1 Fixed or Capital Cost..... 9-1</p> <p>9.2.2 Running of Operational Charges..... 9-3</p> <p>9.2.3 Unit Energy Cost..... 9-3</p> <p>9.3 Load Curves..... 9-3</p> <p>9.4 Different Terms and Definitions..... 9-5</p> <p>9.5 Significance of Load Factor and Diversity Factor..... 9-7</p> <p>9.6 Load Sharing of Various Plants..... 9-8</p>	<p>9.7 Base Load and Peak Load Plants 9-8</p> <p>9.8 Selection of Power Plants for Power Generation 9-9</p> <p>9.9 Load Duration Curve 9-10</p> <p>9.10 Performance and Operating Characteristics of a Power Plant 9-10</p> <p>9.11 The Heat Rate and Incremental Rate Curves 9-11</p> <p>9.12 Economic Load Sharing between Generating Plants 9-12</p> <p>9.13 Economic Load Sharing between Base Load and Peak Load Plants 9-13</p> <p>9.14 Tariff Methods for Electrical Energy 9-14</p> <p>9.15 Relative Merits and Demerits with Site Selection Criteria and Capital and Operating Cost Comparison of Various Power Plants..... 9-31</p> <p>9.16 Pollutants from Power Plants..... 9-32</p> <p>9.17 Causes and Harmful Effects of Pollutants on Environment 9-32</p> <p>9.18 Other Effects of Pollutants and Thermal Pollution 9-33</p> <p>9.18.1 Acid Rains 9-33</p> <p>9.18.2 Thermal Pollution 9-34</p> <p>9.18.2.1 Impact of Cooling Towers 9-34</p> <p>9.19 Control of Pollutants 9-34</p> <p>9.19.1 Control of SO₂ 9-34</p> <p>9.19.1.1 Desulphurisation of Fuels (Pre - Treatment) 9-35</p> <p>9.19.1.2 Removal of SO₂ from Flue Gases (Post Treatment) 9-35</p> <p>9.19.2 Control of Suspended Particulate Matters (SPMs) 9-35</p> <p>9.19.3 Control of NO_x Emissions 9-35</p> <p>9.20 Pollution from Nuclear Power Plants - Their Effect and Control 9-35</p> <p>9.21 Noise Pollution in Thermal Power Plants and Its Control 9-36</p> <p>9.22 Green House Effect and Global Warming 9-37</p> <p>9.22.1 Control of CO₂ Emissions..... 9-37</p> <p>9.23 Capital and Operating Cost of Power Plants 9-37</p> <p>• Appendix A.....
