

**MODULE 1**

**Chapter 1 : Introduction To Air Pollution 1-1 to 1-27**

**Syllabus :** Introduction to Air Pollution : Definition, Air pollutants and its classification and sources of generation. Emission Inventory. Indoor air pollution. Measurement of air pollution. Air pollution in India and other countries. Air Quality Index. Numerical on conversion of units of pollutants.

**1.1 Air Pollution ..... 1-1**

1.1.1 Introduction ..... 1-1

**1.2 Air Pollutants and their Classification ..... 1-1**

1.2.1 Introduction ..... 1-1

**1.3 Types of Air Pollutants ..... 1-2**

1.3.1 Introduction ..... 1-2

1.3.2 Primary Air Pollutants ..... 1-2

1.3.3 Carbon Monoxide [CO] ..... 1-2

1.3.4 Nitrogen Oxides [NO<sub>x</sub>] ..... 1-3

1.3.5 Sulphur Oxides [SO<sub>x</sub>] ..... 1-4

1.3.6 Hydrocarbons (HC) ..... 1-5

1.3.7 Particulates ..... 1-6

1.3.8 The Secondary Air Pollutants ..... 1-8

1.3.9 Differences between Primary and Secondary Pollutants ..... 1-8

1.3.10 Primary Air Pollutants : Sources and Effects ..... 1-8

**1.4 Emission Inventory ..... 1-9**

1.4.1 Introduction ..... 1-9

1.4.2 Aspects of Emission ..... 1-9

1.4.3 Use of Emission Inventory ..... 1-10

1.4.4 Use of Emission Inventory for Policy Making ..... 1-10

1.4.5 Use of Emission Inventory for Scientific Application ..... 1-10

**1.5 Causes, Sources and Effects of Indoor Pollutants ..... 1-10**

1.5.1 Introduction ..... 1-10

1.5.2 Types of Indoor Pollutants ..... 1-10

1.5.3 Sources of Indoor Pollutants ..... 1-11

1.5.4 Effects of Indoor Air Pollution ..... 1-11

**1.6 Factors Affecting the Exposure to Indoor Air Pollution ..... 1-11**

1.6.1 Introduction ..... 1-11

1.6.2 Human Activities ..... 1-11

1.6.3 Geographical and Local Variations ..... 1-12

1.6.4 Urban, Suburban and Neighbourhood Variations in the Indoor Air Quality ..... 1-12

1.6.5 Variations in Indoor Air Quality in the Building ..... 1-13

1.6.6 General Observations about the Impact of these Factors on the Quality and Concentration of Indoor Pollutants ..... 1-13

**1.7 Investigation of Indoor Air Quality (IAQ) Problems1- ..... 1-13**

1.7.1 Introduction ..... 1-13

1.7.2 Method of Investigation ..... 1-13

**1.8 Changes in the Indoor Air Quality and Control of Indoor Pollutants ..... 1-14**

1.8.1 Introduction ..... 1-14

**1.9 Indoor Cleaning System ..... 1-15**

1.9.1 Introduction ..... 1-15

1.9.2 Mechanical Ventilation ..... 1-15

1.9.3 Types of Mechanical Ventilators ..... 1-15

**1.10 Use of Plants to Control Indoor Air Pollution ..... 1-16**

1.10.1 Introduction ..... 1-16

1.10.2 Best Office Plants to Purify the Indoor Air and Reduce Pollution ..... 1-16

**1.11 Radon and Its Decay Product in Indoor Air .... 1-17**

1.11.1 Introduction ..... 1-17

1.11.2 Source of Radon ..... 1-17

1.11.3 Danger Level of Radon ..... 1-17

**1.12 Odour Pollution ..... 1-17**

1.12.1 Introduction ..... 1-17

1.12.2 Classification of the Sources of Odour ..... 1-18

1.12.3 Odorous Chemicals, Emitted from Industrial Operations ..... 1-18

**1.13 Methods of Measurement of Odour ..... 1-19**

1.13.1 Introduction ..... 1-19

1.13.2 Terms Associated with the Odour Measurement ..... 1-19

1.13.3 Measurement of Odour..... 1-19

**1.14 Control of Odour Pollution..... 1-20**

1.14.1 Introduction..... 1-20

1.14.2 Odour Control From Area Sources..... 1-21

1.14.3 Odour Control from Point Sources ..... 1-21

**1.15 Air Pollution in India and other Countries ..... 1-22**

1.15.1 Introduction..... 1-22

1.15.2 The Main causes of Air Pollution in India..... 1-22

**1.16 Air Quality Index [AQI] ..... 1-22**

1.16.1 Introduction..... 1-22

1.16.2 Air Pollution in Various Megapolicy Cities in India..... 1-23

1.16.3 Air Quality Index [AQI in U.S.A]..... 1-23

1.16.4 AQI In the World..... 1-24

1.16.5 A.Q.I. of India..... 1-24

**1.17 Conversion of Units of Pollutants ..... 1-25**

1.17.1 Introduction..... 1-25

**1.18 Numerical on Conversion of Units of Pollutants ..... 1-26**

**MODULE 2**

**Chapter 2 : Environmental Effects of Air Pollution**  
**2-1 to 2-5**

**Syllabus :** Environmental Effects of Air Pollution : Effects of air pollutants on human beings, plants, animals, properties and visibility. Exposure to air pollution. Numerical problems based on COH, CoHb.

**2.1 Effects of Air Pollution ..... 2-1**

2.1.1 Introduction..... 2-1

2.1.2 Air Pollution and Human Health..... 2-1

2.1.3 Air Pollution and Vegetation ..... 2-2

2.1.4 Air Pollution and Animals..... 2-2

**2.2 Air pollution Effects on Non-livings..... 2-2**

2.2.1 Effects on material /Properties..... 2-2

2.2.2 Effects on climate ..... 2-2

**2.3 Effects of Air Pollution on Visibility..... 2-3**

2.3.1 Introduction..... 2-3

2.3.2 Visibility and Haze ..... 2-3

**2.4 Effects of Poor Visibility..... 2-3**

2.4.1 Introduction..... 2-3

2.4.2 Visibility Controlling Parameters..... 2-3

2.4.3 Seasonal and Regional Variations in the Visibility..... 2-4

**2.5 The Measurement of Visibility ..... 2-4**

2.5.1 Introduction..... 2-4

2.5.2 Measuring the Visibility during Rainfall Snowfall..... 2-4

2.5.3 Measuring the visibility in Polluted Air..... 2-4

**2.6 Numericals Based on COH, CoHb..... 2-4**

**MODULE 3**

**Chapter 3 : Measurement and Control Technology of Air Pollutant**  
**3-1 to 3-30**

**Syllabus :** Measurement and Control technology of Air Pollutants: methods to measure ambient air pollution and stack emissions, high volume sampler, wind rose diagram.

Control Technology : Control Devices Principles, operations and types, simple hoods and ducts. Settling chambers, cyclones, electrostatic precipitators (ESP), Filters, scrubbers, absorption towers and incinerators. Collection efficiencies for laminar and turbulent flows for settling chambers, particle cut size for cyclone, ESP Concept of frictional and overall efficiencies. Design criteria for filters, scrubbers, absorption towers and incinerators

**3.1 Methods to Measure the Ambient Air Pollution ..... 3-1**

3.1.1 Introduction..... 3-1

3.1.2 Purpose of Ambient Air..... 3-1

3.1.3 Methods Used to Collect the Ambient Air Sampling and Analysis..... 3-1

**3.2 Air Sampling Methods ..... 3-2**

3.2.1 Introduction..... 3-2

3.2.2 Sedimentation Method ..... 3-2

3.2.3 The Filtration Method..... 3-2

**3.3 Precipitation Method to Collect Air Pollutants ..... 3-2**

3.3.1 Introduction..... 3-2

|             |   |             |             |  |             |
|-------------|---|-------------|-------------|--|-------------|
| 3.3.2       | Thermal Precipitation.....  | 3-2         | <b>3.11</b> | <b>Measures to Control Air Pollution .....</b>                     | <b>3-12</b> |
| 3.3.3       | Electronic Precipitation .....  | 3-3         | 3.11.1      | Introduction.....  | 3-12        |
| <b>3.4</b>  | <b>Air sampling of the Gaseous Pollutants.....</b>                            | <b>3-3</b>  | <b>3.12</b> | <b>Control of Particulate Matters.....</b>                         | <b>3-13</b> |
| 3.4.1       | Introduction.....   | 3-3         | 3.12.1      | Settling Chamber .....   | 3-13        |
| 3.4.2       | Absorption Sampling Method .....  | 3-3         | 3.12.2      | Working Principle and Design Criteria of<br>Settling Chamber ..... | 3-14        |
| 3.4.3       | Adsorption Sampling Method .....  | 3-3         | <b>3.13</b> | <b>Simple Hoods and Ducts .....</b>                                | <b>3-14</b> |
| 3.4.4       | Condensation Sampling.....  | 3-3         | 3.13.1      | Introduction.....  | 3-14        |
| <b>3.5</b>  | <b>Basis Consideration of Sampling Sites.....</b>                             | <b>3-4</b>  | 3.13.2      | Designing Local Exhaust System .....                               | 3-14        |
| 3.5.1       | Introduction.....   | 3-4         | 3.13.3      | The Hood Design Basics.....  | 3-15        |
| 3.5.2       | Site Selection .....  | 3-4         | <b>3.14</b> | <b>Control of Particulate Matter .....</b>                         | <b>3-15</b> |
| 3.5.3       | Site Selection Criteria.....  | 3-4         | 3.14.1      | Introduction.....  | 3-15        |
| <b>3.6</b>  | <b>High Volume Air Sampler .....</b>  | <b>3-4</b>  | 3.14.2      | Gravity Settling Chamber .....                                     | 3-15        |
| 3.6.1       | Introduction.....   | 3-4         | 3.14.3      | Cyclone Collector.....   | 3-16        |
| 3.6.2       | Working of High Volume Air Sampler.....                                       | 3-5         | 3.14.4      | Electrostatic Precipitator .....                                   | 3-16        |
| <b>3.7</b>  | <b>Stack Emission Monitoring for Particulates<br/>and Gaseous Matter.....</b> | <b>3-5</b>  | 3.14.5      | Wet Scrubbers .....  | 3-17        |
| 3.7.1       | Introduction.....   | 3-5         | 3.14.6      | Other Types of Scrubbers.....                                      | 3-18        |
| 3.7.2       | Emission Monitoring of Stacks .....   | 3-6         | 3.14.7      | Fabric Filters/Bag Filters.....                                    | 3-18        |
| 3.7.3       | What If the Stack Emission Limits are Crossed ?...                            | 3-6         | <b>3.15</b> | <b>Natural Emissions .....</b>                                     | <b>3-19</b> |
| 3.7.4       | Isokinetic Sampling.....  | 3-6         | 3.15.1      | Introduction.....  | 3-19        |
| 3.7.5       | Sampling Train for Stack Sampling .....                                       | 3-6         | <b>3.16</b> | <b>Control of Air Pollution at Source .....</b>                    | <b>3-20</b> |
| <b>3.8</b>  | <b>Location of Sampling Ports and<br/>Travers Points.....</b>                 | <b>3-7</b>  | 3.16.1      | Introduction.....  | 3-20        |
| 3.8.1       | Introduction.....   | 3-7         | 3.16.2      | Absorption in Liquid.....  | 3-20        |
| 3.8.2       | The Sampling Ports .....  | 3-7         | 3.16.3      | Adsorption on Solid Surface .....                                  | 3-20        |
| 3.8.3       | Location of Traverse Points .....   | 3-7         | 3.16.4      | Condensation to a Liquid .....                                     | 3-20        |
| <b>3.9</b>  | <b>Wind Roses Diagram .....</b>   | <b>3-8</b>  | 3.16.5      | Conversion to a Less Toxic Gas of<br>Non-Polluted Gas.....         | 3-20        |
| 3.9.1       | Introduction.....   | 3-8         | <b>3.17</b> | <b>Control of Air Pollution from Automobiles .....</b>             | <b>3-21</b> |
| 3.9.2       | The Mechanisms of Wind Roses.....   | 3-8         | 3.17.1      | Introduction.....  | 3-21        |
| 3.9.3       | Use of Wind Rose Diagrams.....  | 3-10        | 3.17.2      | Various IC engine pollutants, are controlled<br>as under .....     | 3-21        |
| <b>3.10</b> | <b>Control of Air Pollution .....</b>   | <b>3-11</b> | <b>3.18</b> | <b>Absorption Tower .....</b>                                      | <b>3-22</b> |
| 3.10.1      | Introduction.....   | 3-11        | 3.18.1      | Introduction.....  | 3-22        |
| 3.10.2      | Modification in the Process by the<br>Raw Materials .....                     | 3-11        | 3.18.2      | Objectives of the Absorption Towers.....                           | 3-22        |
| 3.10.3      | Modification in the Process by Changing<br>the Fuel.....                      | 3-11        | 3.18.3      | Designing of Absorption Towers.....                                | 3-22        |
| 3.10.4      | Modification in Process Equipment to Control<br>Air Pollution.....            | 3-12        | <b>3.19</b> | <b>Incinerators .....</b>  | <b>3-23</b> |
| 3.10.5      | Modification in Production Process to<br>Reduce the Air Pollution.....        | 3-12        | 3.19.1      | Introduction.....  | 3-23        |
|             |   |             | 3.19.2      | Designing of Incinerator .....                                     | 3-23        |

**3.20 Collection Efficiencies for Laminar and Turbulent Flows for settling Chambers ..... 3-24**

3.20.1 Introduction ..... 3-24

**3.21 Particle cut Size for Cyclone ..... 3-24**

3.21.1 Introduction ..... 3-24

**3.22 ESP Concept of Frictional and Overall Efficiencies ..... 3-24**

3.22.1 Introduction ..... 3-24

3.22.2 ESP Efficiency Calculator ..... 3-25

**3.23 Design Criteria ..... 3-25**

3.23.1 Design Criteria Filters ..... 3-25

3.23.2 Design Criteria for Scrubbers ..... 3-25

3.23.3 Design Criteria of Absorption Towers ..... 3-26

3.23.4 Design Criteria for Incinerators ..... 3-26

**3.24 Examples on Air Pollution ..... 3-27**

**MODULE 4**

**Chapter 4 : Meteorological Process and Air Quality Monitoring 4-1 to 4-26**

**Syllabus :** Meteorological process and air quality monitoring: Large scale wind circulation geotropic wind, gradient wind, cyclone, anticyclone, planetary boundary layer. Lapse rate, stability conditions, wind velocity profile, maximum mixing depth, topographic effects. Plum patterns, plum dispersion, Gaussian model for predicting concentration, downwind from a single source, diffusion coefficients, Turner's stability categories and graphs for dispersion estimates. Maximum ground level concentration, inversion effects, distance touching ground modification of Gaussian model to predict particulate dispersion, plume rise, modified Holland equation for small source.

**4.1 Meteorological Parameters ..... 4-1**

4.1.1 Introduction ..... 4-1

4.1.2 Importance of Meteorological Parameters ..... 4-1

**4.2 Primary and Secondary Meteorological Factors ..... 4-2**

4.2.1 Introduction ..... 4-2

4.2.2 Wind Speed and Direction ..... 4-2

4.2.3 Temperature and Sun light ..... 4-2

4.2.4 Humidity ..... 4-2

4.2.5 Rainfall ..... 4-3

4.2.6 Solar Radiation ..... 4-3

**4.3 Instruments used to Collect Weather Data ..... 4-3**

4.3.1 Introduction ..... 4-3

4.3.2 Wind velocity - Anemometer ..... 4-3

4.3.3 Temperature / Solar Radiation ..... 4-3

4.3.4 Moisture / Humidity ..... 4-4

4.3.5 Rain Fall ..... 4-5

4.3.6 Solar Radiation ..... 4-5

**4.4 Large Scale Winds Circulation ..... 4-5**

4.4.1 Introduction ..... 4-5

4.4.2 Temperature Zone of the Earth ..... 4-6

4.4.3 Pressure Belts ..... 4-6

**4.5 Large Scale Winds ..... 4-7**

4.5.1 Introduction ..... 4-7

4.5.2 Geotropic ..... 4-7

4.5.3 Gradient Winds / Globular / Yearly Winds ..... 4-8

4.5.4 Seasonal Winds ..... 4-9

4.5.5 Cyclonic Winds ..... 4-9

4.5.6 Anti-Cyclones ..... 4-10

**4.6 The Planetary Layer of Atmosphere ..... 4-11**

4.6.1 Introduction ..... 4-11

4.6.2 The Structure of Atmosphere ..... 4-11

4.6.3 Importance of Planetary Layer ..... 4-13

**4.7 Temperature Lapse Rate ..... 4-14**

4.7.1 Introduction ..... 4-14

4.7.2 Atmospheric Lapse Rate / Environmental Lapse Rate ..... 4-14

4.7.3 Environmental Lapse Rate (E.L.R.) and Adiabatic Lapse Rate (A.L.R.) ..... 4-14

4.7.4 Relationship between E.L.R. and A.L.R. / Process of Inversion ..... 4-14

**4.8 Plume Patterns ..... 4-17**

4.8.1 Introduction ..... 4-17

4.8.2 Looping ..... 4-17

4.8.3 Neutral Plume ..... 4-17

4.8.4 Coning Plume ..... 4-17

|             |  |             |
|-------------|--|-------------|
| 4.8.5       | Fanning Plume .....  | 4-18        |
| 4.8.6       | Lofting Plume .....  | 4-18        |
| 4.8.7       | Fumigating Plume .....   | 4-18        |
| 4.8.8       | Trapping Plume .....   | 4-19        |
| <b>4.9.</b> | <b>Turner's Stability Categories.....</b>  | <b>4-19</b> |
| <b>4.10</b> | <b>Gaussian Diffusion Model for Finding<br/>Ground Level Concentration .....</b> | <b>4-19</b> |
| 4.10.1      | Introduction .....   | 4-19        |
| 4.10.2      | General Assumption of G. P.M.....  | 4-19        |
| 4.10.3      | Restrictions for G. P. M.....  | 4-20        |
| 4.10.4      | Modification of Gaussians Model.....   | 4-20        |
| <b>4.11</b> | <b>Formulae for Effective Stack Height<br/>(As per CPCB norms) .....</b>         | <b>4-20</b> |
| 4.11.1      | Introduction .....   | 4-20        |
| 4.11.2      | Minimum Stack Height for Steam Generation<br>Boiler .....                        | 4-20        |
| 4.11.3      | Diesel Generation Sets .....   | 4-22        |
| <b>4.12</b> | <b>Numericals .....</b>  | <b>4-22</b> |

**MODULE 5****Chapter 5 : Current Issues on Air Pollution and Global  
Legal Aspects 5-1 to 5-9**

**Syllabus :** Current Issues on Air Pollution and Global -Legal Aspects, air pollution laws, Indian standards- emission and air quality standards Greenhouse effect/ Global warming, Ozone Pollution, Acid Rain.

|            |   |            |
|------------|---|------------|
| <b>5.1</b> | <b>Air Pollution : A Universal Issue .....</b>                                | <b>5-1</b> |
| 5.1.1      | Introduction .....  | 5-1        |
| 5.1.2      | Cause of Air Pollution.....   | 5-1        |
| <b>5.2</b> | <b>Legal Aspects of Air Pollution .....</b>                                   | <b>5-2</b> |

| 5.5.2      | Effects of Global Warming .....             | 5-6        |
| 5.5.3      | Prevention of Green House Effect.....       | 5-6        |
| <b>5.6</b> | <b>Ozone Layer Depletion .....</b>          | <b>5-7</b> |
| 5.6.1      | Introduction.....                           | 5-7        |
| 5.6.2      | Importance of Ozone Layer.....              | 5-7        |
| <b>5.7</b> | <b>Acid Rain.....</b>                       | <b>5-8</b> |
| 5.7.1      | Introduction.....                           | 5-8        |
| 5.7.2      | Effects of Acid Rain.....                   | 5-8        |

**MODULE 6****Chapter 6 : Noise Pollution 6-1 to 6-22**

**Syllabus :** Noise Pollution : definition and introduction, the effects of noise, characteristics of sound and its measurement, levels of noise and problems, noise rating system, noise level standards, sources of noise and their noise levels, noise abatement and control.

|            |   |            |
|------------|---|------------|
| <b>6.1</b> | <b>Noise Pollution .....</b>                        | <b>6-1</b> |
| 6.1.1      | Introduction.....                                   | 6-1        |
| 6.1.2      | Important Sources of Noise Pollution .....          | 6-1        |
| <b>6.2</b> | <b>Measurement of Sound / Noise Intensity .....</b> | <b>6-2</b> |
| 6.2.1      | Introduction.....                                   | 6-2        |
| <b>6.3</b> | <b>Effects of Noise Pollution.....</b>              | <b>6-3</b> |
| 6.3.1      | Introduction.....                                   | 6-3        |
| 6.3.2      | Physical Effects / Audio logical Effects.....       | 6-3        |
| 6.3.3      | Physiological Effects.....                          | 6-3        |
| 6.3.4      | Psychological Effects .....                         | 6-3        |
| 6.3.5      | Measures to Control the Noise Pollution.....        | 6-3        |
| <b>6.4</b> | <b>Important Terminologies.....</b>                 | <b>6-4</b> |
| 6.4.1.     | Frequency of Sound .....                            | 6-4        |
| 6.4.2      | Wave Length.....                                    | 6-4        |
| 6.4.3      | Sound Pressure Level.....                           | 6-4        |

|            |   |            |            |  |             |
|------------|---|------------|------------|--|-------------|
| 6.4.4      | Threshold of Hearing.....                 | 6-4        | 6.7.5      | Fan Speed.....   | 6-9         |
| 6.4.5      | Threshold Feeling.....                    | 6-5        | 6.7.6      | Pneumatic Exhausts.....  | 6-9         |
| <b>6.5</b> | <b>Levels of Noise and Problems .....</b> | <b>6-5</b> | 6.7.7      | Pneumatic Nozzles .....  | 6-9         |
| 6.5.1      | Introduction.....                         | 6-5        | 6.7.8      | Vibration Pads.....  | 6-10        |
| 6.5.2      | Levels of Sound.....                      | 6-5        | 6.7.9      | Existing Machine Guard.....  | 6-10        |
| <b>6.6</b> | <b>Noise Rating Systems.....</b>          | <b>6-6</b> | 6.7.10     | Chain and Timing Belt Drives.....                                  | 6-11        |
| 6.6.1      | Introduction.....                         | 6-6        | 6.7.11     | Electric Motors.....   | 6-11        |
| 6.6.2      | Noise Rating (NR).....                    | 6-6        | 6.7.12     | Permissible Noise Level.....                                       | 6-11        |
| <b>6.7</b> | <b>Noise Control Techniques .....</b>     | <b>6-7</b> | 6.7.13     | Equivalent Noise Level or Total Sound Pressure<br>Level (SPL)..... | 6-11        |
| 6.7.1      | Introduction.....                         | 6-7        | 6.7.14     | Cumulative Noise Level.....  | 6-12        |
| 6.7.2      | Damping.....                              | 6-7        | <b>6.8</b> | <b>Numericals.....</b>   | <b>6-12</b> |
| 6.7.3      | Fan Installation.....                     | 6-8        |            |  |             |
| 6.7.4      | Ductwork.....                             | 6-8        |            |  |             |
