

Chapter 1 : Introduction to Digital Signal Processing		2.6.3	Circular Time Shift.....	2-30
1-1 to 1-7		2.6.4	Circular Frequency Shift	2-36
1.1	Introduction.....	2.6.5	Time Reversal	2-37
1.2	Digital Signal Processing System.....	2.6.6	Symmetry Property.....	2-38
1.2.1	Difference between Digital and Analog Signal Processing.....	2.6.7	Complex Conjugate Property.....	2-43
		2.6.8	Parseval's Theorem.....	2-43
1.2.2	Converting a Analog Signal to a Discrete Time Signal.....	2.6.9	Multiplication of Two Sequences.....	2-46
		2.6.10	Circular Convolution.....	2-46
1.3	Aliasing	2.7	Circular Convolution	2-47
1.3.1	Solved Examples on Aliasing.....	2.7.1	Concentric Circle Method	2-47
1.3.2	Nyquist Rate.....	2.7.2	Matrix Method	2-49
1.4	Basic Elements of a DSP System.....	2.7.3	Getting Linear Convolution from Circular Convolution.....	2-50
Chapter 2 : Discrete Fourier Transform (DFT)		2.8	Filtering of Long Duration Signals.....	2-59
2-1 to 2-66		2.8.1	Overlap -Save Method.....	2-60
2.1	The Fourier Transform.....	2.8.2	Overlap -Add Method	2-62
2.2	Discrete Fourier Transform (DFT).....	2.9	Summary of DFT Properties	2-66
2.2.1	DFT of Simple Signals	Chapter 3 : Fast Fourier Transform 3-1 to 3-48		
2.3	The Fourier Spectrum	3.1	Introduction	3-1
2.4	Inverse Discrete Fourier Transform (IDFT) 2-13	3.2	Computational Complexity of DFT	3-1
2.5	Computing DFT by Matrix Method.....	3.3	Radix-2 Decimation In Time FFT (DIT-FFT)	3-3
2.5.1	Solved Examples on DFT Matrix Method.....	3.3.1	Bit Reversal Format	3-7
2.5.2	Relationship between DFT and ZT	3.3.2	Solved Examples on DIT-FFT.....	3-7
2.6	Discrete Fourier Transform (DFT) Properties.....	3.4	Radix Decimation in Frequency FFT (DIF-FFT)	3-19
2.6.1	Linearity			
2.6.2	Periodicity.....			

3.4.1 Solved Examples on DIF-FFT 3-22

3.5 Computational Complexity Comparison between DFT and FFT..... 3-34

3.5.1 Computation of Inverse DFT using FFT Algorithms 3-35

3.5.2 Filtering using FFT Algorithms 3-42

Chapter 4 : Basics of Digital Filter 4-1 to 4-19

4.1 Introduction.....4-1

4.2 Basics of Filters.....4-1

4.2.1 Analog Filters4-1

4.2.2 Digital Filters 4-2

4.2.3 Drawing the Frequency Response of Digital Filter 4-2

4.3 Ideal Filter Responses.....4-4

4.4 Basics of Filtering.....4-6

4.4.1 Ideal Filters 4-7

4.5 Types of Digital filters.....4-9

4.5.1 Difference between IIR and FIR..... 4-9

4.5.2 Additional Points in Filters 4-10

4.6 Minimum, Maximum and Mixed Phase Systems..... 4-14

Chapter 5 : FIR Filter Design 5-1 to 5-40

5.1 Introduction.....5-1

5.1.1 Characteristics of FIR Filters..... 5-1

5.1.2 Linear Phase 5-2

5.2 Designing of FIR Filters.....5-2

5.2.1 Designing FIR Filters using Windows..... 5-3

5.3 Windowing Techniques..... 5-3

5.3.1 Rectangular Window..... 5-3

5.3.1(A) Gibbs Phenomena5-12

5.3.2 Hamming, Hanning, Blackman and Bartlett Window.....5-15

5.3.3 Bartlett Window (Triangular Window).....5-16

5.4 Designing FIR Filters using Frequency Sampling Method 5-18

5.5 Solved Examples on FIR Filter Design..... 5-20

5.6 Solved Examples 5-37

Chapter 6 : IIR Filter Design 6-1 to 6-49

6.1 Introduction 6-1

6.2 Stability of IIR filter 6-1

6.2.1 Approach of IIR Filter Design 6-2

6.3 Impulse Invariance Method..... 6-2

6.3.1 Solved Examples on Impulse Invariance Method 6-4

6.4 Impulse Invariance Mapping of s-plane to z-plane 6-9

6.4.1 Disadvantage of Impulse Invariant Method6-10

6.5 Bilinear Transformation Method 6-11

6.5.1 Frequency Warping.....6-12

6.5.2 Comparison between Impulse Invariance and Bilinear Transformation Method.....6-13

6.5.3 Solved Examples on Bilinear Transformation Method.....6-13

6.6 Design of Analog Butterworth Filter 6-17

6.6.1 Steps Involved in Designing Butterworth Lowpass Filter..... 6-19

6.6.2 Solved Examples on Butterworth Filter..... 6-19

6.7 Design of Analog Chebyshev Filter 6-32

6.7.1 Solved Examples on Chebyshev Filter 6-35

6.7.2 Elliptic Filter 6-39

6.7.3 Comparison between Butterworth Filter, Chebyshev Filter and Elliptic Filter 6-40

6.8 Frequency Transformation 6-40

6.8.1 Frequency Transformation in the Analog Domain 6-40

6.9 Solved Examples..... 6-44

Chapter 7 : Filter Structures 7-1 to 7-29

7.1 Introduction of Filter Structure.....7-1

7.1.1 Advantages of Filter Structure 7-1

7.1.2 Block Diagram Representation..... 7-1

7.2 Structure for IIR Filter7-2

7.2.1 Direct Form I Structure 7-2

7.2.2 Direct Form II Structure..... 7-6

7.2.3 Cascade Form Structures..... 7-10

7.2.4 Parallel Form Structure..... 7-12

7.3 Solved Examples on IIR Filter Structures 7-13

7.4 FIR Filter Structure Realization..... 7-23

7.4.1 Direct Form Structure 7-24

7.4.2 Cascade Form Structure 7-24

7.5 Structure for Linear Phase FIR Filters..... 7-25

7.5.1 Solved Examples of FIR Filter Structure Realization.....7-26

7.6 Finite Word Length Effect in Digital Filter 7-28

Chapter 8 : Finite Word Length Effects in Digital Filters 8-1 to 8-26

8.1 Introduction 8-1

8.2 Conversion from Decimal to Binary and Binary to Decimal 8-1

8.3 Number Representation in a Digital System 8-3

8.3.1 Fixed Point Representation..... 8-3

8.3.1(A) Sign Magnitude Form 8-3

8.3.1(B) One’s Complement Form 8-4

8.3.1(C) Two’s Complement Form 8-5

8.3.2 Floating Point Numbers 8-5

8.3.3 Block Floating Point Numbers..... 8-6

8.4 Truncation and Rounding in Quantization..... 8-6

8.4.1 Truncation..... 8-6

8.4.2 Rounding..... 8-7

8.5 Truncation and Rounding Errors 8-8

8.6 Quantization Noise..... 8-9

8.6.1 Input Quantization Error8-10

8.6.1(A) Steady State Input Noise Power8-10

8.6.1(B) Steady State Output Noise Power.....8-11

8.6.2 Product Quantization Error8-11

8.6.3 Coefficient Quantization Error 8-12

8.7 Zero Input Limit Cycle Oscillations 8-14

8.8 Dead Band..... 8-16

8.8.1 Overflow Limit Cycle Oscillation 8-17

8.8.2 Clipping 8-18

8.8.3 Disadvantage of Clipping 8-18

8.9 Scaling 8-18

8.10 Finite Word Length Effects in FIR Digital Filter 8-20

8.11 Quantization in Floating Point Realization of IIR Filters..... 8-21

8.12 Solved Examples..... 8-22

Chapter 9 : Multirate Signal Processing 9-1 to 9-17

9.1 Introduction..... 9-1

9.2 Down-sampling..... 9-1

9.3 Up-sampling..... 9-3

9.4 Spectrum of Down Sampled Signal..... 9-4

9.5 Aliasing 9-8

9.6 Spectrum of Up-sampled Signal..... 9-8

9.7 Anti-Imaging Filter 9-9

9.8 Cascading Sample Rate Convertors 9-10

9.9 Identities..... 9-12

9.10 Polyphase Decimation using z-transforms 9-13

9.11 Poly-phase Interpolation using z-transform 9-14

9.12 Multistage Implementation of Sampling Rate Conversion 9-15

9.13 Solved Examples 9-15

Chapter 10 : DSP Processors and Applications 10-1 to 10-18

10.1 Introduction to General Purpose and Special Purpose DSP Processors 10-1

10.2 Comparison of General Purpose Microprocessor with DSP Processors 10-1

10.3 Computer Architecture for Signal Processing & Harvard Architecture 10-2

10.3.1 Von Neumann Architecture..... 10-2

10.3.1(A) Input Unit 10-3

10.3.1(B) Output Unit 10-3

10.3.1(C) Arithmetic and Logic Unit (ALU)..... 10-3

10.3.1(D) Control Unit..... 10-3

10.3.1(E) Memory Unit 10-3

10.3.1(F) Key Features of a Von Neumann Machine 10-3

10.3.1(G) Detailed Structure of the CPU 10-3

10.3.2 Harvard Architecture 10-4

10.4 Pipelining 10-6

10.5 Replication and Extended Parallelism..... 10-6

10.6 General Purpose Digital Signal Processors 10-7

10.6.1 Multiply and Accumulate (MAC) 10-8

10.6.2 Arithmetic and Logic Unit (ALU)..... 10-8

10.6.3 Program Address Generator 10-8

10.6.4 Data Address Generator (DAG)..... 10-8

<p>10.6.5 Program Sequencers..... 10-8</p> <p>10.6.6 Memory..... 10-8</p> <p>10.6.7 Input/Output Controller 10-8</p> <p>10.6.8 Fixed Point Representation 10-9</p> <p>10.7 A General Purpose of DSP Processor TMS 320 C54 XX..... 10-9</p> <p>10.7.1 Floating Point Representation10-12</p> <p>10.8 Selecting Digital Signal Processors..... 10-13</p> <p>10.9 On-Chip Memory 10-14</p>	<p>10.10 Fixed Point and Floating Point DSP Processor and Special Instructions.....10-15</p> <p>10.10.1 Fixed Point Instructions.....10-15</p> <p>10.11 Applications of DSP : Radar Signal Processing and Speech Processing.....10-15</p> <p>10.12 Speech Coding and Compression10-16</p> <p>10.13 Applications of DSP for ECG Signal10-16</p> <p>10.13.1 Types of Noises which Affects ECG Signal10-17</p> <p>10.13.2 De-noising of ECG Signals.....10-17</p>
