

**Unit I****Introduction to Database Management Systems :**

Purpose of Database Systems, Database-System Applications, Data Abstraction and Database System Structure.

Relational Model : Structure of relational databases, Domains, Relations, Relational algebra – fundamental operators and syntax, relational algebra queries, tuple relational calculus.

Entity-Relationship model : Basic Concepts, Entity Set, Relationship Sets and Weak Entity Sets, Mapping Cardinalities, Keys, E-R diagrams, Design Issues, Extended E-R Features, Converting E-R & EER diagram into tables..

Chapter 1 : Introduction to Database Management

System	1-1 to 1- 21
1.1 Introduction to DBMS	1-1
1.1.1 Process of Database Management.....	1-2
1.1.2 History of Database System.....	1-2
1.2 Database System Application	1-2
1.2.1 Characteristics of DBMS.....	1-3
1.2.2 File System Vs Database System.....	1-4
1.3 View of Data	1-5
1.3.1 Three Level Architecture for Database.....	1-5
1.3.1(A) Introduction.....	1-5
1.3.1(B) Database architecture	1-5
1.3.1(C) Data Abstraction.....	1-6
1.3.1(D) Data Independence.....	1-7
1.3.1(E) Difference Between Logical and Physical data Independence.....	1-8
1.4 Database System Architecture/ Structure	1-8
1.4.1 Query Processor Components.....	1-9
1.4.2 Storage Manager / Storage Management.....	1-10

1.4.3 Transaction Management.....	1-10
1.5 People / Database Users	1-10
1.5.1 Database Administrator (DBA).....	1-11
1.6 Database Model	1-12
1.6.1 Benefits of Data Modeling.....	1-12
1.6.2 Basic Building Block of Data Model.....	1-13
1.7 Data Models	1-14
1.7.1 Hierarchical Model.....	1-14
1.7.2 Network Database Model	1-15
1.7.3 Relational Model.....	1-16
1.7.4 Entity Relationship Model.....	1-18
1.7.5 Object Model.....	1-19
1.8 Comparison of All Data Models	1-19
1.9 Database Languages	1-20
1.9.1 Data Definition Language (DDL).....	1-20
1.9.2 Data Manipulation Language (DML).....	1-20
1.9.3 Data Control Language (DCL)	1-20

Chapter 2 : Relational Model & Algebra 2-1 to 2-14

2.1 Relational Data Model	2-1
2.1.1 Relation / Relational Table	2-1
2.1.2 Attributes / Fields.....	2-2
2.1.3 Tuple / Records.....	2-2
2.1.4 Domain.....	2-2
2.2 Relational Algebra	2-2
2.2.1 Basic Relational Algebra Operations	2-2
2.3 Selection Operation (σ)	2-2
2.4 Projection Operation (π)	2-3
2.5 SET Operation	2-3

<p>2.5.1 Union Operator2-3</p> <p>2.5.2 Intersect Operator2-4</p> <p>2.5.3 Difference Operator2-5</p> <p>2.6 Cross Product / Cartesian product..... 2-5</p> <p>2.7 Join Operation (\cup)..... 2-6</p> <p>2.8 Relational Division Operator..... 2-7</p> <p>2.9 Operator Precedence..... 2-7</p> <p>2.10 Examples of queries in relational algebraic using symbols..... 2-8</p> <p>2.11 Tuple Relational Calculus 2-9</p> <p>2.11.1 Selection and Projection Operators2-9</p> <p>2.11.2 SET Operations.....2-10</p> <p>2.11.3 CROSS Product Operations (Cartesian-Product Operation)2-12</p> <p>2.11.4 JOIN Operations2-12</p> <p>2.11.5 Division Operator.....2-13</p> <hr/> <p>Chapter 3 : Entity Relationship Model 3-1 to 3-26</p> <hr/> <p>3.1 ER Model..... 3-1</p> <p>3.1.1 ER Diagrams3-1</p> <p>3.1.2 Entities3-2</p> <p>3.1.3 Attributes.....3-2</p> <p>3.2 Relationship Set 3-4</p> <p>3.2.1 Constraints on Relationship3-4</p> <p>3.3 Design Process..... 3-6</p> <p>3.4 ER Design Issues..... 3-7</p> <p>3.5 Enhanced Entity Relationship (EER) 3-7</p> <p>3.6 Sub Class - Super Class and Inheritance 3-7</p> <p>3.7 Specialization 3-8</p> <p>3.8 Generalization 3-9</p>	<p>3.9 Aggregation.....3-10</p> <p>3.10 Union and Category Relation3-10</p> <p>3.11 Converting ER & EER Diagram into Tables.....3-11</p> <p>3.11.1 Entity to Tables3-11</p> <p>3.11.2 Attributes to Columns of Table3-11</p> <p>3.11.3 Relationships to Tables.....3-12</p> <p>3.11.4 Inheritance (Specialisation and Generalisation) to Tables3-13</p> <p>3.11.5 Union or Category to Tables.....3-14</p> <p>3.12 Solved Examples for EER and ER Model3-15</p> <p>3.13 Key Concept3-25</p> <p>3.13.1 Types of Keys3-25</p> <div style="text-align: center; background-color: black; color: white; padding: 5px; margin: 10px 0;">Unit II</div> <div style="border: 1px solid black; padding: 10px; background-color: #f0f0f0;"> <p>Basic concepts, CODD's Rules,</p> <p>Relational Integrity : Domain, Referential Integrities, Enterprise Constraints.</p> <p>Database Design : Features of Good Relational Designs, Normalization, Atomic Domains and First Normal Form, Decomposition using Functional Dependencies, Algorithms for Decomposition, 2NF, 3NF, 4NF and BCNF..</p> </div> <hr/> <p>Chapter 4 : Relational Integrity 4-1 to 4-6</p> <hr/> <p>4.1 E. F. Codd's Rule for RDBMS..... 4-1</p> <p>4.1.1 Overview of Codd's Rule4-1</p> <p>4.1.2 Codd's Rule in Details4-2</p> <p>4.2 Relational Integrity 4-4</p> <p>4.2.1 Types of Relational Integrity.....4-4</p> <p>4.3 Enterprise Constraints..... 4-5</p> <p>4.3.1 Unique Constraint4-6</p> <p>4.3.2 Primary Key Constraint.....4-6</p>
---	--

**Chapter 5 Database Design 5-1 to 5-23**

5.1	Functional Dependencies.....	5-1
5.1.1	Solved Examples on Functional Dependencies.....	5-2
5.1.2	Types of Functional Dependencies.....	5-3
5.2	FD Properties (Armstrong's Axioms/ Closures of FD).....	5-5
5.3	Decomposition Using FD	5-6
5.3.1	Goals.....	5-6
5.3.2	Algorithm of Decomposition	5-7
5.3.2(A)	Lossless-join Decomposition	5-7
5.3.2(B)	Dependency Preservation	5-8
5.3.2(C)	Repetition of information.....	5-8
5.4	Normalization	5-9
5.4.1	Features of Good Database Design	5-9
5.4.1(A)	Purpose of Normalisation to Remove Pitfalls in Database Design.....	5-10
5.5	Keys and Attributes in Keys	5-12
5.6	First Normal Form (1NF).....	5-13
5.7	Second Normal Form (2NF).....	5-14
5.8	Third Normal Form (3NF).....	5-16
5.9	Fourth Normal Form (4NF).....	5-17
5.10	Boyce Codd Normal Form (BCNF).....	5-18
5.11	Modeling Temporal Data.....	5-20

Unit III

DDL, DML, DCL, Structure : Creation, Alteration, Defining constraints – Primary key, Foreign key, Unique key, Not null, Check, IN operator.

Functions : Aggregate Functions, Built-in Functions – Numeric, Date, String Functions. Set operations, sub-queries, correlated subqueries, Use of group by, having, order by, join and its types, Exist, Any, All, view and its types.

Transaction control commands : Commit, Rollback, Save-point PL/SQL Concepts: Cursors, Stored Procedures, Stored Function, Database Triggers.

Chapter 6 : Structured Query Language**6-1 to 6-19**

6.1	Overview of SQL.....	6-1
6.1.1	Role of SQL	6-1
6.1.2	SQL Data types.....	6-1
6.2	Data Definition Language (DDL).....	6-3
6.2.1	Create Table - CREATE Command	6-3
6.2.2	Alter Table - ALTER Command	6-4
6.2.3	Drop Table - DROP Command	6-4
6.2.4	Rename Table	6-4
6.2.5	Truncate Table	6-4
6.2.6	Viewing Structure of Table - DESC Command	6-4
6.3	Creation, Alteration, Defining constraints.....	6-5
6.3.1	Types of Data Integrity Constraints	6-5
6.3.1(A)	Domain Relational Constraint – Business Rule Constraint	6-5
6.3.1(B)	Entity Relational Constraints	6-6
6.3.1(C)	Unique Key Constraints.....	6-6
6.3.2	Primary Key Constraint.....	6-7
6.3.3	Referential Integrity - Foreign Key	6-7
6.4	Data Manipulation Language (DML).....	6-7
6.4.1	INSERT Command.....	6-8
6.4.2	DELETE Command.....	6-8
6.4.3	UPDATE Command.....	6-8
6.5	Data Control Language (DCL).....	6-9
6.5.1	Grant Command	6-9
6.5.2	Revoking Command	6-9

6.6	Display Data using SELECT Statement (Data Query Language)6-10	7.5	Aggregate Functions 7-5
6.6.1	SELECT Clause - Select all Columns 6-10	7.5.1	Types of Aggregate Functions7-5
6.6.2	SELECT Clause - Select Specific Columns 6-10	7.5.2	Summary of Aggregate Functions.....7-7
6.6.3	SELECT Clause - Select Unique Records..... 6-11	<hr/>	
6.7	Ordering Query Results - ORDER BY Clause ...6-11	Chapter 8 : Advanced SQL 8-1 to 8-18	
6.8	SQL Operators6-12	8.1	GROUP BY Clause - Grouping Query Results 8-1
6.8.1	Filtering Query Results - WHERE Clause..... 6-12	8.2	HAVING Clause – Filtering grouped Query Results 8-2
6.8.2	Arithmetic Operators6-13	8.2.1	Apply Conditions with GROUP BY.....8-2
6.8.3	Comparison Operators..... 6-13	8.3	GROUP BY and Aggregate Function..... 8-3
6.8.4	Logical Operators (AND, OR, NOT)..... 6-14	8.4	SQL Joins and its Types 8-4
6.8.5	IN Operator 6-14	8.4.1	Cartesian product / Cross join.....8-4
6.8.6	BETWEEN Operator 6-14	8.4.2	Inner join.....8-4
6.9	Range Searching Operators - Between6-14	8.4.3	Outer join8-6
6.10	Pattern Matching Operation - Like.....6-15	8.5	Sub Queries 8-8
6.11	Limit Clause – Restricting Rows in Result6-17	8.5.1	Independent Subquery8-9
6.12	SET Operations6-17	8.5.2	Multiple Row Subquery8-10
6.12.1	Union Operation 6-17	8.6	Correlated Sub Queries8-12
6.12.2	Intersect Operation 6-18	8.7	Solved Examples.....8-14
6.12.3	Except Operation 6-18	<hr/>	
6.12.4	Nesting SET Operations..... 6-18	Chapter 9 : Views 9-1 to 9-4	
<hr/>		9.1	Introduction of Views 9-1
Chapter 7 : Function 7-1 to 7-8		9.2	Creating a Views 9-2
7.1	Inbuilt Functions in MySQL 7-1	9.3	Dropping Views 9-3
7.2	String Functions 7-1	9.4	Modifying a Views 9-3
7.2.1	Case Manipulation Functions.....7-1	9.5	Renaming Views 9-3
7.2.2	Character Manipulation Functions7-2	9.5.1	Advantages of Views9-3
7.3	Arithmetic Functions 7-3	9.5.2	Disadvantages of Views9-4
7.4	Date Time Functions 7-4		

**Chapter 10 : Cursor and Stored Procedure 10-1 to 10-18**

10.1	Transaction Control Language (TCL) - COMMIT, ROLLBACK, SAVEPOINT	10-1
10.1.1	Commit Transaction	10-1
10.1.2	Rollback Transaction.....	10-2
10.1.3	Savepoint Transaction	10-2
10.2	Stored Procedure.....	10-3
10.2.1	Creating Stored Procedure.....	10-3
10.2.2	Executing Stored Procedure.....	10-4
10.2.3	Parameter Types in Stored Procedure	10-4
10.2.4	Parameter Modes in Stored Procedure	10-4
10.2.5	Altering Stored Procedure	10-5
10.2.6	Dropping Stored Procedure.....	10-6
10.3	Stored Function	10-6
10.3.1	Create Function.....	10-6
10.3.2	Calling Function	10-7
10.3.3	Deleting a Function.....	10-7
10.3.4	Advantages of Stored Functions	10-7
10.4	Concept of Cursor.....	10-8
10.4.1	Implicit Cursor.....	10-8
10.4.2	Explicit Cursor	10-9
10.5	Trigger.....	10-11
10.5.1	Components of Trigger (E-C-A model) – How to Apply Trigger ?	10-11
10.5.2	Trigger Syntax	10-12
10.5.3	Trigger Types	10-12
10.5.4	Trigger Example	10-13

10.5.5	Trigger Operations	10-14
10.5.6	Trigger Advantages \ Uses of Trigger	10-14
10.5.7	Trigger Disadvantages	10-14
10.5.8	Solution for Mutating Table Error	10-14
10.6	Assertions.....	10-15

Unit IV

Basic concepts of a Transaction, Transaction Management, Properties of Transactions, Concept of Schedule, Serial Schedule, Serializability : Conflict and View, Cascaded Aborts, Recoverable and Non-recoverable Schedules, **Concurrency Control** : Need, Locking Methods, Deadlock handling and Time-stamp based Protocols.

Chapter 11 : Database Transaction 11-1 to 11-14

11.1	Transaction.....	11-1
11.1.1	Concept of Transaction	11-1
11.1.2	Transaction Management Architecture.....	11-2
11.1.3	Working of Transaction Processing - Transaction State Diagram.....	11-3
11.1.3(A)	Transaction States	11-4
11.1.4	Fundamental Properties of Transaction/ ACID Properties	11-4
11.1.5	Concept of Schedules (Transactions Schedules) ..	11-6
11.2	Serial Schedule.....	11-6
11.2.1	Concurrent Schedule.....	11-7
11.3	Serializability/Serializable Schedule.....	11-9
11.3.1	Conflict Serializability	11-10
11.3.2	View Serializability.....	11-11
11.4	Precedence Graph.....	11-11
11.5	Recoverable and Non-Recoverable Schedules	11-13

11.5.1	Recoverable Schedules	11-13
11.5.2	Cascade Less Schedules /Cascaded Aborts / Cascaded Rollbacks	11-13

Chapter 12 : Concurrency Control **12-1 to 12-14**

12.1	Need of Concurrency Control.....	12-1
12.1.1	Concurrency Control Schemes	12-2
12.2	Lock Based Protocols\Locking Methods.....	12-3
12.2.1	Types of Locks	12-3
12.2.2	Locking Levels	12-4
12.2.3	Working of Locking Protocol / Locking Scheduler / Locking Manager	12-4
12.2.4	Granting Locks.....	12-5
12.2.5	Rejecting Locks.....	12-6
12.3	Two-Phase Locking (2PL) Protocol.....	12-6
12.3.1	Modified Versions of Two-phase Locking Protocol	12-7
12.4	Concept of Deadlock	12-7
12.4.1	Approaches for Deadlock Prevention	12-8
12.4.2	Deadlock Detection and Recovery	12-9
12.5	Timestamp Based Protocols\Time Stamping Methods.....	12-10
12.5.1	Concept of Timestamp	12-10
12.5.2	Timestamp - ordering Protocol.....	12-11
12.5.3	Advantages.....	12-12
12.5.4	Disadvantages.....	12-12
12.6	Thomas' Write Rule	12-12

12.7	Optimistic Methods - Validation Based Protocol.....	12-13
-------------	--	--------------

Unit V

Introduction to Database Architectures : Multi-user DBMS Architectures, Case study- Oracle Architecture.
Parallel Databases : Performance Parameters for Parallel Databases, Types of Parallel Database Architecture, Evaluating Parallel Query in Parallel Databases and Virtualization on Multicore processors.

Chapter 13 : Database Architecture **13-1 to 13-12**

13.1	Client Server Architecture / Multiuser DBMS Architectures.....	13-1
13.1.1	Client-Server Architecture Types.....	13-1
13.1.1(A)	Single Tier Architecture / Centralized Database Architecture.....	13-1
13.1.1(B)	Two Tier Architecture.....	13-1
13.1.1(C)	Three Tier Architecture.....	13-2
13.1.1(D)	N Tier Architecture.....	13-3
13.1.1(E)	Goals of Client-Server Architecture.....	13-3
13.1.2	Case study - Oracle Architecture	13-4
13.2	Parallel Databases System.....	13-5
13.2.1	Goals of Parallel Databases	13-6
13.3	System Parameters / Measures of Performance	13-6
13.3.1	Throughput-Output Efficiency	13-6
13.3.2	Response Time	13-6
13.3.3	Speed Up.....	13-7
13.3.4	Scale Up.....	13-7
13.4	Architecture of Parallel Databases	13-7
13.4.1	Types of Parallel Databases	13-7

13.4.1(A) Shared Memory System.....	13-8
13.4.1(B) Shared Disk System.....	13-8
13.4.1(C) Shared Nothing Disk System	13-9
13.4.1(D) Hierarchical System	13-9
13.5 Parallel Query Evaluation	13-9
13.5.1 Types of Parallel Query Evaluation	13-9
13.5.1(A) Pipeline Parallelism.....	13-10
13.5.1(B) Inter Query Parallelism	13-10
13.5.1(C) Intra Query Parallelism	13-11
13.6 Virtualization in Multicore Processors	13-11

Unit VI

Distributed Databases : Distributed Database Management System, Factors Encouraging DDBMS, Advantages of Distributed Databases, Types of Distributed Databases, Architecture of Distributed Databases, Distributed Database Design, Distributed Data Storage, and Distributed Transaction: Basics, Failure modes, Commit Protocols, Concurrency Control in Distributed Database.

Chapter 14 : Distributed Databases 14-1 to 14-20

14.1 Introduction to Distributed Databases.....	14-1
14.1.1 Distributed Databases System Concepts	14-1
14.1.2 Factors Encouraging DDBMS	14-2
14.1.3 Advantages of Distributed Database System	14-2
14.1.4 Distributed Database System Design Issues	14-4
14.2 Types of Distributed Databases	14-4
14.2.1 Homogeneous Distributed Database System.....	14-4
14.2.2 Heterogeneous Distributed Database System.....	14-5
14.3 Architecture of Distributed Databases	14-6

14.4 Data Fragmentation / Distributed Database Storage.....	14-9
14.4.1 Introduction.....	14-9
14.4.2 Fragmentation Schema	14-10
14.4.3 Types of Data Fragmentation.....	14-10
14.4.3(A) Horizontal Fragmentation.....	14-10
14.4.3(B) Vertical Fragmentation.....	14-12
14.4.3(C) Mixed (Hybrid) Fragmentation.....	14-12
14.5 Failure Modes in Distributed Databases.....	14-14
14.6 Solutions to Concurrency Problems in Distributed Databases	14-14
14.6.1 Maintaining a Distinguished Copy of a Data Item	14-14
14.6.1(A) Primary Site Method.....	14-14
14.6.1(B) Primary Site With Backup Site	14-15
14.6.1(C) Primary Copy Method	14-15
14.6.2 Voting Method	14-15
14.7 Commit Protocol	14-16
14.7.1 Two Phase Commit Protocol.....	14-16
14.7.2 Three Phase Commit Protocol.....	14-17
14.8 Concurrency Control in Distributed Databases	14-19
14.8.1 Distributed Two Phase Locking.....	14-19
14.8.2 Distributed Timestamp - Ordering Protocol	14-20
14.9 Distributed Database Transaction Processing - Basics	14-20
