

**Chapter 1 : Introduction to Image Processing****1-1 to 1-11**

1.1	Introduction .....	1-1
1.2	What Do We Mean by Image Processing ? .....	1-1
1.3	Images .....	1-2
1.4	The Electromagnetic Spectrum .....	1-3
1.5	Units of Intensity.....	1-4
1.6	The Inverse Square Law.....	1-4
1.7	The Human Visual System .....	1-5
1.7.1	Image Formation in Eye .....	1-6
1.7.2	Visual Phenomena .....	1-6
1.7.3	Dynamic Range and Contrast.....	1-9
1.7.4	Radiance and Luminance.....	1-9
1.7.5	Applications of Image Processing.....	1-9
1.8	Object Recognition .....	1-10
1.9	Image Processing, Computer Graphics and Computer Vision.....	1-10
•	Chapter Ends .....	1-11

**Chapter 2 : Image Sensing and Acquisition 2-1 to 2-11**

2.1	Introduction .....	2-1
2.2	Image Types .....	2-6
2.3	Image File Formats .....	2-9
•	Chapter Ends .....	2-11

**Chapter 3 : Sampling and Quantization 3-1 to 3-12**

3.1	Introduction .....	3-1
3.2	Sampling .....	3-1
3.3	Quantization (Dec. 15, May 17, Dec. 17).....	3-7
3.4	Isopreference Curves .....	3-9
3.5	Non-uniform Sampling.....	3-10
3.6	Physical Resolution .....	3-10
3.7	University Questions.....	3-12
•	Chapter Ends .....	3-12

**Chapter 4 : Image Enhancement in Spatial Domain****4-1 to 4-46**

4.1	Introduction .....	4-1
4.2	Spatial Domain Methods .....	4-1
4.3	Point Processing (Dec. 15).....	4-2
4.3.1	Digital Negative .....	4-2
4.3.2	Contrast Stretching.....	4-3
4.3.3	Thresholding.....	4-4
4.3.4	Grey Level Slicing (Intensity Slicing).....	4-5
4.3.5	Bit Plane Slicing (May 16) .....	4-7
4.3.5(A)	Applications of Bit Plane Slicing (Dec. 17).....	4-10
4.3.6	Dynamic Range Compression (Log Transformation) (Dec. 16) .....	4-10
4.3.7	Power Law Transformation.....	4-11

4.3.8	Spatial and Intensity Resolution .....	4-11
4.4	Solved Examples on Point Processing .....	4-12
4.4(A)	Image Subtraction .....	4-18
4.5	Neighbourhood Processing .....	4-18
4.5.1	Low Pass Filtering (Smoothing).....	4-20
4.5.2	Noise.....	4-20
4.5.3	Low Pass Averaging Filter(Smoothing).....	4-21
4.5.4	Low Pass Median Filtering.....	4-25
4.6	Highpass Filtering.....	4-27
4.7	High-Boost Filtering.....	4-29
4.7.1	Advantages of High Boost Filtering (Dec. 17).....	4-31
4.8	Zooming .....	4-31
4.8.1	Replication .....	4-31
4.8.2	Linear Interpolation.....	4-33
4.9	Geometric Transformation.....	4-34
4.9.1	Euclidean Transformations.....	4-34
4.9.2	Affine Transformation .....	4-35
4.9.2(A)	Scaling .....	4-35
4.9.2(B)	Shear .....	4-36
4.10	Solved Examples on Neighbourhood Processing .....	4-36
4.11	Difference between Point Processing and Mask Processing .....	4-44
4.12	University Questions .....	4-46
•	Chapter Ends .....	4-46

**Chapter 5 : Histogram Modelling****5-1 to 5-28**

5.1	Introduction (May 18) .....	5-1
5.1.1	Mean and Standard Deviation of Histogram .....	5-3
5.2	Linear Stretching .....	5-3
5.3	Histogram Equalization.....	5-6
5.4	Histogram Specification.....	5-14
5.5	Additional Examples on Histogram Modelling.....	5-16
5.6	Difference between Histogram Equalization and Contrast Stretching.....	5-26
5.7	University Questions .....	5-27
•	Chapter Ends .....	5-28

**Chapter 6 : Image Enhancement in Frequency Domain****6-1 to 6-42**

6.1	Introduction .....	6-1
6.2	The Fourier Transform.....	6-1
6.3	1-Dimensional Fourier Transform .....	6-2
6.4	2-Dimensional Fourier Transform .....	6-4
6.4.1	Properties of Discrete Fourier Transform (May 18).....	6-7
6.4.1(1)	The Separability Property .....	6-7
6.4.1(2)	Translation Property (Shifting Property) (Dec. 17) .....	6-10
6.4.1(3)	Periodicity and Conjugate Symmetry Property .....	6-11
6.4.1(4)	Rotation Property .....	6-13
6.4.1(5)	Distributive and Scaling Property.....	6-13

6.4.1(6)	Average Value Property.....	6-14
6.4.1(7)	Laplacian Property (Second Derivative).....	6-14
6.4.1(8)	Convolution Property ( <b>May 18</b> ).....	6-14
6.4.2	Image Enhancement in Frequency Domain ( <b>Dec. 15, May 16, Dec. 16, May 17, Dec. 17</b> ).....	6-15
6.5	Low Pass Frequency Domain Filters ( <b>Dec. 16</b> ).....	6-16
6.5.1	Ideal Low Pass Filter (ILPF).....	6-17
6.5.2	Butterworth Low Pass Filters (BLPF).....	6-20
6.5.3	Gaussian Low Pass Filter (GLPF).....	6-22
6.6	High Pass Frequency Domain Filters ( <b>Dec. 16</b> ).....	6-23
6.6.1	Ideal High Pass Filter (IHPF).....	6-23
6.6.2	Butterworth High Pass Filter (BHPF).....	6-24
6.6.3	Gaussian High Pass Filter (GHPF).....	6-25
6.6.4	High Boost Filtering (Unsharp Masking / High Frequency Emphasis).....	6-26
6.7	Homomorphic Filtering ( <b>May 18</b> ).....	6-27
6.8	Periodic Noise (Sinusoidal Noise).....	6-30
6.9	Relationship between Filtering in the Spatial and Frequency Domain.....	6-32
6.9.1	Generating $h(x, y)$ from $H(u, v)$ .....	6-33
6.9.2	Generating $H(u, v)$ from $h(x, y)$ .....	6-34
6.10	University Questions.....	6-41
	• Chapter Ends.....	6-42

### Chapter 7 : Image Segmentation 7-1 to 7-68

7.1	Introduction.....	7-1
7.2	Image Segmentation based on Discontinuities.....	7-2
7.2.1	Point Detection.....	7-2
7.2.2	Line Detection.....	7-2
7.2.3	Edge Detection ( <b>Dec. 16</b> ).....	7-3
7.3	Detection of Edges.....	7-5
7.3.1	Computing the Gradient.....	7-6
7.4	Finding Gradients using Masks.....	7-7
7.4.1	Roberts Mask ( <b>May 16</b> ).....	7-8
7.4.2	Prewitts and Sobel Operators ( <b>May 16</b> ).....	7-10
7.4.3	Compass Operators ( <b>May 16</b> ).....	7-13
7.4.3(1)	Applications/Advantages of Compass Operator ( <b>Dec. 17</b> ).....	7-15
7.5	Image Segmentation using the Second Derivative - The Laplacian ( <b>May 16</b> ).....	7-15
7.5.1	Laplacian of Gaussian Operator.....	7-16
7.5.2	Canny Edge Detector.....	7-19
7.5.3	Difference of Gaussian (DoG).....	7-19
7.6	Edge Linking.....	7-20
7.6.1	Local Processing.....	7-20
7.6.2	Hough Transform ( <b>Dec. 15</b> ).....	7-20
7.6.2(1)	Applications/Advantages of Hough Transform ( <b>Dec. 17</b> ).....	7-33
7.7	Global Processing via Graph - Theoretic Techniques.....	7-33
7.8	Connectivity ( <b>May 16, May 17</b> ).....	7-37

7.9	Distance Transform.....	7-39
7.10	Region based Segmentation (Segmentation based on Similarities) ( <b>Dec. 15</b> ).....	7-41
7.10.1	Region Growing.....	7-42
7.10.2	Region Splitting.....	7-46
7.10.3	Region Merging.....	7-47
7.10.4	Split and Merge ( <b>May 18</b> ).....	7-48
7.11	Image Segmentation based on Thresholding.....	7-50
7.11.1	Global Thresholding.....	7-51
7.11.2	Local (Adaptive) Thresholding.....	7-53
7.11.3	Optimum Thresholding.....	7-56
7.12	Additional Solved Examples.....	7-57
7.13	University Questions.....	7-67
	• Chapter Ends.....	7-68

### Chapter 8 : Image Transforms 8-1 to 8-11

8.1	Introduction.....	8-1
8.2	Linear Transformations.....	8-1
8.2.1	One Dimensional Discrete Linear Transformations.....	8-1
8.2.2	Unitary and Orthogonal Matrices ( <b>MU - Dec. 16</b> ).....	8-1
8.2.3	Two Dimensional Discrete Linear Transformations.....	8-2
8.3	Non-sinusoidal Transforms.....	8-3
8.3.1	The Haar Transform.....	8-4
	• Chapter Ends.....	8-11

### Chapter 9 : Image Morphology 9-1 to 9-31

9.1	Introduction.....	9-1
9.2	Arithmetic and Logical Operation.....	9-1
9.2.1	Arithmetic Operations.....	9-1
9.2.2	Logical Operations.....	9-1
9.3	Basic Definitions.....	9-2
9.3.1	Dilation.....	9-3
9.3.2	Erosion.....	9-3
9.4	A Simple Practical Formula for Implementing Dilation and Erosion ( <b>MU - May 17</b> ).....	9-4
9.5	Structuring Elements.....	9-6
9.6	Opening and Closing Operations ( <b>MU - Dec. 15, Dec. 17, May 18</b> ).....	9-9
9.6.1	Opening.....	9-9
9.6.2	Closing.....	9-9
9.7	Basic Morphological Operations.....	9-14
9.7.1	Boundary Extraction.....	9-14
9.7.2	Region Filling.....	9-15
9.8	HIT - or - MISS Transformation ( <b>MU - Dec. 15, Dec. 16, May 18</b> ).....	9-18
9.9	Thinning and Thickening Transformation.....	9-22
9.9.1	Comparison of Dilation and Erosion ( <b>MU - Dec. 16</b> ).....	9-24

9.10	Solved Examples.....	9-24	11.2.3	Fourier Descriptors.....	11-5
9.11	University Questions.....	9-30	11.2.4	Signatures.....	11-6
	• Chapter Ends .....	9-31	11.2.5	Euler Number (Topological Descriptors).....	11-8
<b>Chapter 10 : Image Restoration</b>			<b>10-1 to 10-8</b>		
10.1	Introduction .....	10-1	11.2.6	Polygonal Approximations .....	11-8
10.2	Degradation Model (MU - May 16, Dec. 16, May 17).....	10-1	11.3	Moments .....	11-9
10.3	Degradation Functions .....	10-2	11.3.1	Computing $\mu$ in Terms of $m$ .....	11-10
10.3.1	Noise and Degradation.....	10-2	11.4	Texture.....	11-13
10.4	Discrete Degradation Model (MU - Dec. 16, May 17).....	10-2	11.4.1	Statistical Texture Analysis.....	11-14
10.5	Inverse Filtering (MU - May 18).....	10-3	11.4.2	Structural Texture Analysis.....	11-15
10.5.1	Pseudo-Inverse Filtering.....	10-3	11.4.3	Spectral Texture Analysis.....	11-15
10.6	Noise Models.....	10-3	11.5	Solved Examples.....	11-16
10.6.1	Additive White Noise Gaussian Noise (AWGN) Model.....	10-6		• Chapter Ends .....	11-20
10.7	Comparison of Image Enhancement and Image Restoration (MU - Dec. 17, May 18).....	10-7	<b>Chapter 12 : Machine Vision Algorithms</b>		
10.8	University Questions.....	10-8	<b>12-1 to 12-8</b>		
	• Chapter Ends .....	10-8	12.1	Object Recognition.....	12-1
<b>Chapter 11 : Introduction to Machine Vision</b>			12.1.1	Pattern and Pattern Classes.....	12-2
<b>11-1 to 11-20</b>			12.1.2	Classifiers .....	12-2
11.1	Introduction to Machine Vision.....	11-1	12.1.2(A)	Minimum Distance Classifier .....	12-2
11.2	Feature Extraction .....	11-1	12.1.2(B)	Template Matching Classifier (Correlation based Classifier) .....	12-3
11.2.1	Chain Codes.....	11-1	12.1.2(C)	Classifier Performance .....	12-4
11.2.2	First Difference, Shape Number and Order .....	11-3	12.1.2(D)	Bayes Classifier .....	12-5
			12.2	K Means Clustering .....	12-6
			12.3	Support Vector Machine (SVM).....	12-7
				• Chapter Ends .....	12-8
				• <b>Appendix A</b> .....	A-1- A-8
