

**UNIT 1****Chapter 1 : Transformer 1-1 to 1-23**

Syllabus : Modes of heat dissipation. Heating and cooling curves. Calculations of heating and cooling time constants. Types and constructional features of core and windings used in transformer. Transformer auxiliaries such as tap changer, pressure release valve, breather and conservator. Specifications of three phase transformers as per IS 2026(Part I).

1.1	Modes of Heat Generation	1-1
✓	Syllabus Topic : Modes of Heat Dissipation.....	1-2
1.2	Modes of Heat Dissipation (May 2015).....	1-2
1.3	Temperature Rise in Electrical Machines.....	1-4
✓	Syllabus Topic : Heating Curve and Heating Time Constant	1-4
1.3.1	Heating Curve (Dec. 2015)	1-4
1.3.1(A)	Heating Time Constant.....	1-5
✓	Syllabus Topic : Cooling Curve and Cooling Time Constant	1-6
1.3.2	Cooling Curve.....	1-6
1.3.2(A)	Cooling Time constant : $\theta = 0.367 \theta_0$	1-6
1.3.3	Maximum Temperature Rise and it's Estimation.....	1-6
1.4	Short Time Rating (May 2015, May 2016, Dec. 2016)	1-8
1.5	Continuous Rating (May 2015, May 2016, Dec. 2016)	1-8
1.5.1	Intermittent.....	1-9
1.5.2	Short Time Rating Parameters.....	1-9
✓	Syllabus Topic : Types of Transformers.....	1-9
1.6	Types of Transformers	1-9
1.6.1	Core Type Transformer	1-10
1.6.2	Shell Type Transformer.....	1-11
✓	Syllabus Topic : Constructional Features of Core.....	1-12
1.6.3	Core.....	1-12
1.6.3(A)	Core Cross Section	1-12
1.6.3(B)	Yoke Cross Section.....	1-13
1.6.4	Mitred Joints	1-13
✓	Syllabus Topic : Transformer Windings	1-14
1.6.5	Transformer Windings	1-14
1.6.6	Advantages of Star Connected Winding	1-17
✓	Syllabus Topic : Auxiliaries used in Transformer	1-17
1.7	Auxiliaries used in Transformer.....	1-17

1.7.1	Tap Changer and its Uses (May 2017).....	1-17
1.7.2	Types of Tapping	1-18
1.7.2(A)	Positions of Tappings	1-18
1.7.2(B)	Tap Changing	1-19
1.7.3	Pressure Release Valve (May 2017).....	1-20
1.7.4	Breather and Conservator (May 2017).....	1-20
✓	Syllabus Topic : Specifications of Transformer as per IS 2026 (Part I).....	1-21
1.8	Specifications of Transformer as per IS 2026 (Part I) (May 2017)	1-21
1.8.1	Rating.....	1-21
1.9	Exam Pack (University and Review Questions)	1-22

UNIT 2**Chapter 2 : Transformer Design 2-1 to 2-32**

Syllabus : Output equation with usual notations, Optimum design of transformer for minimum cost and loss. Design of main dimensions, core, yoke and windings of transformer. Methods of cooling and Tank design. Estimation of resistance and leakage reactance of transformer.

2.1	Design Procedure of Transformer	2-1
✓	Syllabus Topic : Output Equation with Usual Notations.....	2-2
2.1.1	Output Equation of Single Phase Transformer with Usual Notations (Dec. 2015)	2-2
2.1.2	Output Equation of Three Phase Transformer with Usual Notations (May 2015, May 2016).....	2-3
2.2	Window Space Factor.....	2-3
2.2.1	Factors Affecting Window Space Factor.....	2-3
2.2.2	Relation between emf per Turn (Et) and Transformer Rating (Q).....	2-4
✓	Syllabus Topic : Design of Core	2-4
2.3	Design of Core.....	2-4
2.3.1	Stacking Factor.....	2-4
2.3.2	Core Section	2-5
2.3.2(A)	Core Sections and Area.....	2-5
2.3.3	Flux Density and Current Density	2-7
2.3.3(A)	Selection of Flux Density	2-7
2.3.3(B)	Selection of Current Density	2-7
✓	Syllabus Topic : Window Dimensions.....	2-8
2.3.4	Window Dimensions	2-8
2.3.4(A)	Derivation for Width of Windows for Maximum Output	2-8

✓	Syllabus Topic : Design of Yoke 2-9	✓	Syllabus Topic : Estimation of No Load Current..... 3-1
2.4	Design of Yoke 2-9	3.1	Estimation of No Load Current (Dec. 2016) 3-1
✓	Syllabus Topic : Design of Main Dimensions 2-10	✓	Syllabus Topic : Estimation of Losses 3-4
2.4.1	Design of Main Dimensions..... 2-10	3.2	Estimation of Losses..... 3-4
✓	Syllabus Topic : Design of HV and LV Windings 2-16	3.2.1	Copper Losses (I^2R Losses) 3-4
2.5	Design of HV and LV Windings 2-16	3.2.2	Core Losses (Iron Losses)..... 3-5
2.5.1	LV Winding 2-16	✓	Syllabus Topic : Estimation of Efficiency and Regulation of Transformer 3-5
2.5.2	HV Winding..... 2-17	3.3	Estimation of Efficiency..... 3-5
✓	Syllabus Topic : Cooling and Cooling Methods of Transformer 2-18	3.3.1	Estimation of Voltage Regulation..... 3-6
2.6	Cooling of Transformer..... 2-18	✓	Syllabus Topic : Calculation of Mechanical Forces Developed Under Short Circuit Conditions 3-7
2.6.1	Different Methods of Cooling of Transformer 2-19	3.3.2	Calculation of Mechanical Forces Developed Under Short Circuit Conditions 3-7
2.6.2	Design of Cooling System 2-21	3.3.2(A)	Mechanical Forces (May 2015, May 2016, Dec. 2016)..... 3-7
2.6.2(A)	Temperature Rise of Transformers 2-21	✓	Syllabus Topic : Measures to Overcome the Effect of Mechanical Forces 3-13
✓	Syllabus Topic : Design of Tank with Tubes 2-22	3.4	Measures to Overcome the Effect of Mechanical Forces (May 2015, May 2016) 3-13
2.6.2(B)	Design of Tank with Tubes (Dec. 2015)..... 2-22	3.5	Optimum Design 3-13
✓	Syllabus Topic : Dimensions of Transformer Tank .. 2-22	3.5.1	Design for Minimum Cost 3-13
2.6.2(C)	Dimensions of Transformer Tank..... 2-22	3.5.2	Design for Minimum loss (i.e. Maximum Efficiency)..... 3-14
✓	Syllabus Topic : Estimation of Resistance of Transformer..... 2-25	3.5.3	Variation of Output and Losses in Transformer with Linear Dimensions..... 3-14
2.7	Estimation of Resistance of Transformer (May 2017) 2-25	3.5.4	Differentiate between Power Transformer and Distribution Transformer (Dec. 2015) 3-15
✓	Syllabus Topic : Estimation of Leakage Reactance of Transformer..... 2-26	✓	Syllabus Topic : Introduction to Computer Aided Design of Transformer..... 3-16
2.8	Estimation of Leakage Reactance of Transformer (Dec. 2015)..... 2-26	3.6	Introduction to Computer Aided Design of Transformer 3-16
✓	Syllabus Topic : Optimum Design of Transformer for Minimum Cost and Loss 2-30	✓	Syllabus Topic : Generalised Flow Charts for Design of Transformer 3-17
2.9	Optimum Design..... 2-30	3.6.1	Generalised Flow Charts for Design of Computer Aided Design..... 3-17
2.9.1	Design for Minimum Cost 2-30	3.6.2	Flow Charts for Design of Electrical Machines 3-18
2.9.2	Design for Minimum loss (i.e. Maximum Efficiency) 2-31	3.6.2(A)	Basic Steps of Design of Transformer (Dec. 2016).... 3-18
2.10	Exam Pack (University and Review Questions)..... 2-31	3.6.2(B)	Basic Steps of Design of 3 Phase Induction Motor 3-18
		3.7	Exam Pack (University and Review Questions) 3-19

UNIT 3

Chapter 3 : Performance Parameters of Transformer

3-1 to 3-20

Syllabus : Estimation of no-load current, losses, efficiency and regulation of transformer. Calculation of mechanical forces developed under short circuit conditions, measures to overcome this effect. Introduction to Computer aided design of transformer, generalized flow chart for design of transformer.

**UNIT 4****Chapter 4 : Three Phase Induction Motor
Design Part - I 4-1 to 4-27**

Syllabus : Specification and Constructional features, Design of ac windings. Output equation with usual notations, specific electrical and magnetic loadings, ranges of specific loadings, turns per phase, number of stator slots.

4.1	Introduction.....	4-1
✓	Syllabus Topic : Constructional Features.....	4-1
4.1.1	Constructional Features	4-1
4.1.2	Table of Parts and their Functions	4-3
4.1.3	Information in Brief	4-3
4.2	Prerequisite	4-4
✓	Syllabus Topic : Introduction to Winding and Developed Diagrams and Design.....	4-4
4.2.1	Introduction to Winding and Developed Diagrams and Design.....	4-4
4.3	Closed Windings, Open Windings and Split Winding.....	4-5
✓	Syllabus Topic : A. C. Armature Windings	4-6
4.4	A. C. Armature Windings (May 2015, Dec. 2015).....	4-6
4.4.1	AC Single Phase Windings	4-6
4.5	A. C. Armature Winding - 3 Phase	4-7
4.5.1	Introduction.....	4-7
4.5.2	Number of Phases (m) and Phase Spread (Angle).....	4-7
4.5.3	Different Terms.....	4-9
4.6	Concentric Windings	4-11
4.6.1	Hemitropic Winding	4-11
4.6.2	Whole Coil Winding / Bifurcated Winding.....	4-11
4.6.3	Concentric / Spiral Winding	4-12
4.7	Additional Simple Procedure for Winding Development	4-13
4.8	Mush Winding.....	4-19
4.9	Double Layer Winding	4-20
4.9.1	Types of Double Layer Windings	4-20
4.10	Design	4-20
✓	Syllabus Topic : Specifications of Induction Motor.....	4-20
4.10.1	Specifications	4-20
✓	Syllabus Topic : Specific Electrical and Magnetic Loadings and Ranges of Specific Loadings	4-21

4.11	Specific Loading.....	4-21
4.11.1	Specific Magnetic Loading (B_{av}) (May 2015, Dec. 2016).....	4-21
4.11.2	Range of Specific Magnetic Loading	4-21
4.11.3	Specific Electric Loading (ac) (May 2015, Dec. 2016).....	4-21
4.11.4	Range of Specific Electric Loading (SEL).....	4-22
4.12	Main Dimension	4-22
✓	Syllabus Topic : Output Equation of 3-ph Induction Motor.....	4-22
4.12.1	Output Equation of 3-ph Induction Motor (May 2015, Dec. 2015, May 2016, Dec. 2016).....	4-22
4.12.2	Factors Affecting Size of Machine	4-23
4.12.3	Choice of Specific Magnetic Loading (B_{av}) (May 2015, Dec. 2015, May 2016, Dec. 2016, May 2017).....	4-23
4.12.4	Choice of Specific Electric Loading (ac) (May 2015, Dec. 2015, May 2016, Dec. 2016).....	4-25
4.13	Exam Pack (University and Review Questions)	4-26

UNIT 5**Chapter 5 : Three Phase Induction Motor
Design Part - II 5-1 to 5-33**

Syllabus : Suitable combinations of stator and rotor slots. Calculations for main dimensions and stator design parameters. Selection of length of air gap, factors affecting length of air gap, unbalanced magnetic pull. Design of rotor slots, size of bars, end rings for cage rotor and rotor slots, turns and area of cross section of conductor for wound rotor.

✓	Syllabus Topic : Calculations for Main Dimensions	5-1
5.1	Calculation for Main Dimensions	5-1
5.1.1	Peripheral Speed	5-1
5.1.2	Ventilating Duct.....	5-1
✓	Syllabus Topic : Design of Stator	5-2
5.2	Design of Stator	5-2
5.2.1	Stator Turns per Phase.....	5-2
5.2.2	Stator Conductor Section.....	5-2
5.2.3	Stator Slot Design	5-2
5.2.4	Shape of Stator Slots.....	5-2
✓	Syllabus Topic : Number of Stator Slots.....	5-3
5.2.5	Number of Stator Slots (May 2016).....	5-3
5.2.6	Area of Stator Slot.....	5-4
5.2.7	Stator Slot Insulation.....	5-5

5.2.8	Length of Mean Turn	5-5
5.2.9	Stator Winding Resistance	5-5
5.2.10	Stator Teeth Design.....	5-5
5.2.11	Stator Core Design.....	5-6
✓	Syllabus Topic : Design of Rotor Slots.....	5-14
5.2.12	Harmonic Field Effect on Performance of Three Phase Induction Motor (May 2015, May 2017).....	5-14
✓	Syllabus Topic : Suitable Combinations of Stator and Rotor	5-15
5.2.13	Suitable Combination of Stator and Rotor Slots OR Rotor Slots Selection Rules (May 2015, Dec. 2016)	5-15
5.2.14	Methods to Reduce Harmonics	5-16
5.3	Technical Specifications of Induction Motor.....	5-16
5.4	Rotor Design.....	5-16
✓	Syllabus Topic : Length of Air Gap (Selection of Air-Gap Length or Factors Affecting Length of Air-Gap).....	5-16
5.4.1	Length of Air Gap (Selection of Air-Gap Length or Factors Affecting Length of Air-Gap) (May 2015, Dec. 2015, May 2016, Dec. 2016, May 2017).....	5-16
✓	Syllabus Topic : Design of Squirrel Cage Rotor.....	5-18
5.5	Design of Squirrel Cage Rotor	5-18
5.5.1	Design of Rotor Slots.....	5-19
5.5.2	Design of Rotor Bars and Slots.....	5-19
5.5.2(i)	Rotor Bar Current	5-19
5.5.2(ii)	Area of Rotor Bars.....	5-19
5.5.2(iii)	Shape of Rotor Slots	5-19
5.5.2(iv)	Rotor Slot Insulation	5-19
✓	Syllabus Topic : Design of End Rings.....	5-20
5.5.3	Design of End Rings.....	5-20
5.5.3(i)	End Ring Current (Dec. 2015, May 2016).....	5-20
5.5.3(ii)	Area of End Ring	5-20
✓	Syllabus Topic : Turns of Area of Cross Section of Conductor for Wound Rotor	5-21
5.6	Design of Slip Ring Rotor or Wound Rotor.....	5-21
5.6.1	Number of Rotor Slots	5-21
5.6.2	Number of Rotor Turns.....	5-21
5.6.3	Rotor Windings	5-21
5.6.4	Rotor Core	5-22
✓	Syllabus Topic : Unbalanced Magnetic Pull and it's Estimation	5-28

5.7	Unbalanced Magnetic Pull and it's Estimation (May 2015, Dec. 2015, May 2016, Dec. 2016)	5-28
5.7.1	Radial Magnetic Forces	5-29
5.7.2	Causes of UMP.....	5-30
5.7.3	Derivation of UMP.....	5-30
5.7.3(A)	Calculation of UMP	5-30
5.8	Exam Pack (University and Review Questions)	5-32

UNIT 6

Chapter 6 : Performance Parameters of 3-Phase Induction Motor 6-1 to 6-23

Syllabus : Leakage flux and leakage reactance : Slot leakage, tooth top leakage, zig-zag leakage, overhang leakage, leakage reactance calculation for three phase machines. MMF Calculation for air gap, stator teeth, stator core, rotor teeth and rotor core, effect of saturation, effects of ducts on calculations of magnetizing current, calculations of no-load current. Calculations of losses and efficiency. Calculation of short time and continuous rating of electrical machine.

6.1	Magnetic Circuits of a 4-pole Induction Motor	6-1
✓	Syllabus Topic : Calculation of No Load Current (I_0)	6-1
6.1.1	Calculation of No Load Current (I_0) (May 2015, Dec. 2016).....	6-1
6.1.1(i)	Calculation of Magnetizing Current (I_m) (Dec. 2015, May 2016, May 2017).....	6-1
✓	Syllabus Topic : MMF Calculation for Air Gap (AT_g).....	6-2
✓	Syllabus Topic : MMF for Stator Teeth (AT_{ts})	6-2
✓	Syllabus Topic : MMF for Rotor Teeth (AT_{tr})	6-2
✓	Syllabus Topic : MMF for Stator Core (AT_{CS})	6-3
✓	Syllabus Topic : MMF for Rotor Core (AT_{cr})	6-3
6.1.1(ii)	Loss Component Current (I_l).....	6-5
✓	Syllabus Topic : Effect of Saturation.....	6-5
6.2	Effect of Saturation	6-5
✓	Syllabus Topic : Effects of Ducts on Calculation of Magnetizing Current	6-6
6.3	Effects of Ducts on Calculation of Magnetizing Current (May 2016, Dec. 2016)	6-6
6.3.1	Gap Contraction Factors.....	6-6
✓	Syllabus Topic : Magnetic Leakage (Leakage Flux and Reactance).....	6-14
6.4	Magnetic Leakage (Leakage Flux) (May 2015, Dec. 2015, Dec. 2016, May 2017)	6-14

✓	Syllabus Topic : Slot Leakage Flux 6-15	✓	Syllabus Topic : Calculations of Losses 6-20
✓	Syllabus Topic : Tooth Top Leakage Flux 6-17	6.6	Calculations of Losses (Dec. 2016) 6-20
✓	Syllabus Topic : Zig-zag Leakage Flux 6-17	✓	Syllabus Topic : Calculation of Efficiency 6-22
✓	Syllabus Topic : Overhang Leakage Flux 6-17	6.7	Efficiency and Temperature Rise 6-22
✓	Syllabus Topic : Leakage Reactance	6.7.1	Estimation of Efficiency 6-22
	Calculations of Polyphase Machines 6-18	6.7.2	Estimation of Temperature Rise 6-22
6.4.1	Leakage Reactance Calculations of Polyphase Machines 6-18	✓	Syllabus Topic : Calculation of Short Time and Continuous Rating of Electrical Machine 6-22
✓	Syllabus Topic : Short Circuit Current 6-19	6.8	Calculation of Short Time Rating and Continuous Rating of Electrical Machines 6-22
6.5	Short Circuit Current 6-19	6.9	Exam Pack (University and Review Questions) 6-22
6.5.1	Stator Resistance 6-19	✓	Appendix A A-1 to A-21
6.5.2	Rotor Resistance 6-19	✓	Question Paper Q-1 to Q-3
6.5.3	Leakage Reactance 6-20	✓	Appendix B B-1 to B-6
