

Unit - I

Chapter 1 : Electrical Wiring Diagram(s) 1-1 to 1-37

Syllabus

- 1.1 Electrical symbols used in electrical diagrams as per Indian standard, multiline and single line representation of conductors.
- 1.2 Electrical diagrams, their Classification. Definition of wiring and circuit (Schematic) diagram according to IS: 2042(Part-I)-1962.
- 1.3 Methods of representation for the wiring diagram- multiline and single line representation, conversion of multi line representation into single line and vice versa.
- 1.4 Fundamental principles for electrical installations, Safety in electrical work, permit to electrical work, safety instruction and safety practices
- 1.5 Scope and features of National Electrical Code 2011 (NEC 2011), Types of electrical installation- Non industrial and industrial, Standard value of voltages and their limits.

- 1.1 Electrical Symbols used in Electrical Diagrams 1-1
 - 1.1.1 Multiline and Single line Representation of Conductor..... 1-9
- 1.2 Electrical Diagrams 1-13
 - 1.2.1 Plans and Layout of Wiring..... 1-19
 - 1.2.2 Some Important Definitions as per IS Codes..... 1-20
- 1.3 Methods of Representation of Multi line and Single line and their Conversion 1-21
 - 1.3.1 Conversion of Multiline Diagram into Single line Diagram 1-27
 - 1.3.2 D.O.L. Starter 1-28
 - 1.3.3 A 3-phase 400 volts 50 Hz Induction motor drives a conveyor belt and a single phase drive a fan 1-29
- 1.4 Fundamental Principles of Electrical Installations 1-29
 - 1.4.1 Classification of electrical installation 1-29
 - 1.4.2 General Requirements in Installations (principles)..... 1-30
 - 1.4.3 Safety in Electric Work - (Permit to work, safety precaution) 1-30
 - 1.4.4 IE Act and Permit to Work 1-31

- 1.5 Scope and Features of National Electric Code 2011 (i.e. NEC-2011) 1-33
 - 1.5.1 Types of Electrical Installations 1-33
 - 1.5.2 Standard Values of Voltages and their Limits 1-34
 - 1.5.2.1 Effect on performance of motor if permissible limit crosses..... 1-35
 - 1.5.2.2 As per IS code 2011 - Standard Values of Voltages 1-36

Unit - II

Chapter 2 : Domestic and Commercial Installations

2-1 to 2-42

Syllabus

- 2.1 Domestic Dwellings/Residential Buildings, its classification, Necessity and reading of Civil Engineering building drawing. Interpretation of electrical installation plan and electrical diagrams.
- 2.2 General requirements and inspection of electrical installation to IS: 732 - 1982.
- 2.3 Design and drawing, estimation and costing of a residential installation having maximum 5 KW load.
- 2.4 Design consideration of electrical installation in commercial buildings. Design electrical installation scheme of commercial complex such as drawing halls and auditorium.
- 2.5 Residential building Service Connection- types Underground and overhead. Calculation of Material required for service connection.

- 2.1 General Rules for Domestic and Commercial Wiring Installations 2-1
 - 2.1.1 Different Methods of Wiring 2-2
 - 2.1.2 Line Diagram for Residential Wiring 2-3
 - 2.1.3 General Rules (IE) for Wiring Installation..... 2-3
 - 2.1.4 Route Line Diagram and Actual Wiring Connections Diagram 2-4
 - 2.1.5 Main and Distribution Board by Line Diagram 2-5
 - 2.1.6 Civil Engineering Building Plane (drawing) 2-5

2.1.7	Big Newly Constructed House Load Calculation Single Line Diagram	2-8
2.2 (A)	General requirements and	
(B)	Inspection of Electrical Installation according to IS	2-9
2.3	Design Drawing and Estimation and Costing of Residential Installation.....	2-10
2.3.1	Estimation of Premises of House (Civil plans) and Wiring Diagram, Preparing Material Schedule	2-10
2.3.2	Wiring Estimation of Small House Two Rooms Veranda.....	2-11
2.4	Design and Drawing, Estimation and Costing of Commercial Installations	2-19
2.4.1	Concept of Commercial installation	2-19
2.4.2	Provisions in Commercial Lighting.....	2-19
2.4.3	Design Consideration of Electrical Installation System in Commercial Building	2-20
2.4.3.1	Separate Sub-Circuits for Lighting and Power Load	2-20
2.5	Testing of Wiring Installation as per IS	2-30
2.5.1	Insulation Resistance between "Earth and Conductor"	2-31
2.5.2	Insulation Resistance between Conductors	2-31
2.5.3	Circuit Diagram for Testing.....	2-32
2.5.4	Testing of Polarities of Single Pole Switches.....	2-32
2.5.5	Testing Earth Continuity Path.....	2-33
2.6	Residential Building Service Connections.....	2-34
2.6.1	Definition of Service Line.....	2-34
2.6.1.1	Service Line Connection.....	2-34
2.6.1.2	Types of Service Connections	2-35
2.6.2	Overhead Single Phase from Pole to Ground Floor by Service Line 20 Meters from Pole Showing Connections	2-35
2.6.3	Service Line Connection to Two Storey Building	2-35
2.6.4	Estimation of Service Line Connections	2-36

2.6.4.1	A service connection for domestic purpose from overhead line hung on GI bearer wire with bobbin (rid) insulators (Distance 20 m). Prepare the estimate of materials...2-36	
2.6.5	Underground Service Connection.....	2-37
2.6.6	Service Connection for 11 kV HT Consumer	2-38
2.6.7	Difference between Overhead Service Connection and Underground Service Connection	2-40

Unit - III

Chapter 3 : Industrial Installations

3-1 to 3-20

Syllabus

3.1	Classification of industrial buildings, Classification based on power consumption, Difference between non-industrial and industrial load, General characteristics of industrial building, selection of wiring system.	
3.2	Drawing of wiring diagram and single line diagram for single phase and three phase motors.	
3.3	Design consideration in industrial installations.	
3.4	Design electrical installation scheme and preparation of small industrial unit having total aggregate three -phase load of 30 KW, agricultural pump and flourmill.	
3.5	Erection, Inspection and testing of installation as per Part 1 section 13 of NEC 2011.	
3.1	Introduction	3-1
3.1.1	Classification of Industrial Buildings	3-1
3.1.2	Comparison of Industrial and Non-industrial Sectors.....	3-2
3.1.3	General Characteristics of Industrial Buildings	3-2
3.1.4	Industrial Load.....	3-3
3.1.5	Selection Wiring Systems.....	3-3
3.2	Drawing Wiring Diagram and Single Line Diagram for Single Phase and 3 Phase Motors	3-4
3.3	Design Consideration of Industrial Installation.....	3-5
3.4	Design of Electrical Installation Scheme.....	3-6
3.4.1	Guidelines about Power Wiring (and Motor Wiring) Installation.....	3-6

3.4.2	Power Rating Calculation of Current.....	3-7	4.2.3	Stranded Conductors.....	4-9
3.4.2.1	Examples on Installation and Estimation	3-9	4.2.4	Hollow Conductors	4-9
3.4.2.2	Example of Industrial Installation showing Actual Wiring and Materials Required.....	3-12	4.2.5	Materials of Conductor	4-9
3.4.3	Power Installation for Agricultural Tube Well Pumping.....	3-17	4.2.6	Other Material Components on LT Line.....	4-9
3.5	Erection, Inspection and Testing of Installation as per NEC – 2011	3-19	4.2.6.1	Tabular Steel Poles	4-10
3.5.1	Visual Inspection	3-19	4.2.6.2	Steel Towers for HT Line.....	4-11
3.5.2	Testing in Sequence.....	3-19	4.2.6.3	Stay wire assembly	4-12
			4.2.7	More about Conductors	4-13
			4.2.7.1	Copper Conductor	4-13
			4.2.7.2	Aluminium Conductor.....	4-13
			4.2.7.3	All Aluminium Conductors	4-14
			4.2.7.4	ACSR Conductor.....	4-15
			4.2.8	Other Materials / Components of Overhead line.....	4-16
			4.2.8.1	Function of the above main Components	4-16
			4.3	Cables used for Distribution Lines	4-17
			4.3.1	Requirements of Underground Cables.....	4-17
			4.3.1(A)	Construction of Cables	4-17
			4.3.1(B)	Different Layers on the Underground Cable.....	4-18
			4.3.1(C)	Cable Conductors and Insulating Materials for Cable.....	4-19
			4.3.1(D)	Expected Properties of Insulation Material used for Cable	4-19
			4.3.2	Classification of Cables	4-20
			4.3.3	Factors Determining Section of Cables	4-20
			4.3.4	Detailed Construction and Explanation of LV and HV Cables and their Suitability	4-20
			4.3.5	Comparison of Underground and Overhead Line.....	4-24
			4.3.6	Requirements of Cable.....	4-24
			4.3.7	Insulating Materials used for Cables.....	4-25
			4.3.8	Laying of Cables.....	4-25
			4.3.8.1	Cable Laying Methods.....	4-25
			4.3.8.2	Fault Finding in Underground Cables	4-27
			4.3.8.3	Cable Jointing	4-31
			4.3.9	Factors Determining Selection of Power Cables.....	4-32

Unit - IV

Chapter 4 : Distribution Lines 4-1 to 4-40

Syllabus

4.1	Introduction to overhead and underground distribution line.	
4.2	Materials used for distribution line HT (11 KV) and LT (415 V)	
4.3	Cables used for distribution line, factors determining selection of LT/ HT power cables, and cable termination methods.	
4.4	Design, estimation and costing of HT (11 KV), LT (415 V) overhead line and underground cabling.	
4.1	Introduction Underground and Overhead Distribution Line.....	4-1
4.1.1	Single Line Diagrams with Components of Electrical Supply Transmission and Distribution Systems	4-1
4.1.2	Single Line Diagram of A.C. Supply System.....	4-1
4.1.3	Structure of Power System	4-2
4.1.3.1	Necessity of Transmission Line	4-3
4.1.4	Main Components Needed for Transmission Lines	4-4
4.1.5	Introduction to Distribution Lines	4-4
4.1.5.1	Components of Distribution System	4-4
4.1.6	Feeder HV-11KV and Distributor LT 415 Volts	4-5
4.2	Properties of Conductor Material required in HT/LT Distribution Line.....	4-7
4.2.1	Types of Conductors in HT / LT System	4-8
4.2.2	Solid Conductors	4-9

4.4	Design Estimation and Costing of Over-head Lines	4-33
4.4.1	Estimation of Over-head Lines	4-33
4.4.1.1	Prior to Start Construction of Line.....	4-34
4.5	Example on Estimation Design.....	4-35

Unit - V

Chapter 5 : Public Lighting Installation 5-1 to 5-52

Syllabus

5.1	Classification of outdoor installations, streetlight / public lighting installation.
5.2	Terminology used according to NEC 2011 - Terms related to highway, lighting installation, photometric terms, luminaries etc. Aim of public lighting installation, classification of roads, standard layout of roads.
5.3	Street light pole structures. Selection of equipments, sources used in street light installations.
5.4	Cables, recommended types and size of cable. On off Control of equipments of street light installation.
5.5	Design, estimation and costing of streetlight.

5.1	Objectives of Outdoor i.e. Exterior Lighting.....	5-1
5.1.1	General Requirements (Factors to be Considered) of Outdoor Lighting Scheme.....	5-1
5.2	Road/Street Lighting.....	5-2
5.2.1	General Comparison of Street Lighting with Indoor Lighting.....	5-2
5.2.2	Important Terms to be Understood (in Roads/Street Lighting)	5-3
5.2.3	Important Points to be noted for Street/Road Lighting (Street Lighting Scheme and its Design)	5-5
5.2.3.1	Luminaire Spacing.....	5-5
5.2.4	Objectives of Road Lighting.....	5-5
5.2.5	Basic Requirements of Street Lighting.....	5-6
5.2.5.1	Principles used in Street Light Designing	5-6
5.2.5.2	Illumination Level on Streets : (It depends on Class of Street Lighting Installations).....	5-6
5.3	Description of Road.....	5-7

5.4	Classes of Road.....	5-7
5.4.1	Important Terms and Relations in Road Lighting.....	5-8
5.4.2	Isolux Diagram (Graphical Method of Finding Luminance on Road Surface)	5-9
5.5	Recommendation for Direct Visual Guidance	5-10
5.6	Lighting Classes for Different Road Types in Pedestrian Areas.....	5-11
5.7	Arrangement of Luminaries on Straight Roads.....	5-11
5.7.1	Arrangement of Luminaries at Special Saturating.....	5-13
5.7.2	Road Lighting Code in India (IS 1944) (BIS) / Terminology	5-15
5.7.3	Pedestrian Crossing Lighting.....	5-16
5.7.4	Lighting with optical Fibre Operating Principle	5-16
5.7.5	Street Light Poles and Electric Connection.....	5-17
5.7.6	Electric Lighting Sources	5-17
5.7.6.1	Types of Road Lighting Luminaries	5-18
5.7.7	Location of Lamps and their Advantages.....	5-18
5.8	Mathematical Problems of Road/Street Lighting and Solution Methods	5-19
5.9	Some Photographs of Road Lighting and Mounting Heights.....	5-23
5.9.1	Definitions of terms Related with Road Lighting	5-23
5.9.2	Important Factors in Choice of Street Lamps	5-24
5.10	Flood Lighting.....	5-24
5.10.1	Meaning of Flood Light.....	5-24
5.10.2	Applications of Flood Lighting.....	5-25
5.10.3	Types of Luminaires Required for Flood Lighting.....	5-26
5.10.4	Flood Light Projector	5-26
5.10.4.1	Reflecting Surfaces	5-26
5.10.4.2	Classification of Projectors (Tree Pattern)	5-26
5.10.4.3	Lamps Used for Different Projectors.....	5-27
5.10.4.4	Location/Mounting of Projectors for Flood Lighting.....	5-27
5.10.5	Some Fitting, Holders, Pictures of Flood Lighting Luminaires.....	5-29
5.10.6	Luminaires.....	5-30
5.10.7	Illumination Level for Flood Lighting	5-30

5.10.8	Calculations on Flood Lighting Scheme.....	5-31
5.10.9	Following Steps will help in Calculations / Design Procedure.....	5-31
5.10.9.1	Factors considered in Illumination Calculation.....	5-31
5.10.10	Solved Examples.....	5-32
5.11	Lighting for Stadium / Sports	5-35
5.11.1	Objective of Sport-lighting	5-35
5.11.2	Background Brightness	5-35
5.11.2.1	Expected Illumination on Ground.....	5-35
5.11.2.2	Lamps used for Sports / Stadium Lighting	5-36
5.11.2.3	Spot Lights Comparison	5-36
5.11.2.4	Section of Lamps as per Characteristics	5-37
5.11.2.5	Design Considerations and Limitations on Lamp-Uses	5-37
5.11.2.6	Designing Factors in Indoor Sports Lighting	5-38
5.11.2.7	Summarising the Points and Other Information of Sports	5-38
5.11.2.7(A)	Categories of Sports Fixed by International Authority.....	5-39
5.11.2.7(B)	Television Coverage Sports	5-40
5.11.2.8	General Precautions for Lighting on Play Grounds ...	5-41
5.11.2.9	Recommended Illuminance Level in f_c (Lux)	5-42
5.12	Lighting for Advertisements / Hoardings	5-42
5.12.1	Introduction of Lighting for Advertisements and Hoardings	5-42
5.12.2	Classification of Electric Signs for Advertising	5-43
5.12.3	Desired Characteristics of Signs.....	5-43
5.12.4	Different Signs by Lamps and Tubes.....	5-45
5.12.5	Light Sources for Flood Lights Signs	5-48

Unit - VI

Chapter 6 : Contracting

6-1 to 6-29

Syllabus

6.1 Purpose of estimating and costing, Qualities of good estimator, essential elements of estimating and costing.

6.2	Meaning and purpose of- Rough estimate, detailed estimate, supplementary estimate, annual maintenance estimate and revised estimate, Factors to be considered while preparation of detailed estimate and economical execution of work.
6.3	Concepts of contracts, types of contracts, contractor, role of contractor, qualities of good contractor
6.4	Type of tender, tender notice, preparation of tender document, and method of opening of tender; e-tendering.
6.5	Quotation, quotation format, comparison between tender and quotation. Comparative statement format of comparative statement. Order format, placing of purchasing order.
6.6	Principles of execution of works, planning, organizing and completion of work, Billing of work.

6.1	Purpose of Estimating and Costing	6-1
6.1.1	Qualities of a Good Estimator.....	6-1
6.1.2	Essential Elements of Estimating and Costing	6-2
6.1.2.1	Purpose of Estimating and Costing	6-2
6.1.2.2	Things required by the Estimator for Estimate.....	6-2
6.1.2.3	Proforma for Making Estimate	6-3
6.2	Estimates	6-3
6.2.1	Purpose of Estimate.....	6-3
6.2.2	Rough Estimate.....	6-3
6.2.3	Detailed Estimate	6-3
6.2.3.1	Documents to be attached with Detailed Estimate.....	6-4
6.2.4	Supplementary Estimate	6-4
6.2.5	Annual Maintenance Estimate	6-4
6.2.6	Revised Estimate	6-4
6.2.7	Factors to be considered while Preparation of a Detailed Estimate and Economical Execution of Work	6-4
6.2.8	Other important factors of Estimating and Costing	6-5
6.2.8.1	Contingencies	6-5
6.2.8.2	Overhead charges.....	6-5
6.2.8.3	Supervision Charges	6-6
6.2.8.4	Production Cost.....	6-6
6.2.8.5	Profit.....	6-6
6.2.8.6	Storage Charges	6-6
6.2.8.7	Tools and Plant Charges	6-6

6.2.8.8	Total cost	6-6	6.4.5	Types of Tenders	6-18
6.3	Contracts.....	6-6	6.4.5.1	Informal Tender.....	6-18
6.3.1	Concept of Contract	6-6	6.4.5.2	Unbalanced Tender	6-18
6.3.2	Contractors.....	6-6	6.4.5.3	Single Tender.....	6-18
6.3.3	Authorities Competent to Enter into Contract.....	6-6	6.4.5.4	Spot-tendering.....	6-19
6.3.4	Essentials of Contracts or When the Contract Becomes Valid	6-7	6.4.5.5	Open Tendering	6-19
6.3.5	Role of Contractor	6-7	6.4.6	Specimen Form of Letter Accepting the Tender	6-19
6.3.6	Qualities of a Good Contractor	6-8	6.4.7	Some Important Terms Related to this Topic	6-20
6.3.7	Types of Contracts	6-8	6.4.7.1	Earnest Money	6-20
6.3.7.1	Lump-Sum Contract	6-9	6.4.7.2	Security Deposit	6-20
6.3.7.2	Percentage Rate Contract	6-9	6.4.7.3	Retention Money	6-20
6.3.7.3	Item Rate Contract	6-9	6.4.7.4	Liquidated Damage	6-21
6.3.7.4	Cost Plus % Rate Contract.....	6-10	6.4.7.5	Global Tender.....	6-21
6.3.7.5	Target Contract	6-10	6.4.7.6	Comparative Statement.....	6-21
6.3.7.6	Rate Contract	6-10	6.4.7.7	Work Order	6-22
6.3.7.7	Material Supply Contract	6-11	6.4.8	e-tendering system.....	6-22
6.3.7.8	Labour Contract.....	6-11	6.5	Quotations.....	6-23
6.3.7.9	Negotiated Contract.....	6-11	6.5.1	Quotation Format	6-23
6.3.7.10	Piece Work agreement Contract	6-11	6.5.2	Comparative Statement.....	6-23
6.3.8	Contract Document	6-12	6.5.3	Proforma of Comparative Statement	6-24
6.4	Tenders.....	6-13	6.5.3 (A)	Comparison of Quotation and Tender	6-24
6.4.1	Tender.....	6-13	6.5.4	Orders for Supply / Purchase Orders.....	6-24
6.4.1.1	Earnest Money	6-13	6.5.5	Criteria for Selecting the Supplier	6-25
6.4.1.2	Tender Notice.....	6-13	6.5.6	Techniques and Objectives of Purchase	6-25
6.4.1.3	Inviting Tenders.....	6-14	6.5.7	Procedure of Purchasing	6-25
6.4.1.4	Tender Form	6-14	6.5.8	Purchase Orders	6-26
6.4.2	Specimen Tender	6-15	6.5.9	Purchase Order Form.....	6-26
6.4.2.1	Procedure to be followed by Contractor to Fill the Tender	6-15	6.6	Principles of Execution of Work.....	6-27
6.4.2.2	Extension of Time for Submission of Completed Tenders	6-16	6.6.1	Procedure followed for Execution of Work (Planning and Organising)	6-27
6.4.2.3	Format for giving Extension of Dates to Tender.....	6-17	6.6.2	Completion Certificate	6-27
6.4.3	Preparation of Tender Documents.....	6-17	6.6.3	Billing of Work	6-27
6.4.4	Method of Opening Tender.....	6-17
