

**Unit-I****Chapter 1 : Basics of Electrical Engg. 1-1 to 1-30**

Syllabus : Definition of current and voltage, Units of current and voltage, Ohm's law, Symbol and relation. Characteristics of electrical circuit, Resistor in series and parallel, Inductor, Capacitor. Kirchoffs' current and voltage law. Active components (Voltage source and current source), Passive components (Resistor, inductor, capacitor). Sinusoidal signal, Triangular wave, Square wave, Sawtooth wave, Amplitude, frequency, Wave length, Time period.

1.1	Network or Circuit	1-2	1.15.1	Series Connection of Resistors	1-10
1.1.1	Circuit Element	1-2	1.15.2	Parallel Connection of Resistors	1-11
1.2	Voltage and Current	1-2	1.16	Electric Networks	1-11
1.2.1	Voltage	1-2	1.16.1	Characteristics of Electric Network	1-12
1.2.2	Current	1-2	1.16.2	Types of Electric Networks	1-12
1.3	Power (P)	1-3	1.16.3	Open Circuit	1-12
1.4	Energy (E)	1-3	1.16.4	Short Circuit	1-12
1.5	Types of Electronic Components	1-3	1.16.5	Branch	1-13
1.5.1	Active Components	1-3	1.16.6	Mesh or Loop	1-13
1.5.2	Passive Components	1-4	1.16.7	Node or Junction	1-13
1.5.3	Comparison of Active and Passive Components	1-4	1.17	Kirchhoff's Laws	1-13
1.6	Resistors	1-4	1.17.1	Kirchhoff's Current Law (KCL)	1-13
1.6.1	Resistance (R)	1-5	1.18	Mesh or Loop and Sign Convention	1-14
1.7	Variable Resistors	1-5	1.18.1	Mesh or Loop	1-14
1.8	Capacitors	1-6	1.18.2	Concept of Sign Convention	1-14
1.8.1	Capacitance	1-6	1.18.3	Potential Rise and Drop for a Resistor	1-15
1.9	Variable Capacitors	1-7	1.18.4	Potential Rise and Drop For Voltage Sources	1-15
1.10	Inductors	1-7	1.19	Kirchhoff's Voltage Law (KVL)	1-15
1.10.1	Types of Inductor	1-8	1.20	Signal	1-16
1.10.2	Variable Inductors	1-8	1.20.1	Representation of a Signal	1-16
1.11	Voltage Sources	1-8	1.20.2	Waveform	1-17
1.11.1	Ideal Voltage Source	1-8	1.21	Types of Signals	1-17
1.11.2	Practical Voltage Source	1-9	1.21.1	Sinusoidal Signal	1-18
1.11.3	Difference between Ideal and Practical Voltage Sources	1-9	1.21.2	Square wave Signal	1-18
1.12	Current Source	1-9	1.21.3	Triangular wave Signal	1-18
1.12.1	Ideal Current Source	1-9	1.21.4	Sawtooth wave Signal	1-19
1.12.2	Practical Current Source	1-10	1.22	Important Definitions	1-19
1.13	Ohm's Law	1-10	1.22.1	Amplitude	1-19
1.13.1	Limitations of ohm's law	1-10	1.22.2	Cycle.....	1-19
1.14	Applications of ohm's Law	1-10	1.22.3	Time Period or Periodic Time (T)	1-20
1.15	Resistors in Series and Parallel	1-10	1.22.4	Frequency	1-20
			1.22.5	Phase	1-21
			1.22.6	Wavelength	1-21
			1.23	Time and Frequency Domain Representation of Signals	1-22
			1.23.1	Time Domain Representation	1-22
			1.23.2	Frequency Domain Representation	1-22
			1.24	1 Mark or 2 Marks UQs with Answers	1-28
				• Review Questions.....	1-22

Unit-II

Chapter 2 : Diode Theory 2-1 to 2-24

Syllabus : Structure of atom, Valence electron, Conductor, Semiconductor, Insulator. Doping, Intrinsic semiconductor, Extrinsic semiconductor, P-type and N-type semiconductor, Majority charge carrier, Minority charge carrier, P-N junction, Depletion layer, Knee voltage, Forward bias, Reverse bias.

2.1	Structure of Atom.....	2-2
2.1.1	Energy Levels of Various Shells	2-3
2.1.2	Simplified Energy Band Diagram	2-4
2.2	Classification of Solids	2-5
2.2.1	Conductors (or Metals)	2-5
2.2.2	Insulators	2-5
2.3	Semiconductors	2-6
2.3.1	Types of Semiconductors	2-7
2.3.2	Intrinsic Semiconductors	2-7
2.3.3	Conduction in Intrinsic Semiconductors	2-7
2.3.4	Extrinsic Semiconductors	2-8
2.3.5	Doping	2-8
2.4	Extrinsic Semiconductors	2-8
2.4.1	n-type Semiconductors	2-9
2.4.2	p-type Semiconductors	2-10
2.4.3	Comparison of P and N Semiconductors	2-11
2.5	Drift and Diffusion	2-11
2.6	P-N Junction Diode	2-12
2.6.1	Depletion Region / Layer	2-13
2.6.2	Barrier Potential or Junction Potential (V_j)	2-14
2.7	Working of a p-n Junction Diode	2-14
2.7.1	Biasing	2-14
2.7.2	Working of Forward Biased Diode	2-14
2.7.3	Power Dissipation	2-15
2.7.4	Working of Reverse Biased Diode	2-16
2.7.5	Breakdown in a Reverse Biased Diode	2-17
2.7.6	Breakdown Voltage	2-17
2.8	The V-I Characteristic of a Diode	2-17
2.8.1	Forward Characteristic	2-17
2.8.2	Reverse Characteristic of a Diode	2-18
2.8.3	Reverse Power Dissipation	2-18
2.8.4	Peak inverse voltage (PIV)	2-18

2.8.5	V-I Characteristic of Silicon and Germanium Diodes	2-18
2.9	Applications of p-n Junction Diode	2-19
2.10	1 Mark or 2 Marks UQs with Answers	2-23
	• Review Questions.....	2-19

Unit-II

Chapter 3 : Special Diodes 3-1 to 3-18

Syllabus : Special diodes : LED, Photodiode, Zener diode, Tunnel diode, LASER diode and Power diode, Zener diode as a voltage regulator.

3.1	Introduction	3-2
3.2	Zener Diode	3-2
3.2.1	V-I Characteristics of a Zener Diode	3-3
3.2.2	Comparison of Zener Diode and p-n Junction Diode	3-3
3.2.3	Applications of Zener Diode	3-4
3.3	The Zener Voltage Regulator	3-4
3.3.1	Limitations of Zener Regulators	3-5
3.3.2	Merits of Zener Regulator	3-5
3.4	Light Emitting Diodes (LED)	3-6
3.4.1	Output Characteristics of LED	3-7
3.4.2	Applications of LED	3-7
3.4.3	Multi Colour LED	3-7
3.5	Photodiode	3-7
3.5.1	Photodiode Characteristics	3-8
3.5.2	Application of Photodiode	3-9
3.5.3	Other Applications of Photodiode	3-9
3.5.4	Comparison of Diodes	3-9
3.6	Tunnel Diode	3-9
3.6.1	Construction	3-10
3.6.2	Tunnel Diode Characteristics	3-10
3.6.3	Applications of Tunnel Diode	3-11
3.7	Laser Diode	3-11
3.7.1	Laser Diode	3-12
3.7.2	Applications of LASER diode	3-13
3.8	Power Diodes	3-13
3.8.1	Types of Power Diodes	3-13
3.8.2	Characteristic of Power Diode	3-14
3.8.3	Applications of Power Diode	3-15
3.9	1 Mark or 2 Marks UQs with Answers	3-18
	• Review Questions.....	3-15

Unit-II

Chapter 4 : Rectifiers 4-1 to 4-16

Syllabus : Types of Rectifiers : Half Wave, Full Wave Rectifier (bridge and center tapped) : Circuit operation, I/O waveforms for voltage and current.

4.1 A DC Power Supply 4-2
 4.1.1 The Transformers 4-2
 4.2 Rectifiers 4-3
 4.2.1 Classification of Rectifiers 4-3
 4.3 Half Wave Rectifier (HWR) 4-3
 4.3.1 Performance Parameters of HWR 4-5
 4.3.2 Advantages of HWR 4-6
 4.3.3 Disadvantages of Half Wave Rectifier 4-7
 4.3.4 Applications of HWR 4-7
 4.4 Full Wave Rectifier with Centre Tapped Transformer 4-7
 4.4.1 Performance Parameters of FWR 4-8
 4.4.2 Advantages of Full Wave Rectifier 4-10
 4.4.3 Disadvantages of Full Wave Rectifier 4-10
 4.4.4 Applications of FWR 4-10
 4.5 Bridge Rectifier 4-10
 4.5.1 Performance Parameter of a Bridge Rectifier 4-11
 4.5.2 Advantages of Bridge Rectifier 4-12
 4.5.3 Disadvantages of Bridge Rectifier 4-12
 4.5.4 Applications of Bridge Rectifier 4-12
 4.5.5 Comparison of Rectifying Circuits 4-13
 4.6 1 Mark or 2 Marks UQs with Answers 4-16
 • **Review Questions** 4-13

Unit-III

Chapter 5 : Transistors 5-1 to 5-20

Syllabus : Types of transistors : PNP, NPN, Working of transistors, Transistor Configurations (CE) : Circuit diagram, Input and output characteristics. Different points of characteristics (Cut-off, Active and Saturation), Input resistance, Output resistance, Current gain, Transistor as a switch.

5.1 Introduction 5-2
 5.1.1 Basics of a Transistor 5-2
 5.2 Construction of a BJT 5-2
 5.2.1 An Unbiased Transistor 5-3
 5.3 Transistor Biasing in the Active Region 5-3
 5.3.1 Biasing 5-3
 5.3.2 Regions of Operation 5-3

5.3.3 Transistor Biasing for Forward Active Region 5-4
 5.3.4 Transistor Biasing for Forward Active Region 5-4
 5.4 Transistor Operation 5-4
 5.4.1 Operation of n-p-n Transistor 5-4
 5.4.2 Operation of p-n-p Transistor 5-5
 5.4.3 Circuit Symbols and Conventions 5-6
 5.5 Transistor Configurations 5-6
 5.6 Common Base (CB) Configuration 5-7
 5.6.1 Current Gain (α or α_{dc}) 5-7
 5.6.2 Features of CB Configuration 5-8
 5.7 Common Emitter (CE) Configuration 5-8
 5.7.1 Current Gain β of CE Configuration 5-9
 5.7.2 Relation between α_{dc} and β_{dc} 5-9
 5.7.3 Input Characteristic 5-9
 5.7.4 Output Characteristic 5-10
 5.7.5 Features of CE Configuration 5-11
 5.8 Common Collector (CC) Configuration 5-12
 5.8.1 Features of CC Configuration 5-13
 5.9 Comparison of Configurations 5-13
 5.10 Transistor as Amplifier 5-13
 5.10.1 Block Diagram of an Amplifier 5-14
 5.10.2 Amplifier Characteristics 5-14
 5.10.3 Transistor as a Current Amplifier 5-15
 5.10.4 Transistor as a Voltage Amplifier 5-15
 5.11 Transistor as a Switch 5-16
 5.11.1 Applications of Transistor 5-17
 5.12 1 Mark or 2 Marks UQs with Answers 5-19
 • **Review Questions** 5-17

Unit-IV

Chapter 6 : Electronic Hardware 6-1 to 6-32

Syllabus : Definition, Construction, Types, Example, PCB layout, Types, Single layer, Multi layer, Manufacturing of PCB. SSI, MSI, LSI, VLSI (Introduction to various technology). RTL, DTL, TTL, CMOS, Fan in, Fan out (Building components, Number of gates supported), Twisted pair, Coaxial cable, Fibre optic cable, RJ45 connector, BNC.

6.1 Introduction to PCB Design 6-2
 6.2 Mechanical Dimensions of Devices and the Components used in Electronic Circuits 6-2
 6.2.1 Classification of Components 6-2
 6.3 Rules for Preparing Layout 6-3
 6.3.1 Layout Scale 6-3
 6.3.2 Use of the Grid System 6-3

6.3.3	Use of Proper Material and Drawing Aid	6-3	6.18	CMOS Logic	6-19
6.3.4	Rules for Preparing Layout	6-3	6.18.1	CMOS Characteristics	6-19
6.3.5	Layout Procedure	6-4	6.18.2	Advantages of CMOS	6-19
6.3.6	Component Placing and Mounting ..	6-4	6.18.3	Disadvantages of CMOS	6-19
6.3.7	Layout Check	6-5	6.19	Comparison of TTL, CMOS, RTL and DTL	6-19
6.4	Artwork	6-5	6.20	Classification of Cables	6-20
6.4.1	Methods to Prepare the Artwork	6-5	6.20.1	Types of Wired Media	6-20
6.4.2	General Rules for Artwork	6-7	6.21	Twisted Pair Cables	6-20
6.4.3	Artwork Check and Inspection	6-8	6.21.1	UTP (Unshielded Twisted Pair)	6-21
6.5	Production of Single Sided PCB's	6-9	6.21.2	STP (Shielded Twisted Pair)	6-21
6.5.1	Photo Printing Method	6-9	6.21.3	Comparison of Twisted Pair Cables	6-22
6.5.2	Screen Printing Method	6-11	6.22	Co-axial Cables	6-22
6.5.3	Double Sided PCB	6-11	6.23	Optical Fiber Cables	6-23
6.5.4	PCB Manufacturing Process of DSPTCH	6-11	6.23.1	Characteristics / Specifications of Optical Fiber Cables	6-24
6.6	Integrated Circuits (ICs)	6-12	6.23.2	Advantages of Optical Fibers	6-25
6.6.1	Types of Integrated Circuits	6-12	6.23.3	Disadvantages of Optical Fiber	6-25
6.6.2	Linear and Digital ICs	6-13	6.23.4	Applications	6-25
6.7	Scale of Integration	6-13	6.23.5	Comparison of Wired Media	6-25
6.8	Advantages of Integrated Circuits	6-13	6.24	Connectors	6-25
6.9	Disadvantages of Integrated Circuits	6-13	6.24.1	Connector for Twisted Pair Cable	6-26
6.10	Applications of ICs	6-13	6.24.2	Connector for Coaxial Cable	6-26
6.11	Difference between Linear and Non-linear ICs	6-14	6.24.3	Fiber Optic Cable Connectors.....	6-26
6.12	Logic Families	6-14	6.25	1 Mark or 2 Marks UQs with Answers	6-32
6.13	Classification of Logic Families	6-14		• Review Questions.....	6-27
6.13.1	Classification Based on Devices Used	6-14	Unit-V		
6.14	Characteristics of Digital ICs	6-15	Chapter 7 : Handling Electronic Waste 7-1 to 7-06		
6.14.1	Fan-in and Fan-out	6-15	Syllabus : Concept of electronic waste. Sustainability and electronic waste. Methods to handle electronic waste, Disposal of electronic waste.		
6.15	Resistor Transistor Logic (RTL)	6-15	7.1	Concept of Electronic Waste	7-2
6.15.1	Advantages	6-16	7.1.1	List of Common E-waste Items	7-2
6.15.2	Limitations	6-16	7.1.2	E-waste Problems	7-2
6.15.3	Characteristics	6-16	7.2	Sustainability and E-waste Management	7-2
6.15.4	Features	6-16	7.2.1	Sustainable Management of E-Waste	7-3
6.16	DTL Gates (Diode Transistor Logic)	6-16	7.2.2	Advantages of E-waste Management	7-3
6.16.1	DTL NAND Gates	6-16	7.3	Methods to Handle Electronic Waste	7-4
6.16.2	Advantages	6-17	7.3.1	Tips for Individuals to Manage E-waste	7-4
6.16.3	DTL Characteristics	6-17	7.4	E- waste Management Strategies	7-5
6.16.4	Demerits	6-17	7.5	Disposal of Electronic Waste.....	7-5
6.17	TTL Family	6-17		• Review Questions.....	7-06
6.17.1	Standard TTL Characteristics	6-17	□□□		
6.17.2	Advantages of TTL	6-18			
6.17.3	Disadvantages of TTL	6-19
