

**Chapter 1 : Scenario of Renewable Energy (RE) Sources 1-1 to 1-19**

Need of RE, advantages and limitations of RE, present energy scenario of conventional and RE Sources.

**1.1 Energy and Power..... 1-1**

**1.2 Energy Consumption as Measure of Prosperity..... 1-1**

**1.3 Classification of Energy Sources ..... 1-1**

1.3.1 Primary and Secondary Energy Sources.....1-2

1.3.2 Commercial and Non-commercial Energy Sources.....1-2

1.3.3 Renewable (Non-conventional) or Alternate and Non-renewable (Conventional) Energy Sources .....1-2

**1.4 Global Primary Energy Reserves ..... 1-2**

**1.5 Global Energy Consumption..... 1-3**

**1.6 Reserves and Production of Energy in India ... 1-4**

1.6.1 Sector Wise Energy Consumption in India .....1-6

1.6.2 Installed Capacity of Conventional and Non-conventional Energy Sources in India .....1-6

**1.7 Non-conventional Energy Sources Relevant to India..... 1-7**

1.7.1 Need to Develop Non-conventional or Renewable Energy of Sources .....1-8

1.7.2 Non-conventional Energy Sources Relevant to India .....1-8

**1.8 Merits and Demerits of Renewable form of Energy ..... 1-9**

**1.9 Methods of Utilization of Renewable Sources of Energy..... 1-9**

**1.10 Direct Applications of Solar Energy .....1-10**

**1.11 Indirect Applications of Solar Energy .....1-11**

**1.12 Role of OPEC .....1-12**

**1.13 Environment and Pollutants.....1-13**

**1.14 Global Warming / Climate Change.....1-13**

1.14.1 Acid Rain and Acid Snow ..... 1-14

1.14.2 Thermal Pollution ..... 1-14

1.14.3 Impact of Cooling Towers..... 1-14

**1.15 Role and Missions of MNRE.....1-14**

**1.16 Scope of Alternate sources in India .....1-15**

**1.17 Initiatives Taken by Govt. of India to Develop Renewable Energy Sources .....1-16**

**1.18 Major Solar Power Plants in India.....1-17**

**Chapter 2 : Solar Radiations 2-1 to 2-22**

Energy available from the sun, spectral distribution, solar radiation outside the earth's atmosphere and at the earth's surface, solar radiation geometry, Instruments for solar radiation measurements, empirical equations for prediction of availability of solar radiation on horizontal, radiation on and tilted surface.

**2.1 Introduction..... 2-1**

**2.2 Structure of the Sun..... 2-1**

2.2.1 Core (0 to 0.23 R) .....2-2

2.2.2 Radiation Zone (0.23 R to 0.7 R).....2-2

2.2.3 Convection Zone (0.7 R to 1.0 R) .....2-3

2.2.4 Photosphere.....2-3

2.2.5 Reversing Layer .....2-3

2.2.6 Chromosphere .....2-3

2.2.7 Transition Layer .....2-3

2.2.8 Corona .....2-3

2.2.9 Sun-Earth Relationship.....2-3

**2.3 Solar Constant..... 2-4**

2.3.1 Variation of Solar Constant.....2-4

**2.4 Sun's Radiation ..... 2-4**

2.4.1 Air Mass .....2-5

**2.5 Composition of Suns Radiation ..... 2-5**

**2.6 Basic Sun-Earth Angles ..... 2-5**

**2.7 Tilt Factor .....2-10**

**2.8 Daily Average Global Radiation .....2-11**

**2.9 Measurement of Solar Radiations .....2-11**

2.9.1 Pyranometers.....2-12

2.9.2	Pyrheliometer .....	2-13
2.9.3	Angstrom Pyrheliometer .....	2-13
2.9.4	Sunshine Recorder.....	2-14
2.9.5	Abbot Silver Disc Pyrheliometer .....	2-15

### Chapter 3 : Solar Energy Collectors and Storage

3-1 to 3-37

Solar energy conversion into heat, types and working of solar collectors, evacuated and non-evacuated solar air heater, concentrated collectors, losses in liquid flat plate collector, thermal analysis of liquid flat plate collector, air heater and cylindrical parabolic concentrating collector, solar energy thermal storage.

<b>3.1</b>	<b>Introduction .....</b>	<b>3-1</b>
3.1.1	Types of Solar Collectors.....	3-1
<b>3.2</b>	<b>The Liquid Flat Plate Collector .....</b>	<b>3-1</b>
3.2.1	Flat Plate Solar Air Heater .....	3-2
3.2.1.1	Advantages of Flat Plate Collectors.....	3-2
3.2.1.2	Disadvantages of Flat Plate Collectors.....	3-2
3.2.2	Evacuated Tube Solar Heater or Evacuated Tube Collector (ETC) .....	3-3
<b>3.3</b>	<b>Construction and Materials for Flat Plate Collectors.....</b>	<b>3-3</b>
3.3.1	Absorber Plate and Tubes .....	3-3
3.3.2	Fixing of Absorber Plate and Tubes (Types of Flat Plate Collectors).....	3-4
3.3.3	Thermal Insulation .....	3-4
3.3.4	Transparent Cover Plates.....	3-5
3.3.5	Casing or Container .....	3-5
3.3.6	Selective Surface and Selective Coatings .....	3-5
<b>3.4</b>	<b>Performance Analysis of Flat Plate Collectors under Steady State Conditions .....</b>	<b>3-5</b>
3.4.1	Instantaneous Collection Efficiency, $\eta_i$ and Hourly Collection Efficiency $\eta_h$ .....	3-6
3.4.2	Collector Aperture Area ( $A_a$ ).....	3-7
3.4.3	Collector Gross Area ( $A_c$ ).....	3-7
3.4.4	Stagnation Temperature .....	3-7
3.4.5	Transmissivity of the Cover System.....	3-7
3.4.5.1	Transmissivity based on Reflection and Refraction .....	3-7
3.4.5.2	Transmissivity based on Absorption ( $\tau_a$ ).....	3-8
3.4.6	Transmissivity for Diffuse Radiation.....	3-8
3.4.7	Variation of Transmissivity with Angle of Incidence .....	3-8
3.4.8	Losses in Flat Plate Collector .....	3-8
<b>3.5</b>	<b>Testing of Solar Collectors .....</b>	<b>3-9</b>
3.5.1	Main Purposes of Testing .....	3-9
3.5.2	Testing Methods .....	3-9
3.5.3	Testing Procedures.....	3-9
3.6	Effect of Various Parameters on Performance of Collectors .....	3-10
<b>3.7</b>	<b>Limitations of Flat Plate Collectors .....</b>	<b>3-11</b>
<b>3.8</b>	<b>Concentrating Type Collectors .....</b>	<b>3-12</b>
<b>3.9</b>	<b>Types of Solar Concentrating Collectors .....</b>	<b>3-12</b>
<b>3.10</b>	<b>Focusing Type Concentrators .....</b>	<b>3-13</b>
3.10.1	Parabolic Trough Reflector .....	3-13
3.10.2	Mirror Strip Reflector Type Concentrating Collector .....	3-14
3.10.3	Fresnel Lens Concentrating Collector .....	3-14
3.10.4	Paraboloid Dish Collector .....	3-14
<b>3.11</b>	<b>Non-focussing Type Concentrators.....</b>	<b>3-15</b>
3.11.1	Flat Plate Collector with Plane Reflector .....	3-15
3.11.2	Compound Parabolic Concentrator (CPC).....	3-15
<b>3.12</b>	<b>Central Tower Receiver Using Heliostat Mirrors .....</b>	<b>3-16</b>
<b>3.13</b>	<b>Advantages and Disadvantages of Concentrating Collectors Over Flat plate Collectors.....</b>	<b>3-17</b>
<b>3.14</b>	<b>Selection of Materials .....</b>	<b>3-17</b>
<b>3.15</b>	<b>Performance Analysis of Concentrators .....</b>	<b>3-17</b>
<b>3.16</b>	<b>Optical Losses.....</b>	<b>3-19</b>
<b>3.17</b>	<b>Economics of Solar Heating System .....</b>	<b>3-23</b>

<p>3.17.1 Calculations for Payback Period of the Solar Heating System.....3-23</p> <p>3.17.2 Life Cycle Cost Analysis .....3-24</p> <p><b>3.18 Necessity of Energy Storage .....3-24</b></p> <p><b>3.19 Classification of Energy Storage System.....3-25</b></p> <p><b>3.20 Thermal Energy Storage System.....3-25</b></p> <p><b>3.21 Sensible Heat Storage .....3-26</b></p> <p>3.21.1 Solid Storage System.....3-26</p> <p>3.21.2 Liquid Sensible Heat Storage .....3-26</p> <p>3.21.3 Solar Ponds .....3-27</p> <p><b>3.22 Latent Heat Energy Storage (Phase Change Energy Storage) .....3-28</b></p> <p>3.22.1 Classification of Phase Change Materials.....3-29</p> <p><b>3.23 Thermo-Chemical Solar Energy Storage .....3-30</b></p> <p><b>3.24 Electrical Energy Storage of Solar Energy).....3-31</b></p> <p><b>3.25 Electromagnetic Storage System .....3-32</b></p> <p><b>3.26 Mechanical Energy Storage System of Solar Energy.....3-32</b></p> <p><b>3.27 Biological Storage of Solar Energy .....3-33</b></p> <p><b>Chapter 4 : Applications of Solar Energy 4-1 to 4-47</b></p> <div style="border: 1px solid black; padding: 5px; margin: 10px 0;"> <p>Solar space heating and cooling of buildings, solar pumping, solar cooker, solar still, solar dryer, solar refrigeration and air-conditioning, solar pond, heliostat, solar furnace, photovoltaic system for power generation, solar cell modules and arrays, solar cell types, material, applications, advantages and disadvantages.</p> </div> <p><b>4.1 Introduction to Solar Water Heating..... 4-1</b></p> <p>4.1.1 Advantages of Solar Water Heating System .....4-1</p> <p><b>4.2 Solar Water Heating Systems..... 4-1</b></p> <p>4.2.1 Natural Circulation or Thermo-syphon Solar Water Heating System.....4-1</p> <p>4.2.2 Forced Circulation Solar Water Heating System .....4-2</p> <p><b>4.3 Classification of Space Heating (Solar Heating of Buildings) Systems ..... 4-4</b></p> <p><b>4.4 Passive Space Heating ..... 4-4</b></p> <p>4.4.1 Passive Space Cooling Through Ventilation .....4-5</p>	<p><b>4.5 Active Space Heating Systems..... 4-5</b></p> <p>4.5.1 Hot Water Space Heating System.....4-6</p> <p>4.5.2 Active Hot Air Heating System .....4-6</p> <p>4.5.3 Solar Based Li Br - H<sub>2</sub>O Vapour Absorption System for Space Cooling.....4-7</p> <p><b>4.6 Solar Air Heating Systems ..... 4-8</b></p> <p><b>4.7 Types of Solar Air Heating Collectors based on Absorbing Surfaces ..... 4-9</b></p> <p>4.7.1 Simple Flat Plate Collector .....4-9</p> <p>4.7.2 Finned Plate Absorber Collector.....4-10</p> <p>4.7.3 Corrugated Absorber Plate Collector .....4-10</p> <p>4.7.4 Matrix Absorber Plate Collector .....4-10</p> <p>4.7.5 Overlapped Transparent Plate Collector .....4-10</p> <p>4.7.6 Transpiration Absorber Type Collector .....4-11</p> <p><b>4.8 Solar Dryers .....4-11</b></p> <p>4.8.1 Types of Solar Dryers .....4-11</p> <p><b>4.9 Natural Convection or Direct Type Solar Dryers (Cabinet Dryer) .....4-11</b></p> <p><b>4.10 Forced Convection Solar Dryer (Direct Gain Type) Active Type or Forced Circulation Type .....4-12</b></p> <p><b>4.11 Forced Convection Solar Dryer (Indirect Gain Type).....4-13</b></p> <p><b>4.12 Economics of Solar Heating System .....4-13</b></p> <p>4.12.1 Calculations for Payback Period of the Solar Heating System.....4-13</p> <p>4.12.2 Life Cycle Cost Analysis .....4-14</p> <p><b>4.13 Solar Distillation (Solar Still) .....4-15</b></p> <p><b>4.14 Types of Solar Still .....4-16</b></p> <p><b>4.15 Solar Cooking .....4-17</b></p> <p>4.15.1 Domestic Solar Cooker (Box Type) .....4-17</p> <p>4.15.2 Paraboloidal Dish Type Cooker.....4-18</p> <p>4.15.3 Advanced Solar Cooker.....4-18</p> <p><b>4.16 Solar Green Houses .....4-19</b></p> <p><b>4.17 Types of Greenhouses .....4-20</b></p>
---	---

<p><b>Chapter 5 : Wind Energy 5-1 to 5-37</b></p>	
<p>Energy available from wind, basics of lift and drag, basics of wind energy conversion system, Betz limit theory, effect of density, angle of attack and wind speed, wind mill rotors, horizontal and vertical axes rotors, drag, lift, torque and power coefficients, tip speed ratio, solidity of turbine, wind turbine performance curves, wind energy potential and site selection, basics of wind farm, safety and environmental aspects, wind energy potential and installation in India.</p>	
<p><b>5.1 Introduction to Wind Energy ..... 5-1</b></p> <p><b>5.2 Causes of Wind..... 5-1</b></p> <p><b>5.3 Principle of Wind Power (Momentum Theory) ..... 5-2</b></p> <p>5.3.1 Maximum Power.....5-2</p>	

5.3.2	Ideal or Maximum Theoretical Efficiency, $\eta_{\max}$ and Betz Coefficient.....	5-4	5.13.1	Thrust on Turbine Rotor.....	5-26
5.3.3	Torque and Axial Thrust on Blades.....	5-4	5.13.2	Torque on Turbine Rotor.....	5-26
<b>5.4</b>	<b>Advantages and Disadvantages of Wind Energy .....</b>	<b>5-10</b>	5.13.3	Effect of Speed of Wind Stream Variation (Cut-In and Cut-Out Speed) .....	5-26
5.4.1	Block Diagram of Wind Energy Conversion System (WECS).....	5-11	5.13.4	Factors Affecting the Design of Wind Turbine .....	5-27
5.4.2	Applications of Wind Energy.....	5-11	<b>5.14</b>	<b>Types of Wind Energy Systems.....</b>	<b>5-27</b>
<b>5.5</b>	<b>Wind Data and Energy Estimation .....</b>	<b>5-11</b>	5.14.1	Stand-alone System .....	5-27
<b>5.6</b>	<b>Classification of Wind Energy Conversion Systems (WECS).....</b>	<b>5-13</b>	5.14.2	Grid Connected Wind Energy Conversion System .....	5-28
5.6.1	Horizontal Axis Wind Turbines (HAWT).....	5-13	5.14.3	Solar Wind Hybrid Power System.....	5-29
5.6.2	Vertical Axis Wind Turbine (VAWT) .....	5-14	5.14.4	Small Wind Turbines for Residential and Commercial Use .....	5-30
<b>5.7</b>	<b>Horizontal Axis Wind Turbine (HAWT) Generator .....</b>	<b>5-15</b>	5.14.5	Large Wind Mills for Power Generation.....	5-30
5.7.1	Yaw Pitch Control.....	5-15	<b>5.15</b>	<b>Offshore Wind Energy System .....</b>	<b>5-31</b>
<b>5.8</b>	<b>Vertical Axis Wind Turbine (VAWT) .....</b>	<b>5-16</b>	5.15.1	Advantages and Disadvantages of Offshore Wind Farms Compared Onshore Wind Farms .....	5-31
5.8.1	Comparison of Horizontal and Vertical Axis Wind Mills.....	5-16	<b>5.16</b>	<b>Present Status and Installations of Wind Energy in India.....</b>	<b>5-32</b>
<b>5.9</b>	<b>Performance of Wind Mills.....</b>	<b>5-16</b>	<b>5.17</b>	<b>Wind Energy Conversion System (WECS) for Wind Farms and other Purposes .....</b>	<b>5-33</b>
5.9.1	Dependence of Power Coefficient, $C_p$ on Tip Speed Ratio, $\lambda$ .....	5-17	<b>5.18</b>	<b>Pollution from Wind Energy (Environmental Aspects) .....</b>	<b>5-34</b>
5.9.2	Dependence of Solidity, $\gamma$ on Tip Speed Ratio, $\lambda$ .....	5-18	<b>Chapter 6 : Bio Energy 6-1 to 6-28</b>		
<b>5.10</b>	<b>Site Selection .....</b>	<b>5-19</b>	Modern energy carrier, energy plantation, gasification, types and applications of gasifiers, types of biogas plants, design of biogas plant, factors affecting biogas generation, advantages and disadvantages.		
<b>5.11</b>	<b>Design Considerations in Blade Design.....</b>	<b>5-20</b>	<b>6.1</b>	<b>Biomass and Biomass Energy Resources.....</b>	<b>6-1</b>
5.11.1	Nomenclature Related to Aerofoil Blades .....	5-20	6.1.1	Photosynthesis Process.....	6-2
5.11.2	Cross-section of Rotor Blade.....	5-21	6.1.2	Availability of Biomass.....	6-2
5.11.3	Lift and Drag.....	5-22	6.1.3	Limitations of Use of Biomass Energy.....	6-2
5.11.4	Blade Sections.....	5-22	6.1.4	Advantages of Biomass .....	6-3
5.11.5	Tower Height .....	5-22	6.1.5	Modern Bioenergy - An Overview.....	6-3
5.11.6	Number of Blades.....	5-23	<b>6.2</b>	<b>Energy Conversion from Biomass .....</b>	<b>6-3</b>
5.11.7	Magnus Effect.....	5-23	6.2.1	Direct Combustion .....	6-3
<b>5.12</b>	<b>Methods of Overcoming Fluctuations of Power .....</b>	<b>5-25</b>			
<b>5.13</b>	<b>Design of Wind Turbine Rotor.....</b>	<b>5-26</b>			

<p>6.2.2 Thermo Chemical Conversion (Dry Processes) .....6-3</p> <p>6.2.3 Biochemical Conversion (Wet Processes).....6-4</p> <p>6.2.3.1 Fermentation of Biomass.....6-4</p> <p>6.2.3.2 Anaerobic Digestion of Biomass.....6-4</p> <p>6.2.3 Difference between Aerobic and Anaerobic Digestion.....6-4</p> <p><b>6.3 Biogas Generation ..... 6-5</b></p> <p>6.3.1 Principles of Biogas Production from Waste Biomass .....6-5</p> <p><b>6.4 Various Factors Affecting the Production of Biogas..... 6-6</b></p> <p><b>6.5 Classification of Biogas Plants ..... 6-8</b></p> <p><b>6.6 Continuous or Batch Type Biogas Plants ..... 6-8</b></p> <p><b>6.7 Dome and Drum Type Biogas Plants ..... 6-9</b></p> <p>6.7.1 Floating Drum Type Biogas Plants (Constant Pressure Type).....6-9</p> <p>6.7.2 Fixed Dome Type Biogas Plants.....6-10</p> <p>6.7.2.1 Comparison between Fixed Dome Type and Floating Dome Type Biogas Plants .....6-12</p> <p>6.7.3 Biobulk CST (Continuously Stirred Tank Reactor).....6-13</p> <p>6.7.4 UASB Bio Reactor (Up flow Anaerobic Sludge Blanket).....6-13</p> <p>6.7.5 Initial Loading of Digester.....6-13</p> <p><b>6.8 Community Biogas Plants .....6-13</b></p> <p>6.8.1 Properties of Biogas .....6-14</p> <p><b>6.9 Digester Design Considerations.....6-15</b></p> <p>6.9.1 Biogas Production.....6-15</p> <p>6.9.2 Volume of Digester .....6-15</p> <p>6.9.3 Digester Size.....6-15</p> <p><b>6.10 Site Selection for Biogas Plants .....6-16</b></p> <p><b>6.11 Application of Biogas in Engines.....6-16</b></p> <p>6.11.1 Application of Biogas in Petrol Engines .....6-16</p> <p>6.11.2 Use of Biogas in Diesel Engines.....6-17</p> <p>6.11.3 Other Applications of Biogas.....6-17</p>	<p><b>6.12 Bio-fuel .....6-17</b></p> <p>6.12.1 Production Processes of Ethanol from Biomass.....6-18</p> <p><b>6.13 Energy Plantation .....6-19</b></p> <p><b>6.14 Gasification of Biomass .....6-19</b></p> <p>6.14.1 Types of Gasifier .....6-20</p> <p>6.14.1.1 Downdraft Gasifier .....6-20</p> <p>6.14.1.2 Updraft Gasifier.....6-21</p> <p>6.14.1.3 Cross Draft Gasifier.....6-21</p> <p>6.14.1.4 Fluidized Bed Gasifier .....6-21</p> <p><b>6.15 Applications of Gasifiers.....6-22</b></p> <p><b>6.16 Power Generation from Urban Waste.....6-22</b></p> <p>6.16.1 Municipal Solid Waste (MSW) .....6-22</p> <p>6.16.2 Power Generation from Landfill Gas Using Municipal Waste .....6-22</p> <p><b>6.17 Power Generation from Liquid Waste .....6-23</b></p> <p>6.17.1 Sewage .....6-23</p> <p>6.17.2 Distillery Waste.....6-23</p> <p>6.17.3 Pulp and Paper Mill Black Liquor Waste.....6-24</p> <p><b>Chapter 7 : Ocean Energy 7-1 to 7-17</b></p> <div style="border: 1px solid black; padding: 5px; margin: 5px 0;"> <p><b>Ocean Energy :</b> OTEC principle, open, closed and hybrid cycle OTEC system, Energy from tides, estimation of tidal power, tidal power plants, single and double basin plants, site requirements, advantages and limitations.</p> <p><b>Wave energy :</b> Wave energy conversion devices, advantages and disadvantages, present scenario.</p> </div> <p><b>7.1 Technologies Available to Utilize Ocean Energy ..... 7-1</b></p> <p><b>7.2 Ocean Temperature Difference and Principle of Working of OTEC Plants..... 7-1</b></p> <p>7.2.1 Efficiency of OTEC Power Plants and Power Developed .....7-2</p> <p>7.2.2 Efficiency of OTEC Power Plant and Quantity of Water to be Pumped for 1 MW Plant.....7-2</p> <p><b>7.3 Types of OTEC Systems ..... 7-3</b></p> <p>7.3.1 Open Cycle or Claude Cycle OTEC System.....7-3</p>
--	---

7.3.2 Closed or Anderson Cycle OTEC System.....7-4

7.3.3 Hybrid OTEC Cycle.....7-5

**7.4 Advantages and Disadvantages of Closed Cycle System ..... 7-5**

7.4.1 Advantages of Closed Cycle over Open Cycle of OTEC Systems.....7-5

7.4.2 Disadvantages of Closed Cycle Over Open Cycle of OTEC Systems.....7-6

7.4.3 Environmental Effects of OTEC Plant.....7-6

**7.5 Tidal Energy..... 7-7**

7.5.1 Limitations of Tidal Energy .....7-7

7.5.2 Availability of Tidal Power in India and Locations.....7-8

**7.6 Tidal Power Plants (Single Basin System)..... 7-8**

7.6.1 Tidal Power Plant-Double Basin System .....7-9

**7.7 Advantages of Tidal Power.....7-10**

**7.8 Disadvantages of Tidal Power .....7-10**

**7.9 Types of Hydraulic Turbines for Tidal Power Plants System .....7-10**

**7.10 Estimation of Tidal Power in Single Basin System.....7-10**

**7.11 Wave Energy.....7-12**

7.11.1 Wave Energy Conversion Devices .....7-12

7.11.2 Advantages of Wave Energy Conversion .....7-13

7.11.3 Limitations and Disadvantages of Wave Energy Conversion .....7-13

**7.12 Wave Profile Devices .....7-13**

7.12.1 Float Type Wave Energy Converter or Point Absorber Buoy Method .....7-13

7.12.2 Surface Attenuator.....7-14

7.12.3 Pelamis Wave Energy Converter.....7-14

7.12.4 Dolphin Type Wave Energy Converter.....7-14

**7.13 Wave Capture Devices.....7-14**

**7.14 Oscillating Water Column Wave Energy Converter .....7-15**

**7.15 Present Scenario of Development of Ocean Energy .....7-15**

**Chapter 8 : Geothermal Energy 8-1 to 8-14**

Introduction, vapor and liquid dominated systems, binary cycle, hot dry rock resources, magma resources, advantages and disadvantages applications

**8.1 Introduction to Geothermal Energy ..... 8-1**

8.1.1 Advantages of Geothermal Energy .....8-1

8.1.2 Disadvantages of Geothermal Energy .....8-2

**8.2 Origin and Types of Geothermal Energy ..... 8-2**

8.2.1 Types of Geothermal Resources .....8-3

8.2.2 Analysis of Energy Stored in Dry Rock and Hot Aquifer.....8-3

8.2.2.1 Energy from Dry Rocks.....8-3

8.2.2.2 Energy from Hot Aquifer.....8-4

**8.3 Applications of Geothermal Energy ..... 8-7**

8.3.1 Difference between Conventional Steam Power Plants and Geothermal Power Plants.....8-7

**8.4 Applications of Hydrothermal Resources..... 8-8**

8.4.1 Vapour Dominated or Dry Steam System.....8-8

8.4.2 Liquid Dominated or Wet Steam System .....8-9

**8.5 Other Applications of Geothermal Fluid for Low Temperature Systems .....8-10**

**8.6 Hot Dry Rock (HDR) Resources.....8-11**

**8.7 Scope for Geothermal Energy in India .....8-11**

8.7.1 Research Organisation Working on Geothermal Energy in India .....8-11

**8.8 Environmental Problems in Geothermal Power Plants.....8-11**

**Chapter 9 : Magneto Hydrodynamic (MHD) Power Generation 9-1 to 9-13**

Concept and working principle.

**9.1 Introduction to MHD ..... 9-1**

**9.2 Working Principle of MHD Generator..... 9-1**

9.2.1 MHD Arrangement and Efficiency .....9-2

**9.3 Types of MHD Plants..... 9-4**

9.3.1 Open Cycle MHD System .....9-4

9.3.2 Closed Cycle MHD System .....9-5

**9.4 Advantages and Disadvantages of MHD System ..... 9-7**

**9.5 Fuels and Material Used in MHD Plants ..... 9-7**

**9.6 Performance of MHD Generators ..... 9-8**

**9.7 Future Prospects of MHD .....9-10**

**Chapter 10 : Economic Analysis 10-1 to 10-28**

Initial and annual cost, Basic definitions Fundamentals of economic analysis, time value of money, payback period, present worth calculations, repayment of loan in equal annual installments, annual solar savings, cumulative saving and life cycle cost analysis, economic analysis of solar system, clean development mechanism.

**10.1 Introduction to Energy Management .....10-1**

10.1.1 Financial Planning and Analysis ..... 10-1

10.1.2 Definitions ..... 10-2

10.1.2.1 Load Factor and Energy Generated/day ..... 10-2

10.1.2.2 Inflation ..... 10-2

10.1.2.3 Initial Cost..... 10-2

10.1.2.4 Annual Cost (AC) ..... 10-2

10.1.2.5 Annual Savings (AS) ..... 10-2

10.1.2.6 Levelized Cost ..... 10-3

**10.2 Fixed and Variable Cost .....10-3**

10.2.1 Break Even Chart..... 10-3

10.2.1.1 Limitations and Assumptions of Break Even Analysis ..... 10-4

10.2.1.2 Applications of Break Even Analysis ..... 10-4

10.2.2 Annual Savings ..... 10-5

**10.3 Cash Flows .....10-6**

10.3.1 Interest Charges..... 10-6

10.3.2 Future value..... 10-7

10.3.3 Inflation ..... 10-7

10.3.4 Present Value (PV) of a Future Principal Sum..... 10-7

**10.4 Financial Analysis on Investment.....10-9**

10.4.1 Simple Payback Period, Time Value for Money (TVM) and Future Value (FV) ..... 10-9

10.4.2 Return of Investment (ROI) or Rate of Return (RR) Method..... 10-10

10.4.3 Net Present Value of (NPV) of Cash Flows ..... 10-10

10.4.3.1 Present Value Function (PVF) ..... 10-11

10.4.4 Internal Rate of Return (IRR)..... 10-11

10.4.4.1 NPV and IRR with Fuel Escalation ..... 10-12

10.4.5 Life Cycle Cost..... 10-13

10.4.6 Repayment of Loan Taken in Equal Installments ..... 10-13

**10.5 Economic Analysis of Add on Solar System..... 10-13**

**10.6 Green House Effect and Global Warming (Climate Change)..... 10-23**

**10.7 Kyoto Protocol and Carbon Credits ..... 10-24**

10.7.1 Clean Development Mechanism (CDM)..... 10-25

10.7.1.1 CDM Project Cycle ..... 10-26
