3.5.6 Applications of Gauss's Law for Spherical Shell of Charge

OR Derivation of $\bar{E}$ due to Uniform Surface Charge Density ρs (C/m^2) Distributed on the Surface of a Sphere of Radius 'a' Centered at Origin 3-12

3.5.7 Solved Examples on Gauss's Law 3-14

3.6 Divergence Theorem 3-20

3.6.1 Solved Examples on Divergence Theorem 3-21

3.7 Work Done in Moving a Point Charge 3-28

3.7.1 Proof of "Work Done is Independent of Distance Travelled" 3-29

3.7.2 Solved Examples on Work Done 3-29

3.8 Electric Potential 3-33

3.8.1 Potential Difference (P.D.) 3-33

3.8.2 Potential due to a Point Charge 3-34

3.8.3 Scalar or Absolute Potential 3-34

3.8.4 Electrical Potential due to Charge Distributions 3-35

3.8.5 Potential Difference in the Field of Infinite Line Charge 3-35

3.8.6 Potential Difference in the Field of an Infinite Surface Charge 3-36

3.9 Equipotential Surfaces OR Concept of Uniform and Non-Uniform Fields, Utilization Factor 3-37

3.9.1 Conservative Property in Electrostatics 3-37

3.10 Solved Examples on Electric Potential 3-37

3.11 Potential Gradient 3-41

3.11.1 Relation Between $\bar{E}$ and $\bar{V}$ 3-42

3.11.2 Solved Examples on Potential Gradient 3-42

3.12 Energy Density in Electrical Field 3-45

3.12.1 Potential Energy in a Continuous Charge Distribution 3-46

3.12.2 Solved Examples on Potential Energy of Charged Distribution 3-47

3.13 Short Questions and Answers 3-49

Chapter 4 : Conductors, Dielectrics and Boundary Conditions 4-1 to 4-24

4.1 Electric Field in Free Space 4-1

4.2 Conductors 4-1

4.2.1 Drift Velocity 4-1

4.2.2 Equation of Resistance 4-2

4.2.3 Properties of Perfect Conductors 4-2

4.2.4 Solved Examples on Conductors 4-2

4.3 Relaxation Time 4-4

4.3.1 Solved Example on Relaxation Time 4-4

4.4 Dielectrics 4-5

4.4.1 Polarization in Dielectrics 4-5

4.4.2 Dielectric Constant and Strength 4-6

4.4.3 Types of Dielectric Medium 4-6

4.4.4 Properties of Dielectric Material 4-6

4.4.5 Solved Examples on Dielectrics 4-7

4.5 Electric Field in Multiple Dielectrics 4-9

4.6 Boundary Conditions 4-9

4.6.1 Boundary Condition between Conductor and Free Space 4-9

4.6.2 Boundary Condition between Conductor and Dielectric 4-11

4.6.3 Boundary Condition between Conductor- Conductor Interface 4-11

4.6.4 Boundary Conditions between Perfect Dielectrics [Dielectric–Dielectric Boundary] 4-12

4.6.5 Solved Examples on Boundary Conditions 4-14

4.7 Ohm's Law in Point Form 4-21

4.8 Equation for Continuity of Current 4-22

4.8.1 Steady State Current 4-23

4.8.2 Solved Example on Current Density 4-23

4.9 Short Questions and Answers 4-24

Chapter 5 : Laplace and Poisson's Equations 5-1 to 5-24

5.1 Laplace and Poisson's Equations 5-1

5.1.1 Laplace's Equation in Different Co-ordinate System 5-1

5.1.2 Significance of Poisson's and Laplace's Equations 5-2

5.1.3 V and E as a Function of Φ 5-2

5.2 Capacitance 5-3

5.2.1 Parallel Plate Capacitor 5-3

5.2.2 Spherical Capacitor 5-4

5.2.2(A) Isolated Spherical Capacitors 5-5

5.2.2(B) Isolated Spherical Capacitors Coated with Dielectric 5-5

5.2.3 Cylindrical Capacitors (Co-axial Cable) 5-6

5.2.4 Solved Examples on Capacitors 5-7

5.3 Equation of Capacitance using Laplace's and Poisson's Equations 5-13

5.3.1 Parallel Plate Capacitor 5-13

5.3.2 Spherical Capacitor 5-14

5.3.3 Co-axial Capacitor Cable 5-16

5.3.4 Solved Examples on Laplace's and Poisson's Equations 5-18

5.4 Capacitance of Two Wire Line 5-21

5.5 Uniqueness Theorem 5-23

5.5.1 Understanding $\nabla^2 V = 0$ 5-23

5.6 Short Questions and Answers 5-24
