Chapter 1 : Functions and Limits 1-1 - 1-22

1.1 Introduction to Functions ... 1-2
1.1.1 Some Important Definitions ... 1-2
1.1.2 Function ... 1-2
1.2 Types of Functions ... 1-3
1.3 Examples ... 1-4
1.4 Examples Based on Odd and Even Function ... 1-18
1.5 Introduction to Limits ... 1-20
1.6 Existence of Limits ... 1-20
1.6.1 Uniqueness of Limit ... 1-21
1.7 Properties of Limits ... 1-21
1.8 Substitution ... 1-21
1.9 List of Standard Important Formulae ... 1-21

Chapter 2 : Derivatives 2-1 - 2-84

2.1 Introduction ... 2-2
2.2 Definition of Derivative ... 2-2
2.3 Geometrical Meaning of Derivatives ... 2-2
2.4 Derivatives of Standard Functions ... 2-3
2.4.1 Constant Function ... 2-3
2.4.2 Power Function ... 2-3
2.4.3 Exponential Function ... 2-3
2.4.4 Logarithmic Function ... 2-4
2.4.5 Trigonometric Functions By using First Principle ... 2-4
2.4.6 Derivatives of Inverse Trignometric Functions ... 2-6
2.5 Derivatives of Some Standard Functions ... 2-7
2.6 Rules of Differentiation ... 2-8
2.6.1 Derivative of Sum ... 2-8
2.6.2 Derivative of Difference ... 2-8
2.6.3 Examples ... 2-9
2.6.4 Derivative of Product ... 2-12
2.6.5 Derivative of Quotient ... 2-16
2.6.6 Derivatives of a Composite Functions (Chain Rule) ... 2-22
2.7 Composite Derivatives ... 2-22
2.8 Derivatives of Inverse Functions ... 2-36
2.9 Derivatives of Inverse Trignometric Functions by Suitable Substitution ... 2-37
2.10 Derivatives of Implicit Functions ... 2-45
2.11 Logarithmic Differentiation ... 2-52
2.12 Derivatives of Parametric Functions ... 2-63
2.13 Derivative of One Function with respect to another Function ... 2-72
2.14 Second Order Differentiation ... 2-81

Chapter 3 : Applications of Derivative 3-1 - 3-47

3.1 Introduction ... 3-2
3.2 Geometrical meaning of Derivatives (Slope, Gradient) ... 3-2
3.3 Examples ... 3-2
3.4 Tangents and Normal ... 3-8
3.5 Maxima and Minima ... 3-19
3.6 Radius of Curvature ... 3-36
3.6.1 Radius of Curvature in Cartesian Form ... 3-37

Chapter 4 : Integration 4-1 - 4-86

4.1 Integration ... 4-2
4.1.1 Indefinite Integral ... 4-2
4.1.2 Integration of Standard Function ... 4-2
4.2 Rules of Integration ... 4-3
4.3 Solved Examples on Simple Integration ... 4-3
4.4 Integration of Composite Function ... 4-9
4.5 Integrals of Simple Algebraic Rational Functions ... 4-11
4.6 Integration by Trignometric Transformation ... 4-14
4.7 Integration by Substitution Method ... 4-24
4.7.1 Some Substitutions ... 4-24
4.8 Solved Examples ... 4-25
4.9 Integral of the Form ... 4-39
4.9.1 Solved Example ... 4-40
4.10 Integration by Partial Fraction ... 4-42
4.11 Integral of the Form ... 4-57
4.11.1 Examples ... 4-57
4.12 Integrals of the Form ... 4-62
4.12.1 Integrals of the Form ... 4-63
4.13 Integration by Parts ... 4-68
4.14 Generalized Rule of Integration by Parts ... 4-79

Chapter 5 : Definite Integration 5-1 - 5-42

5.1 Definite Integral ... 5-2
5.2 Some Properties of Definite Integral ... 5-2
5.2.1 Examples ... 5-2
5.3 Problems on Property of Definite Integration ... 5-13
5.4 Definite Integral by Method of Substitution ... 5-22
5.5 Integration by Parts ... 5-37
5.6 Examples ... 5-37

Chapter 6 : Applications of Definite Integration **6-1 - 6-26**

6.1 Introduction 6-2
6.2 Area under the Curve as a Definite Integral 6-3
6.3 Examples 6-3
6.4 Area between Two Curves 6-14
6.4.1 Examples 6-14
6.5 Volume of a Solid of Revolution 6-20
6.5.1 Examples 6-21

Chapter 7 : Differential Equation **7-1 - 7-40**

7.1 Introduction 7-2
7.2 Solved Examples 7-2
7.3 Formation of Differential Equation 7-6
7.3.1 General Solution 7-7
7.3.2 Particular Solution 7-7
7.4 Examples 7-7
7.5 Solution of Differential Equations of First Order and First Degree 7-13
7.6 Examples 7-14
7.7 Equation Reducible to Variable Separable Form 7-19
7.8 Solved Examples 7-20
7.9 Homogeneous Differential Equation 7-25
7.10 Linear Differential Equation 7-31

Chapter 8 : Application of Differential Equations **8-1 - 8-13**

8.1 Rectilinear Motion Under Constant Acceleration 8-2
8.1.1 Examples 8-2
8.2 Motion Under Variable Acceleration 8-3
8.2.1 Examples 8-3
8.3 Applications of Differential Equations 8-8
8.3.1 Introduction 8-8
8.3.2 Simple Electrical Circuits 8-8
8.3.3 Kirchhoff's Law 8-8

Chapter 9 : Complex Numbers **9-1 - 9-21**

9.1 Introduction 9-2
9.2 Definition of a Complex Number 9-2
9.3 Conjugate of Complex Number 9-3
9.4 Algebra of Complex Number 9-3
9.4.1 Equality of Complex Numbers 9-3
9.4.2 Addition and Subtraction of Complex Number 9-3
9.4.3 Multiplication of Complex Number 9-3
9.4.4 Division of Complex Number 9-3
9.5 Graphical Representation of Complex Number (Argand's Diagram) 9-4
9.6 Examples 9-4
9.6.1 Modulus or Magnitude of Complex Number 9-10
9.6.2 Amplitude or Argument of Complex Number 9-10
9.7 Polar Form of Complex Number 9-13
9.8 Exponential Form of Complex Number 9-14
9.8.1 Product of Complex Numbers in Polar or Exponential Form 9-15
9.8.2 Equality of Complex Numbers in Polar or Exponential Form 9-15

Chapter 10 : Laplace Transform **10-1 - 10-50**

10.1 Introduction 10-2
10.2 Condition for Existence of Laplace Transform 10-2
10.3 Laplace Transform of Some Standard Functions 10-2
10.4 Some Properties of Laplace Transform 10-3
10.5 Laplace Transform of an Integral of Form $\left(\int_0^t f(u)\, du \right)$ .. 10-4
10.6 Trigonometric Identities 10-4
10.6.1 Solved Examples 10-4
10.7 Examples based on First Shifting Theorem 10-12
10.8 Inverse Laplace Transform 10-23
10.9 Properties of Inverse Laplace Transform 10-24
10.10 Inverse Laplace Transform by Partial Fractions 10-31
10.11 Solutions of Differential Equation by Laplace Transform Method 10-37
