

**UNIT I****Chapter 1 : Introduction to Computer Graphics****1-1 to 1-13**

1.1	Introduction.....	1-1
1.2	Applications of Computer Graphics.....	1-1
1.3	Basics of Graphics System .....	1-2
1.3.1	Pixel.....	1-2
1.3.2	Resolution.....	1-2
1.3.3	Aspect Ratio.....	1-2
1.3.4	Frame Buffer .....	1-2
1.3.5	Display Adapters.....	1-3
1.3.6	Refresh Rate .....	1-3
1.3.7	Modes .....	1-3
1.3.8	Graphics adapters.....	1-3
1.4	Graphics Devices.....	1-5
1.4.1	Interactive Devices.....	1-5
1.4.2	Display Devices.....	1-6
1.4.2(A)	Cathode-ray Tube (CRT) .....	1-6
1.4.2(B)	Color CRT Monitor.....	1-7
1.4.2(C)	Liquid crystal display (LCD).....	1-8
1.4.2(D)	Light Emitting Diode (LED) .....	1-9
1.4.2(E)	Direct View Storage Tube (DVST) .....	1-9
1.4.2(F)	Plasma Display.....	1-9
1.4.2(G)	3D Display .....	1-9
1.4.2(H)	Comparison of CRT, LCD, Plasma, and OLED Displays .....	1-10
1.4.3	Display file Structure.....	1-10
1.4.3(A)	Display File Interpreter .....	1-11
1.5	Basic Display Processor.....	1-11
1.5.1	Features of Display Processor.....	1-12
1.5.2	Working.....	1-12

**Chapter 2 : Introduction to OpenGL****2-1 to 2-18**

2.1	Introduction to OpenGL.....	2-1
2.1.1	OpenGL and Related APIs.....	2-2
2.2	OpenGL Architecture.....	2-3
2.3	Basic Syntax of OpenGL .....	2-4
2.3.1	Building on Windows.....	2-4
2.3.2	Building on Linux.....	2-7
2.4	Basic Graphics Function .....	2-8

2.5	Primitives and Attributes .....	2-8
2.5.1	Point Primitives.....	2-8
2.5.2	Indexed Vertices.....	2-11
2.6	The OpenGL interface .....	2-11
2.7	3D Graphics Coordinate Systems.....	2-11
2.7.1	Pixel vs. Fragment .....	2-12
2.8	Simple Modelling and Rendering of Two and Three-Dimensional Geometric Objects.....	2-12
2.8.1	Color in OpenGL .....	2-12
2.8.2	Differences in Coordinate System of GLUT and OpenGL.....	2-13
2.8.3	Transformations in OpenGL.....	2-13
2.8.4	2-Dimensional Viewing .....	2-15
2.8.5	3D Geometric Transformations in OpenGL .....	2-15
2.8.5(A)	Geometric Transformations Functions in OpenGL.....	2-16
2.8.6	Projection Transformation .....	2-16
2.9	GLUT .....	2-16
2.10	Programming events.....	2-17
2.10.1	Reading the Mouse Position .....	2-17
2.10.2	Handling Keyboard Inputs with GLUT .....	2-17
2.11	Callback Function .....	2-18

**Chapter 3 : Line ,Circle and Character Generation****Algorithms****3-1 to 3-25**

3.1	Scan Conversion.....	3-1
3.1.1	Introduction .....	3-1
3.1.2	Line and Line Segment.....	3-2
3.1.3	Qualities of Good Line Drawing Algorithms.....	3-3
3.2	Line Drawing Algorithms.....	3-3
3.2.1	Digital Differential Analyzer (DDA).....	3-3
3.2.1(A)	Working Mechanism .....	3-3
3.2.1(B)	DDA Algorithm for Drawing Line .....	3-4
3.2.1(C)	Pros and Cons.....	3-5
3.2.1(D)	Examples.....	3-6
3.2.2	Bresenham's Line Drawing Algorithm.....	3-9
3.2.2(A)	Introduction .....	3-10
3.2.2(B)	Bresenham Line drawing Algorithm.....	3-12
3.2.2(C)	Pros and Cons .....	3-13
3.2.2(D)	Examples.....	3-13
3.2.3	DDA vs. Bresenham Line Drawing Algorithm.....	3-17

3.3	Circle Drawing Algorithms.....	3-18
3.3.1	DDA Circle Drawing Algorithm.....	3-18
3.3.1(A)	Working Mechanism .....	3-18
3.3.1(B)	Pros and Cons .....	3-18
3.3.2	Bresenham Circle Drawing Algorithms .....	3-18
3.3.2(A)	Working Mechanism .....	3-19
3.3.2(B)	Algorithm.....	3-21
3.3.2(C)	Pros and Cons .....	3-21
3.3.2(D)	Examples.....	3-21
3.4	Introduction to Aliasing and Anti-aliasing.....	3-22
3.4.1	Aliasing .....	3-22
3.4.1(A)	Staircase.....	3-22
3.4.1(B)	Brightness.....	3-22
3.4.1(C)	Global aliasing .....	3-22
3.4.2	Antialiasing.....	3-22
3.4.2(A)	Antialiasing methods .....	3-22
3.5	Character Generation.....	3-23

## UNIT II

### Chapter 4 : Polygon 4-1 to 4-10

4.1	Polygons.....	4-1
4.1.1	Types of Polygon.....	4-1
4.1.1(A)	Convex Polygon .....	4-1
4.1.1(B)	Concave Polygon.....	4-2
4.1.1(C)	Complex Polygon.....	4-2
4.2	Inside Test.....	4-2
4.2.1	Even-Odd Test.....	4-2
4.2.2	Winding Number Method .....	4-3
4.3	Polygon Filling Method .....	4-4
4.3.1	Introduction.....	4-4
4.3.2	Pixel Connectivity.....	4-4
4.3.3	Boundary Fill.....	4-4
4.3.3(A)	Algorithm for boundary fill method .....	4-5
4.3.3(B)	Advantages and Disadvantages .....	4-6
4.3.4	Flood Fill.....	4-6
4.3.4(A)	Algorithm.....	4-6
4.3.5	Scan Line Fill .....	4-7
4.3.6	Seed Fill vs Scan Line Algorithm .....	4-10

### Chapter 5 : 2D Transformations 5-1 to 5-34

5.1	Introduction to 2D Transformation.....	5-1
-----	--	-----

5.2	Revising Matrices .....	5-1
5.2.1	Matrix Representation .....	5-2
5.2.2	Matrix Properties.....	5-2
5.2.3	Determinant of Matrix.....	5-2
5.2.4	Multiplying Two Matrices.....	5-2
5.3	Translation.....	5-2
5.4	Scaling .....	5-4
5.4.1	Scaling About Origin.....	5-4
5.4.2	Scaling with Respect to Reference Point.....	5-5
5.5	Rotation.....	5-7
5.5.1	Rotation with Respect to Origin .....	5-7
5.6	Homogeneous Coordinates.....	5-10
5.6.1	Rotation.....	5-10
5.7	Composite Transformation.....	5-11
5.7.1	Successive Transformations.....	5-11
5.8	Rotation About an Arbitrary Point.....	5-12
5.9	Inverse Transformation .....	5-17
5.10	Shear .....	5-17
5.10.1	X- Direction Shearing.....	5-17
5.10.2	Shearing About a Line Parallel to X-axis .....	5-18
5.10.3	Y- Direction Shearing.....	5-19
5.10.4	Shearing About a Line Parallel to Y-axis .....	5-20
5.11	Reflection.....	5-21
5.11.1	Reflection About X - Axis (Y = 0 Line) .....	5-21
5.11.2	Reflection About Y - Axis (X = 0 Line) .....	5-21
5.11.3	Reflection About X = Y Axis.....	5-22
5.11.4	Reflection About X = - Y Axis.....	5-22
5.11.5	Reflection About Origin .....	5-22
5.11.6	Reflection About Any Line $y = mx + c$ .....	5-23
5.11.7	Reflection About a Line Parallel to X-Axis.....	5-23
5.11.8	Reflection About a Line Parallel to Y-Axis.....	5-23
5.12	Solved Examples .....	5-25

## UNIT III

### Chapter 6 : Windowing and Clipping 6-1 to 6-18

6.1	Viewing Transformations.....	6-1
6.1.2	Window to Viewport Transformation.....	6-3
6.2	2-D Clipping.....	6-4
6.3	Point Clipping.....	6-5
6.4	Line Clipping .....	6-5

6.4.1	Cohen – Sutherland Line Clipping Algorithm.....	6-6
6.5	Polygon Clipping .....	6-13
6.5.1	Sutherland Hodgeman Polygon Clipping Algorithm.....	6-13
6.5.2	Weiler Atherton Polygon Clipping Algorithm.....	6-16

**Chapter 7 : 3D Transformation and Projections****7-1 to 7-39**

7.1	3D Transformation.....	7-1
7.1.1	Introduction.....	7-1
7.1.2	3D Geometry .....	7-1
7.1.3	Translation.....	7-1
7.1.4	Scaling .....	7-2
7.1.5	Rotation .....	7-3
7.1.5(A)	Rotation About Axis.....	7-3
7.1.5(B)	Rotation About Line Parallel to Principle Axis....	7-4
7.1.5(C)	Rotation About an Arbitrary Line .....	7-5
7.1.6	Shear .....	7-9
7.1.7	Reflection .....	7-9
7.2	Projections .....	7-21
7.2.1	Introduction.....	7-21
7.2.2	Parallel Projection.....	7-22
7.2.2(A)	Oblique Parallel Projection .....	7-23
7.2.2(B)	Orthographic Parallel Projection .....	7-24
7.2.3	Perspective Projection .....	7-28
7.2.3(A)	Isometric Projections.....	7-29
7.2.3(B)	Vanishing Point.....	7-30
7.2.4	Differentiate : Parallel vs. Perspective Projection .....	7-32
7.2.5	Differentiate : Orthographic vs. Isometric Projection .....	7-32

**UNIT IV****Chapter 8 : Segments****8-1 to 8-7**

8.1	Segment.....	8-1
8.1.1	Introduction.....	8-1
8.1.2	Segment Table .....	8-2
8.2	Operations on Segment.....	8-3
8.2.1	Creation of a Segment.....	8-3
8.2.2	Closing of a Segment .....	8-4
8.2.3	Segment Deletion.....	8-4

8.2.4	To Rename a Segment.....	8-5
8.3	Image Transformation .....	8-7

**Chapter 9 : Illumination Models and Shading Algorithm****9-1 to 9-17**

9.1	Introduction .....	9-1
9.1.1	Sources of light.....	9-1
9.1.1(A)	Distributed Source of light.....	9-2
9.1.2	Ambient Light / Diffuse light .....	9-2
9.1.3	Diffuse Reflection .....	9-2
9.1.4	Specular Reflection.....	9-3
9.1.5	Point Source Illumination.....	9-4
9.1.6	Specular Reflection and Phong Model.....	9-4
9.1.7	Combined Diffuse and Specular Reflections with Multiple Light Sources.....	9-5
9.1.8	Warn Model.....	9-5
9.2	Color Model .....	9-5
9.2.1	Properties of Light .....	9-6
9.2.2	CIE Chromaticity Diagram.....	9-6
9.2.3	Color Gamut.....	9-8
9.3	Different Color Models.....	9-8
9.3.1	RGB Color Model.....	9-9
9.3.2	CMY Color Model.....	9-10
9.3.3	Differentiate RGB and CMY Color Model.....	9-10
9.3.4	HSV Color Model .....	9-11
9.3.5	Differentiate RGB and HSV Color Model .....	9-11
9.3.6	YCbCr Color Model .....	9-12
9.4	Shading Algorithms .....	9-12
9.4.1	Constant Shading (Constant Intensity Shading).9-13	
9.4.2	Gouraud Shading.....	9-13
9.4.3	Phong Shading.....	9-14
9.4.4	Halftone Shading.....	9-14
9.4.5	Differentiate between Phong Shading and Gouraud Shading.....	9-16

**UNIT V****Chapter 10 : Curves and Fractals****10-1 to 10-21**

10.1	Curves.....	10-1
10.1.1	Introduction .....	10-1
10.1.2	Interpolation and Approximation .....	10-1
10.1.3	Blending Function .....	10-2

10.2	Spline Interpolation Methods – Hermite Interpolation .....	10-3
10.3	Bezier Curve .....	10-5
10.3.1	Properties of Bezier Curves.....	10-5
10.3.2	Cubic Bezier Curves.....	10-5
10.3.3	Matrix Representation .....	10-6
10.3.4	Subdivision Method.....	10-7
10.3.5	Applications of Bezier Curve.....	10-7
10.3.6	Limitations of the Bezier Curve .....	10-7
10.4	B-Spline Curve.....	10-13
10.4.1	Properties of B-Spline Curve.....	10-14
10.4.2	Bezier Vs. B-Spline Curve.....	10-16
10.5	Fractals.....	10-16
10.5.1	Introduction.....	10-16
10.5.2	Classification of fractals.....	10-16
10.5.3	Applications of Fractals .....	10-17
10.5.4	Fractal Dimension .....	10-17
10.5.5	Fractal Generation.....	10-18
10.5.6	Triadic Koch Curve.....	10-19
10.5.7	Hilbert Curve.....	10-20
10.5.8	Applications.....	10-21

### **Chapter 11 : Animation 11-1 to 11-13**

11.1	Animation.....	11-1
11.1.1	Introduction.....	11-1
11.2	Basics of animation.....	11-1
11.2.1	Different Types of Animation .....	11-1
11.3	Principles of Animation .....	11-2
11.4	Animation Techniques .....	11-4
11.4.1	Conventional Animation.....	11-5
11.4.2	Computer-Based Animation.....	11-5
11.4.3	Differentiate Conventional Animation vs. Computer-based Animation .....	11-6
11.5	Design of Animation Sequences .....	11-6
11.6	Animation Languages .....	11-8
11.7	Keyframe.....	11-8
11.7.1	Approaches for Keyframe Animation .....	11-9
11.8	Morphing.....	11-9
11.8.1	Applications of Morphing .....	11-11

11.9	Motion Specification.....	11-11
11.9.1	Direct Motion Specification .....	11-11
11.9.1(A)	Goal-directed Systems.....	11-11
11.9.2	Kinematics and Dynamics .....	11-11
11.10	Methods of Controlling Animation.....	11-12
11.11	Frame by Frame Animation Techniques.....	11-12
11.12	Real Time Animation .....	11-13

### **UNIT VI**

### **Chapter 12 : Virtual Reality 12-1 to 12-20**

12.1	Introduction of Virtual Reality (Fundamental Concept).....	12-1
12.1.1	Three I's of Virtual Reality .....	12-1
12.1.2	Classic Components of VR System.....	12-2
12.1.3	Application of VR Systems .....	12-2
12.2	Multiple Modals of Input and Output Interface in Virtual Reality.....	12-4
12.2.1	Input - 3D Position Trackers and its Types .....	12-4
12.2.1(A)	Tracker.....	12-5
12.2.1(B)	Input Devices .....	12-6
12.2.1(C)	Output Devices.....	12-7
12.2.2	Navigation and Manipulation Interfaces.....	12-7
12.2.2(A)	Tracker-Based Navigation/Manipulation Interfaces.....	12-7
12.2.3	Gesture Interfaces .....	12-7
12.2.4	Graphics Displays .....	12-8
12.2.4(A)	The head-mounted display (HMD) .....	12-8
12.2.4(B)	CAVE (Cave Automatic Virtual Environment).....	12-9
12.2.5	Sound Displays.....	12-10
12.2.6	Haptic Feedback.....	12-10
12.3	Rendering Pipeline .....	12-10
12.3.1	Graphics rendering Pipeline .....	12-11
12.3.2	Haptics Rendering Pipeline .....	12-11
12.4	Modeling in Virtual Reality .....	12-12
12.4.1	Geometric Modelling.....	12-13
12.4.2	Kinematics Modelling.....	12-15
12.4.3	Physical Modelling .....	12-17
12.4.4	Behaviour Modelling.....	12-19
