Index

Chapter 1 : Introduction **1-1 to 1-8**

1.1 Features or buzzwords of Java 1-2
1.2 Comparison of C++ and JAVA 1-4
1.3 JVM (Java Virtual Machine) 1-6
1.4 JVM Architecture 1-6
1.5 JRE (Java Runtime Environment) 1-7
1.6 Java Development Kit (JDK) 1-8

Chapter 2 : Object Oriented Programming **2-1 to 2-16**

2.1 Class Fundamentals 2-2
2.2 Object & Object Reference 2-3
2.3 Object Life Time & Garbage Collection 2-3
2.3.1 Object Life Time 2-3
2.3.2 Garbage Collection 2-4
2.4 Constructor & Initialization Code Block 2-4
2.5 Access control 2-5
2.6 Java Modifiers 2-6
2.7 Nested, Inner Class & Anonymous Classes, Abstract Class &Interfaces 2-6
2.8 Methods, Defining Methods, Argument Passing Mechanism, Method Overloading, Recursion, Dealing with Static Members, Finalize() Method, Native Method. 2-7
2.8.1 Method 2-7
2.8.2 Passing Parameters by Value 2-8
2.8.3 Method Overloading 2-9
2.8.4 The finalize( ) Method 2-10
2.9 Use of “this“ Reference 2-11
2.10 Cloning Objects, Shallow and Deep Cloning 2-13
2.10.1 Object Cloning 2-13
2.12 Generic Class Types 2-15

Chapter 3 : Extending Classes and Inheritance **3-1 to 3-12**

3.1 Use and Benefits of Inheritance in OOP 3-2
3.2 Types of Inheritance in Java 3-3
3.3 Inheriting Data Members and Methods 3-7
3.4 Role of Constructors in inheritance 3-9
3.5 Overriding Super Class Methods, Use of “super” 3-9

3.6 Polymorphism in Inheritance 3-11
3.7 Type Compatibility and Conversion 3-11
3.8 Implementing Interfaces 3-12

Chapter 4 : Packages **4-1 to 4-5**

4.1 Organizing Classes and Interfaces in Packages 4-2
4.1.1 Definition of Package 4-2
4.1.2 Advantage of Using Packages in Java 4-2
4.1.3 Packages are Divided into two Categories 4-3

Chapter 5 : Exception Handling **5-1 to 5-18**

5.1 The Idea behind Exception 5-2
5.2 Exceptions & Errors 5-2
5.3 Types of Exception 5-3
5.4 Control Flow in Exceptions 5-5
5.5 JVM reaction to Exceptions 5-8
5.6 Use of try, Catch, Finally, Throw, Throws in Exception Handling 5-10
5.7 Checked and Un-Checked Exceptions 5-16
5.7.1 Checked Exceptions 5-16
5.7.2 Unchecked exceptions 5-17

Chapter 6 : Array & String **1-1 to 1-16**

6.1 Defining an Array 6-2
6.2 Initializing & Accessing Array 6-2
6.4 Operation on String, Immutable String 6-6
6.5 Using Collection Bases Loop for String, Tokenizing a String 6-9
6.6 Creating Strings using StringBuffer, String Builder 6-12

Chapter 7 : Thread **7-1 to 7-17**

7.1 Understanding Threads 7-2
7.2 Need of Multi-Threaded Programming 7-3
7.3 Thread Life Cycle 7-4
7.3.1 How to create Threads 7-4
7.3.1.1 Thread Class 7-4
7.3.1.2 Runnable Interface 7-7
7.4 Thread Priorities 7-8
7.5 Synchronizing Threads 7-9
7.5.1 Types of Synchronization 7-9

7.5.2 Thread Synchronization 7-10
7.5.3 Mutual Exclusive 7-10
7.6 Inter communication of Threads 7-13
7.6.1 Process of Inter-Thread Communication 7-14
7.6.2 Difference between wait() and sleep() 7-15
7.7 Critical Factor in Thread-Deadlock 7-16

Chapter 8 : A Collection of Useful Classes 8-1 to 8-38

8.1 Utility Methods for Arrays 8-2
8.1.1 Class Methods 8-2
8.2 Observable and Observer Objects 8-3
8.2.1 Observer and Observable functions 8-4
8.2.2 Example 8-5
8.3 Date & Times 8-7
8.4 Using Scanner 8-9
8.4.1 Input Types 8-10
8.5 Regular Expression 8-11
8.5.1 Regular Expression Syntax 8-13
8.5.2 Methods of Matcher Class 8-14
8.6 Input/output Operation in Java (java.io Package) 8-17
8.7 Streams and the new I/O Capabilities 8-19
8.7.1 Understanding Streams 8-19
8.7.2 The Classes for Input and Output 8-21
8.7.3 The Standard Streams 8-23
8.8 Working with File Object 8-24
8.8.1 File I/O Basics 8-24
8.8.2 Reading and Writing to Files 8-26
8.8.3 Buffer and Buffer Management 8-32
8.8.4 Read/Write Operations with File Channel 8-35
8.9 Serializing Objects 8-37

Chapter 9 : UI Programming 9-1 to 9-5

9.1 Designing Graphical User Interfaces in Java 9-2
9.2 Components and Containers 9-3
9.3 Basics of Components 9-4
9.4 Using Containers 9-5

Chapter 10 : Event Handling **10-1 to 10-5**

10.1 Event-Driven Programming in Java 10-2
10.2 Event- Handling Process 10-2
10.3 Event Handling Mechanism 10-3
10.4 The Delegation Model of Event Handling 10-3
10.5 Event Classes, Event Sources, Event Listeners 10-4
10.6 Adapter Classes as Helper Classes in Event Handling 10-5

Chapter 11 : The Collection Framework **11-1 to 11-26**

11.1 Introduction to Java Framework 11-2
11.1.1 Advantages of Java Framework 11-2
11.1.2 Examples of Java Frameworks 11-2
11.1.3 Difference between Frameworks and Libraries 11-3
11.2 Collection of Objects 11-3
11.2.1 Advantages of Collection Framework 11-4
11.2.2 Hierarchy of Collection Framework 11-5
11.3 Collection Types, Sets, Sequence, Map 11-5
11.3.1 The Collection Interfaces 11-5
11.3.2 The Collection Classes 11-6
11.3.3 Sets 11-7
11.3.3.1 HashSet 11-8
11.3.3.2 TreeSet 11-9
11.3.4 Sequence (List) 11-10
11.3.4.1 ArrayList 11-11
11.3.4.2 LinkedList 11-13
11.3.5 Map 11-15
11.4 Understanding Hashing 11-17
11.4.1 What is HashMap in Collection Framework? 11-17
11.5 Use of ArrayList and Vector 11-20
11.5.1 Vector 11-20
11.5.2 Difference between Array List and Vector 11-21
11.6 Java Utilities (java.util Package) 11-21
11.6.1 java.util Package Interfaces: 11-21
11.6.2 java.util.Package Classes: 11-22
11.6.3 java.util Package Exceptions: 11-22
11.6.3 Example of Date class 11-23
11.6.4 Example of Scanner class: 11-23
11.6.5 Example of Random class 11-24

Chapter 12 : Database Programming using JDBC **12-1 to 12-19**

12.1 Introduction to JDBC 12-2
12.1.1 JDBC Product Components 12-2
12.1.2 JDBC Architecture 12-3
12.2 JDBC Drivers and Architecture 12-4
12.2.1 Type 1- JDBC-ODBC Bridge Driver 12-4
12.2.2 Type 2-JDBC-Native API 12-5
12.2.3 Type 3- JDBC-Net pure Java 12-5
12.2.4 Type 4-100% Pure Java 12-6
12.2.5 Which Driver should be Used? 12-7
12.3 CURD Operations using JDBC 12-7
12.3.1 CURD is the acronym for the following four operations 12-7
12.3.2 Java sql package 12-7
12.3.2.1 java.sql package interfaces 12-7
12.3.2.2 java.sql package classes 12-8
12.3.2.2 java.sql package Exceptions 12-8
12.3.3 To Establish the Connection with Database and to Perform the CRUD Operation on it, Following are the steps 12-9
12.3.4 Let us understand each of the above operations with examples in java using JDBC and mysql as DBMS. 12-12
12.3.4.1 Insert values into employee table (Database name= example). 12-13
12.3.4.2 Retrive values from employee table (Database name= example) 12-14
12.3.4.3 Update Values into Employee table (Database name= example). 12-15
12.3.4.4 Delete values from employee table (Database name= example). 12-16
12.4 Connecting to non-conventional databases 12-17
12.4.1 Introduction 12-17
12.4.2 Object-Relational Database Management System 12-18
12.4.2.1 Advantages of Object Relational model 12-18

Chapter 13 : Java Server Technologies **13-1 to 13-34**

13.1 Servlet web Application Basics 13-2
13.2 Architecture and Challenges of Web Application 13-4
13.2.1 Architecture of Web Application 13-4
13.2.2 Challenges of Web Application 13-5
13.3 Introduction to Servlet 13-6
13.3.1 Jobs of Servlet 13-6
13.3.2 Architecture of Servlet 13-7
13.3.3 Servlet performs the following tasks 13-7

13.3.4 Advantages of Servlet 13-7
13.3.5 Servlet API 13-7
13.3.6 Structure of web application 13-9
13.4 Introduction to JSP 13-10
13.4.1 Features of JSP technology 13-10
13.4.2 Advantages of JSP over Servlet 13-11
13.4.3 Lifecycle of JSP 13-11
13.4.4 JSP Elements 13-12
13.4.4.1 Scriplets 13-12
13.4.4.2 JSP Declaration 13-13
13.4.4.3 JSP Expression: 13-13
13.4.4.4 JSP Comments: 13-14
13.4.4.5 JSP Directives : 13-14
13.4.4.6 JSP Actions 13-15
13.5 Servlet Lifecycle 13-16
13.5.1 The init() method 13-17
13.5.2 The service() method 13-17
13.5.3 The destroy() method 13-18
13.5.4 The working of servlet 13-18
13.6 Developing and Deploying Servlet, Exploring Deployment Descriptor (web.xml) 13-19
13.6.1 Create directory structure 13-19
13.6.2 Create a servlet 13-19
13.6.3 Compile the servlet 13-20
13.6.4 Create the Deployment Descriptor (web.xml) 13-21
13.6.5 Start the Server and Deploy the project 13-21
13.6.6 Access the Servlet 13-22
13.7 Handling Request and Response 13-22
13.7.1 HTTP Request 13-22
13.7.1.1 GET Vs. POST 13-23
13.7.1.2 Example: Reading form data using servlet 13-24
13.7.2 HTTP Response 13-26
