

<b>Chapter 1 : Functions and Limits</b>	<b>1-1 - 1-22</b>	<b>Chapter 3 : Applications of Derivative</b>	<b>3-1 - 3-47</b>
1.1 Introduction to Functions.....	1-2	3.1 Introduction.....	3-2
1.1.1 Some Important Definitions.....	1-2	3.2 Geometrical meaning of Derivatives (Slope, Gradient)....	3-2
1.1.2 Function.....	1-2	3.3 Examples.....	3-2
1.2 Types of Functions.....	1-3	3.4 Tangents and Normal.....	3-8
1.3 Examples.....	1-4	3.5 Maxima and Minima.....	3-19
1.4 Examples Based on Odd and Even Function.....	1-18	3.6 Radius of Curvature.....	3-36
1.5 Introduction to Limits.....	1-20	3.6.1 Radius of Curvature in Cartesian Form.....	3-37
1.6 Existence of Limits.....	1-20		
1.6.1 Uniqueness of Limit.....	1-21	<b>Chapter 4 : Integration</b>	<b>4-1 - 4-86</b>
1.7 Properties of Limits.....	1-21	4.1 Integration.....	4-2
1.8 Substitution.....	1-21	4.1.1 Indefinite Integral.....	4-2
1.9 List of Standard Important Formulae.....	1-21	4.1.2 Integration of Standard Function.....	4-2
		4.2 Rules of Integration.....	4-3
<b>Chapter 2 : Derivatives</b>	<b>2-1 - 2-84</b>	4.3 Solved Examples on Simple Integration.....	4-3
2.1 Introduction.....	2-2	4.4 Integration of Composite Function.....	4-9
2.2 Definition of Derivative.....	2-2	4.5 Integrals of Simple Algebraic Rational Functions.....	4-11
2.3 Geometrical Meaning of Derivatives.....	2-2	4.6 Integration by Trigonometric Transformation.....	4-14
2.4 Derivatives of Standard Functions.....	2-3	4.7 Integration by Substitution Method.....	4-24
2.4.1 Constant Function.....	2-3	4.7.1 Some Substitutions.....	4-24
2.4.2 Power Function.....	2-3	4.8 Solved Examples.....	4-25
2.4.3 Exponential Function.....	2-3	4.9 Integral of the Form.....	4-39
2.4.4 Logarithmic Function.....	2-4	4.9.1 Solved Example.....	4-40
2.4.5 Trigonometric Functions By using First Principle.....	2-4	4.10 Integration by Partial Fraction.....	4-42
2.4.6 Derivatives of Inverse Trigonometric Functions.....	2-6	4.11 Integral of the Form.....	4-57
2.5 Derivatives of Some Standard Functions.....	2-7	4.11.1 Examples.....	4-57
2.6 Rules of Differentiation.....	2-8	4.12 Integrals of the Form.....	4-62
2.6.1 Derivative of Sum.....	2-8	4.12.1 Integrals of the Form.....	4-63
2.6.2 Derivative of Difference.....	2-8	4.13 Integration by Parts.....	4-68
2.6.3 Examples.....	2-9	4.14 Generalized Rule of Integration by Parts.....	4-79
2.6.4 Derivative of Product.....	2-12		
2.6.5 Derivative of Quotient.....	2-16	<b>Chapter 5 : Definite Integration</b>	<b>5-1 - 5-42</b>
2.6.6 Derivatives of a Composite Functions (Chain Rule).....	2-22	5.1 Definite Integral.....	5-2
2.7 Composite Derivatives.....	2-22	5.2 Some Properties of Definite Integral.....	5-2
2.8 Derivatives of Inverse Functions.....	2-36	5.2.1 Examples.....	5-2
2.9 Derivatives of Inverse Trigonometric Functions by Suitable Substitution.....	2-37	5.3 Problems on Property of Definite Integration.....	5-13
2.10 Derivatives of Implicit Functions.....	2-45	5.4 Definite Integral by Method of Substitution.....	5-22
2.11 Logarithmic Differentiation.....	2-52	5.5 Integration by Parts.....	5-37
2.12 Derivatives of Parametric Functions.....	2-63	5.6 Examples.....	5-37
2.13 Derivative of One Function with respect to another Function.....	2-72		
2.14 Second Order Differentiation.....	2-81		

**Chapter 6 : Applications of Definite Integration****6-1 - 6-26**

6.1	Introduction .....	6-2
6.2	Area under the Curve as a Definite Integral.....	6-3
6.3	Examples .....	6-3
6.4	Area between Two Curves.....	6-14
6.4.1	Examples .....	6-14
6.5	Volume of a Solid of Revolution.....	6-20
6.5.1	Examples .....	6-21

**Chapter 7 : Differential Equation****7-1 - 7-40**

7.1	Introduction .....	7-2
7.2	Solved Examples .....	7-2
7.3	Formation of Differential Equation.....	7-6
7.3.1	General Solution .....	7-7
7.3.2	Particular Solution .....	7-7
7.4	Examples .....	7-7
7.5	Solution of Differential Equations of First Order and First Degree .....	7-13
7.6	Examples .....	7-14
7.7	Equation Reducible to Variable Separable Form.....	7-19

7.8	Solved Examples .....	7-20
7.9	Homogeneous Differential Equation .....	7-25
7.10	Linear Differential Equation.....	7-31

**Chapter 8 : Application of Differential Equations****8-1 - 8-13**

8.1	Rectilinear Motion Under Constant Acceleration .....	8-2
8.1.1	Examples .....	8-2
8.2	Motion Under Variable Acceleration .....	8-3
8.2.1	Examples .....	8-3
8.3	Applications of Differential Equations .....	8-8
8.3.1	Introduction .....	8-8
8.3.2	Simple Electrical Circuits .....	8-8
8.3.3	Kirchhoff's Law.....	8-8

**Chapter 9 : Probability Distribution****9-1 - 9-23**

9.1	Binomial Distribution .....	9-2
9.1.1	Examples .....	9-2
9.2	Poisson's Distribution .....	9-8
9.3	Normal Distribution .....	9-16
9.3.1	Graph of Normal Distribution .....	9-16
9.3.2	Properties of Normal Distribution .....	9-16
