UNIT I

Chapter 1: Overview of Construction Materials

1-1 to 1-22

Syllabus:

Scope of construction materials in Building Construction, Transportation Engineering, Environmental Engineering, Irrigation Engineering (applications only).

Selection of materials for different civil engineering structures on the basis of strength, durability, Eco friendly and economy.

Broad classification of materials - Sources of materials, Natural, Artificial - special, finishing and recycled.

1.1	Introduction
1.1.1	Purpose of Study of Construction Materials 1-1
1.2	Scope of Construction Material 1-1
1.2.1	Scope of Construction Materials in Building Construction
1.2.2	Scope of Construction Materials in Transportation
	Engineering
1.2.3	Scope of Construction Materials in Environmental
	Engineering
1.2.4	Scope of Construction Materials in Irrigation
	Engineering
1.3	Selection of Construction Materials 1-4
1.4	Classification of Materials 1-6
1.4.1	Natural Material1-7
1.4.2	Artificial Material 1-10
1.4.3	Special Material 1-11
1.4.4	Eco-friendly Material / Green Material / Recycled
	Material1-13
1.4.5	Finishing Material1-14

UNIT II

Chapter 2: Natural Construction Material 2-1 to 2-39

Syllabus:

Requirements of good building stone; general characteristics of stone; quarrying and dressing methods and tools for stone.

Structure of timber, general properties of good timber, seasoning, preservation and defects in timber and uses, use of bamboo in construction.

Asphalt, bitumen and tar used in construction, properties and their uses.

Properties of lime, its types and uses.

Types of soil and its suitability in construction.

Properties of sand and uses.

Classification of coarse aggregate according to sizes and its uses.

2.1	Introduction about Stone	2-1
2.1.1	Stone	2-1
2.1.2	Types of Stone	2-1
2.1.3	Requirements of Good Building Stone	2-3
2.1.4	General Characteristics of Stone	2-4
2.1.5	Quarrying of Stones	2-5
2.1.5.1	Definition	2-5
2.1.5.2	Selection of Site for Quarrying of Stones	2-5
2.1.5.3	Methods of Quarrying of Stones Quarrying Method are Classified Differently	
2.1.6	Dressing of Stones	2-7
2.1.6.1	Definition	2-7
2.1.6.2	Objectives of Dressing of Stones	2-7
2.1.6.3	Procedure of Dressing the Quarry Stones	2-7
2.1.6.4	Methods / Types of Dressings of Stones	2-8
2.1.7	Tools for Stone	2-10
2.1.7.1	Tools for Quarrying - Blasting	2-10
2.1.7.2	Tools for Dressing of stone	2-11
2.2	Timber	2-13
2.2.1	Definition	2-13
2.2.2	Structure of tree	2-13
2.2.3	Characteristics of good timbers	2-14
2.2.4	Seasoning of Timber	2-14
2.2.4.1	Advantages of Seasoned Timber	2-15
2.2.4.2	Types of Timber Seasoning	2-15
2.2.5	Defects in Timber	2-16
2.2.6	Preservation of Timber	2-19
2.2.7	Different Types of Timber and its uses	2-20
2.3	Aggregates	2-23
2.3.1	Types of Aggregates	2-24

3.1

2.3.2	Desirable Properties of Road Aggregate 2-24
2.3.3	Test of Road Aggregate2-24
2.4	Bituminous Material 2-27
2.4.1	Types of Bituminous Materials 2-27
2.5	Lime 2-31
2.5.1	Classification of Lime IS 712-1973 2-31
2.5.2	Properties of Lime for Use in Construction 2-31
2.5.3	Uses/Applications of Building Lime in Construction 2-32
2.6	Soil
2.6.1	Function of Soil2-32
2.6.2	Characteristic of a Subgrade Soil 2-33
2.6.3	Soil Classification Systems
2.6.4	Applications of Soil
2.7	Sand
2.7.1	Sources of sand
2.7.2	Classification of Sand
2.7.3	Properties of Good Sand 2-39
2.7.4	Use of Sand2-39
2.7.5	Requirement of Good Sand 2-39

UNIT III

Chapter 3: Artificial Construction Materials 3-1 to 3-44

Syllabus:

Constituents of Brick earth. Conventional / Traditional bricks. Modular and Standard bricks, Characteristics of good brick, Classification of burnt clay bricks and their suitability. Special bricks. Common Field tests on Bricks. Manufacturing process of burnt clay brick.

Flooring tiles - Types, uses

Manufacturing process of Cement-dry and wet (only flow chart), types of cement and its uses.

Pre-cast concrete blocks- hollow, solid, pavement blocks, balustrades and their uses.

Plywood, particle board, Veneers, laminated board and their

Types of glass : soda lime glass, lead glass and borosilicate glass and their uses.

Ferrous and non-ferrous metals and their uses..

3.1.1	Uses of Bricks
3.1.2	Types of Bricks
3.1.3	Constituents of Clay Bricks 3-7
3.1.4	The Harmful Substances Present in the Brick Earth 3-8
3.1.5	Characteristic of Good Bricks3-10
3.1.6	Common Field Test for Clay Bricks3-10
3.1.7	Primary Steps of Brick Manufacturing Process3-12
3.2	Tiles3-14
3.2.1	Types of Flooring Tiles3-14
3.2.2	Use of Flooring Tiles3-16
3.3	Cement3-16
3.3.1	Introduction3-16
3.3.2	Properties of Cement3-17
3.3.3	Types of Cement and their Uses3-17
3.3.4	Manufacturing of Cement3-20
3.4	Pre-cast Concrete Blocks3-23
3.4.1	Introduction3-23
3.4.2	Types of Pre-cast Concrete Blocks3-24
3.5	Plywood3-32
3.5.1	Types of Plywood3-32
3.5.2	Advantages of Plywood3-33
3.5.3	Disadvantages of Plywood3-34
3.5.4	Particle Board3-35
3.5.5	Uses of Particle Board3-35
3.5.6	Difference between Plywood and Particle Board3-37
3.6	Veneer3-37
3.6.1	Types of Veneer Wood3-38
3.6.2	Uses of Wood Veneer3-39
3.7	Laminated Board3-39
3.7.1	The Various Types of Laminates Boards and their
	Uses
3.8	Glass
3.8.1	Engineering Properties of Glass3-41
3.8.2	Various types of Glass3-41
3.9	Ferrous and Non - Ferrous Metals and their Uses3-43

UNIT IV

Chapter 4: Special Construction Materials 4-1 to 4-29

Syl	lah	110	
SVI	ıav	นอ	

Types of material and suitability in construction works of following materials: Water proofing, Termite proofing; Thermal and sound insulating materials.

Fibers - Types - Jute, Glass, Plastic Asbestos Fibers, (only uses).

Geopolymer cement : Geo-cement : properties, uses and applications.

4.1	Water Proofing Materials	4-1
4.1.1	Introduction	4-1
4.2	Methods of Water Proofing	4-1
4.2.1	Conventional System	4-2
4.2.2	Integral Water Proofing System	4-2
4.2.3	Advanced Technology or Use of Water Proofing Materials	4-2
4.3	Suitability of Water Proofing Materials	4-10
4.4	Damp Proofing Materials	4-10
4.4.1	Properties of Damp Proofing	4-11
4.4.2	Classification of damp proof materials	4-11
4.5	Termite Proofing	4-13
4.5.1	Termite Proofing Materials	4-13
4.6	Thermal Insulating Materials	4-17
4.6.1	Rock Wool	4-17
4.6.2	Flexible Blankets	4-18
4.6.3	Mineral Wool Slabs/Mineral Wool Board	4-18
4.6.4	Cork Board Slabs	4-19
4.7	Sound Insulating Materials	4-19
4.7.1	Types of Insulating Materials	4-20
4.7.2	Suitability of Sound Insulating Materials	4-22
4.7.3	Properties of Sound Insulating Material OR Requirement of Good Sound Insulating Material.	4-22
4.7.4	Need of Sound insulating material	4-23
4.7.5	Areas or Types of Building Where Sound Insulati	
4.8	Fibers	4-23
4.8.1	Types of fibers	4-23

4.9	Geopolymer Cement	4-27
4.9.1	Geo-cement	4-27
4.9.2	Properties of Geo-cement	4-27
4.9.3	Applications of Geopolymer Cement	4-28
4.9.4	Use of Geopolymer Cement	4-28
4.9.5	Advantages of Geopolymer Cement	4-29
	UNITV	

Chapter 5: Finishing Materials

5-1 to 5-15

Syllabus:

3

Lime Mortar, Cement Mortar, Special Mortars and their uses as plastering material.

Constituents and uses of POP (Plaster of Paris), POP finishing boards, sizes and uses.

Paints-Oil Paints, Distempers and Varnishes with their uses (situations where used).

(Situatio	ons where used).	
5.1	Plastering Materials	5-1
5.1.1	Mortar	5-1
5.1.2	Types of Mortar	5-2
5.1.3	Finishing Materials Used in Building Construction	5-5
5.2	Plaster of Paris (POP)	5-5
5.2.1	Constituents	5-5
5.2.2	Properties	5-5
5.2.3	Uses	5-6
5.2.4	Pop Finishing Board	5-6
5.3	Paints	5-6
5.3.1	Objective of Painting	5-6
5.3.2	Properties of Good Paint	5-6
5.3.3	Types of Paint	5-7
5.3.4	Distempers	5-10
5.3.5	Varnish	5-11
5.4	Suggestion for the Type of Paint to be used for Wall Surface	5-14
5.5	Difference between Paints, Varnishes and Distemper	5-14
5.5.1	Application of Paint	
5.5.2	Application of Distempers	
5.5.3	Applications of Varnishes	

UNIT VI

Chapter 6: Processed Construction Materials

6-1 to 6-15

Syllabus:

Industrial waste materials- Fly ash, Blast furnace slag, Granite and marble polishing waste and their uses.

Agro waste materials - Rice husk, Bagasse, coir fibres and their uses.

Special processed construction materials; Geosynthetic, Ferrocrete, Artificial timber, Artificial sand and their uses.

6.1	Introduction
6.2	Industrial Waste Material 6-1
6.2.1	Fly Ash 6-1
6.2.2	Blast Furnace Slag 6-2
6.2.3	Granite and Marble Polishing Waste 6-3
6.2.4	Construction Waste 6-4
6.2.5	Sawdust
6.2.6	Plastic6-5
6.2.7	Polymers 6-6
6.2.8	Rubber Waste 6-6
6.3	Agro and Wastes Material 6-7
6.3.1	Rice Husk 6-7
6.3.2	Bagasse 6-8
6.3.3	Coir Fibres 6-8
6.3.4	Straw 6-8

6.3.5	Coconut Tree Trunks 6-9
6.3.6	Areca Nut Tree Trunks 6-9
6.3.7	Coconut Leaf6-10
6.4	Need of Agro and Industrial Waste as a
	Construction Material6-10
6.5	Special Processed Construction Material6-10
6.5.1	Geosynthetic Materials6-10
6.5.2	Ferrocrete6-11
6.5.2.1	Properties of Ferro-Crete6-12
6.5.2.2	Applications of Ferrocrete6-12
6.5.2.3	Uses6-12
6.5.2.4	Availability6-12
6.5.2.5	Storage6-12
6.5.2.6	Conditions of use6-13
6.5.3	Artificial timber6-13
6.5.4	Adhesives Material6-13
6.5.5	Epoxy6-13
6.5.6	Artificial Sand6-14
6.5.6.1	Properties of Artificial Sand6-14
6.5.6.2	Advantages of Artificial Sand and its Suitability6-14
6.5.6.3	Uses of Sand6-15
6.5.6.4	Comparison between Natural Sand and Artificial
	Sand6-15
