

**Chapter 1 : Functions and Limits****1-1 - 1-22**

1.1	Introduction to Functions	1-2
1.1.1	Some Important Definitions	1-2
1.1.2	Function	1-2
1.2	Types of Functions	1-3
1.3	Examples	1-4
1.4	Examples Based on Odd and Even Function	1-18
1.5	Introduction to Limits	1-20
1.6	Existence of Limits	1-20
1.6.1	Uniqueness of Limit	1-21
1.7	Properties of Limits	1-21
1.8	Substitution	1-21
1.9	List of Standard Important Formulae	1-21

Chapter 2 : Derivatives**2-1 - 2-84**

2.1	Introduction	2-2
2.2	Definition of Derivative	2-2
2.3	Geometrical Meaning of Derivatives	2-2
2.4	Derivatives of Standard Functions	2-3
2.4.1	Constant Function	2-3
2.4.2	Power Function	2-3
2.4.3	Exponential Function	2-3
2.4.4	Logarithmic Function	2-4
2.4.5	Trigonometric Functions By using First Principle	2-4
2.4.6	Derivatives of Inverse Trigonometric Functions	2-6
2.5	Derivatives of Some Standard Functions	2-7
2.6	Rules of Differentiation	2-8
2.6.1	Derivative of Sum	2-8
2.6.2	Derivative of Difference	2-8
2.6.3	Examples	2-9
2.6.4	Derivative of Product	2-12
2.6.5	Derivative of Quotient	2-16
2.6.6	Derivatives of a Composite Functions (Chain Rule)	2-22
2.7	Composite Derivatives	2-22
2.8	Derivatives of Inverse Functions	2-36
2.9	Derivatives of Inverse Trigonometric Functions by Suitable Substitution	2-37
2.10	Derivatives of Implicit Functions	2-45

2.11	Logarithmic Differentiation	2-52
2.12	Derivatives of Parametric Functions	2-63
2.13	Derivative of One Function with respect to another Function	2-72
2.14	Second Order Differentiation	2-81

Chapter 3 : Applications of Derivative**3-1 - 3-47**

3.1	Introduction	3-2
3.2	Geometrical meaning of Derivatives (Slope, Gradient).....	3-2
3.3	Examples	3-2
3.4	Tangents and Normal	3-8
3.5	Maxima and Minima	3-19
3.6	Radius of Curvature	3-36
3.6.1	Radius of Curvature in Cartesian Form	3-37

Chapter 4 : Integration**4-1 - 4-86**

4.1	Integration	4-2
4.1.1	Indefinite Integral	4-2
4.1.2	Integration of Standard Function	4-2
4.2	Rules of Integration	4-3
4.3	Solved Examples on Simple Integration	4-3
4.4	Integration of Composite Function	4-9
4.5	Integrals of Simple Algebraic Rational Functions	4-11
4.6	Integration by Trigonometric Transformation	4-14
4.7	Integration by Substitution Method	4-24
4.7.1	Some Substitutions	4-24
4.8	Solved Examples	4-25
4.9	Integral of the Form	4-39
4.9.1	Solved Example	4-40
4.10	Integration by Partial Fraction	4-42
4.11	Integral of the Form	4-57
4.11.1	Examples	4-57
4.12	Integrals of the Form	4-62
4.12.1	Integrals of the Form	4-63
4.13	Integration by Parts	4-68
4.14	Generalized Rule of Integration by Parts	4-79

Chapter 5 : Definite Integration**5-1 - 5-42**

5.1	Definite Integral	5-2
5.2	Some Properties of Definite Integral	5-2
5.2.1	Examples	5-2
5.3	Problems on Property of Definite Integration	5-13
5.4	Definite Integral by Method of Substitution	5-22
5.5	Integration by Parts	5-37
5.6	Examples	5-37

**Chapter 6 : Applications of Definite Integration****6-1 - 6-26**

6.1	Introduction	6-2
6.2	Area under the Curve as a Definite Integral	6-3
6.3	Examples	6-3
6.4	Area between Two Curves	6-14
6.4.1	Examples	6-14
6.5	Volume of a Solid of Revolution	6-20
6.5.1	Examples	6-21

Chapter 7 : Differential Equation**7-1 - 7-40**

7.1	Introduction	7-2
7.2	Solved Examples	7-2
7.3	Formation of Differential Equation	7-6
7.3.1	General Solution	7-7
7.3.2	Particular Solution	7-7
7.4	Examples	7-7
7.5	Solution of Differential Equations of First Order and First Degree	7-13
7.6	Examples	7-14
7.7	Equation Reducible to Variable Separable Form	7-19
7.8	Solved Examples	7-20
7.9	Homogeneous Differential Equation	7-25
7.10	Linear Differential Equation	7-31

Chapter 8 : Application of Differential Equations**8-1 - 8-13**

8.1	Rectilinear Motion Under Constant Acceleration	8-2
8.1.1	Examples	8-2
8.2	Motion Under Variable Acceleration	8-3
8.2.1	Examples	8-3
8.3	Applications of Differential Equations	8-8
8.3.1	Introduction	8-8
8.3.2	Simple Electrical Circuits	8-8
8.3.3	Kirchhoff's Law	8-8

Chapter 9 : Solutions of Algebraic Equations 9-1 - 9-24

9.1	Introduction	9-2
9.2	Types of Numerical Methods	9-2
9.3	Bisection Method	9-2
9.4	Regula-Falsi (False Position) Method	9-8
9.5	Newton-Raphson Method	9-16

Chapter 10 : Numerical Solutions of Simultaneous Equations**10-1 - 10-22**

10.1	Introduction	10-2
10.2	Gauss Elimination Method	10-2
10.3	Gauss-Seidel Method	10-8
10.4	Jacobi Method	10-16
