

<b>Chapter 1 : Functions and Limits</b>	<b>1-1 - 1-22</b>	2.11	Logarithmic Differentiation .....	2-52	
1.1	Introduction to Functions .....	1-2	2.12	Derivatives of Parametric Functions .....	2-63
1.1.1	Some Important Definitions .....	1-2	2.13	Derivative of One Function with respect to another Function .....	2-72
1.1.2	Function .....	1-2	2.14	Second Order Differentiation .....	2-81
1.2	Types of Functions .....	1-3	<b>Chapter 3 : Applications of Derivative</b>		
1.3	Examples .....	1-4	<b>3-1 - 3-47</b>		
1.4	Examples Based on Odd and Even Function .....	1-18	3.1	Introduction .....	3-2
1.5	Introduction to Limits .....	1-20	3.2	Geometrical meaning of Derivatives (Slope, Gradient).....	3-2
1.6	Existence of Limits .....	1-20	3.3	Examples .....	3-2
1.6.1	Uniqueness of Limit.....	1-21	3.4	Tangents and Normal .....	3-8
1.7	Properties of Limits .....	1-21	3.5	Maxima and Minima.....	3-19
1.8	Substitution .....	1-21	3.6	Radius of Curvature.....	3-36
1.9	List of Standard Important Formulae.....	1-21	3.6.1	Radius of Curvature in Cartesian Form .....	3-37
<b>Chapter 2 : Derivatives</b>		<b>2-1 - 2-84</b>		<b>Chapter 4 : Integration</b>	
<b>2-1 - 2-84</b>		<b>4-1 - 4-86</b>		<b>4-1 - 4-86</b>	
2.1	Introduction .....	2-2	4.1	Integration .....	4-2
2.2	Definition of Derivative .....	2-2	4.1.1	Indefinite Integral .....	4-2
2.3	Geometrical Meaning of Derivatives .....	2-2	4.1.2	Integration of Standard Function.....	4-2
2.4	Derivatives of Standard Functions .....	2-3	4.2	Rules of Integration.....	4-3
2.4.1	Constant Function .....	2-3	4.3	Solved Examples on Simple Integration .....	4-3
2.4.2	Power Function .....	2-3	4.4	Integration of Composite Function .....	4-9
2.4.3	Exponential Function .....	2-3	4.5	Integrals of Simple Algebraic Rational Functions .....	4-11
2.4.4	Logarithmic Function.....	2-4	4.6	Integration by Trigonometric Transformation .....	4-14
2.4.5	Trigonometric Functions By using First Principle.....	2-4	4.7	Integration by Substitution Method .....	4-24
2.4.6	Derivatives of Inverse Trigonometric Functions.....	2-6	4.7.1	Some Substitutions.....	4-24
2.5	Derivatives of Some Standard Functions.....	2-7	4.8	Solved Examples .....	4-25
2.6	Rules of Differentiation.....	2-8	4.9	Integral of the Form.....	4-39
2.6.1	Derivative of Sum.....	2-8	4.9.1	Solved Example.....	4-40
2.6.2	Derivative of Difference.....	2-8	4.10	Integration by Partial Fraction .....	4-42
2.6.3	Examples .....	2-9	4.11	Integral of the Form.....	4-57
2.6.4	Derivative of Product.....	2-12	4.11.1	Examples .....	4-57
2.6.5	Derivative of Quotient .....	2-16	4.12	Integrals of the Form.....	4-62
2.6.6	Derivatives of a Composite Functions (Chain Rule) .....	2-22	4.12.1	Integrals of the Form.....	4-63
2.7	Composite Derivatives .....	2-22	4.13	Integration by Parts.....	4-68
2.8	Derivatives of Inverse Functions.....	2-36	4.14	Generalized Rule of Integration by Parts .....	4-79
2.9	Derivatives of Inverse Trigonometric Functions by Suitable Substitution .....	2-37	<b>Chapter 5 : Definite Integration</b>		
2.10	Derivatives of Implicit Functions .....	2-45	<b>5-1 - 5-42</b>		
			5.1	Definite Integral.....	5-2
			5.2	Some Properties of Definite Integral .....	5-2
			5.2.1	Examples .....	5-2
			5.3	Problems on Property of Definite Integration .....	5-13
			5.4	Definite Integral by Method of Substitution .....	5-22
			5.5	Integration by Parts.....	5-37
			5.6	Examples .....	5-37

**Chapter 6 : Applications of Definite Integration****6-1 - 6-26**

6.1	Introduction .....	6-2
6.2	Area under the Curve as a Definite Integral .....	6-3
6.3	Examples .....	6-3
6.4	Area between Two Curves .....	6-14
6.4.1	Examples .....	6-14
6.5	Volume of a Solid of Revolution .....	6-20
6.5.1	Examples .....	6-21

**Chapter 7 : Differential Equation****7-1 - 7-40**

7.1	Introduction .....	7-2
7.2	Solved Examples .....	7-2
7.3	Formation of Differential Equation .....	7-6
7.3.1	General Solution .....	7-7
7.3.2	Particular Solution .....	7-7
7.4	Examples .....	7-7
7.5	Solution of Differential Equations of First Order and First Degree .....	7-13
7.6	Examples .....	7-14
7.7	Equation Reducible to Variable Separable Form .....	7-19
7.8	Solved Examples .....	7-20
7.9	Homogeneous Differential Equation .....	7-25
7.10	Linear Differential Equation .....	7-31

**Chapter 8 : Application of Differential Equations****8-1 - 8-13**

8.1	Rectilinear Motion Under Constant Acceleration .....	8-2
8.1.1	Examples .....	8-2
8.2	Motion Under Variable Acceleration .....	8-3
8.2.1	Examples .....	8-3
8.3	Applications of Differential Equations .....	8-8
8.3.1	Introduction .....	8-8
8.3.2	Simple Electrical Circuits .....	8-8
8.3.3	Kirchhoff's Law .....	8-8

**Chapter 9 : Solutions of Algebraic Equations****9-1 - 9-24**

9.1	Introduction .....	9-2
9.2	Types of Numerical Methods .....	9-2
9.3	Bisection Method .....	9-2
9.4	Regula-Falsi (False Position) Method .....	9-8
9.5	Newton-Raphson Method .....	9-16

**Chapter 10 : Numerical Solutions of Simultaneous Equations****10-1 - 10-22**

10.1	Introduction .....	10-2
10.2	Gauss Elimination Method .....	10-2
10.3	Gauss-Seidel Method .....	10-8
10.4	Jacobi Method .....	10-16
