

1.13.2 Classification of Capacitors	1-14	1.23.8 Phase	1-28
1.13.3 Dielectric Materials used for Capacitors	1-15	1.23.9 Wavelength	1-28
1.14 Capacitors Specification	1-15	1.24 Types of Signals Sinusoidal, Triangular and Square	1-29
1.15 Types of Fixed Capacitors and their Applications	1-16	1.24.1 Time and Frequency Domain Representation of Signals	1-29
1.16 Colour Coding of Capacitors	1-17	1.25 Introduction to Integrated Circuits	1-30
1.16.1 Using Numerals	1-17	1.25.1 Disadvantages of Discrete Circuits	1-30
1.16.2 Using Colour Band System	1-18	1.26 Integrated Circuits	1-30
1.16.3 By Means of Characters	1-18	1.26.1 Classification of Integrated Circuits	1-30
1.16.4 Directly Printed	1-18	1.26.2 Classification Based on the Applications (Linear and Digital)	1-31
1.17 Variable Capacitors	1-19	1.27 Scale of Integration or Level of Integration	1-31
1.17.1 Symbol and Units	1-19	1.28 Advantages of Integrated Circuits	1-32
1.17.2 Applications of Variable Capacitors	1-19	1.29 Disadvantages of Integrated Circuits	1-32
1.18 Inductors	1-19	1.30 Uses of ICs	1-32
1.18.1 Construction and Symbol	1-20	1.31 Difference between Linear and Non-linear ICs.....	1-32
1.18.2 Types of Inductor	1-20	1.32 MSBTE Questions and Answers	1-33
1.18.3 Types of Fixed Inductor	1-20	1.33 I-Scheme Solved Examples	1-37
1.18.4 Materials used for Inductor	1-20	1.34 I-Scheme Questions and Answers	1-38
1.18.5 Applications of Fixed Inductors	1-20		
1.18.6 Choke	1-21		
1.19 Classification of Inductors	1-21	• Review Questions.....	1-33
1.20 Colour Code of Inductors	1-21		
1.20.1 Four Band Colour Code	1-21	Unit - II	
1.20.2 Five Band Colour Code	1-22		
1.21 Variable Inductors	1-23		
1.21.1 Application of Variable Inductors	1-23		
1.22 Voltage and Current Sources	1-24		
1.22.1 Independent Voltage Sources	1-24		
1.22.2 Current Sources	1-25		
1.23 Signal Waveform	1-26		
1.23.1 Definition of Waveform	1-26	2.1 Introduction to p-n Junction	2-2
1.23.2 Types of AC Waveforms	1-26	2.1.1 Formation of P-N Junction	2-2
1.23.3 Waveform of Sinusoidal AC	1-26	2.1.2 Formation of the Depletion Region	2-2
1.23.4 Cycle	1-27	2.1.3 Barrier Potential or Junction Potential (V_j)	2-3
1.23.5 Time Period or Periodic Time (T)	1-28	2.2 p-n Junction Diode	2-4
1.23.6 Frequency	1-28	2.3 Biasing the p-n Junction.....	2-4
1.23.7 Amplitude	1-28	2.3.1 Forward Bias	2-5

Chapter 2 : Semiconductor Diode**2-1 to 2-26**

Syllabus : Symbol, Construction and working principle of P-N junction diode, Zener diode working principle, Symbol, Construction and working principle of light emitting diode (LED).

2.1 Introduction to p-n Junction	2-2
2.1.1 Formation of P-N Junction	2-2
2.1.2 Formation of the Depletion Region	2-2
2.1.3 Barrier Potential or Junction Potential (V_j)	2-3
2.2 p-n Junction Diode	2-4
2.3 Biasing the p-n Junction.....	2-4
2.3.1 Forward Bias	2-5
2.3.2 Voltage Drop Across the Forward Biased Diode (V_F)	2-6

2.3.3	Reverse Bias	2-6
2.3.4	Breakdown in the Reverse Biased Diode (Breakdown Voltage)	2-8
2.4	The Volt-ampere (V-I) Characteristics of a Diode ..	2-9
2.4.1	Forward Characteristics of p-n Junction Diode	2-9
2.4.2	Reverse Characteristics of a Diode (Breakdown Voltage)	2-10
2.4.3	Complete V-I Characteristics of a Diode	2-11
2.4.4	Complete V-I Characteristics of Silicon and Germanium Diodes	2-11
2.4.5	Comparison of Silicon and Germanium Diodes	2-12
2.4.6	Mathematical Expression for the Diode Current (V-I Characteristics)	2-12
2.4.7	Effect of Temperature on the V-I Characteristics	2-12
2.4.8	Circuit Diagram for Characteristics	2-12
2.4.9	Ideal Characteristics	2-13
2.4.10	Comparison of Ideal Diode and Real Diode	2-14
2.5	Applications of p-n Junction Diode	2-14
2.6	Zener Diode	2-14
2.6.1	Operating Principle	2-14
2.6.2	Circuit Symbol and Biasing of a Zener Diode	2-14
2.6.3	V-I Characteristics of a Zener Diode	2-15
2.6.4	Circuit Diagram for the V-I Characteristics	2-16
2.7	Breakdown Mechanisms in Zener Diode	2-17
2.7.1	Zener Breakdown	2-17
2.7.2	Avalanche Breakdown in Zener Diodes	2-17
2.7.3	Comparison of Zener Diode and p-n Junction Diode	2-18
2.8	Applications of Zener Diode	2-18
2.9	Light Emitting Diodes (LED)	2-18
2.9.1	Construction of LED	2-19
2.9.2	Principle of LED Operation	2-19
2.9.3	Applications of LEDs	2-20

2.9.4 Infra Red Light Emitting Diode
(IR-LED)

2-20

2.9.5 Comparison of Conventional Diode and
LED

2-21

2.10 MSBTE Questions and Answers

2-21

2.11 I-Scheme Questions and Answers

2-26

Unit - II

Chapter 3 : Rectifiers, Filters and Voltage Regulators

3-1 to 3-44

Syllabus : Rectifiers Half wave, Full wave and Bridge rectifiers, Working principle, Circuit diagram, Performance parameters PIV, Ripple factor, Efficiency, Need of filters, Circuit diagram and working of L, C and . filters. Zener diode as voltage regulator, Working principle and block diagram of a regulated power supply.

3.1	Basic Block Diagram of Regulated Power Supply ..	3-2
3.1.1	Need of Regulated Power Supply	3-3
3.1.2	Advantages of Regulated Power Supplies	3-3
3.1.3	Applications of Regulated Power Supplies	3-3
3.2	Rectifiers	3-3
3.2.1	Rectification	3-3
3.2.2	Rectifiers	3-3
3.2.3	Polarities of Transformer Voltages	3-4
3.2.4	Types of Rectifiers	3-4
3.3	Half Wave Rectifier (HWR)	3-4
3.3.1	Operation of the HWR	3-5
3.3.2	Analysis of Half Wave Rectifier	3-6
3.3.3	DC or Average Load Current (I_{Ldc})	3-6
3.3.4	DC or Average Load Voltage (V_{Ldc})	3-6
3.3.5	AC or RMS Load Current (I_{Lrms})	3-6
3.3.6	AC or RMS Value of Load Voltage (V_{Lrms})	3-6
3.3.7	Ripple Factor (RF)	3-7
3.3.8	DC Output Power (P_{Ldc})	3-7
3.3.9	AC Input Power	3-7

3.3.10 Rectification Efficiency or Power	3-7	3.9.1 Operation of FWR with a Shunt Capacitor Filter	3-22
Conversion Efficiency		3.9.2 Ripple Factor and DC Output Voltage	3-23
3.3.11 Transformer Utilization Factor (TUF)	3-8	3.9.3 Dependence of Ripple Factor on the Value of Load	3-24
3.3.12 Peak Inverse Voltage (PIV)	3-8	3.9.4 Advantages of Capacitor Input Filter	3-24
3.3.13 Ripple Frequency	3-9	3.9.5 Disadvantages (Limitations)	3-24
3.3.14 Disadvantages of Half Wave Rectifier	3-9	3.9.6 HWR with Shunt Capacitor Filter	3-24
3.3.15 Advantages of HWR	3-9	3.9.7 Bridge Rectifier with Shunt Capacitor Filter	3-24
3.3.16 Applications of HWR	3-9	3.10 Series Inductor Filter (Choke Input Filter) or L Filter.	3-25
3.4 Examples on Half Wave Rectifier	3-9	3.10.1 Operation of the Circuit and Waveforms	3-25
3.5 Full Wave Rectifier with Center Tapped Transformer	3-10	3.10.2 Expression for the Ripple Factor	3-25
3.5.1 Operation of FWR	3-11	3.10.3 Dependence of Ripple Factor on Load	3-26
3.5.2 Average Load Current (I_{Ldc})	3-12	3.10.4 Advantages of Series Inductor Filter	3-26
3.5.3 Average Load Voltage (V_{Ldc})	3-13	3.10.5 Disadvantages	3-26
3.5.4 RMS Load Current (I_{Lrms})	3-13	3.10.6 Comparison of Shunt Capacitor and Series Inductor Filters	3-26
3.5.5 RMS Load Voltage (V_{Lrms})	3-13	3.10.7 HWR with Series Inductor Filter	3-27
3.5.6 Ripple Factor (RF)	3-13	3.10.8 Bridge Rectifier with Series Inductor Filter	3-27
3.5.7 DC Output Power (P_{Ldc})	3-14	3.11 LC Filter	3-27
3.5.8 AC Input Power (P_{ac})	3-14	3.11.1 Role of the Bleeder Resistance (R_B)	3-27
3.5.9 Rectifier Efficiency	3-14	3.11.2 Expression for the Ripple Factor	3-28
3.5.10 Peak Inverse Voltage (PIV)	3-14	3.11.3 Dependence of Ripple Factor on the Load	3-28
3.5.11 Ripple Frequency	3-14	3.11.4 Advantages of LC Filter	3-28
3.5.12 Advantages of Full Wave Rectifier	3-15	3.11.5 Disadvantages of LC Filter	3-28
3.5.13 Disadvantages of Full Wave Rectifier	3-15	3.11.6 LC Filter with Half Wave Rectifier	3-28
3.5.14 Applications of FWR	3-15	3.11.7 LC Filter with Bridge Rectifier	3-28
3.5.15 Solved Example on FWR	3-15	3.11.8 π Type Filter (CLC Filter)	3-28
3.6 Full Wave Bridge Rectifier	3-15	3.11.9 Comparison of C, L, LC and π Filters	3-30
3.6.1 Operation of the Bridge Rectifier	3-16	3.12 Introduction to Voltage Regulators	3-31
3.6.2 Performance Parameter of a Bridge Rectifier	3-17	3.12.1 Unregulated Power Supply	3-31
3.6.3 Advantages of Bridge Rectifier	3-18	3.12.2 Need of Regulator	3-31
3.6.4 Disadvantages of Bridge Rectifier	3-18	3.12.3 Voltage Regulation (or Voltage Regulation Factor)	3-31
3.6.5 Applications of Bridge Rectifier	3-18	3.12.4 Factors Affecting the Output Voltage	3-31
3.6.6 Comparison of Rectifying Circuits	3-19		
3.7 Need of Filter Circuits	3-20		
3.8 Types of Filters (Classification of Filters)	3-21		
3.9 Capacitor Input Filter (Shunt Capacitor Filter) or C Filter	3-21		

3.12.5	Load Regulation	3-32
3.12.6	Line Regulation or Source Regulation	3-32
3.13	Zener Diode as a Voltage Regulator	3-33
3.13.1	Regulating Action with a Varying Input Voltage (Constant I_L)	3-34
3.13.2	Regulating Action with a Varying Load (V_{in} Constant)	3-34
3.13.3	Limitations of Zener Regulators	3-35
3.13.4	Merits of Zener Regulator	3-35
3.13.5	Applications of Zener Regulator	3-35
3.14	MSBTE Questions and Answers	3-39
3.15	I-Scheme Questions and Answers	3-44
• Review Questions.....		3-38

Unit – III**Chapter 4 : Bipolar Junction Transistor 4-1 to 4-44**

Syllabus : Unipolar and Bipolar devices, Symbol, Construction and working principle of NPN transistor, Transistor as switch and amplifier, CE, CB and CC configurations, Regions – Cut-off, Saturation and Active region, Transistor parameters -Alpha, Beta, Input and output resistances and relation between alpha and beta, Transistor biasing - DC load line, Q-point and Fixed bias and voltage divider biasing, RC coupled amplifier.

4.1	Introduction to Bipolar Junction Transistors	4-2
4.1.1	Advantages of a Transistor	4-2
4.1.2	Transistor Definition	4-2
4.1.3	Why is it called a "Bipolar" Transistor ?	4-2
4.1.4	Types and Symbols of Transistors	4-2
4.2	Construction of a BJT	4-3
4.2.1	An Unbiased Transistor	4-3
4.3	Transistor Biasing in the Active Region	4-4
4.4	Operation of NPN Transistor	4-4
4.4.1	Operation of PNP Transistor	4-6
4.5	Transistor Currents	4-7
4.5.1	Circuit Symbols and Conventions	4-7
4.6	Transistor Configurations	4-7
4.7	Common Base (CB) Configuration	4-7
4.7.1	Current Relations in CB Configuration	4-8
4.7.2	Features of CB Configuration	4-9
4.8	Common Emitter (CE) Configuration	4-9

4.8.1	Current Relations in CE Configuration	4-10
4.8.2	Reverse Leakage Current in CE Configuration (I_{CEO})	4-10
4.8.3	Current Gain (β)	4-10
4.8.4	Relation between α_{dc} and β_{dc}	4-11
4.8.5	Input Characteristics	4-11
4.8.6	Output Characteristics	4-12
4.8.7	Experimental Setup to Plot CE Characteristics	4-13
4.8.8	Features of CE Configuration	4-14
4.8.9	Typical Junction Voltages	4-14
4.9	Common Collector (CC) Configuration	4-15
4.9.1	Practical Way to Draw Common Collector Configuration	4-15
4.9.2	Features of CC Configuration	4-16
4.10	Comparison of Configurations	4-17
4.11	Solved Examples	4-17
4.12	Specifications of a Transistor	4-19
4.13	Transistor Applications	4-19
4.14	Need of Biasing	4-19
4.14.1	Requirements of Transistor Biasing	4-20
4.15	Transistor Biasing	4-20
4.15.1	DC Load Line	4-20
4.15.2	The Quiescent Point (Q Point) or Bias Point or Operating Point	4-21
4.15.3	Selection of Q Point	4-21
4.15.4	Factors Affecting the Stability of Q Point	4-22
4.16	Need of Bias Stabilization	4-22
4.16.1	Q Point Instability due to Temperature	4-22
4.16.2	Q Point Instability due to Changes in β_{dc}	4-22
4.16.3	Q Point Instability due to Variation in Parameters from One Device to Other ...	4-23
4.16.4	Stability Factors	4-23
4.16.5	Stabilization Techniques (Types of Biasing Circuits)	4-23
4.16.6	Steps to Obtain the DC Operating Point	4-23

4.17	Fixed Bias Circuit	4-24
4.17.1	Stabilization of Q Point	4-24
4.17.2	Advantages of Fixed Bias Circuit	4-24
4.17.3	Disadvantages of Fixed Bias Circuit	4-24
4.18	Voltage Divider Bias or Self Bias or Potential Divider Bias	4-25
4.18.1	Advantages of Voltage Divider Bias Circuit	4-26
4.18.2	Disadvantages of Voltage Divider Bias Circuit	4-26
4.19	Concept of Amplification and Definition of Amplifier	4-26
4.20	Block Diagram of an Amplifier	4-26
4.20.1	Amplifier Characteristics	4-27
4.21	Classification Depending on the Type of Coupling	4-27
4.22	Transistor as an Amplifier	4-27
4.22.1	Transistor as a Current Amplifier	4-27
4.22.2	Transistor as a Voltage Amplifier	4-28
4.23	Single Stage RC Coupled CE Amplifier	4-28
4.23.1	Circuit Components their Functions and Selection Criteria	4-29
4.23.2	Operation of the RC Coupled Amplifier	4-30
4.24	Transistor as a Switch	4-32
4.24.1	Applications of Transistor as a Switch	4-33
4.25	MSBTE Questions and Answers	4-34
4.26	I-Scheme Solved Examples	4-38
4.27	I-Scheme Questions and Answers	4-39
• Review Questions		4-33

Unit - IV**Chapter 5 : Field Effect Transistors 5-1 to 5-24**

Syllabus : FET types : JFET and MOSFET, Classification of JFET, Symbol, Construction and working principle of N-channel and P- channel JFET, Drain and transfer characteristics of JFET, JFET parameters : DC and AC drain resistance, Transconductance, Amplification factor, Symbol, Construction and working principle of MOSFET.

5.1	Introduction to Junction Field Effect Transistor (JFET)	5-2
5.1.1	Voltage Controlled or Current Controlled ?	5-2
5.1.2	Unipolar or Bipolar ?	5-2
5.1.3	Advantages of JFET over BJT	5-2
5.1.4	Disadvantage of JFET	5-3
5.1.5	Classification of Field Effect Transistors	5-3
5.1.6	Construction of an n-Channel JFET	5-3
5.1.7	Construction of p-channel JFET	5-4
5.1.8	Unbiased JFET	5-4
5.1.9	Biased JFET (Working of n-channel JFET)	5-5
5.2	Characteristics of JFET	5-6
5.2.1	Drain Characteristics (Output Characteristics)	5-6
5.2.2	Pinch off Voltage (V_P)	5-8
5.2.3	Transfer Characteristics (Mutual Characteristics)	5-8
5.3	p-channel JFET	5-9
5.4	Comparison of JFET and BJT	5-10
5.5	Parameters of JFET	5-10
5.5.1	DC Drain Resistance	5-11
5.5.2	Dynamic (AC) Drain Resistance (r_d)	5-11
5.5.3	Transconductance or Mutual Conductance (g_m)	5-11
5.5.4	Amplification Factor (μ)	5-12
5.5.5	Relation between the Parameters	5-12
5.5.6	Input Resistance	5-12
5.5.7	Applications of JFET	5-12
5.6	MOSFETs	5-13
5.7	Depletion Type MOSFET (D MOSFET)	5-13
5.7.1	Basic Construction	5-13
5.7.2	Working Principle of Depletion MOSFET	5-14
5.7.3	p-channel Depletion Type MOSFET	5-15
5.7.4	Symbols of n and p-type Depletion MOSFETs.....	5-15
5.8	Enhancement MOSFET	5-15

5.8.1	n-Channel EMOSFET	5-16
5.8.2	Operation of n - channel Enhancement MOSFET	5-16
5.8.3	p-channel Enhancement Type MOSFETs	5-17
5.8.4	Symbols of Enhancement MOSFET	5-17
5.8.5	Advantages of MOSFETs	5-17
5.8.6	Disadvantages	5-17
5.8.7	Applications of EMOSFET	5-18
5.8.8	Applications of DMOSFET	5-18
5.9	Comparisons	5-18
5.9.1	Comparison of DMOSFET and EMOSFET	5-18
5.9.2	Comparison of BJT, JFET and MOSFET	5-18
5.10	MSBTE Questions and Answers	5-19
5.11	I-Scheme Solved Examples	5-23
5.12	I-Scheme Questions and Answers	5-23
• Review Questions.....		5-19

Unit - V**Chapter 6 : Sensors and Transducers 6-1 to 6-28**

Syllabus : Working of sensors and transducers, Selection criteria for transducers, Active and passive transducers, Inductive, Capacitive, Resistive pressure and piezoelectric transducers, Thermocouple and proximity sensors, Photodiode and phototransistor transducer.

6.1	Introduction	6-2
6.1.1	Basic Instrumentation System	6-2
6.1.2	Transducer	6-3
6.1.3	Sensors	6-3
6.2	Classification of Transducers	6-3
6.2.1	Active Transducers	6-3
6.2.2	Passive Transducers	6-3
6.2.3	Primary or Secondary Transducers	6-4
6.3	Characteristics (Parameters) of a Transducer	6-5
6.4	Selection Criteria of Transducer	6-5
6.5	Resistive Transducer	6-6
6.5.1	Potentiometer	6-6

6.5.2	Advantages of Resistance Potentiometers	6-7
6.5.3	Disadvantages	6-7
6.5.4	Variable Resistance Transducers for Displacement Measurement	6-8
6.5.5	Measurement of Angular Displacement	6-8
6.5.6	Potentiometric Pressure Transducer	6-8
6.6	Strain Gauge Transducer	6-8
6.6.1	Types of Strain Gauges	6-9
6.6.2	Unbonded Strain Gauge	6-9
6.6.3	Bonded Strain Gauges	6-9
6.6.4	Foil Gauges	6-9
6.6.5	Semiconductor Strain Gauge	6-10
6.7	Inductive Transducers	6-10
6.7.1	Transducers Working on the Principle of Variation of Self Inductance	6-11
6.7.2	Variable Reluctance Inductive Transducer	6-11
6.7.3	Transducers Operating on the Principle of Change in Mutual Inductance	6-12
6.7.4	Differential Output Transducers	6-12
6.7.5	Eddy Current type Inductive Transducers	6-13
6.7.6	Pressure Inductive Transducer	6-13
6.7.7	Variable Reluctance (Inductive) Transducer for Displacement Measurement	6-13
6.7.8	Linear Variable Differential Transformer (LVDT)	6-14
6.7.9	Load Cell (Pressure Cell)	6-16
6.8	Capacitive Transducers (Pressure)	6-16
6.8.1	Capacitive Pressure Transducer	6-17
6.8.2	Advantage	6-17
6.8.3	Disadvantages	6-17
6.8.4	Applications	6-17
6.9	Piezoelectric Pressure Transducers	6-17
6.10	Thermocouples	6-18
6.10.1	Thermocouple Materials	6-19
6.10.2	Comparison of Temperature Transducers	6-19

6.11	Proximity Sensors	6-20	6.13	Phototransistor	6-23
6.12	Photodiode	6-21	6.13.1	Construction and Biasing	6-23
6.12.1	Construction and Operation	6-21	6.13.2	Advantages of a Phototransistor	6-23
6.12.2	Photodiode Characteristics	6-22	6.13.3	Disadvantages of a Phototransistor	6-24
6.12.3	Advantages of Photodiode	6-22	6.13.4	Applications of Phototransistor	6-24
6.12.4	Disadvantages of Photodiode	6-22	6.14	I-Scheme Questions and Answers	6-25
6.12.5	Applications of Photodiode	6-22	•	Review Questions	6-24
6.12.6	Other Applications	6-22	•	Appendix-A :	A-1 to A-4
