

Unit I

Chapter 1 : Wiring Components, Tools & Safety Devices 1-1 to 1-56

Syllabus : IE rules of safety.

Safety Tools used in wiring : Pliers, nose pliers, cutter cum insulation remover, screw driver, tester, test lamp, crimping tool, continuity tester, wire gauge, knife.

Accessories : safety hand gloves, safety boots, safety goggles, safety rubber mats.

Components with specifications used in wiring systems : different types of iron clad switches, DBs, switches, plugs, sockets, MCBs, RCBs, ELCBs, holders, wires, cables.

1.1	IE Rules of Safety.....	1-1
1.1.1	Objectives of Safety [Need for following Safety Rules].....	1-3
1.1.2	Precaution to be taken by every House Holder using Electricity for Domestic Purpose and for Domestic Appliances.....	1-4
1.2	Safety Tools used in Wiring.....	1-5
1.2.1	Precautions to be taken in Using / Handling Tools.....	1-5
1.2.2	Detailed Study of Tools, Construction uses and Care / Maintenance	1-6
1.3	Accessories.....	1-10
1.4	Different Components with Specifications used in Wiring System.....	1-14
1.4.1	Symbols used in Electrical units	1-14
1.4.2	Wires and Cables	1-21
1.4.2.1	Wire Joining	1-23
1.4.3	Different Types of Switches.....	1-26
1.4.3.1	Ceiling Roses	1-29
1.4.3.2	Mounting Blocks.....	1-29
1.4.3.3	Socket Out-lets.....	1-29
1.4.4	Plugs	1-30
1.4.4.1	Distribution Fuse Boards and Boxes.....	1-30
1.4.5	Main Switches (Iron Clad Switches)	1-31
1.4.6	Lamp Holders.....	1-32
1.4.7	Connectors / Adopters.....	1-33
1.5	MCB (Miniature Circuit Breaker)	1-34

1.5.1	Functions of MCB.....	1-35
1.5.2	Comparison between MCB and Switch.....	1-35
1.5.3	Specification of MCB	1-36
1.5.4	Applications of MCB	1-36
1.5.5	Detailed MCB Specification	1-36
1.6	Cables.....	1-36
1.6.1	Requirements of Cables.....	1-37
1.6.1(A)	Construction of Cables	1-37
1.6.1.1	Cable Conductor - Insulation Materials	1-38
1.6.1.2	Classification of Cables	1-39
1.7	Molded Case Circuit Breaker (MCCB)	1-39
1.7.1	Earth Leakage Circuit Breaker (ELCB)	1-42
1.7.2	Residual Current Circuit Breaker (RCCB).....	1-44
1.7.3	Tester used in Electric Circuits	1-45
1.7.4	Comparison of MCB with Fuse	1-46
1.7.5	How Electrical Accidents can be avoided ?	1-46
1.7.6	Safety Signs and Symbols Used in Industries	1-47
1.7.7	Design, Estimation and Costing of Earthing Pit, and Earthing Connection for Electrical m/c Lab, HT Substations.....	1-49
1.7.8	Earthing for Small Capacity Equipments	1-54
1.7.9	Advantages of using MCB's over Kit-Kat Fuse Units .	1-55
1.8	Exam Pack (Review Questions)	1-55
1.9	MSBTE Question and Answers	1-56

Unit II

Chapter 2 : Conductors and Electromagnetic Materials 2-1 to 2-26

Syllabus : Properties of conducting materials : Electrical, Mechanical and thermal properties of conducting materials.

Conducting materials and their applications : Copper, aluminium, tungsten, brass, bronze, mercury, silver, lead, nickel and tin.

Types of magnetic materials : Ferromagnetic, paramagnetic and diamagnetic materials.

Properties and applications of magnetic materials : Magnetization curve, hysteresis, hysteresis loss, magnetostriction materials, C.R.G.O. silicon Steel, H.R.G.O. silicon steel, typical hysteresis loops for different ferromagnetic materials (hard steel, wrought iron and alloyed steel), Loss of magnetism.

2.1	Classification of Electrical Materials	2-1	2.6	Amorphous Metal	2-19
2.2	Conducting Materials	2-2	2.6.1	Crystalline Structures of Alloy Metal and Amorphous Metal	2-19
2.2.1	Properties Expected for Conducting Materials	2-2	2.6.2	Preparing an Amorphous Material	2-19
2.3	Conducting Materials and their Applications	2-3	2.6.3	Examples of Amorphous Materials	2-20
2.3.1	Classification of Conductors according to Conductivity	2-3	2.6.4	Magnetisation Curve	2-20
2.3.2	Different Conducting Materials	2-3	2.6.4.1	Magnetic Hysteresis	2-20
2.3.2.1	Copper	2-4	2.6.4.2	Hysteresis Loop for Different Materials	2-21
2.3.2.2	Aluminium	2-5	2.6.5	Magneto Striction	2-22
2.3.2.3	Silver	2-6	2.6.6	Effect of addition of other Metals in Ferromagnetic Materials	2-23
2.3.2.4	Steel	2-6	2.7	Some important Magnetic Materials used in Electric Fields	2-23
2.3.2.5	Brass	2-6	2.7.1	Silicon Steel	2-23
2.3.2.6	Bronze	2-7	2.7.2	Permalloy	2-24
2.3.2.7	Tungsten	2-7	2.7.3	Cobalt Steel	2-24
2.3.2.8	Mercury (Hg)	2-8	2.7.4	Chromium Steel	2-24
2.3.2.9	Lead	2-8	2.7.5	Alnico	2-24
2.3.2.10	Nickel	2-9	2.8	Exam Pack (Review Questions)	2-25
2.3.2.11	Tin	2-9	2.9	MSBTE Question and Answers	2-26
2.3.3	Comparison of Copper and Aluminium as Conductor	2-10	Unit III		
2.3.4	Types of Conductors according to shape of conductor	2-10	Chapter 3 : Electric Insulating Materials 3-1 to 3-29		
2.3.5	Introduction	2-11	Syllabus : Significance and properties of electrical insulating materials : electrical, mechanical and thermal properties. Thermal classification of insulators, classes of insulators. Dielectric failure of insulating materials. (Gaseous, Liquid and Solid state) Applications of insulating materials in electrical machines and devices.		
2.3.6	Magnetic Properties of Materials	2-11	3.1	Introduction	3-1
2.3.7	Classification of Magnetic Materials	2-12	3.2	Properties of Insulating Materials	3-1
2.3.7.1	Paramagnetic Materials	2-12	3.2.1	Electrical properties	3-2
2.3.7.2	Diamagnetic Materials	2-13	3.2.2	Mechanical Properties	3-3
2.3.7.3	Ferromagnetic Materials	2-13	3.2.3	Thermal Properties	3-3
2.3.7.4	Arrangements of Dipoles in Different Materials	2-15	3.2.4	Chemical properties	3-3
2.3.8	Comparison of Paramagnetic, Diamagnetic, Ferromagnetic Materials	2-15	3.3	Classification of Insulating Materials	3-4
2.3.9	Magnetically Soft and Hard Materials	2-16	3.3.1	Insulating materials according to Thermal (temperatures) With-Standing Capacity	3-4
2.3.9.1	Magnetically Soft Materials	2-16			
2.3.9.2	Magnetically Hard Materials	2-17			
2.3.10	About Antiferro Materials	2-17			
2.3.10.1	Super Paramagnetic Materials	2-17			
2.4	Types of Magnetic Materials, their Susceptibility and Examples	2-18			
2.5	C.R.G.O. Sheets	2-18			
2.5.1	H.R.G.O	2-19
